COLQUHOUN'S
Scotch Tweeds & Knitting Yarns.

To the Public.

Scotch Tweeds mean value, and Colquhoun's Ladies and Gentlemen's Scotch Tweeds, Knitting Yarns, Blankets, &c., mean perfection of value. Their wear is magnificent. All goods are made to my own Mills under my own supervision, and nothing is sold as wool that is not pure wool. Any length at Mill price and carriage paid. Self-measurement forms sent, and Suits made up if desired.
400 Patterns, post free. Write for them.

To Wool Growers.

What do you do with your wool? Do you make the most of it? One thing is quite certain. You cannot do better than send it to my Mills and have it made into woollen cloth, blankets, or other goods. I have 400 patterns to select from, and pay carriage on wool sent to me for manufacture. Write for booklet, which tells you all you want to know, and receive patterns, so that you may say what you want made and the patterns you prefer.

FOR FINE HEALTHY CALVES USE

VESTA CREAM MEAL

This, our latest Calf Meal, has been specially made for use with either Skim or Separated Milk, and after the first few days can be used alone.

It is very nutritious, easily digested, prevents scour, and imparts a beautiful sleek skin.

It is one of the richest milk substitutes obtainable, and fine healthy thriving calves are reared on it by the leading breeders of cattle.

It is therefore a *perfect milk substitute.*

T. GITTINS, Esq., Wrentnall Farm, Shrewsbury, says

"I am more than pleased with your Calf Meal, I consider it excellent in every way"

15s. per cwt. Carriage Paid to Nearest Station.

LIVERPOOL VESTA CAKE CO.

Blackstock Street, LIVERPOOL

THREE UNRIVALLED CALF MEALS

THE LANCASTER CALF FOOD

13/- per cwt., or in 4 cwt. lots 12/3 per cwt.

This Meal does not swell out so far as the "Milk Equivalent," but is much easier to prepare, and is recommended to those who do not personally see to proper preparation.

BIBBY'S MILK EQUIVALENT

12/6 per cwt., or in 5 cwt. lots 12/- per cwt.

This Meal swells out splendidly, but needs careful preparation. It is, however, a first-class Meal, and probably the most economic in use of all the Calf Meals in the Market.

BIBBY'S CREAM EQUIVALENT

The most popular Calf Food ever produced, 15/- per cwt.

Is the latest and most popular of our foods; **we believe it is the nearest approach to the ideal that has yet been reached in preparations of this kind.**

CARRIAGE PAID to BUYER'S NEAREST STATION.

THE ROYAL SHOW—AND AFTER.

Visitors to Park Royal last week may have been assisting at what will prove to be the last of the shows of the Royal Agricultural Society held in the permanent showyard between Willesden and Ealing. The result of the show has been a sad blow to the optimistic feelings that reigned in some quarters that the fixture that has just come to a conclusion would show that the tide was on the turn, and that better times were in store.

The gate has been a deplorable failure, only 23,913 people paid for admission, and last year the loss to the Society on the show was nearly £7,000, when the number of persons admitted amounted to 52,030, a considerable number of them, it may be added, at 5s. per head. Therefore, the loss on the 1905 show is bound to be commensurately greater. It is impossible to say yet what the amount will be, but probably £10,000 would not be an extravagant figure.

It is difficult to forecast what the new Council, which comes into power on August 1 next, will decide to do, but one thing is perfectly certain, and that is that great changes will have to be made if the show is to be placed upon a financially sound basis. At the annual meeting on Wednesday it was very evident that the President (Lord Middleton) spoke somewhat despondingly of the future prospects of the Society.

Varied opinions are to be expected among such a large number of members of the Society, coming as they do from different parts of the country. It is difficult, therefore, to form an accurate idea as to the real views held at large, but as far as our experience went, there seemed to be a feeling in favour of the reversion to the migratory system. This tendency to go back to the old arrangements is a very strong one in the minds of many of the supporters of the Society, but nevertheless, they should seriously consider whether a simple return to the conditions of a few years ago will solve the difficulty, and whether the alternative solutions of curtailment of the showyard and rigidly cutting down expenses in various directions would not be advisable.

It is with a feeling of sadness that we record the evil times upon which the Royal Agricultural Society have fallen, and we can only hope that the new Council which will soon take office will remedy affairs. It would be a disaster of unparalleled severity if the Royal Show was allowed to drop.

Seasonable Topics.

As a rule, the cutting of the clover marks the advent of the haymaking season, and during the past few weeks we have witnessed operations amongst the above crop in various places. On the whole, there is, perhaps, a fair average of clover, but the farmers who pastured it late have to be contented with light crops, as the rains in May were too few and far between to set the grass going. We fail to see any wisdom in leaving the cutting of clover till late, because if rain comes after it is removed, a good start is given for a second crop. This can, of course, be made into hay, which is always useful, if only for topping up ricks, or it may be mown green for the horses or horned stock. The farmer, by the way, who has lambs which need a little juicy food at the end of the summer will do well to make provision for a second crop of clover, as nothing is more valuable for lambs at that period. Further, a good cut of clover in September is an extremely useful commodity if the summer happens to be dry and pastures are bare.

Points about Clover.

❦ ❦ ❦

It is curious to observe what a tremendous lot parliamentary candidates belonging to both parties intend to do for agriculture, just when a General Election is pending, and how very few of the proposals are really carried out when the political fight is over and the successful candidate is safe in his seat. Amongst the topics now under discussion in agricultural politics, that of tenure is most important. As a matter of fact, the farmer is not satisfied with the present system, which certainly does not afford him sufficient security. It is not easy to find an excuse for a landlord getting rid of a good tenant, yet such things do occur, and when a man has farmed well and has improved his holding, it is absolutely unfair that he should be called upon to quit on a short notice, without having the right of appeal to a court of arbitration or something of the kind. Of course, the farmer can obtain some compensation under the above circumstances, but not sufficient to repay him just at the time when he has pulled a place round and is just commencing to reap some material profit from his labour. Particularly in the neighbourhood of towns do farmers need greater security of tenure, because if a landlord wishes to dispose of his land by sale or lease for building purposes, he gets good value for it, while the tenant farmer receives the usual notice to quit, but without being entitled to compensation in proportion to the loss and inconvenience. Of course, there are two sides to the question, and whatever is done to give the tenant more security of tenure, which is certainly needed, landlords must also be protected against bad farmers. How much a landlord may stand to lose through having a bad tenant is a matter which he can only learn by experience, but the chances of getting compensation from a man who has nothing is somewhat parallel to the drawing of blood out of a stone. In view of the two distinct sides to the question, it is obvious that any reform in land tenure should be of a character that mutually protects both parties.

The Question of Tenure.

❦ ❦ ❦

It may have come within the notice of some of our readers what a tremendous thirst comes over the British labourer at hay harvest time. Not that haymaking is a more laborious task than some other operations on the farm, but by right of custom it is an "allowance job," and the labourer is not the man to let old customs die out in this respect. Just exactly what shall be consumed in the way of liquid refreshment during harvest time is largely a question of local custom, but the labourer must have a big drink of some kind. Many brewers cater for the demand by supplying a liquor known as harvest beer, which, perhaps fortunately, is not famous for its strength, and just exactly how much malt and hops are used in its manufacture is happily a matter that the consumer does not inquire into. In the West of England cider is the recognised harvest drink, and the labourer regales himself with the juice of the apple, plus varying proportions of water, first, according to the strength of the cider to begin with or the quantity of apples there may be for grinding up. Trifles about quality do not worry the labourer at harvest time. He takes a big drink, sweats it out of himself, and is ready for another. Could he work as well on anything else besides beer or cider? Perhaps if you asked him he would reply in the negative, but this is largely a matter of opinion. The writer was once connected with an establishment where beer was stopped one harvest time and extra money was paid instead, yet it was curious to observe that very little of the latter was spent in beer. Lemonade, meal and water, and tea, both hot and cold, were drunk by the haymakers, but far less beer was consumed than in any previous season. Indeed, it was observed that the thirst was not nearly so great as when beer was provided ad lib. Evidently the men preferred the money.

Harvest Thirst.

❦ ❦ ❦

In modern agriculture we are not quite sure whether there is so much of that help one another feeling which used to be so general amongst the members of the agricultural fraternity in the old days. We do not think people are necessarily more selfish, but the struggle for individual existence is so keen that men have little time to consider the wants of their neighbours. Still there are times, particularly during harvest, when one man may lend a hand to another without being in any way the loser, and this neighbourly spirit cannot fail to establish a feeling of good fellowship between men whose interests are mutual. We confess to a spirit of sympathy with the little men, the small holders, who are struggling without much capital to make their little places show a profit. Hay harvest is a serious time for the man with a few acres and a cow, and much depends on getting the crop in well. He cannot afford to pay much out in labour, and it is a real help to a man of this class if a neighbouring farmer sees well to send a machine and pair of horses to knock off his bit of grass for him. It must be said that we find more sentiment amongst the agricultural fraternity than in most other walks of life, and it would be unfortunate if that spirit of neighbourliness, which has been characteristic of farmers for generations past, should become extinct.

Lending a Hand.

❦ ❦ ❦

We are much interested in a remark by a correspondent in the last issue to the effect that he soaked the seed of his swede turnips in turpentine and not a flea came near them. We hope that some of our readers will accept the invitation of our correspondent and give their experience of the remedy, which is by no means new, as it was given to us in the first place some years ago as a quiet tip by a cottage gardener, who always succeeded in getting good turnips when the flea devoured those belonging to his neighbours. We tried the remedy on a small scale, and, like our correspondent, we found it answer; but we should like to hear the views of others on the matter. Everyone knows what a source of trouble the flea is to turnip growers, and if it can be checked by such a simple remedy as soaking the seed in turpentine the information ought to be widespread. At the same time, any experiment with turpentine should be conducted quite fairly. We know that when a good seed-bed is prepared and the weather is warm and showery turnips will grow away freely and flea does not injure, and in such cases it would be unfair to attribute the non-attack to turpentine. On the other hand, when seedling turnips are endeavouring to struggle to maturity on a parched soil and under burning sunshine the flea does its worst, and to see the rows disappearing like magic is disappointing, to say the least of it. Will soaking the seed in turpentine keep flea at bay under these circumstances? We should like to hear the experiences of all who have tried it.

Turpentine and Turnip Flea.

❦ ❦ ❦

We have heard a good deal of late about the prospects of the apple crop being affected by blight; but blight is a comprehensive term, and is applied to insect pests of various descriptions. As a matter of fact, the pest, which has played considerable havoc amongst apples this season, is the apple sucker (Psylla mali), which resembles an Aphis, and is frequently confounded with the latter pest. The dry weather throughout the month of May was just to the liking of the apple sucker, as the insects and the sticky honeydew which they exude, instead of being washed out by rain, remained in the trusses of buds. The insect in question is correctly named, as its depredations consist of sucking the juices out of the infant fruits, with the result that they shrivel up and fall off. There is only one way of dealing with the apple sucker, namely, spraying, and a useful wash is recommended by the Board of Agriculture. It consists of 6 lb. soft soap dissolved in 100 gallons of water, with the bitter extract of 8 lb. of quassia chips to the above. The trees should be sprayed as soon as the pest is observed in the fruit trusses, and if the insecticide is applied lukewarm it is all the more effective.

The Apple Sucker.

87814

By a Lobbyist.

The report of the Departmental Committee on Market Gardens is significant by reason of the fact that it undeniably provides evidence of the growth of opinion in reference to matters of agrarian economy. Mr. Ailwyn Fellowes has not echoed the very determined sentiments which possess his predecessor, the Earl of Onslow in regard to Governmental action and aid. Lord Onslow would have the Board of Agriculture in matters in which financial aid is of the utmost moment, matters like the creation of a co-operative system of distribution, play the part of the sympathetic observer who is lavish with encouraging phrases, rather than of the paterfamilian associate who does not mind occasionally opening his purse. The present report shows plainly that there is a growing conviction that after all gracious words do not butter parsnips. The demands for the establishment of an experimental fruit farm, for the teaching of horticulture in elementary schools, and for the creation of a bettered system of distribution, even to the coercion of railway authorities, are all indications of the trend of agrarian opinion. Even the apathetic agrarian world moves; even the market gardeners can be selfish enough to seek their own interest. And what the market-gardeners demand to-day will be demanded by the general body of farmers to-morrow.

• • •

Of course, the moment of the proposals of the Committee—on which, mind you, the conservative element in our economy and politics was largely represented—lies in the suggestions it makes concerning tenure and compensation. The advice that valuers should be appointed for the purpose of estimating and assessing the amount of compensation to be paid the outgoing tenant under the Agricultural Holdings Act on the basis of the value to the incoming tenant would, half a score years ago, have been thought to be revolutionary to the extent of sans-culottism. It would have been declared against with reverberating vehemence, whereas now it is regarded as as a mere prosaic necessity it were foolish to resist. The suggestion that the State should have power to lend money to landowners having fruit on their estates for the purpose of supplying the ready money for the payment of compensation on the determination of a tenancy is a little remarkable because of the specific selection of the landlord for the financial assistance. The landlord should, of course, be assisted should he need it and desire to compensate; but why should not the State assistance be also extended to an incoming tenant able to give adequate security? However, there need be no cavilling with the report. It means, I apprehend, that what we know as the Evesham custom will in the end be embodied in a formal enactment, and the tenant have the right to sell his improvements to the highest bidder (who may, of course, be the landlord), provided he be accepted as a tenant.

• • •

The report of this Committee is a justification of every position the MARK LANE EXPRESS has adopted. It is a justification not merely of the men whose heart refuses to be chilled by the suggestion of State aid in fostering agricultural prosperity and convenience, but also of those who demand that tenure-law should more definitely recognise the rights and interests of the tenant, and be able to defend him against possible cupidity and caprice. Believe me, the agricultural reformer is at last abroad. It is astonishing in what avenues you now find him—avenues from which he was once relentlessly banished. This report of the Market Gardeners' Committee means a distinct step forward.

• • •

Whatever character the movement may take whose purpose is the development of inland waterways—whether it be a definite agitation in favour of nationalisation or not—a practical importance should be associated with the demand that the principle of one gauge must be adopted. I am glad to see that so keen-eyed a man as Sir John Brunner, who is a pioneer in the matter, lays this down as a primal necessity of any scheme. Without this principle being adopted, it would be hopeless to anticipate success. Continuity of traffic, safety of traffic, speed, and economy all depend upon the acceptance of the principle. The politicians whom I have spoken to on the subject do not, I regret, quite appreciate the significance of the matter. They, of course, all the same, regard the apathy which has resulted in our great natural and artificial waterways being rendered derelict as a sin and a stupidity. It thus must be for those interests like agriculture which will use the canals—which should be a chief influence in relieving British industry of the present extravagant cost of carriage—to so instruct the Parliamentary mind that the newly begotten enthusiasm may be characterised by intelligence. I see that Sir John Brunner provides in his new Bill for the Board of Agriculture having the same authority on the trust which will be empowered to acquire and control the canals as the Treasury and the Board of Trade. Agriculture must raise the prefatory demand—one gauge for all canals.

• • •

The Bill to amend the Motor-Car Act by which Mr. Soares, M.P., would confer on magistrates the power to imprison owners or drivers for a first offence, is not of so much significance as is the evidence which the introduction of the Bill has provided of the temper of the House of Commons. I will not say the House is anti-motoristic in its sympathies; I will say that it does not intend to be a party to penalising the community in the interest of a selfish and wealthy class who have, as a sequel to the undue privileges they have been allowed on the King's highway, developed an arrogance of demand that would deprive the ordinary citizen of almost all roadway rights. The majority with which the House rebuked the attempt to obstruct the introduction of this Bill—and, in the current phrase of the "oi polloi," "a majority of 164 is enough to go on with"—is a reflection of the resolve of Parliament to rebuke this demand, and to restore to ordinary humanity its rights and privileges. My object in emphasising this is to seek to induce the varied interests affected, and in particular the urban interests, to discipline the movement with a view to making motorists bear their fair share of the increased cost of the maintenance of roads. If a little of the energy at this moment expended in vituperating the motorist were diverted to the practical channel of organisation, the result would be, if not quite so entertaining, at least much more profitable.

• • •

We are a long way off the nationalisation of the cost of the maintenance of main roads. How, then, can the motorists—the scurrying gentlemen who hail from Throgmorton Street and Houndsditch—be made to bear the cost of repairing the local roads they tear and rip and remedy the discomfort and damage caused by their hideous, stifling, corroding dust? We do not want an anti-motor agitation. Motors are now an integral part of our domestic life. We do want an effort whose purpose shall be to throw upon motorists that responsibility and expense they now jauntily call upon local areas to meet in order that they may generally play the nuisance. I have, of course, heard of organisations being called into existence for this purpose. What have they accomplished? Are they still in active operation? If they neglect the opportunity provided by the present Parliamentary temper, they will be guilty of a recreance to their own ambition. The motorist must not only be regulated, but must pay for his luxury. This is a dictum to which Parliament would readily subscribe. But how? These organisations should indicate to Parliamentarians the method to be pursued.

• • •

Mr. Lancelot Saunderson is a King's Counsel, and the Conservative candidate for Carlisle. In the coming days, when pressure will be sought to be placed on railway companies to reduce their railway rates, we must not expect much help from him. He believes in the operation of the holy law of competition, without comprehending that in this case competition is practically non-existent. "I should have thought," said he, in reply to an interrogation, "there was enough competition to ensure that railway rates are cut down to a reasonable sum." Well, Mr. Lancelot Saunderson, K.C., think again! If this is your only excuse for respecting State interference in the interest of British trade and agriculture, abandon it. Better far adopt the rigid position that the State—whose legislative act is the authority for running the railway—has no more right to insist upon a moderate cost of carriage than it has upon the moderate cost of butter! This is at least a logical, if mistaken, position. The other attitude is a distortion of fact and of experience.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended June 24th, 1905, together with the quantities imported in the corresponding week of the previous year:—

	1904.	1905.		1904.	1905.
	No.	No.		Cwt.	Cwt.
Cattle ...	13,645	8,516	Wheat ...	2,112,100	1,693,800

Spalding June Cattle Fair, held on Tuesday, was largely attended, and there was a large show of horned stock. Some of the best beasts made up to £24, and others £20 to £22. There was an unusually large show of stores. Young cattle, £8 to £12; two-year-old beasts, £12 to £15; and three-year-olds, £15 to £19. Milking cows were in demand, and fetched up to £20 and £22. In the sheep market there was a brisk trade, yearlings making 55s. each. A few horses were on offer, but only those of the best description were inquired for.

Potato Disease in Cheshire.—A mysterious and destructive disease has broken out among the new potatoes in Cheshire, where they are most extensively grown. The disease attacks the stalk close to the root, and rots it completely through, and at the same time kills the young potatoes. In an advanced stage of the disease, the tubers become dry and almost powdery.

Attendance at the Royal Show.

SIR,—With regard to the poor attendance at "Park Royal," exhibitors have complained ever since the Society has held its shows at Park Royal that the shows are not sufficiently advertised, and I would suggest, if another show is held, that posters be sent to every member for distribution to every farmer of standing in his district, and for placing at the railway stations also. Sandwich men, in and around London, is a capital idea, but it must be carried out on a larger scale. It might also be of advantage to charge a higher price for admission on the last day than on the other days, so as to induce visitors to attend to save the higher entrance fee.

I have had a good deal of experience at shows, and know that when the old attractions fall off new ones must be found. Everyone should know the theory of agriculture, its necessity and usefulness, particularly in time of a great European war with us. Rome lost the art, and failed. She fell, never to rise again. Let England beware.—I am, etc.,

J. THORNTON.

Turnham Green, London, W., June 28.

S. Devons at Nottingham.

SIR,—The letter by "Writer of the Report" in your paper of June 19 quite confirms my former impression that his information was obtained from a prejudiced source, and it would have been more in accord with your usual discretion had he exercised reasonable care in gleaning his information, instead of condemning the judge, "or I may say judges," whose awards in the old bull class S. Devon breeders well-nigh unanimously approve.

Had Good Gift been successfully exhibited as a two-y ar-old I should not have been anxious to procure him to compete in the old class, as it is a well-known fact that such animals do not attain the size so much in request by S. Devon breeders, and when five or six years old are rarely if ever winners. Shorthorn, Hereford, and North Devon breeders may prefer a smaller type and different standard of excellence, but we prefer a large, good animal to a smaller specimen with the same qualifications; and, with all respect to the standard adopted by other breeds, S. Devon judges are quite competent to fix their own

I should have been delighted, "had he been eligible," to send Good Gift to the Royal, and am quite confident that the third judge would have endorsed the awards of his predecessors.

Your reporter should know, if he does not, that Good Gift is not eligible at the Royal, having been calved previous to 1901.—I am, sir, yours faithfully,

W. J. CROSSING.

South Devons at Nottingham.

SIR,—I am sorry to again intrude on your space, but I feel that I owe your correspondent an apology for having accused him of obtaining his information from a defeated exhibitor, and I much regret having made such an inference; but permit me to say, however, that in so doing I was actuated by the kindest motives, as I did not wish to totally attribute such an erratic report to the writer's ignorance of the breed; but this, I find, from his further remarks, is what I ought to have done, as his latest attempt to describe Good Gift is more fatal than the first.

He endeavours to point out that, if I am correct, in declaring his loins to be perfect, the fault must be in the ribs, etc. This, indeed, is a very weak argument. He then goes on to say that his worst defect is want of fulness over the fore ribs and behind shoulders, where, I assert, without fear of contradiction from any practical judge, he is exceptionally good, far excelling any of his competitors.

I have yet to learn that a very arched rib is a necessary qualification for a prize winner; what is far more essential is depth in the sides, uniformity of flesh and general character, all of which Good Gift possesses.

Your reporter adds in his postscript that Good Gift was sent out of the ring at Totnes in 1904 unnoticed; but that fact, surely, should not deprive him from his well earned honours in 1905. My experience has been that those animals which are placed in the prize list when yearlings and two-year olds seldom win later in life; and I venture to think that Mr. Wroth's Star Duke might have developed into a larger beast had he not been brought to such early maturity.

I have the highest opinion of my opponent's literary ability, in which, no doubt, he is a past master; but he must pardon me for saying that he has yet to gain much practical knowledge before he can attempt to correctly criticise the merits and faults of South Devons

I have no desire to prolong this controversy, and am willing to leave the verdict with your readers. Again thanking you for the impartial publicity you have given to the respective letters.—I remain, Sir, yours faithfully,

June 15, 1904. J. STRANGER FORD.

A Long Drought in Munster.

SIR,—From the first week of May to the present time, with the exception of one day's rain, we have had one long, continual drought, with the usual result that the crops are completely stunted, or in many cases entirely destroyed. Grass on the pastures is very poor, and the supply of milk is decreasing, and store stock, instead of improving, are barely holding their own.

The seed meadows are now being cut, and show very poor returns; the other hay crops will not be cut for some time, but no amount of rain can possibly work any improvement, as the late growth is scarcely noticed when saved, and can add little to the general bulk.

Green crops, too, are a failure; in many cases the mangels never sprouted, and the ground has been, in most cases, resown with turnips. These latter are doing fairly well, and if they get moisture to pu\ them beyond the ravages of the fly, may yet make a fair crop.

The apple crop shows no prospect of any return. Strawberries and gooseberries were fairly successful, but prices were low. Wheat looks well, and promises to be the best crop of the season; as for the oats, they cannot possibly amount to anything either in straw or grain; barley also will be a poor crop. Potatoes are doing well, and if the blight does not put in an early appearance will make good returns. Wool paid a good price this season, having paid 13d. per lb., a price which has not been seen for a quarter of a century.

Cattle, considering the season, are doing well, but prices have dropped, and very poor payment for summer grazing appears in view.

Sheep are doing better, and prices are not so bad, and, with the help from the rise in wool, ought to leave some profit.

Pork is paying a good price now, but the bulk of the farmers feed no pigs at this season of the year.

On the whole, I am afraid this year must be considered an unprofitable year from a farmer's point of view. P. FROST.

June 27, 1905.

Drought in Durham.

SIR,—The long-continued drought has become somewhat serious. Prospects for hay are poor, more particularly old land, which cannot now be other than a very light crop. Pastures, too, are very bare. Turnips, except on the very best land, have not germinated, and where resown are sadly in need of rain.

Wheat, however, still looks promising. Barley fairly so; but oats are very short, and, in some districts, going back. Potatoes, on the other hand, hold their own. Cattle markets are very quiet, and prices generally easier.

E. AND F. R.

June 28, 1905.

Good Prospects in Cambridgeshire

SIR,—The prospects at the present time are very good, the rains of the last few weeks have brought on the crops of corn and hay almost beyond recognition, with the exception of some of the gravelly land; the hay and clover crop is a good one. I should say an average one. Corn looks very healthy, and stands up strong; has put forth a good ear, and looks like yielding. Roots are grand, especially wurzels and potatoes. I think the prospect much better than the last two years. Stock healthy and doing well.

A. W. R.

June 28, 1905.

Outlook in South-West Kent.

SIR, Haymaking has been in progress in this district fully a fortnight, and the fine dry weather that followed the heavy rains in the early part of the month has enabled a large breadth to be got up in fine condition. The crop is not a heavy one, but, except on poor dry soils, it has proved beyond expectation, and, speaking generally, may be described as fair, though far below the abundant crop of last year. There is a good deal of old hay in stack yet, so there need be no fear of a scarcity.

To-day (Thursday, 29th) there has been a nice steady rain for several hours, which will be of immense benefit to all growing crops, which may be expected to make rapid progress under the influence of the warm atmosphere now prevailing.

Hops have grown very quickly during the past week, or two, and, notwithstanding reports of fly in many places, are generally looking healthy and strong. Indeed, some growers consider the bine too strong to hold out hopes of a plentiful yield, but it is yet too early to speak confidently.

All kinds of fruit are deficient, and of nothing (except perhaps raspberries and gooseberries) can we expect more than half a crop of some kinds considerably less. Pears will be very scarce, and for apples the prospect is by no means good. On the whole it looks like a bad season for fruit-growers; but for ordinary farm crops the outlook is better than last year.

Hay Crop in Somerset.

SIR,—With the exception of a thunder shower the weather during the past week was favourable for haymaking, and many stacks of hay have been secured in good condition. This being a dairy farming district but little hay is secured, but from the pasture land and the occupiers of the land often allow their cattle to graze on the land considerably longer than it is safe to do in such a season as we are now passing through, and those who adopt that system now find after the cold dry spring we have recently experienced that the crop of hay is a light one.

The little corn grown here is short in straw, but yet sufficient for a good crop of grain. Grass in the pastures is not abundant, but yet sufficient for the requirements of the live stock.

Cattle and sheep are doing well, but the milk from the dairy herds has not continued to flow so freely as usual.

Many plots of potatoes were cut by the frost, consequently the sample grown from such will not be so good, more small tubers being present.

Apples and other fruit on the trees also suffered considerably from the cold nights, and will not be good crops.—Yours, etc.,

CHEDDAR.

June 30, 1905.

Fair Hay Crop in East Suffolk.

SIR,—We have had plenty of rain in this district lately, and there will be a fair hay crop after all. Clovers as a rule are not good; very patchy, and little growth, due to foreign seed, perhaps.

Corn looks well on good farmed land; winter beans and early barleys especially. Oats are short in the straw, and can hardly be a heavy crop. Some good pieces of early-sown mangel about; but many are a poor plant, and grow slowly.

I do not find, as your Gloucester correspondent does, that soaking swede seed in turpentine is effectual in keeping the fly off. It is a pity they do not attack the thistles, there would be plenty of feed for them this year. H. P. T.

June 30, 1905.

Telegrams at the Royal Show.

SIR,—As showing the total lack of administrative grip, let me add a word to what others have recently written regarding this Society.

I am a member, and visit the Show year by year. Being a commercial man, and having connections all over the kingdom, I notified by business friends that telegrams could be sent to me at the Show-yard addressed on the lines laid down in the Society's programme, page 12:—

> Members of the Society who may desire to receive telegrams without the trouble of going for them to the Post Office are requested to have them specifically addressed to them, care of "Royalagso, London."

Judge of my disgust at getting no messages till nearly six p.m. on the first day of the show, and then only when they had been re-addressed and repeated, the postal authorities having informed senders that "Royalagso" is not now registered.

The loss of money to the senders, in my case, is a bagatelle, but what of the hundreds of other members who had their messages turned back in the same way?

What is annoying is the loss of time and temper through a lack of organisation which would discredit a schoolboy, and would certainly and deservedly ensure the instant dismissal of the official in a commercial establishment if one could be found so grossly negligent as to permit such a blunder to escape his notice. Yours truly,

June 30, 1905. O. P. Q.

Judging the Aberdeen Angus Bulls at Park Royal.

The Royal Society's Show at Park Royal.

The third show of the Royal Agricultural Society to be held on their permanent ground between Willesden and Ealing has resulted in a disaster greater than either of its predecessors. The show of stock, as will be seen from the critical report which follows, was the finest ever got together by the Society, but the attendance of the general public was exceedingly small and disappointing.

The opening day (Tuesday) was favoured with beautiful weather, and although the entrance fee was reduced from 5s. to 2s. 6d. there was nothing like a proportionate increase in the attendance, the total for the day being 2,769. H.R.H. the Prince of Wales visited the yard in the afternoon, journeying from Paddington via the Great Western Railway to Park Royal. He was met at the latter station by the president of the society, Lord Middleton, and the secretary, Sir Ernest Clarke. The Royal visitor reached the show ground a few minutes before three o'clock, and in his carriage were accommodated Lord Middleton, Sir Ernest Clarke, and the Equerry in attendance, Lieutenant Godfrey Faussett, R.N. The Prince was received at the Royal Pavilion by H.R.H. Prince Christian, Sir Walter Gilbey, Bart., Sir John Thorold, Bart., the Earl of Feversham, the Earl of Coventry, Sir Jacob Wilson (honorary director), Mr. P. Crutchley, and the Hon. Cecil Parker. Later the Prince of Wales made a tour of the show, the principal features being pointed out by the honorary director, Sir Jacob Wilson.

Wednesday was another fine day, but the attendance was again disappointing, amounting to only 7,684 persons. His Majesty the King, accompanied by the Queen, drove up to the principal entrance of the exhibition just before three o'clock, and they received an enthusiastic reception. Prince Christian, the Earl of Middleton, Sir Walter Gilbey, Bart., Sir Jacob Wilson (hon. director), Sir Ernest Clarke, and others associated with the Council, received their Majesties. The Royal visitors did the round of the show, inspecting the live-stock very closely, and conversing with several of the better known breeders quite freely. They afterwards proceeded to the Royal box in the grand stand and witnessed the judging of one of the ornamental competitions.

Thursday was a most dull and depressing day, rain setting in about noon and continuing almost incessantly until the show closed, its effect is reflected in the number of visitors, which was only 7,706. The Society's chief guests were the Prince and Princess Arisugawa, who arrived at the ground with their suite in three Royal carriages about four o'clock. They were received by the president, Lord Middleton, and the Council, and with Sir Jacob Wilson riding at their head, were conducted to the Royal stands, from which they watched the tour in hand competition in progress. They also subsequently completed a tour of the ground, and though rain was falling during the whole of the time, they frequently left their carriage to more closely inspect the stands, and expressed themselves extremely pleased with what they saw.

Friday began most depressingly, but a later on the weather improved, but the show ground throughout the day had a most deserted and dreary look, the 5,705 visitors making no impression in such a large area.

The following table gives the attendances during each day, and also the figures of the four previous meetings. :—

	London. 1905.	Lond'n. 1904.	Lond'n. 1903.	Carlisle. 1902.	Cardiff. 1901.
First Day	2,769	2,021	2,685	2,321	2,155
Second Day	7,684	9,375	12,057	7,550	23,745
Third Day	7,754	10,912	11,463	15,398	25,033
Fourth Day	5,706	11,175	20,569	46,292	69,133
Fifth Day	—	16,417	18,299	19,304	46,327
Total	23,913	52,930	65,913	*33,387	167,123

* The total at Carlisle includes 2,672 admissions to the Implement Yard only.

The financial result is most distressing, last year the loss was £6,920, in 1903 £9,681, and at Carlisle in 1902 £2,898. In the light of these figures, therefore, the deficit on last week's exhibition cannot be far short of, if it does not actually exceed £10,000. The gate-money is shown approximately in the table below :—

Tuesday	...	2,769 visitors at 2s. 6d.	=	£346 2 6
Wednesday	...	7,684 visitors at 2s. 6d.	=	£960 10 0
Thursday	...	3,457 visitors at 2s. 6d.	=	£432 2 6
Thursday	...	4,297 visitors at 1s. 0d.	=	£214 17 0
Friday	...	5,706 visitors at 1s. 0d.	=	£285 6 0
Total	...	23,913 visitors	..	= £2,238 18 0

Various opinions are rife as to what this crowning disaster will lead to, and in the course of an interview Sir Jacob Wilson, the honorary director of the show, expressed the opinion that the old plan of "travelling" the annual show might be profitably revived, Park Royal having its turn once in three years, and various large provincial centres taking the two others. The Council will have to consider very earnestly whether in this way they could not rely upon tapping a fresh local public in each of the two years, while at the triennial intervals Cockney curiosity might be stimulated. On Friday, Sir Jacob, we may add, received many cordial congratulations on the honour bestowed upon him by the King in making him a Knight Commander of the Victorian Order—a fitting recognition of Sir Jacob's eminent services to agriculture and the Royal Agricultural Society.

The entries in the various sections are shown in the appended statement :

Entries of Live Stock, Poultry & Produce.

Exclusive of Draught Horses and the Harness Classes.

Horses.

The equine section as a whole was not at all well filled, several of the classes, particularly in the light-horse division, and also in the Clydesdale and Suffolk portion of the heavy horses. Shires, though not as liberally represented as at many district shows in the Midlands, were decidedly the best and most attractive classes. There are many reasons nowadays that have tended to influence the exhibition of horses at these large summer shows. In the first place, the season of the year is not suitable for stallions, and, likewise, brood mares and foals cannot be kept in close boxes for a week together without considerable risk. Then there is the further fact that horses can go and win prizes at two or three local shows at less cost than the one Royal and in the same time. Last of all, there is the very all-important reason that the three leading English breeds all hold their own shows in the spring of the year, when the honours of winning are much greater than even at the Royal, owing to the very keen competition. With all these things taken into consideration, it is quite probable that we shall never see such large displays of horses at these great summer shows, as were seen in the days gone by, before the breed societies had become so firmly rooted in the Agricultural Hall.

Hunters.

The catalogue of the Royal always gives precedence to the hunter breed, which is seldom very numerous at English shows during the summer. This year the quality was generally very creditable, and several really first-class horses were shown in this section. Hunter mares with foal at foot came first, and in these Mr. F B. Wilkinson's Glasspore, a daughter of Glasshampton, that has been winning upon several occasions lately, and a mare of very nice brood character, took the first prize over Sir Walter Gilbey's well-known mare The Witch, of unknown breeding, but one of the hardest nuts to crack in this section. Lord Middleton's Mercy, well moulded upon hunter lines, with quality, and sired by Red Eagle, took the first honour in the three-year-old filly class—a rather small one, the second place being taken by Mr. F. B. Wilkinson's The Duchess by Florismart, a filly likely to maintain the standard of hunter mares in the future.

Two-year-old fillies, like the previous class, were not numerous, the prizes going to Mr. C. Kelway-Bamber's Columbine, by Pantomime, who looks like getting into a weight-carrier, and Mr. Mark Burns-Lindow's Sunshine, by Hale, a highly-bred filly of the right type, and full of promise. Yearlings were a kind of rule-of-three business. The first of these was Mr. Nickisson's Success by Enterprise. Messrs. Cheney's Lady Madcap was the other winner; she was got by Field Marshal. Both fillies are of capital breeding and quality. The four-year-old class to be ridden was open to both sexes, and half-a-dozen very useful horses faced the judge. The post of honour in this instance was accorded to Messrs. Cheney's Casual, who has run up to good size, and, with Castlenock blood in her sire's side, is pretty sure to end well. Mr. J. H. Stokes's well-known hunters, Kitchener and Artist, were the next best in the order named. Mares and geldings up to 14 st., and foaled in or before 1900, was the next class, and was not by any means a strong one. Both first and second prizes again went to Mr. J. H. Stokes's stud for the London and Richmond winner, Gold Reef, who was in very good form, and Lady Emily, by Braggadocia, a young mare of fine breeding, and full of quality. In the light-weight class Messrs. Brown's Huntsman, bred in Ireland and well known in the showyards, was placed first. Mr. J. H. Stokes's Rosebud, another hunter-like mare, carrying off the second prize, and Mr. A. Cory Wright's Grandee, who has so often been at the front in the past was given the third place.

Cleveland Bay.

These classes are seldom well filled numerically, even at their own shows, and at the Royal they have always been somewhat smaller. There were, however, a lot of stylish and fine-moving colts and fillies included in the entries, and few horses were more admired by the visitors. In the first class of stallions, Mr. George Scoby's Beadlam Fred, a son of King Fred, a slashing strong colt and great mover, came to the front, followed by Mr. F. H. Stericker's Radium and Mr. John Letts's Rillington Reliance, any of which were quite good enough for a first place. Mares with foal at foot had but four entries. Mr. Wilson Horsfall's beautiful and roomy, broody class Lady Salton, Mr. G. Grandage's Lady Toft, and Mr. F. Bateman's Queen of Beadlam were the winners in the order named. The two entries of fillies foaled in 1902 or 1903 were Mr. George Grandage's Woodland Briar, by King of the East, and Mr. Charles Butter's Cholderton Farndale, bred by Mr. Stephens in the South, a smart filly, were placed in the order written.

Coach Horses.

These horses, a more substantial type of the Clevelands, brought out a few animals with good action and great power, as well as dash and speed about them. The entire colt class two and three-year-olds—drew forth half-a-dozen entries, of2 which Mr. John Letts's Special Delight was the most successful. This well-known and grand colt retains his form well, and should prove a great acquisition as a sire to the coaching breed. He was sired by Speciality. Mr. Bert Kitching's Young Mischief and Mr. F. H. Stericker's Aneroid were the other winners. Brood mares with foal at foot were three in number. Mr. John Webster's Bell of Harum, who stands on short legs and with room and scope about her, was the best of these. Mr. G. Elder's Aislaby Beauty, another rare type of mare to breed from, was placed second, and Mr. F. W. Horsfall's Perseveran e third. Fillies, like the mares, were three in number, and were well-known show frequenters, and always successful at their own shows. The first of them was Mr. G. Grandage's Woodland Beauty, bred by Mr. Silvester Leaf; second, Mr. John Letts's Madeline; and third, Mr. George Grandage's Mayflower.

Hackneys.

This breed made a great deal better display than we have sometimes seen, and there was little in the equine sections that created as great attraction to the visitors. Some very good hackneys, too, were seen in the harness classes. In the breeding classes, stallions, foaled in 1902, were first, and Mr. R. P. Evans's Evanthius and Sir Walter Gilbey's Kirkburn Sensation were placed first and second as named, and the contest for positions must have been very keen. Evanthius, who was later awarded the Hackney Horse Society's gold medal for the best Hackney stallion, made an excellent show when on parade, and he is well built; but with the general public Kirkburn Sensation seemed to be quite as great a favourite. He is a grand type of hackney. The former is by Polonius, the latter by Rosader. Mrs. F. E. Cobran's All Serene, another very nice colt, was third. Two-year-old stallions were a very large entry. Mr. A. A. Haley's Hiawatha, who has been very successful at several shows, and has quality and substance, was first; Sir Walter Gilbey's Dashing Duke second; and Mr. Alfred Benson's Copper Duke third. There were only three yearlings: Sir Walter Gilbey's Bouncing Danegelt, who made a very good show and looks like finishing big; Mr. R. P. Evans's colt by Polonius; and Mr. Alfred Lewis's Heacham Dignity, which were placed for honours in the order named. Mares with foal at foot were also a small entry. Mr W. B. Tubbs's grand mare Rosaform took the first prize and gold medal, and Mr. Walter Briggs's Lady Millie, by Agility, second. Fillies, three years old, were in great evidence. Sir Walter Gilbey's Mitre, Mr. H. Le Marchant's Green Girl, and Mr. Cliff's Crayke Czarina, three fine young mares, carried off the prizes in the order named; and in two-year-old fillies three well-known animals took the money—Mr. R. P. Evans's Pollinaris, Mr. W. R. Lysaght's Wyeland Mary, and Sir Walter Gilbey's Dashing Princess

Ponies.

The show of these was a great attraction so far as it went, but there were very few exhibited. The hackney ponies Pindersfields Horace and Boydie took prizes first and second for Mr. T. Smith and the Rev. George Cruddas; Messrs. Carr and Co., the Duchess of Newcastle, and Mr. J. Marshall Dugdale being successful in the smaller class; and with mares and foals and fillies (the classes very small), Mrs. T. S. Hall, Mr. O. T. Price, Mrs. F. Jagger, Mr. J. Marshall Dugdale, Mr. G. C. Waud, and Mr. Hussey took the prizes in the various classes. The Ladies Hope and Mr. R. W. R. Mackenzie carried off all the prizes in the three classes of Shetlands with marvellous little ponies, the championship going to the ladies for Haldor, Mr. Mackenzie's Gold Flower being reserve. Mountain and moorland ponies had an invincible representative in Mr. Evan Jones's Greylight, who moved beautifully and is an all-round charming pony. Mr. Harry Dyson and the Radnorshire Co., as well as Mr. J. Marshall Dugdale, Mr. Hollingworth, and Mr. Greaves, were also successful in carrying off a share of the prizes. Polo and riding ponies were better represented than several of the other classes of this division, and in one or two instances competition was very keen. The Radnorshire Co.'s Gownboy was in capital form, and secured first and stallion medal. Mr. John Barker carried off no less than six prizes in the section, including the gold medal for the best polo and riding pony mare; and Miss Standish, the Rev. D. B. Montefiore, Colonel E. N. Henriques, and the Earl of Leitrim were the other prize winners, each exhibiting very showy and useful ponies.

Harness Classes.

Amongst the competitors in these classes were quite a number of the leading show animals of the year; several of the recent Richmond winners being well in evidence and taking their accustomed positions, except in one or two cases, where rather important changes have taken place since a year ago. Mr. Inman's Silver Ness beat Miss Ross's Rowton Blackthorn in the 15.2 and upward class; and under that height Mrs. Hartley Batt's Heathfield Squire, who championed the Richmond Show, was first and Mr. Cunard's Wild Lucy second. In ponies, Mr. Cunard's Queen Go-Bang and Miss Clarke's Berkeley Bobbs were first and second as named, these awards being made on the first day of the show. Other noticeable horses and ponies in the honours were Mr. John Kerr's Forest Fireaway, Mr. C. H. Gobd's Lord Pick-'em-Up, and Mr. Walter Lloyd's Moonhill Model.

Shires.

These classes formed one of the features of the show of horses, owing to their improving good quality and the fact that though rather short numerically they were more numerous than any other breed. Stallions foaled in 1902 were eight in number, and a very good level class. Lord Rothschild's Delamere Chorister was placed first and given the gold medal for the best male; a colt with size, good legs and joints as well as weight and quality, he looked well on parade, and so did Mr. Sutton-Nelthorpe's Souldern Scylax, who was placed second, thus losing a place from last year's show. He, too, is still a good colt, and followed the winner very closely, as did also Lord Egerton's Eastoft Royal Lad, who is of more really Shire character than the two previous colts, and would by some have been placed higher. Sir P. A. Muntz had also a weighty good moving colt in Dunsmore Hydrometer, reserved, and a winner of several firsts this season. Lord Rothschild and Mr. Gould were placed first and second in the two-year-old class with Childwick Champion, by Childwick Majestic, and Lymm Champion, by Lymm Lion, respectively. Again the competition was very close, and these two were placed in the same positions at Islington last February. Since then both have improved marvellously, the winner having gained size, and the second colt has finished on beautiful lines, and moves in quite exceptional style; both are also weighty and their quality good. Sir P. A. Muntz was third with one and reserve with another, good colts in this class.

In yearling colts the class was fairly good, but the first and second colts stood out conspicuously from the others, and the first one seemed also to take the lead somewhat readily; this was Mr. Farnsworth's London winner by Lockinge Forest King, who has grown very fast, and as his quality and limbs are good and he moves well he had a right to be thought of first. The second colt is Mr. Leopold Solomon's Norbury Menestral, by Birdsall Menestrial, and a well balanced, weighty, and good quality colt. The next best colts were Mr. Charles Bell's Norley Prince and Mr. Max Michaelis' Redlynch M.P. Mares with foal at foot consisted of four entries, of which Sir E. D. Stern's Ladysmith 2nd may be called an outstanding winner, as she has developed into a very high-class brood mare, her quality, build, and style being as good as could be wished. Lord Egerton provided the second winner in May Flower, a young mare of first-rate stamp to breed from, a wonderful mover and a good breeder evidently. The third mare, Mr. R. W. Hudson's Tatton Tapestry, looked well worth more than the third place; she is very good in quality and shape, and has great scope and room about her. The Duke of Westminster carried off the reserve with The Nun, a mare that was at one time at the head of affairs at many of the leading shows, and is still a specimen for anyone to be proud of. Three-year-old fillies were a very good lot, the leader of these especially so; this was Mr. John Bradley's Halstead Duchess 3rd, a grand filly in shape, quality, weight, and general character and movement; indeed it is not often that a better filly comes out; she was later on reserved for the gold medal. Sir P. A. Muntz's Bonnie Blue and Lord Middleton's Birdsall Coralline, two very correct and fine fillies, were placed second and third, with Mr. W. Greenwell's Hendre Favourite as reserve.

Two-year-old fillies were also very strongly represented, Sir P. A. Muntz's Dunsmore Fuchsia, who championed the London Show, was quite an outstanding mare, and with her weight, quality, and Shire character combined is likely to remain at the head for some time; the gold medal eventually fell to her lot. Mr. Max Michaelis' Pailton Sorais, H.M. the King's Facsonia, and Mr. T. Simpson Jay's Wimbledon Fuchsia were the next in order, and all of them quite fillies of the best type. Yearling fillies were strong too, Lord Egerton's London winner Tatton May Flower being at the top; she was sired by Lockinge Forest King, and is growing on well upon the best cart horse lines, having weight and quality. Mr. Bradley's Halstead Duchess 4th, Messrs. W. and J. Thompson's Desford Future Queen, and Messrs. Fletcher and Andrew's Maori Sunbeam, very promising and high-class fillies by Dunsmore Jameson and Dunsmore Combination, followed.

Shire geldings were not a large class in numbers, but the quality of these was quite outstanding. Mr. A. C. Sparks, with Oldfield Duke and Oldfield Prince, very big and valuable horses, took the first and third prizes, the two being divided by Mr. Joseph Park's Blackbird, and Mr. Peter Coats was reserved for Clifford Victor, a rather smaller gelding, though of beautiful cast. Lady Wantage also exhibited a very good gelding in the class that obtained a card.

Clydesdales.

These classes were very weak in every respect. Three-year-old stallions were headed by Sir John Gilmour's Montrave Magnus, a quality sire all over, and Messrs. Montgomery came second and third with Earl of Angus and

H.M. the King's Fire King, Champion Hereford Bull, at the Royal Show last week.
Born Feb. 20, 1901; sire Earlsfield 19387, dam Firefly, by Lollipop, and bred by His Majesty at the Royal Farms, Windsor.

Baron Airies. In two-year-old colts the last mentioned exhibitors were first with Baron Fyvie, a wonderfully nice colt that reqiures time to finish a real good one, and who was also awarded the champion prize of the Clydesdale Horse Society. The Seaham Harbour Stud Co. were second. Messrs. Montgomery and Mr. T. Smith were awarded first and reserve for yearling colts. The mare in foal class was better than some of the others, two or three very good mares coming in. Mr. Ernest Kerr's Lady Garnett, Sir John Gilmour's Montrave Rena, and the Seaham Harbour Co.'s Scotch Mist were the best of them as named. Mr. J. Ernest Kerr was at the top of both the three and two-year old filly classes with Ambrosine and Lady Rotha, and Sir John Gilmour's Montrave Marion and the Seaham Harbour Co.'s Silver Princess were second; Mr. Herbert Webster taking a third in the three-year-olds; all these fillies require time to finish, as is usual with their breed.

Suffolks.

The entry of these was much of an average of past years; the horses were brought out remarkably fat, and fit; their general quality, however, was thought by some to be scarcely as good as in one or two previous years. Three-year-old stallions brought out a number of good colts, Mr. A. J. Smith's well tried and good quality colt Rendlesham Sorcerer being at the head, followed by Mr. E. F. Quilter's Bentley Bashful Warrior, the reserve going to the same exhibitor's Sudbourne Highness. The two-year-old colts were well grown and good, both in their joints and build, Mr. C. F. Quilter's Bentley Kaiser was first in these, second and third prizes going to Mr. C. H. Berners's Prince Edward and Mr. A. J. Smith's Rendlesham Braggadocio. In yearlings Mr. Quilter's Bentley Grist was first, and Mr. Robert Edgar's Cheerful Prince second, Sudbourne Arabi winning third for Mr. K. M. Clark. Mares with foal at foot are always amongst the most attractive of the Suffolk bred and Mr. K. M. Clark's Sudbourne Arabella, who came first, is a real good specimen; her stable companion Queen of Diamonds also follows her closely, and Mr. Eaton White's Boulge Maid, a very nice shaped and good stamp of mare, was placed third. Three-year-old fillies had at their head Sir Cuthbert Quilter's splendid filly Bawdsey Daisy 2nd, Mr. Kenneth Clark's Sudbourne Susan and Mr. John Symond's Diamond as written, the two-year-old prizes going to Sir Cuthbert Quilter's Bawdsey China Aster, Mr. Kenneth Clark's Sudbourne Beauty, and Mr. A. J. Smith's Rendlesham Tola. Mr. C. H. Berners and Sir Cuthbert Quilter were also successful with very good geldings. The Suffolk Horse Society's challenge cup was awarded to Rendlesham Sorcerer.

Cattle.

Shorthorns.

This breed had no fewer than 262 entries, and although there were a good number of absentees, the classes were largely filled. In that for bulls calved in 1901 and 1902, His Majesty the King's exhibit, Royal Carlisle, only obtained h.c., his grand top and admirable rotund character probably deserving higher distinction, especially as the quality of the animals was far from perfection. It was, however, really a grand collection of bulls, as many as eight getting barren honours, after the three prizes had been allotted. No fault could possibly be found with Mr. R. Taylor's Royal Emblem, which received first premium, and afterwards champion prize, except that his head was rather feminine. Mr. A. J. Marshall's Roan Conqueror, the second bull, has a very good saddle, but is not quite perfect either in front or behind; and Mr. A. F. Nichol's Baron Butterfly, the third prize-winner, has a shrewdly light front. Many onlookers preferred Mr R. Stratton's Great Mogul, the reserve bull, to either, but it is impossible to know on what point the decision rested, and there can be no question about all of them having been very fine good bulls of the right type. In the class for two-year-old bulls, Mr. J. D. Willis's Downton Brace Arthur came to the front being preferred to Mr. Cooper's Master after a severe contest. Both animals are very good, but the ruling appeared to be well approved. Mr P. L. Mills's King Christian of Denmark obtained the third premium, and Mr. F. Miller's Lincoln Champion the reserve ticket. There appeared to be a good distribution of commendations, which were all well deserved and indeed there might have been a more liberal distribution of them. The first winner in the yearling bull class was Lord Polwarth's British Baron, bred by Mr. Richard Booth, which has a grand level top and is very even in its proportions. Second to it was placed Mr J. D. Willis's Orphan Chief, which having already won at several shows is better known than the third winner, Mr. A. T. Gordon's Fascinator. Both are well-shaped and likely to be heard of again, unless purchased for exportation. In this class, again, the judge might have been much more liberal in his distribution of barren honours. Mr. George Harrison was reserve with Royal Ensign, of Mr. Duthie's breeding, a very shapely white bull. H.M. the King was h.c. with Crystal Talisman, and Mr. C. A. Hirst had the same honour, about half a dozen others being c. Mr. J. D. Willis came to the front again in the cow class with his far-famed White Heather, which still shows bloom, and is difficult to surpass. Mr. Roskruge's Lobelia made a good second, and was preferred to Mr. J. Colman's Hawthorn Flower and Mr. G. Harrison's Ursula Raglan, which had the third prize and reserve tickets.

The Shorthorn Society's prize, with second and third premiums added, brought a small class of three-year-old heifers in milk. Mr. L. de Rothschild's Lady's Slipper taking the first premium, Mr. W. Bell's Ratcheugh Witch the second, and Mr. H. F. Leon's Roseleaf the third. The two-year-old heifers formed a good class, in which Mr. F. Miller's Lady Amy VII., bred by the Earl of Powis, made an admirable first winner, Sir A. Henderson's Lady Buscot Graace coming next, and the Earl of Northbrook's Clorinda third. Mr. R. Taylor's Pitlivie Carnation obtained reserve, and H.M. the King's Datura and Mr. J. Harris's Oxford Duchess of Calthwaite 36th being h.c., with three others c. In a very large class of yearling heifers His Majesty the King's Receptim was worthily first, this heifer being almost faultless in chaaste moulding, with really a nice character. Second to her was placed Mr. A. S. Bassett's Tehidy Queen of Brilliants, also very uniform and of shapely character. The Earl of Powis's Welsh Maid coming third, and Mr. F. Miller reserve with Lady Hermione, bred by the Earl of Powis. In this large class there were several barren honours, yet there were many deserving heifers which received no notice.

What may be termed supplementary classes followed—for pedigree shorthorn dairy cows in milk. In the class for those calved in 1900 or previously, Mr. Jas. T. Hobbs was first with Orange Blossom 13th, a fine, young cow, with a capacious udder. Lord Rothschild's Tulip Leaf came next, of nice character, and also displaying undoubted milking character, while Mr. R. W. Hobbs's Betty 7th seemed a thoroughly general-purpose cow. Mr. C. E. Wodehouse had three of undoubted high merit in the competition, Veronica 2nd displaying rare quality, with good shape, and Lady Rae 3rd depth and full-shaped deportment, such as should not have escaped the judge's eye, but only Clematis 2nd was c., apparently the least deserving of the trio. Mr. Adeane's Lucretia was reserve, and Mr. G. Taylor's Melody h.c., both very deserving. In the class for pedigree cows in milk calved after 1901, Mr. G. W. Tyser, Messrs. Little, and Mr. W. J. Hosken won the prizes with nice animals, Lord Rothschild being reserve.

The Lincolnshire Red shorthorns came out better than they had ever done before at a Royal show, and excited much admiration. In the senior bull class, Mr. T. B. Freshney's Saltfleet Bonus was first, a very grand animal of uniform proportion and massive character. The only other two in the class deservedly received second and third prizes, which were Mr. E. S. Cartwright's Stenigot Bloom Boy and Mr. S. Crawley's Weston Monarch 2nd. The class for bulls calved in 1903 also had three animals, Mr. J. Cartwright's Sharpshooter getting the first premium, but was followed close with Captain Portman's Healing Blucher and Mr. John Langham's Brandon Champion. One of the yearling bulls that had been entered was an absentee, leaving the two exhibited by Messrs. Chatterton to receive first and second prizes with Stenigot Gwynne and Stenigot Primate.

In the cow class, five very fine milkers appeared, headed by Mr. John Evens's Saltfleet Favourite, with Mr. T. B. Freshney's Ruby 12th second, Mr. Carnley's Norbury Duchess third, and the two others h.c. Three very good two-yearold heifers also won the prizes, which were Mr. J. Todd's Kirkby Nonpareil, Mr. W. J. Atkinson's Ruby 14th, and Captain Grantham's Keal Nancy. The yearling heifers were scarcely less deserving, carrying very level forms, with nice character. Mr. Langham was first with Brandon Red Rose, Mr Marriott second, with Cromwell Belle 2nd, and Messrs. Chatterton's Stenigot Daisy 14th third.

Herefords.

Although the whitefaces were not so large in number as last year it was a very adequate representation. The decline in numbers is said to be entirely attributable to so many of the young animals being purchased for export. In the senior bull class only two appeared, one being H.M. the King's Fire King, which kept his accustomed place, the other, Mr. C. D. Faber's Prime Minister, which deservedly received second prize. Fire King was later awarded the championship of the section. In the class for two-year-old bulls, Mr. A. P. Turner's Marquis repeated the victories he won at Nottingham and Malvern, and was also r. for the championship, but there was a reversal of the Bath and West decision in H.M. the King's Admiral only obtaining reserve, below Lord Coventry's Llama and Sir R. G. Cotterell's Priam; Admiral was previously placed above the latter two. Bulls calved in 1904 were more numerous, but there were several absentees. Mr. A. E. Hughes resumed his former position with Premier, to which Mr. A. P. Turner's Antonio made an excellent second, but a fine well-shaped young bull belonging to Mr. R. W. Hall was selected for the third premium in preference to Mr. C. T. Pulley's Eaton King.

The cow class was of a very high order of merit. Seldom have five been selected superior to those which remained together for some time before the judge could place them to his own satisfaction. At length Sir C. H. Rouse Boughton's Lady Betty was placed first, Mr. T. R. Thompson's Bonnie Mary making an excellent second to her, and Mr. Faber's Ivy Lass, bred by the late Mr. R. Green, getting the third premium. The remaining two of the famous quintette were Mr. R. Phipps' well-known Nonsuch and Furious, which as a matter of course were h.c. The two-year-old heifers were also of considerable merit, headed by Mr. A. E. Hughes' Ivington Plum, to which Mr. J. R. Hill's Western Star, Mr. Peter Coats' Dewy May and the Earl of Coventry's Golden Fairy were placed next in the order named, two others being c. The yearling heifers would have been a large class if all that had been entered had appeared, but there were several absentees; Mr. C. F. Pulley's Ashleaf 3rd made an admirable first winner, and Mr. W. H. Davies' Counter and Mr. P. Coats' Pearl fully deserved the other premiums, to which the Earl of Coventry's British Fortune stood reserve.

Devons.

The Devon Cattle Breeders' Society evidently did its best to promote an attendance of the choicest specimens of the breed at Park Royal, as they offered two substantial champion prizes of 10 gs. each for the best male and best female respectively, and with Mr. S. Kidner as judge, the breeders in these classes were well content. As the Devon breed is practically restricted to half a dozen shows, the exhibition animals are not quite so large in number as in those breeds where monetary inducements are offered more frequently. In the class for old bulls there was an entry of three only, but three of the best animals that have been seen in one class for a long time, inasmuch so that the judge recommended that three prizes be given. Mr. J. C. Williams was an easy first with that superb bull, Drosera; he is simply perfect with his top and bottom lines, and squares up largely to the eye, whilst the turn of his middle piece is nearly perfection, the sirloin being exceptionally good; such quality made this bull an easy champion. Second to him was another good bull from the same herd, Ficus. This is a nice bull when seen by itself, but its merits were outshadowed by those of the other. Ficus has a capital back and dewlap, and is set close to the ground; third prize was given to Mr. T. S. Morgan's Pound Mayor, a very nice bull to meet the eye and good at the rump, but its length rather slackened its middle, else it would have had even a stronger run for second.

The entry was slightly larger in the two-years-old class, Mr. J. C. Williams again supplying the premier bull, this time with Dianthus, a nice, deep, grand quality bull, very kindly to the touch, possessor of a rare loin; but if it was a trifle fuller on the rump it would be none the worse for it, but its merits were such as to entitle it to the reserve championship. Second prize went to Mr. C. L. Hancock's Rufus, very level and even, with a good loin, but hardly so big by reason of its age. Mr. Edward C. Norrish was placed third with his Level Best, a very useful bull, with a strong back and good sirloin, but hardly finished enough at the stern. Mr. J. C. Williams was reserve with Mistletoe, that has not come on so well as some of his other exhibits, and is a bit slacker and more uneven, and scarcely fulfils the promise it made last year. There were only four yearling bulls, but they were a smart lot. Here Mr. Alfred Skinner's Pound Royal 2nd continued his unbeaten career, and walked even more gaily than it did on the occasion of the first show of the season, and in the meanwhile it has become the gentleman. Second to it was placed Pound Pink Un, sent by the Hon. E. W. B. Portman, a bull that did not impress one favourably when it first came out, but recently it has smartened considerably, and is well worthy of the position that it now holds. Mr. Edward C. Norrish's Master True Type, and the same exhibitor's Fancy Free 5th have alike had their ups and downs this season, they having experienced changes. Master True Type, now third,

was second at the Royal Counties and Devon County Show, and third at the Somerset County; whereas Fancy Free was second at Somerset and third at Exeter and reserve at Park Royal. They are, however, a very useful pair of bulls, and their merits are very equal.

The class for Devon cow or heifer in milk came out unexpectedly strong, there being an entry of eight, but the contest resolved itself into a battle between two competitors. Mr. Alfred Skinner was placed first with his grand old cow Curly 2nd of Pound, that despite her duty to the herd and to the pail, carries herself with all the lightness and grace of a heifer, and she pens such a beautiful udder that no judge could resist her claims to the female championship. Second to her was placed Mr. B. C. Shepherd's big fine heifer, Hestercombe Myrtle, which was first at the Bath and West. She is a big one, and, with age in her favour, would have been a warm competitor for the other had her udder been as perfect, but, as it was not, second was her place; but she was reserve champion of her section. Third prize went to Mr. Skinner's Pound Curly 5th, a very useful cow, evidently useful as regards the pail; Mr. Shepherd coming in as reserve with Hestercombe Leaf, that scarcely showed so much for milk as the others. His Majesty the King has a useful at-home heifer in Ruby; this heifer was commended, as was also Mr. T. S. Morgan's Beauty 2nd.

Hackney Mare, Crayke Czarina, winner of Third Prize at Park Royal last week, but was Champion of the Young Mares and Reserve Champion Female at the Hackney Society's Show this year.

Exhibited by Mr. S. Cliff, Western Flatts, Wortley, Leeds, and bred by Mr. T. Hodgson Whin Hill, Ottringham, its sire being Corn Factor 6313, and its dam Halsham Topsy 13533.

The two-year-olds made a rattling good class, Mr. J. C. Williams being first with his Blooming Cow 19th. She is a smart one, and runs back well on her ancestral lines; she is neat, even, and was shown at her best; she was neatly modelled on the true lines. Second to her came his Majesty the King's Dewdrop, which attracted such attention at Bournemouth. She was splendidly brought out, she meets the eye well in front, and the judge could not pass over her claim for precedence before Mr. Shepherd's Hestercombe Rubric. She is a big, upstanding heifer, and should produce some weight carriers. Mr. T. S. Morgan was reserved with Whimple Beauty 3rd, that had this set back after her sojourn at the South Coast watering place. She is a nice heifer, and may, another season, regain a higher position.

It was one of the smartest classes of young heifers that has yet been seen at Park Royal. The judge confirmed the Royal Cornwall decision by putting Mr. Eland Clatworthy's Cutsey Zenobia 2nd to the fore. It is a pity that this heifer did not come out at some of the earlier shows; she is of the big Somerset type, but graceful with it, very level, even, and showing well for a good bag when the time comes, and she carries her flesh well here. Second in Cornwall, Violetta has gone off very considerably since, and she was fortunate in getting into the reserve; the second prize went to his Majesty the King's Lucy, not over large, but very shapely and heavily fleshed. She was first in her class at the Bath and West. Another heifer from the Royal farms, Nosegay, very small, with pride showing where it should not, was highly commended. The third prize went to Mr. T. S. Morgan's Whimple Beauty 5th, a nice, curly coated heifer, not quite so evenly made on first sight, but greatly improving on closer acquaintance, was placed third. The Hon. E. W. B. Portman was highly commended with Favourite 2nd, a good heifer, but needing expansion behind. Mr. J. C. Williams was highly commended with a small heifer by Drosera, which, like the previous animal, was a trifle narrow behind.

South Devons.

Only two bulls and two cows of this breed appeared, which seems strange after the formidable display made at Nottingham. The bulls were Mr. J. S. Wroth's Star's Duke and Mr. F. W. Rowe's Merry Boy, which was wrongly placed before the younger competitor at the Exeter and Royal Cornwall Show, the same judge being at both. Star's Duke walked like a nobleman, Merry Boy seemed lame, as the two entered the ring. However, apart from this, Star's Duke has the more level form, and is of superior quality in flesh, and as the Royal is deemed a court of appeal, there was a satisfactory reversal of the former decisions. The cows made a good representation of the excellent dairy character of the Devons. Mr. B. Rutland's Handsome and Buttercup, which were the second and third winners at Nottingham, were worthily placed first and second here, the Nottingham first-winner not having been entered. The judge also awarded third prize to Mr. T. R. C. Cundy's Myrtle, but apparently the stewards would only allow reserve to be recorded. But precedents for it have been abundant in previous Shows, and after the liberality of Sir Walter Gilbey and his friends in bringing the prize-list to such a liberal standard the niggardly rule should in this case not have been brought into action.

Sussex.

This breed did not bring forward numbers so large as might have been expected; but those which appeared were of a high order of merit. The two bulls which were in the senior class were of truly grand character. The Earl of Derby's Mayor, which was first at the Bath and West and Royal Counties shows, had only a second here, being easily beaten by Prince Confidence 2nd, belonging to Mr. A. J. Thomas, a lengthy animal of very even depth, good width and substance, bred by the Hon. R. T. Neville. In the class for bulls calved in 1903 there was more competition. Mr. C. J. Lucas came first with Lord Eric, which was placed second to the Earl of Derby's Mayor at Bournemouth, a young bull of the full-shaped level conformation and carrying grand flesh. The other premium awarded fell to the Hon. R. P. Nevill's Bonfire Prince 2nd, of wealthy character. Mr. Aungier's Lynwick Prince, of good form and flesh, receiving reserve, and Mr. Thomas's son of his first prize bull c. Earl Winterton's Shillinglee Bewbush maintained the position accorded him at Bournemouth, even though having a formidable competitor in Mr. Gerald Warde's Gallant Statesman, of very level composition. Hon R. P. Nevill's Birling Lord had reserve. Only first prize was awarded in the cow class, viz., to Mr. W. F. Winch for Warden Lady, of nice and shapely character, which was preferred to the Earl of Derby's Fancy, of more substance, which received first prize both at Nottingham and Bournemouth. Earl Winterton's Sunlight 5th topped the two-year-old heifers, as at the Royal Counties. With the exception of being rather plain in rumps, she is very perfect. Mr. P. Saillard's Bewbush Wind 4th, the second winner, ran her, however, a severe contest, being shapely and of nice character. Mr. Gerald Warde's Tutsham Pearl, the reserve heifer, also displayed well, especially in full chines and loin. The yearling heifers formed the largest class, in which Earl Winterton was again to the front with Simla 4th, which was also first winner at Bournemouth. Indeed, her shapely form and lovely character would make her difficult to beat anywhere. The same exhibitor was also third with Sunlight 7th, which is perhaps more wealthy, but not so symmetrical or nice as the first winner. Mr. Aungier's Gwendolen of Lynwick divided the two for second prize, a heifer with a grand back and even form, which was also second at Bournemouth, his Consolation 2nd receiving also barren honours, as she did there; but Mr. Thomas's Prebble Smeeth Twin 2nd, a fine heifer, not sent to Bournemouth, had reserve.

Welsh.

Seldom, if ever, have the Welsh blacks been brought out so creditably, with scarcely a single inferior animal among them. Four bulls appeared in the senior class, the only one not taking a prize being reserve. Mr. J. Scourfield's Lloffwr, the first-prize winner, combines large scale to quality admirably, being of even depth and substance underneath as well as above. The Czar, belonging to Mr. Greaves, which won second position, is of good length and of excellent quality. Mr. Robert's Madoc Bach, the third winner, and Lord Harlech's Tudor, which was reserve, were also deserving. The seven junior bulls were commended entire. Mr. J. Owen's Derw Boy carried good form, with excellent flesh, having more substance than the two nice, shapely exhibits from the University herd, which received second and third premiums. Mr. R. M. Greaves could only obtain reserve with his shapely Wern Delight, of rare quality, and the others deserved their barren honours. In the class for cow or heifer calved previously to or in 1902, Mr. Greaves came to the front with his deep, compactly-shaped Pyrites 2nd, which has a good calf at foot. The University College again won second and third premiums with Madryn Sally, bred by Mr. Greaves, and Madryn Kate, both of excellent quality. The reserve went to a compactly-built three-year heifer in milk, of nice character. In the heifer class the University College had two nice exhibits, one of which, Madryn Beryl, a fine, well-fleshed one, was selected for first prize; the second being worthily awarded to Mr. J. W. Griffiths's shapely Penally Primrose, and the third to Mr. R. Thomas's Beauty 2nd, which had a broad, level top. Madryn Mair, the University College's reserve, also appeared deserving.

Red Polls.

Scarcely any breed had a larger proportion of animals of high merit to number than this one. In the senior bull class five specimens appeared to be generally commended. Mr. John Hammond came first and champion with Davison 244th. Whose grand top, rotund, well-covered form, and high character would be difficult to surpass. Lord Amherst was second with Recruit, also of grand form and full-shaped confirmation. Mr. A. J. Smith's Rendiesham Sidar made an excellent reserve, and was well deserving third prize. The two-year-old bulls likewise made an admirable display. Mr. R. P. Cooper came to the front with Ashlyns Major, of undoubted quality; Lord Amherst being again second with Defender, compactly built and level; Mr. A. J. Smith's third winner being also very uniform. Two others were h.c. The yearling bulls formed quite a large class, and no fewer than nine either had prizes or barren honours. No slight honour was it for Sir W. Corbet to top such a nice lot with Acton Rufus, his Acton Garnet coming third. These well-shaped specimens were divided by Mr. R. P. Cooper's Ashlyns Ben, of rotundity and good quality. Mr. Fellowes had two in the swim very deserving, as also were the exhibits of Lords Amherst and Radnor, all of which were h.c.

The cows were fine animals, most of them displaying admirable dairy character. Lord Amherst's Popsey 6th had pride of place, after a sharp contest with Mr. Hammond's Davy 204th, both broad and full in conformation. Alba, the third winner, shown by Mr. Fellowes, M.P., would be equal to either but for plainness at rumps. His Ardent, which was reserve, has likewise considerable merit, and, indeed, the same might be stated of two others which were h.c., belonging to Sir W. Corbett and to Sir T. V. S. Gooch. Mr. Fel-

lowes won first and second prizes in the class for heifers calved in 1903, with Angelus and Avon 2nd, both full-shaped and of nice quality. Mr. Cooper's Ashlyns Gravel had the other premium, a small but very shapely specimen. The reserve heifer of Sir T. V. S. Gooch and Sir W. Corbet's two, which were deservedly h.c., also seemed of high promise. Sir W. Corbet headed the yearling heifers with Acton Primrose, a remarkably chastely-moulded, nice heifer; Mr. J. Hainmond's Davy 283rd and Mr. Scorer's Flaxmoor Geisha, the second and third winners having very shapely character, while Mr. Cooper's Ashlyns Flirt and two or three others fully deserved their barren honours.

Aberdeen-Angus.

The Aberdeen-Angus is a breed which of late years has been introduced with considerable success into England, where they have established themselves well in favour, seeing the credit they do to their adopters. Mr. R. W. Hudson, of Danesfield, Marlow, won in the old bulls with Danesfield Jester; and in this class Mr. J. J. Cridlan was reserve with Wizard of Maisemoor. There was a strong class for 1903 bulls, in which Mr. Charles Wills, of Clifton, Bristol, was commended for his entry Esmond of Wilts, bred by the exhibitor, sire Esmond of Danesfield. All the entries mentioned in the class for yearling bulls were exhibited by owners this side of the Tweed, and herein Admiral Togo II., shown by Mr. C. Wills, was highly commended. For in-milk entries, Mr. J. J. Cridlan, of Maisemoor Park, Gloucestershire, was third, with his three-year-old Mabel 8th. Mr. Charles Hunter, of Darlington, was awarded female championship honours for Ruritania, which won the 1903 heifer class. The Rev. C. Bolden, who was second in the class to the champion, was also reserve for the latter honour.

Guernseys.

The only class of this breed not well filled was that for bulls calved in 1901 and 1902. There were only two entries, and the single prize awarded was to Mr. H. M. Ozanne's Golden Jewel, a very fine animal with a good head, nice skin, and the character usually appreciated. Mr. Plumptre's His Grace 2nd only received reserve, but seemed well worthy of the second premium. There were nine in the class for bulls calved in 1903, in which Mr. Plumptre's Roland of Sea View 10th was placed first after an apparently severe contest with Mr. Hambro's Charleston, both having nice character in skin and colourings. Colonel H. W. Shakerley's third winner, an Island-bred one, was also of the right type and character, and he had a second bull which was h.c., of good form and merit, the reserve bull. Fair Lad, belonging to Mr. Hogg, being likewise a good one. There were seven yearling bulls, and as the class was commended entire the judge must have deemed them a good lot. The prizes went to Mr. J. P. Morgan's Coronation King 3rd, Mr. F. Hargreaves' Merton Signet, and to Colonel Shakerley's Burgate Holden 3rd.

The cow class was a large one, and contained several good milkers. Mr. Hambro brought to the ring three very good ones, his Queen of the Roses being selected for the front; while his Golden Cherry was reserve and Express h.c. Mr. Ozanne brought from the Island Lady Roberts to take second prize, which had a spacious udder, as well as nice character. His Noble Lady was also h.c. Mr. H. C. Stephens' Itchen Claudia, which won third prize, had a nice silky skin. Another large class was that for heifers calved in 1903, in which Mr. H. C. Stephen's was at the top with Itchen Belle 5th, a very shapely nice heifer with indications of dairy character. Mr. Hambro was second with Hayes Imperiale, a heifer of considerable promise and with rich secret colourings. Mr. Plumptre's Cleopatra of Goodnestone 2nd, the third winner, and Sir H. Lennard's Wickham Buttercup 2nd seemed both of considerable promise. Still more deserving seemed the yearling heifers, in which Mr. Ozanne's Sensitive 6th from the Island was deemed the best. Mr. Hambro's second prize, Hayes Olive 2nd, carried excellent form and seemed of rich character, and Mr. Frank Hargreaves's Fairy Footsteps in compactness of build as well as nice character, seemed very deserving. Among the others which received notice were two belonging to Mr. Plumptre, a second exhibit of Mr. Hambro, and a fine heifer shown by Colonel Shakerley.

Jerseys.

The classes of this breed were, as usual, well filled and a considerable proportion of the animals were of sterling merit. The judging in the senior bull class gave tolerably good satisfaction, Captain Gisborne's Glorious Lad making an excellent first winner, with his broad, level top and nice character; while Jolly Peter, belonging to Mr. Miller-Hallett, and Mr. Joseph Brutton's Shy Lad, were considered by outsiders to be in their proper places. At one previous shows neither had been appreciated sufficiently. Lady de Rothschild's Gallant made an excellent reserve, and two or three of the others contributed to the merit of the class. The bulls calved in 1903 were a larger muster. Mr. T. B. Miller's Cricketer was selected for the front, with Mr. Julius C. Drew's Black Pearl second, both of considerable merit; but it seemed questionable whether Captain Fraser's Reminder's Bud and Lady Smyth's Wyllard should not have exchanged places. The latter seemed of very nice character, and Lord Rothschild's Priority, which was h.c., had rich colourings. Several were c. in the yearling bull class after the prizes were awarded, they being of merit as well as in tolerably large force. Mrs. Macintosh owned two of them, and Jolly Jim, of handsome style and nice character, was selected for the front; Mona's Warder obtaining h.c. Both were bred on the Island. Second premium was obtained by Mr. R. B. Ward's Silken Fop, which also was of nice character; Captain Gisborne's Tommy, the third winner, being very shapely and nice. Mr. A. Pocock's Barrister got reserve, which was no slight honour, as about half a dozen others received notice.

The special prize of 10 gs. offered by the Royal Jersey Agricultural Society for the best Jersey bull exhibited in Classes 133 to 135, provided its dam has won a prize or certificate of merit in any butter test competition recognised by the English Jersey Cattle Society, was won by Mr. Alexander Miller-Hallett with Rover of Oaklands; reserve going to Mr. James Joicey for Netina's Dairy Lad.

The cow class was very large, and of rare merit. The first winner was Mr. Miller-Hallett's Lottie, which was bred on the Island, and is apparently a very deep milker. Lord Rothschild exhibited three, two of which, Daystar and Syren 3rd, won the other two premiums; Marseilla being h.c. The Bishop of Ipswich's Oxford Dewdrop, and Mr. Jas. Joyce's Electric Flash, both carried capacious udders, and were deservedly h.c.; Mr. Joseph Brutton's two also winning barren honours, which were Benita 2nd and Benita 4th. The third is a three-year-old heifer, which was the second Royal winner last year. Lord Rothschild was quite to the front in the two-year-old heifer class, Oxford Snowdrop being first and Venecia second. Both are very good, although the first winner is scarcely so refined as some of the Tring Park celebrities. Mrs. Macintosh's Glorissa 5th well deserved her third premium, but Mr. Joseph Carson's Leda's Snowdrop, h.c., scarcely had her deserts, opinions being rife that there was no better heifer in the class. The yearling heifers were certainly very good, about a dozen of them being honoured after the three prizes had been awarded. Mr. Jas. Joicey's Glorinda was selected for the front, which, if not a trifle too coarse, will make a fine cow. Mr. Joseph Brutton's Pretty Princess ran her a close contest. The latter was first at Exeter and second at Bath. Lord Rothschild obtained third prize with Sweet Pansy, of very nice character, several of the others being of good promise.

Longhorns.

Longhorns mustered eighteen, and a useful lot they were. Mr. W. L. Riley, Coventry, led the way in the old bull class with Wychnor Prince, a smart specimen, which beat Bentley Chieftain, a handsome brindle belonging to Mrs. M. M. Cheape, Bentley Manor, Redditch. The Hon. E. A. Fitzroy, West Haddon, was first for yearling bulls, and Mrs. Cheape was first and third for cows with two capital specimens, the second honour going to Mr. W. Hanson Sale, Atherstone. The honours for heifers were divided by Lord Gerard, Ashford, Kent, and Mrs. Cheape.

Kerries and Dexter.

The Duchess of Newcastle, Worksop, as usual, was the most successful exhibitor of Kerries. She won the championship with a four-year-old bull, and the Duchess of Devonshire, Eastbourne, was well up in the prize list for Dexters; the champion honour, however, went to a Yorkshire exhibitor.

Other Breeds

A couple of classes each of Galloways and Highland well maintained the reputation of the breed, while the display of Ayrshires was on a much larger scale.

SHEEP.

This year's entry was one of the most even in its merit we have seen for some time. Further, it may be remarked that the large entry made by the flock masters show they at any rate have done their best to promote the continuance of the Royal Show. The system of single judging worked thoroughly well, and but small complaint could be urged against the result. Of course, there were cases in which mistakes were made, but speaking from an experience of more than a quarter of a century, we are confident that these were far and away less than in the old days of two judges, or the still older days of three judges. The omission of the two shear ram class is one that is a blot upon the section as a whole, and every effort ought to be made to secure this class for every breed in the show. The two new classes this year are valuable ones, another success each has secured renders their inclusion in the schedules of future years a necessity. The two classes referred to are the class for three yearling rams in the Southdown, and the selling class for Shropshire yearling rams.

Taking the catalogue in its order we have to comment first of all upon the Oxford Downs, but before so doing we may remark that as a full list of the awards is given elsewhere it is not felt to be needful to refer in detail to all the sheep with minor honours.

Oxford Downs.

This breed made an excellent entry in all the classes, somewhat larger than the average of the past seven years. In the yearling ram class Mr. A. Brassey, M.P., was well to the fore. The winning ram from this flock was one of fine scale, grand flesh, and typical head, its flockmate that came in for second honours was very close up, but hardly so good a ram in its twist and hind quarter. Third and fourth honours went to Mr. J. T. Hobbs, for a couple of typical rams, hardly so masculine in appearance as some might prefer, but having a great wealth of flesh of the right description. Mr. H. W. Stilgoe's pair were r.n. and c., the former ram has the making of a sire in him, being very level in touton, and even in its skin; Mr. James Horlick's h.c. ram was of good merit. The ram lamb class was a strong one and very excellent in merit. Here Mr. R. W. Hobbs led the way. This pen were of the right type, very masculine in appearance, with plenty of substance and good flesh, the same breeder also won fourth prize with another evenly drawn and good pen. Mr. W. A. Treweeke's two entries were brought in excellent style, they won second honours and h.c. The leading pen were all good lambs with nice heads and plenty of bone, one was better than the rest, and this, which made the pen not quite so even as some others may have been, the cause for second place instead of first, to which they were pretty nearly going. Mr. J. T. Hobbs won third, no objection could be taken to the type or flesh of this pen of lambs but the lack of masculine character was fatal to their success. The last named breeder came in also for r. a very nice even and well fed pen. Mr. James Horlick was h.c. for two typical pens of fine character.

The shearling ewe class was an excellent one. Mr. A. Brassey won here with a particularly fine pen. These ewes were of great scale and merit, they handled well and had a great wealth of first-class flesh. Two pens which are particularly suited for the export trade won second and third honours for Mr. J. T. Hobbs, pens of superior merit, and brought out in excellent condition. These handled well. Mr. G. Hankies, a fresh exhibitor, took fourth honours with a very even pen, not so heavily fed as the leading pens but of nice type. Mr. J. Horlick's pen were h.c.; here we found real good quality. Mr. J. T. Hobbs was fully entitled to his first in the ewe lamb class, the pen he won with being of high merit, they handled well and were very even in the fleece. The second prize went to a beautiful and very typical pen of lambs sent forward from Mr. J. Horlick's flock, this pen was of high average merit. The third and fourth pens from Mr. W. A. Treweeke's flock were of superior quality, several of these lambs were much admired, and it is quite probable some judges would have placed them higher up in the award list. Mr. R. W. Hobbs had the r.n., a pen which need more time to reach perfection, but they had very fine type, and the h.c.'s Mr. A. Brassey and Mr. H. W. Stilgoe won were well deserved.

Shropshires.

All through these classes the grand flock or breed likeness was most noticeable; in no other breed does this great quality take a more prominent place. The two-shear ram class here just shows how valuable such classes are, for here we found six stud rams of notable merit, and real good types of their breed. This was particularly so in the case of Mr. R. P. Cooper's grand sheep, who now, for the third successive year, heads its class at the Royal, having won first as a lamb and then as a yearling. Mr. T. Fenn's entry, lacking somewhat the spread of the winner, had, however, very choice quality and superior merit; whilst in Mr. Berry's r.n. was found a ram whose grand top and level back rendered him a very valuable ram. The yearling rams were not quite so even as we have sometimes seen. Here the destination of the leading award was not in real doubt, for there was no ram equal, either in scale, quality, or merit, to Mr. M. Williams' grand unbeaten yearling ram; the flesh and touch of this sheep

Home Notes.

From the Plantations.

the reports upon the condition and prospects of the growing crop continue to be satisfactory and promising. The threatened attack of blight has practically been defeated by the favourable climatic influences now prevailing the bine making rapid and healthy progress in every parish. The only possible hindrance to a full crop appears to be the tendency towards the redundance of foliage leaving an insufficient reserve of strength for the fruiting. There are some experts who confidently predict this result, and others who anticipate a return of fly in the course of the next week or so; and all will admit that there is yet a sufficient interval of time before commencement of picking for the present favourable aspect to be changed. "Sufficient," however, "for the day is the evil thereof" and we are bound to accept to-day's outlook as generally indicative of at least a good average yield.

The Borough

Trade is therefore affected by the circumstances immediately surrounding us. Consequently it is not surprising that buyers are pressing for lower prices. But I do not find that their efforts are successful, as the very limited supplies now available outside the Syndicate still induce firmness on the part of holders. Reports that hops are to be bought as low as £5 5s. are only applicable to inferior qualities, the values of sound samples remaining steady at not less than £5 15s., and ranging therefrom to £6 5s. The quotations for Syndicate hops are, of course, much higher, the Committee being confident that they will yet be able to realise the figures for the attainment of which they have combined.

Park Royal.

My visit to the Agricultural Show this week, looking for usual hop exhibits, was disappointing, as there were none on view. I could not ascertain the cause of their absence, and can only regret that our important industry was not represented. Even in the educational department there was no sign of anything referring to hops, as Wye College did not put in an appearance this year. I am extremely sorry to note that, although exhibitors in all other sections supported the show liberally, and that it was assisted by the presence of our good King and Queen, with other Royalties, the general public responded so feebly that the financial results must be disappointing; and the prospects of the Society are very far from satisfactory.

All official reports and notices of the National Association of English Hop Growers are printed in the MARK LANE EXPRESS, *and current information from all parts of the world, likely to be of interest and benefit to the members of the society, and Hop Growers generally.*

SULPHUR FOR HOPS.
"AXE" BRAND
VENTILATED FLOWERS SULPHUR
has the merits of being CHEAP and of VERY FINE QUALITY.

Foreign Notes.

America.

I have before me the *Morning Oregonian* of June 13, the *Sacramento Union* of June 14 and 16, and private letters from Oregon and Washington of about same date, and I must confess that I find it somewhat difficult to reconcile the various reports of the market position contained therein. Indignation is freely expressed in forcible language by the supporters of the growers' combines in answering the statements of "bear" buyers, who declare that the strength of the market is rapidly disappearing. The poolers, headed by Mr. Durst, a large Californian grower, and Mr. Krebs, the President of the Oregon Association, are apparently determined to stand by their agreement, and to hold out sturdily for 30 cents, but there is evidence that outsiders are unloading at 20 cents to 22 cents, although it seems that only limited quantities can be bought at such prices. An important element in estimating the possibilities of the future is found in the fact that the Oregon pool, launched with such a loud flourish of trumpets, is not legally constituted, and has for its basis only the promises of its members, which can be repudiated at the will of each individual. Mr. Durst is very strong in his faith in the honour of his colleagues, and has backed his confidence by a bet of 5,000 dollars (£1,000) with one of his opponents. The final issue of the present crisis is almost impossible to forecast. At the moment, it is clear that the market has very little real strength. The future hangs upon events that the most experienced cannot decide upon. The fight is hard and stubborn, and just now it seems as if "bears" and "bulls" are pretty equally matched. I cannot tell which will win, but my best wishes are with those who are battling for their freedom from the oppression of the schemers who have so long controlled the hop market solely for their own advantage.

The New Crop.

is variously reported upon. The desires of the reporters doubtless influence their views, but I am inclined to accept as correct the following extract from a letter of a reliable correspondent, who says, under date June 16, "The crop conditions of the U.S.A. are excellent, and every indication promises a bounteous yield. While some of our yards looked poorly earlier in the season, at the present time the weather is all that can be desired, and the backward vines are coming forward wonderfully."

Nuremberg.

The market continues to be generally as firm as when last reported. But, with a slight falling off of the volume of business, it is hardly surprising that we hear of occasional instances of small concessions being offered to induce buyers to act. These cases do not, however, affect the normal condition, which is satisfactory to holders, especially when the advancement of medium qualities into the first rank is taken into consideration. This is affected by the absolute exhaustion of all the choice parcels. Exportation is practically suspended by the maintenance by local demand of the high range of prices, which are further supported by occasional orders from Bohemian buyers.

Plantation Reports.

are generally favourable, particularly in some parts of Bavaria. In the colder regions of Wurtemberg, Bohemia, etc., the progress and condition of the plants are not quite so favourable, and vermin is heard of in certain districts. Nevertheless, the crop prospects are, as a whole, sufficiently satisfactory to encourage planters to expect a full harvest, unless unforeseen hindrances should arise.

Belgium.

Consequent upon the excellent reports received from the country, the speculative market for 1905 crop has been flattened. For October-November delivery Alosts are now quoted as low as 75 francs, and Poperinghes 67½ francs. But the demand for spot hops is active, and inquiries are being again sent to England for supplies, the local stocks being practically exhausted. Therefore holders maintain their position very firmly, and are easily able to realise the prices demanded, that range from 127½ to 147½ francs. Evidence of the trend of affairs is found in the increased imports of hops into Belgium during May last. The total was 2,100 cwt., as compared with 1,150 cwt. in May, 1904. The returns of exports for five months ending May 31 also provide similar evidence. In 1904, Belgium shipped to various countries (principally to England) 33,300 cwt., this year her shipments have not exceeded 6,000 cwt. Another significant fact is notable: shipments to England in May last were less than 150 cwt., while our shipments to Belgium amounted to about 570 cwt.

EAST ANGLIAN NOTES.

Thunder storms, accompanied with quite tropical downpours of rain, have been frequent during the week in the Eastern Counties, the heaviest occurring in Lincolnshire and North-West Norfolk, and although considerable damage has been done by the lightning to houses and farm buildings, as well as valuable lives lost and stock killed, the earth was most grateful for the rain, the thirsty soil drinking it up most greedily, so that in a short time all signs of the storm have vanished from the land, except that cereals and other crops seemed to stand forth more boldly, and on examination of the wheat ears one could not but notice how the moisture had helped to develop the "fecundated ovary" to the form of a kernel or grain. For the wheat and other cereals the rain has come most opportune, and the prospects for a good harvest are most promising.

The all-absorbing topic in East Anglia to-day is the hay harvest, and although the rain has somewhat hindered the work this past week, a great deal of hay is now cut. As regards grass, it is only here and there in the Eastern Counties a meadow can be seen with tall and dense bottom growth, so that the general yield of hay will be light this season, as the moisture came too close on the flowering season of the grasses to allow of the thickening up. However, the clovers and sainfoins are particularly heavy in some districts, and scarcely anywhere is a really bad crop to be seen. In speaking of the hay-making season, the writer heard, while travelling through Essex and Suffolk this week, many complaints by farmers, who were debarred from visiting the Royal Agricultural Society's show at Park Royal because the time unfortunately was chosen at a period of the year when they were compelled to remain on their farms to see that not a day or hour was lost in securing their hay. These farmers state that they would much appreciate a run up to London with their wives and daughters, not only to see the show, but secure a holiday "between times"; but for some years now this premier show has been held at the most inconvenient time of the farmers' year.

The Parliamentary Committee of the County Council report that they received a deputation from the Essex Education Committee with reference to the joint report by Dr. Dyer, Dr. Thrush, and Mr. Dymond as to the effect of the weather upon the quality of milk and the use of preservatives. The deputation alleged that the report was unfair to dairy farmers, and called attention to a circular recently issued by the Board of Agriculture.

British Possessions

beyond the Seas

AND THEIR

London Representatives.

NOVA SCOTIA.

Offers advantages to British Agriculturists with moderate capital. Improved Farms at Low Rates. Fertile Lands. Famous Fruits. Enormous mineral deposits of Coal, Gold, Silver, Iron, Copper, Lead and Tin. Climate temperate and healthy. Easily accessible to all the principal markets.—Full information supplied by the Agent-General for Nova Scotia, MR. JOHN HOWARD, 57a, Pall Mall, London, S.W.

Doncaster Show.

The weather was not altogether kind to the Doncaster Agricultural Society's show at Doncaster last week, rain falling during a part of the proceedings; and though the attendance did not seem to be greatly affected, we are afraid the wet kept several likely visitors away. This was a pity, for a really splendid show was on view on the famous racecourse, which makes an ideal showyard. The entries did not, so far as numbers are concerned, come up to last year's total, being 882 as against 911, but there was no doubt but that the quality all round was the best ever seen here, and did credit to the exhibitors, and, of course, the society.

The following officiated as judges:—Shorthorn cattle and sheep: Mr. J. J. Stamper, Nunnington, York, and Mr. H. W. Woods, Scotland Farm, Worksop; Channel Island cattle: Mr W. Nuttall, Uttoxeter; hunters: Mr. A. Goodman, Oakham, Rutland, and Mr. A. Knapton, Haldenby Park, Doncaster; hackneys: Mr. Jno. Atkinson, Garton, Driffield, and Mr. S. B. Carnley, Alford, Lincolnshire; agricultural horses: Mr. W. Boast, Holme House, York, and Mr. T. Freshney, South Somercoates, Louth; butter and eggs: Mrs. Demaine, Catgill House, Bolton Abbey.

Good as have been previous displays of Shire horses, this year's was generally ascribed the best. The entries were numerous, and the quality was high. In the class for stallions foaled in 1903, the judges selected Messrs. Forshaw's Albion Magnate, a massive stallion, with length and depth of build, whilst the ten brood mares were of such uniformly excellent quality that the judges felt compelled to increase the number of prizes. Here Mr. Jackson led with his well-known seven-year-old brown mare Enfield Poppy. Mr. Kearns's Knottingley Fuchsia, first-prize winner at the Shire show this year, having to be content with second prize, whilst Summer Queen, with which Mr. Jowett came third, was first at the Bath and West at Nottingham. Amongst the agricultural foals, Mr. Jackson was a good winner with his bay filly by Knottingley Regent, the second to her being Messrs. Forshaw's black colt foal by Lincoln Lion. They are both of good substance and quality, and stand very correct on the ground. The class for yearling agricultural colts was a most meritorious one, and was headed by Sir W. H. Cooke's Redlynch Forest, a colt of large proportions, with a beautiful appearance. Second to him was another promising colt belonging to Mr. Welch, which, though at present somewhat backward in condition, is sure to be heard of again, its dam being Beauty's Queen. Yearling fillies had a very easy winner in Mr. Jackson's bay, a daughter of the first-prize brood mare Enfield Poppy, and, like her mother, full of quality. She was also awarded the Shire Horse Society's medal. The two-year-old competition brought to the front Sir W. H. Cooke's Folville Model, second to her being Mr. Jackson's bay filly, a very useful, nice foal, and, though as well balanced on her feet as her rival, is not quite so massive in build. Messrs. Forshaw took first prize in the three-year-old filly class with a winner at the Shire horse show. Mr. Jackson's bay filly was second this year, whilst the hackneys were not numerous, but the quality was very high. Mr. T. Brigham's three-year-old Golden Duke and Mr. Fewson's Hedon Comedian, both sires of an extremely useful type, were the only two exhibits in the stallion class, the only hackney stallions shown, in fact. Brood mares, with foals, received a better representation, and the chief winner was found in Mr. Wrightit's Londesborough May Queen, with a foal by Polonius. A brood mare of the right sort, too, was Paddock Queen, a London winner, here placed second, though she has the honour of being reserved for the Hackney Society's silver medal, the actual trophy going to Mr. R. W. Jay's Knowle Halma, a six-year-old possessed of His Majesty's blood, and placed third in the riding class. A nice little group of yearlings had Mr. Thomas Hall's Garton Duke filly, Copmanthorpe Duchess, at their head, she thus repeating her London and local victories; and a very good second was Camblesforth Swell, a Bawtry-bred son of Camblesforth Rosador. A filly also took the lead in the two-year-old class of three exhibits namely, Mr. Stephen's Otley and Selby winner, Empress Maud, whilst the sole prize-taker in the three-yearold class was Mr. Thomas Hall's Copmanthorpe Princess. Mr. S. R. Tennant's fine-actioned bay Authority, bred on the Yorkshire Wolds, came out top of the riding class, while Morning Glory, a seven-year-old, which won at Nottingham recently, and brought all the way from London, took second rank in no mean fashion, as befits one got by Rosador and bred by Mr. J. Harrison, of Driffield. In harness, however, Authority has had to give place to Mr. R. W. Jay's Towthorpe Performer, whose performance between the shafts impressed the judges more. Mr. James Jepson's six-year-old Fashion, another nice mover, was the pick of both the "under 15 hands" driving class and the pony riding class under 14.2. The hunter section, like that of hackneys, suffered to some extent by the absence, at the Royal Show, of animals which otherwise might have been seen at Doncaster. It was disappointing to find but two exhibits placed before the judges in the tenant farmer class, as though, in the hunting countries sacred to the Badsworth, Lord Fitzwilliam's, and Lord Galway's hounds, the interest were actually so limited. True, the class contained four more entries, but they did not come into the ring for judgment. The two and three-year-olds come near to being the best of the collection, the winners in each case having plenty of character and quality. A huge proportion of the credit belongs to Mr. F. B. Wilkinson, exhibitor of a first and second prize-taker, as well as breeder of the winning two-year-old, Ready-Made, sired by Squadron Leader, and shown by Mr. Oliver Quibell. Second to Mr. Wilkinson's Johnny Morgan three-year-old gelding (to which was awarded the Hunters' Improvement Society's silver medal) stood Mr. Wickham-Boynton's well-known Fisherman. The filly silver medal went to Mr. Quibell's yearling chestnut filly Barbe 2nd, a daughter of Rollcall, bred by Mr. Briggs, the winning yearling in the class, like the winning foal, being another of Squadron Leader's progeny, shown by Mr. Wilkinson, and the second prize-taker one of Red Eagle's stock, bred by and belonging to Mr. W. B. Swallow, of Ulceby, Lincolnshire, who has also second place for his bay Wales foal.

The cream of the hunters, in most respects, however, were in the five-year-old class—all well-built, stylish-looking specimens of the breed, with powerful limbs suitable for getting across country in the proper style. Mr. Joseph Watson, of Woodhall, Wetherby, was the owner of the winning brood mare, and also secured the gold medal.

Some well-known cattle breeders who usually support Doncaster were exhibiting at the Royal, and consequently the section was hardly so good as usual. Such well-known breeders of shorthorns as Lord Middleton and Mr. George Harrison, for instance, were at Park Royal, and consequently they were not this year represented at Doncaster. The two bulls that were victorious in the aged class were both typical shorthorns. The first came from beyond the Borders, but the second belonged to Mr. Revitt, of Rotherham, and was bred by Earl Fitzwilliam. The best of the two-year-olds also came from Scotland, and belonged to the same owner, Mr. Gordon, while Lancashire supplied the second. The judges marked their appreciation of the merit of this class by a lavish distribution of decorations. The yearlings were led by Earl Manvers's shapely roan Mikado, followed by Merry Prince, a promising son of Merryman, and belonging to Mr. Sowerby, of Cumberland. Between the two same exhibitors and in the same order were divided the honours in the aged cow class. So uniform in quality were they that the judges could not agree on their merits. The referee who was called in gave his verdict in favour of Lord Manvers' red and white three-year-old, Lady Dorothy 39th, by the well-known sire Scotch Thistle. She is full of shorthorn character, and beautifully moulded. Mr. Sowerby's five-year-old roan Peggy Sowerby, which was second, also possesses shape and depth, but is rather patchy, a defect which judges are making a strong effort to have remedied. Lady Isabella Battie Wrightson took first honours amongst the three-year-olds with the beautiful roan St Leger, whilst the pick of the two-year-old heifers was Mr. Sowerby's Fasthorpe Gem. She is a sweet heifer, standing and walking well, and quite the best female shorthorn on the ground.

Sheep are never strong at Doncaster, although She is a sweet heifer, standing and walking well, the case a year ago, and the display was a fairly good one.

Presentation to Mr. John Thornton.

A noteworthy gathering of Shorthorn breeders from all parts of the world assembled on Tuesday evening to honour Mr. John Thornton, the well known auctioneer, and present him with a portrait in oils of himself. The Wharncliffe Rooms of the Great Central Hotel had been engaged for the occasion, and Colonel Sir Nigel Kingscote presided over an eminent company, which included the Earl of Jersey, the Earl of Northbrook, the Earl of Feversham, Lord Middleton, Lord Brougham and Vaux, Lord Burnham, Lord Barrymore, Sir Walter Gilbey, Sir Ernest Clarke, Sir H. F. De Trafford, Sir Jacob Wilson, Sir John Gilmour, Mr. F. J. S. Foljambe, Hon. William McCulloch (Australia), Colonel Henry, Colonel Scoby, Captain Duncombe, Captain Harrison, the Hon. Leslie Combs (Kentucky), Mr. E. N. Casares (Argentina), Mr. Walpole Greenwell, Mr. P. L. Mills, Mr. Martin J. Sutton, and Mr. J. P. Cross.

After the loyal toasts had been honoured in a hearty fashion, Colonel Sir Nigel Kingscote, before formally unveiling the painting, proposed the health of Mr. Thornton, and, in doing so, briefly traced the career of the guest of the evening. Sir Nigel took the opportunity of reading the following letter from Sir Dighton Probyn:—

> I have shown your letter to the King, and I am commanded by his Majesty to say he hopes you will make a point, when presenting the testimonial to Mr. Thornton on the 27th, to let him know how thoroughly satisfied his Majesty has been with the way Mr. Thornton has always conducted the many sales he has had charge of both at Sandringham and Windsor for many years past. The King was very glad indeed to hear of the testimonial having been got up, and of the large number of subscribers to it, this proving beyond any doubt the esteem in which Mr. Thornton is generally held and how highly his services are appreciated in the agricultural world.

Sir Nigel then referred to the career of their guest, and paid a tribute to Mr. Thornton's life work, which had given so much encouragement to agriculturists. The gentleman they were met to honour was known all over the world, and his conduct in business had been very much to the advantage of breeders of animals everywhere. The gift, Sir Nigel said, took the form of a fine portrait of Mr. Thornton, by Mr. A. S. Cope, A.R.A., to which there were over nine hundred subscribers. The toast was received with acclamation and musical honours.

Mr. Thornton replied with deep emotion, his voice frequently faltering as he thanked his friends for this generous gift. He traced the progress of breeding during the last thirty or forty years, as proved by the prices resulting from the sales in which he had been called upon to take an active part. He thanked his friends for their generous recognition of the labours of a patient, honest, and upright life. Far beyond title or wealth was the appreciation of one's fellow men, and he was happy to discover that he enjoyed that. (Cheers.)

The Earl of Jersey, in proposing "The Visitors," declared that he could not imagine a prouder position than that which Mr. Thornton filled at that moment, with many friends and admirers from at home and abroad gathered around him, and having just received a meed of honour from the King of England. Mr. Thornton, too, deserved recognition outside agricultural circles, for he had been the means of attracting a great many visitors to this country, and of enabling those visitors to take away with them some specimens which perhaps we were sorry to lose.

The Hon. Leslie Combs, the Hon. W. McCulloch, and Mr. E. N. Casares responded, and there were several other speeches of marked interest. Other toasts followed, but the remarkable feature of the proceedings was the enthusiasm which prevailed throughout the evening, clearly showing the high position to which Mr. Thornton has attained in agricultural circles, and the esteem he enjoys of his fellow men.

In connection with an outbreak of typhoid at the village of Great Horwood, Bucks, an analysis of samples of water has called forth the comment from the analyst that "the water is a very bad specimen of drinking water; but, by reason of the nitrates it contains, it would be of some value as liquid manure."

By a fire which occurred on Sunday morning on the farm of Mr. Thornton Foster, at Crosby-le-Moor, near Scunthorpe, four straw stacks, one hay, and part of a clover stack were destroyed. The farm is on the Trent side estate of Sir Berkeley Sheffield, Bart., and his steam fire engine at Normanby Park succeeded in saving the buildings and house.

Harvest Weather.

The "Mark Lane Express" Special Three-Day Forecast.

1, Essex Street, Strand, 12 Noon, Monday, July 3rd, 1905.

GENERAL PREDICTION.

The general pressure distribution and movements are favouring a fairly normal July Westerly type of winds and weather over the British area, with occasional short spells of rain and cloud over local areas. The general sequence is:—At first, fair or fine, and mild with Westerly to South-Westerly breezes; some local showers. Later, fair and warm in the centre, South and East; fair and mild to cloudy, and some showers chiefly in the North and West. Finally, some passing showers over most parts to fairer. The wind will be mostly W. to S., S.W., and N.W., and moderate.

LOCAL PREDICTIONS.

No 1.—Scotland:—At first mostly fair; later fair to cloudy and some showers chiefly in the West and North; finally, some local showers, more generally distributed to fairer; temperature mild to locally warm.

,, 2.—England (N.E.) and part of Scotland:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire (N. & E. Ridings).—**Similiar to No. 1, omitting the showers in the West and North.**

,, 3—England (East):—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.—**Fair to cloudy with some local showers; then fair and warm; finally fair to cloudy; some local thunder or passing showers to fairer; wind, W. to variable and S. to S.W. and W.**

,, 4—Midland Counties:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford, Rutland, Shropshire, Stafford, Warwick, Worcestershire, Yorkshire (West Riding).—**Similar to No. 3.**

No. 5.—England (South):—Middlesex, Berkshire, Kent, Surrey, Sussex Wiltshire, Channel Islands, Hampshire.—**Similar to No. 3.**

,, 6.—Ireland.—Fair to cloudy and some showers; later freshening winds and showery to fairer; finally, fair to cloudy; wind, W. to S. then S.W. to N.W.; temperature mostly mild.

,, 7.—England (North-West) and North Wales. Cheshire, Lancashire, Westmoreland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.—**Fairer and mild; later fair to cloudy and warm; finally some passing showers to fairer; wind, W. and N.W. to S. S. W. and W.; moderate to fresh.**

,, 8.—England (South-West) and South Wales:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.—**Fair to cloudy and mild with some local showers; later, fair to cloudy and warm; finally some showers to fairer; winds as in No. 3.**

Age of Moon—Two days.

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Monday, July 3rd.

GENERAL INFERENCE. The high pressure system in the South-West appears to be moving slowly on an easterly course. During the ensuing 24 hours the conditions over our Islands generally will be mainly under its influence, but the slight irregularities of pressure over England and the backing wind in the West of Ireland point to locally unsettled weather.

SCOTLAND, N. and E. and ENGLAND, N.E.—Light to moderate breezes, mainly Westerly; generally fair or fine; mild.

ENGLAND, E., MIDLAND COUNTIES, and LONDON AND CHANNEL.—Light to moderate South-Westerly and North-Westerly breezes; generally fair or fine, but local thunder showers; mild.

SCOTLAND, W.—Same as Scotland N.

ENGLAND, N.W. (and N. Wales) and ENGLAND, S.W. (and S. Wales).—Same as Midland Counties.

IRELAND, N. and S.—Light to moderate Westerly to Southerly breezes; fair, cloudy weather, occasional showers; mild.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—English wheat firm but quiet through scarcity. Foreign held at Monday's rates, but demand small. South Russian quoted at 31s 6d to 36s; Persian, 30s to 31s 6d; Plata, 32s 6d to 34s; No. 2 hard winter, ex ship, at 34s 9d; red Kurrachee, at 30s 6d; new No. 2 Club Calcutta, ex ship, to arrive, at 32s 3d. Flour steady, quiet, at late rates. Hungarians quoted at 31; Iron Dukes, ex ship, to arrive, at 20s 9d, landed at 21s 3d. Maize firm. Fair demand, at 3d to 6d advance over Monday. Mixed American, ex ship, to arrive, quoted at 24s to 24s 6d; and River Plate, at 23s 6d to 24s, and landed at 25s. Barley dull and in limited demand, at prices rather favouring buyers; Odessa, ex ship, quoted at 19s 6d, and landed at 19s 9d. Oats: Sellers ask Monday's rates, but demand not large enough to test values. Common sorts quoted at 14s 6d to 15s 3d.

Mark Lane, Friday.—English wheat supplies exhausted. Foreign, through the Russian scare, sellers hold for 3d to 6d more money, but buyers do not follow except in limited quantities. South Russian quoted at 32s, 36s 6d; No. 2 Club Calcutta at 32s 6d to 32s 9d. Flour firmly held, but quiet. Hungarian quoted at 31s; Pittsburg best at 30s 9d to 31s; Australians at 23s 6d to 24s. Maize firm, with a moderate business passing at fully late rates. Mixed American, ex ship, quoted at 23s 9d, and La Plata, ex ship at 23s 9d to 24s. Barley firmer, but not much business passing. Odessa ex ship to arrive quoted at 19s 6d to 19s 9d. Oats: Sellers ask more money, which checks the demand. Common sorts quoted at 14s 9d to 15s 6d.

COUNTRY.

Ashford, Tuesday.—Trade very quiet, and attendance small. Wheat, 33s to 35s; English feeding barley, 27s to 29s; foreign grinding barley, 21s; mazagan beans, 30s to 32s; tick beans, 33s to 35s; new flat maize, 26s; round maize, 26s to 28s; black oats, 20s to 23s; white oats, 21s to 24s per qr. Flour: Whites, 31s; seconds, 28s; scaling, 26s per sack.

Banbury, Thursday.—Wheat, red, 32s to 33s per quarter; barley, 25s to 28s; beans (new), 30s to 31s; (old), 32s to 34s; oats, 19s to 23s; peas, 27s to 30s; flour, 26s to 30s per sack.

Berwick, Saturday.—Small attendance, with little grain of any description on offer. Prices unchanged. Barley, 25s to 26s 6d; oats, 21s to 23s.

Birmingham, Thursday.—A very small attendance at market, and only a small and quiet trade, sellers being very firm in prices. Scarcely any English wheat offering, and value of same may be quoted at about 13s per bag (106). Foreign wheat quotations: Plate wheat, 32s to 33s per quarter (496lb.); Russian, 32s 6d to 35s per quarter; Indian, 31s 6d to 32s 9d per quarter, all at Sharpness. Plate maize is 3d dearer at 24s per 480lb. at Bristol; flat maize, 24s per quarter, also at Bristol. Grinding barley is unchanged at 19s 9d per 400lb. at Sharpness. Oats very firm at 21s 6d per 312lb. Beans, 13s 3d per bag (196lb.), delivered Birmingham.

Brighton, Thursday.—Quiet trade and small attendance. Wheat trade over for the season; only one or two samples offering. Barley, 28s to 33s; grinding ditto, 21s to 22s; English oats, 19s to 22s; peas, 29s to 30s; beans, 33s to 34s.

Bristol, Thursday.—There was rather a smaller attendance on our market to-day; no English wheat offering. Foreign firm and unchanged. Maize 3d dearer. Barley and oats unchanged. Flour quiet but firm.—GRACE BROTHERS.

Bury St. Edmunds, Wednesday.—An indifferent attendance, farmers being anxious to make the most of the brilliant weather for securing the hay crop. Wheat offering only in moderate supply, maintained late prices of 33s to 34s per qr. Cakes quiet trade, at full prices, with little inquiry. Millers' offals in good demand. Maize firm. Flour unaltered.

Cambridge, Saturday.—There was a thin attendance, and a few samples of wheat on offer, for which farmers ask extreme prices. Red wheat, 32s to 34s, and white up to 34s per 504lb. Spring corn scarce, and quite as dear.

Canterbury, Saturday.—Trade slow, but prices well maintained. Wheat, 34s to 36s; oats, 20s to 22s; grey peas, 32s to 33s; tick beans, 32s 6d to 34s; mazagans, 30s to 32s per qr.

Chelmsford, Friday.—Only a few samples on offer, which sold at from 33s to 34s 6d into mills.

Chester, Saturday.—Poor attendance, and trade quiet. No change in price to note for English grain. Egyptian beans 6d per qr. dearer on the week. Quotations:—Wheat, white and red, 4s 7d to 4s 9d per 75lb.; barley, grinding, 3s 3d to 3s 6d per 64lb.; beans, 5s 9d to 6s per 80lb.; Egyptian beans, 32s 6d to 33s per 480lb.; oats, new, 2s 9d to 2s 11d; ditto old, 3s 2d to 3s 4d per 46lb.; Indian corn, new, 13s to 13s 3d; ditto old, 13s 3d to 13s 6d per 240lb.

Chichester, Wednesday.—White wheat, 34s to 34s 6d; red ditto, 34s to 34s 6d; grinding barley, 20s to 23s; English oats, 18s to 23s; maize, 25s to 26s; flour, 27s to 28s. A very thin attendance, practically no samples on offer, and less trade than usual even for this time of the year.

Colchester, Saturday.—There was hardly anything offering in the way of wheat here to-day, and values were nominally unchanged. Beans and oats steady.—JOSEPH WILES AND SON.

Coventry, Friday. The attendance at market was but a moderate one. Prices ruled as last week. English oats scarcely obtainable. Prices: Wheat, 12s to 13s 6d per 186lb.; barley, 29s to 33s 6d per 448lb; oats, 23s to 25s per 352lb.; beans, 12s 6d to 13s; peas, 11s 6d to 14s per 196lb.

Derby, Friday. Wheat was in scanty supply, and there was only a quiet trade at last week's prices. No change in spring corn. Quotations: New white wheat, 34s to 35s; red, 33s to 35s; malting barley, 25s to 28s; beans, 32s to 33s; oats, 20s to 21s.

Devizes, Thursday. The market to-day was practically nil. Only two samples were on offer, and neither here nor at Salisbury on Tuesday was a single fresh sack brought in, a circumstance without parallel within the memory of the present generation. Prices for all descriptions of corn were generally about the same as last week, except oats, which were getting dearer. Black oats, 4s per quarter. The following were the quotations: New wheat, 10s 6d to 12s 6d; secondary, 13s to 16s; old barley, 24s to 25s, secondary, 20s to 24s; rye, 22s to 24s; old black oats, 19s to 21s; white ditto, 19s to 20s; malting barley, 26s to 32s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to 30.

Doncaster Saturday. Only a moderate attendance, and supplies small, but a firm market. English wheat scarce and difficult to buy, last week's prices being fully maintained. Foreign wheat made an advance of 6d to 1s per qr., and the demand was chiefly for Indian. Beans and maize were also dearer. Other things unchanged.

Dorchester, Saturday.—Not very large attendance today, and, for a second week in succession, there was nothing in the way of home-grown wheat offering, and holders of foreign declined to do business except an advance was given, which buyers had to concede. Barley also realised more money to the extent of 3d to 6d per quarter. Maize was also a very firm trade at prices tending upwards. Feeding stuffs generally held for full values, despite the fall, there being by no means a large demand just at present.

Dublin, Friday.—Wheat, 18s to 20s; barley, grinding, 10s to 12s; malting, 18s 6d to 20s; oats, 11s to 14s 6d; oatmeal, extra pinhead, 11s 6d to 13s; oats, 10s to 12s 6d; pollard and bran, 6s to 6s 6d.

Exeter, Friday.—Trade slow; English wheat scarce and unchanged; foreign firm. Russian sorts rather dearer. Barley, 3d to 6d dearer. Maize firm. Oats unchanged. Flour steady. English wheat, 4s to 4s 3d; superfine flour, 26s to 28s; fine, 23s 6d to 26s.

Glasgow, Wednesday.—There was the usual attendance at our corn exchange. Wheat 3d dearer and flour firm, with no alteration in prices. Indian corn, beans, and oats unchanged. Canadian per sac 3d dearer on the week. Oatmeal 6d higher on the week.—GIBSON AND CLARK.

Glasgow, Friday.—Market generally quiet. Wheat steady but slow. Flour dull, yet held for full rates. American mixed corn, 14s per 280lb. Maize unchanged. Oats quiet, but prices not quotably lower. All feeding stuffs quiet, and prices unaltered. Oatmeal steady.

Grantham, Saturday.—An average attendance, but the market was extremely quiet. There were a few inquiries for wheat, and best samples changed hands at 33s to 34s per qr. Practically no business was transacted in any other department.

Hereford, Wednesday.—A holiday tone pervaded at the market, in consequence of the hay harvest. There were no samples of English grain on offer, and values remained nominally unchanged. Maize was 6d per qr. dearer on the week. Wholesale quotations: Wheat, 3s 10d to 4s per 62lb.; barley, 2s 9d to 4s per 56lb.; oats, 2s to 2s 6d per 46lb.; beans, 3s 6d to 3s 8d per 65½lb.; maize, 3s to 3s 3d per 60lb.; vetches, 4s 6d to 6s 6d per 65½lb.

Ipswich, Tuesday.—A few samples of wheat were offering, for which the demand was quiet at last week's prices of 33s 6d to 34s per qr. Feeding corns and stuffs were a quiet trade, but prices are fully maintained. Oats at 21s to 23s, maize at 25s 6d to 26s, and grinding barley at 24s to 27s per qr. Beans, peas, and Indian corns firm. Oil cakes: Linseed steady, at £8 to £8 5s, and cotton at £5 5s per ton. Middlings firm. Bran quiet, at £4 10s per ton.

Gloucester, Saturday.—There was a stronger tone in the trade owing to Russian news. English wheat unquotable, as there is practically nothing offering. Foreign in moderate demand at 6d advance. Barley and maize strong, and 3d to 6d dearer. Oats rather firmer.—WAIT, JAMES, AND CO.

Leeds, Tuesday.—The weather since last Tuesday has been fine and hot, and more rain is desired in many districts. Large world's shipments keep the trade in check, few people caring to increase stocks on the eve of harvest in American and many parts of Europe; nevertheless, holders of wheat are very tenacious and the business doing to-day is at full prices. Maize, beans, and oats rather firmer.—DUNNS AND CO.

Leeds, Friday.—English and foreign wheat firmly held at Tuesday's full prices, best American descriptions being the turn dearer. No change in barley, beans, peas, oats, maize, flour, or other articles.

Leicester, Saturday.—Fair average attendance of buyers and dealers, with restricted supplies of home-grown wheats, which met a slow sale. Red wheat, 32s to 34s; white wheat, 33s to 35s per 36 stones; grinding barley unaltered; beans, 32s per 38 stones; fine oats, 22s to 24s per 26 stones.

Lincoln, Friday.—A quiet market, few samples of grain of any description being on offer. Of English wheats there are insufficient to test values. No barley was shown. Oats were a trifle easier. Beans slow at unaltered rates.

Liverpool, Friday.—Wheat: There has been a moderate attendance at the market, but wheat meets a very fair trade, and values are generally ½d dearer. Plate sorts are becoming scarce. Flour, foreign and local milled sorts are firm, with a moderate inquiry for the former, but no change is made in values. Maize, mixed, is firm, unchanged, owing to scarcity, but there is only a small inquiry. Plate is also firm at 1d advance, with a moderate inquiry. European sorts are quiet, but the turn dearer. Barley, malting, quiet, unchanged. Feeding firm, with less offering. Beans are occasionally 3d dearer for Saidis, owing to few offers from Alexandria, but quiet. Peas are quiet, without change. Oats rule quiet, and are occasionally ½d in buyers' favour. Oatmeal is very firm owing to scarcity, with a small demand.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday. — Not much home-grown wheat displayed at the market to-day, and the cost of it from last week, no change. Barley is a fair trade, as maize is dear. Oats are very firm for English, especially black, foreign as before. Beans and peas are dull, as demand is slack. In rye, hemps, tares, sergo, and millet no variation discernible.

Manchester, Thursday. — Market steady. English and foreign wheat unchanged. Flour fairly steady. Maize rather dearer. Beans very slow, and lower. Peas unchanged. Oats remain at the same level as last week for English, but Russian are lower. Barley and other cereals unchanged.

Newark, Wednesday.—About an average attendance. The market was very quiet, and there was hardly a sample of corn showing, certainly not enough to test values. Quotations: White wheat, 32s to 33s; red, 33s to 34s; malting barley, 25s; white oats, 20s to 21s; black, 19s to 20s; old beans, 35s; new, 34s per qr.

Newcastle-on-Tyne, Saturday.—At our to-day's market we had a fair demand for wheats of all descriptions at the full prices of last week. Maize again firmly held at 3d to 6d per quarter advance on last week's prices. Beans firmly held. Peas unaltered. A steady demand for oats, and late rates were maintained.—JOSEPH POLLARD AND CO.

Northampton, Saturday. Fair attendance, but trade slow. Wheat remained firm at late rates, 31s to 33s; barley, 24s to 32s; oats, 19s to 21s; beans, 31s to 33s; peas, 28s to 32s; flour, 24s to 28s.

Norwich, Saturday.—Wheat is still in small supply at our market to-day at late rates. Showery weather has prevailed during the past week, with severe thunderstorm on Tuesday, which did some damage. Temperature now higher, and hay harvest progressing favourably. Wheat, red, 33s 6d to 34s per quarter, weight 63lb per bushel imperial. Corn inspector's return for the week ending June 26, 1905: Wheat, 203, 31s 5d to 35s 4d.—J. ARTHUR MILLS.

Nottingham, Saturday. English wheats appear cleared; holders of foreign under the influence of the political horizon ask higher prices. Grinding barley steady sale at full rates. Oats and beans in poor supply, and prices rule in sellers' favour.—ROBT. HUBBLE.

Peterborough, Saturday.—The two or three samples of wheat at to-day's market made 3d to 6d more money. Spring corn all firm, though demand not active. Weather stormy and unsettled.—THOMAS HILL AND SON.

Plymouth, Thursday.—There was a small attendance on our market to-day. Wheat firm; maize 6d dearer; oats remained same, with barley 6d dearer.—ORLANDO DAVIS AND CO.

Reading, Saturday.—Small attendance and scanty supply; trade quiet at the following prices:—Wheat, 35s to 36s; grinding barley, 24s to 27s; oats, 20s to 23s; beans, 32s to 36s; peas, 28s to 31s.

Retford, Saturday.—A thin attendance, and a short supply of grain. Very few samples of wheat on offer, for which the demand was sluggish, without any quotable change in prices, which remained at 31s to 32s per qr.; Indian corn, 27s; flat maize, 26s per 34 stones delivered Retford; grinding barley, 24s; black oats, 18s to 19s; white ditto, 20s; English beans, 32s per qr. The growing crops are reported to be in excellent condition.

Ripon, Thursday.—English wheat firm at late rates. Grinding barley advanced 6d per quarter. A good attendance and a fair trade. English wheat, 32s to 33s; wheat, foreign, 32s to 36s; barley, grinding, 22s to 23s; barley, malting, 26s to 29s; oats, 18s 6d to 21s; maize, round, 26s to 27s 6d; maize, flat, 26s to 27s per quarter.

Shrewsbury, Saturday.—The following were the quotations:—Wheat, 14s to 14s 6d per 225lb.; oats, old, white, 16s to 17s per 225lb; new white, 14s to 14s 6d per 225lb.; peas, 11s 6d to 12s 6d per 225lb.; beans, 15s to 16s per 240lb.

Stamford, Friday.—A very thin attendance, and hardly any business doing. Wheat, 32s 6d to 33s; oats, 22s to 24s; beans, 32s to 34s. Maize firm at late rates. Feeding stuffs unaltered.

Sunderland, Saturday.—Limited supply of grain at this day's market, and there is no change to note in the prices of wheat, barley, or oats. Arrivals:—Coastwise: Nil; foreign, 11,311 quarters.—E. AND R. RICHARDSON.

Tunbridge Wells, Friday.—White wheat, 33s to 34s; red ditto, 32s to 33s; barley, 27s to 32s; grinding ditto, 19s to 23s; English oats, 19s to 22s; rye, 23s to 24s; peas, 31s to 36s; beans, 32s to 36s; tares, 48s to 56s; maize, 22s to 28s.

Warwick, Saturday.—Great scarcity of all English grain, and little change in price. Feeding stuffs rather dearer.

Winchester, Saturday.—English wheat practically exhausted in this district. Foreign firm, with upward tendency. Oats and barley quiet, and unaltered in values. Flour steady; demand at last week's full prices.—FEAR, COLEBROOK AND CO.

Wisbech, Saturday.—Small attendance at market. Very little English grain offering. Red, 33s to 34s. Oats firm; 20s to 22s. No change in other articles.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a small attendance and little business was transacted. Quotations: Wheat, 13s to 14s per 206lb.; English beans, 13s 6d per 196lb.; oats, 13s 6d per 198lb.

Worksop, Wednesday.—Small attendance, and very little grain on offer, farmers being busy with the hay harvest. White wheat, 32s to 33s; red wheat, 31s 6d to 32s 6d; secondary barley, 26s to 28s; grinding barley, 24s to 26s; white oats, 18s 6d to 21s 6d; black oats, 18s 6d to 20s 6d; flat maize, 24s to 26s; round maize, 26s to 28s per qr.

Yeovil, Saturday.—Home grown wheat of best quality, 31s 6d to 33s; secondary, 28s 6d to 38s; foreign wheat, 33s to 34s 6d; best barley, 26s to 30s; secondary, 22s 6d to 25s; oats, white, 16s to 22s; black, 18s to 21s; Irish black, 17s 6d to 19s; round maize, 24s 6d flat, 23s to 24s. Flour, quiet trade, superfine making 26s 6d to 28s; finer, 23s 6d to 26s. Meal and offal unchanged rates.

York, Saturday.—A very poorly attended market, and little wheat on offer. Prices remained unchanged. Fine white, 32s to 33s; red and mixed, 31s to 32s per qr. of 36 stones; feeding barley, 24s to 26s per qr. of 32 stones. Oats firm withotu change in price. White Tartary, 18s to 19s; black, 18s 6d to 19s 6d; white Garton, 19s to 20s per qr. of 24 stones; rye, 7½d per stone; beans, 10d to 11d.

FOREIGN

Hamburg, Saturday.—Prospects of the coming crop remain satisfactory in every respect, especially on heavy soil, whilst on light land more rain is needed. From the Saale and other barley districts in Germany, the reports are encouraging, and also from Austria and Hungary the outlook is most satisfactory. In the latter country cutting will commence about the middle of this month, and, with fine harvest weather, quality is expected to become very fine.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday. — With a continuance of fine weather the growing crops of grain are making satisfactory progress, and a good average harvest is in view. The hay crop, and particularly clover hay, in many places turns out rather deficient. Market quiet for wheat and rye, but firm for feeding stuff. Fine German wheat is getting very scarce; Saale and Mecklenburg is held at 33s to 33s 6d per 504lb. f.o.b. 80 Ko. River Plate on the spot costs 30s to 30s 6d; North and South Russian, July August, 28s 3d to 29s 6d; Australian near at hand 32s 3d per 480lb. c.i.f. Hamburg. Rye not much inquired after; 9 15-20 South Russian afloat is offering at 24s 6d per 480lb. c.i.f. Hamburg. There is a good demand for feeding barley, particularly for autumn delivery; and 60-61 Ko South Russian is selling at 16s 9d to 17s; parcels afloat are selling at 18s 3d to 18s 9d; 59-60 Ko Danubian, August-September, is offered at 16s 9d per 400lb. c.i.f. Hamburg. Maize in demand, with scanty sellers. River Plate on the spot and afloat is selling at 23s to 23s 6d; mixed American, August-September, 22s 6d to 23s per 480lb. c.i.f. Hamburg.—JOHN TAYLOCK.

Paris, Wednesday.—The tone of the country markets is weak, with unaltered prices. At the Bourse de Commerce wheat prices made a good show, and have gained from 5s to 10c. The price of flour continues to fall, and is now below prime cost. Rye: Nothing doing, prices nominal. Oats in good demand, tendency steady, due to the dry weather. Prices denote a slight recovery.—*Dornbusch.*

THE BALTIC.

Wheat cargoes were dull on June 29 and 30, but firm on Saturday. The news from Russia has, for the first time this year, sensibly hardened the market. Prices realised include 35s. per 492 lb. for fine Azima, 34s. per 492 lb. for Odessa Ghirka, 30s. 9d. per 480 lb. for Rosario, 31s. 3d.

per 480 lb. for Bahia Blanca, 31s. 6d. per 480 lb. for Australian, 31s. 6d. per 492 lb. for White Calcutta, 33s. 6d. per 480 lb. for No. 2 Northern Manitoba, and 33s. 6d. per 480 lb. for August shipment of new American red winter wheat.

Maize cargoes, after a good trade had been done in Argentine on passage at 23s. 6d. per 480 lb., come 3d. lower for that type. American are held for 22s. 6d. per 480 lb. on passage.

Barley cargoes on passage from Russia are held for 20s. per 400 lb., but Kustendje offers to ship in August at 18s., and it is doubtful if the Russian price is being paid. Oats have made 14s. 9d. per 304 lb. for a cargo of Vologda, and beans have realised 32s. 6d. per 480 lb. for a cargo on passage from Syria (Sidon).

The London Corn Trade Association c. f. and i. quotations for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian Wheat Contracts, are as follows:—No. 2 Club Calcutta, 32s. 6d.; Soft Red Calcutta, 31s. 6d.; Bombay Soft White Delhi, 32s. 6d.; Karachi Soft White Delhi, 32s. 6d.; Soft White Karachi, 31s.; Choice White Karachi, 31s. 6d.; Soft Red Karachi, 30s. 6d.—all per 492 lb.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 5 wheat (1 Adelaide, 1 Buenos Ayres, 1 Melbourne, 1 Port Pirie, 1 Sydney)—Total 5.

The sailings of grain and seed-laden vessels from ports-of-call for the week were 29 wheat (2 Antwerp, 1 Belfast, 6 Birkenhead, 2 Cardiff, 1 Cork, 3 Dublin, 2 Fleetwood, 1 Galway, 1 Great Yarmouth, 1 Hamburg, 1 Leith, 3 Limerick, 2 London, 1 Lowestoft, 2 Rotterdam), 1 barley (secret), 4 linseed (1 Dunkirk, 1 Greenock, 1 London, 1 Rochester)—Total 34.

Since January 1, 1905, the total arrivals have been 211 wheat, 2 flour, 2 wheat and oats, 1 wheat and linseed, 1 flour and wheat, 13 barley and wheat, 8 barley, 5 maize, 1 beans, 4 locust beans, and 28 linseed—Total 276.

Last year during the same time the arrivals were 109 wheat, 30 barley and wheat, 14 barley, 4 maize, 2 beans, 4 locust beans, 1 rye, 14 linseed and 1 canaryseed—Total 179.

EGGS.

(Price at 1s., except where otherwise stated.)

Wednesday.—Barnsley: 11 or 12. Boston: 14 or 15. Colne: 1s 6d per score. Dorchester: 9½d to 1s per dozen. Goole: 12 & 13. Hereford: 14 to 16. Holsworthy: 14. Keighley: 12 & 13. Kirbymoorside: 13 or 14. Knaresborough: 12 or 13. Louth: 16. Market Drayton: 13 to 15. Market Weighton: 15 to 16. Newton Abbot: 9d to 10d per doz. Northallerton: 13 or 14. Stockton: 11 and 12. Truro: 10d. to 1s per doz. Uttoxeter: 1s 5d to 1s 6d per score. Worksop: 1s 7d to 1s 8d per score.

Thursday. Axminster: 8d to 9d per dozen. Birmingham: 12 to 13. Brigg: 13 or 14. Driffield: 15 or 16. Devizes: 16 to 18. Evesham: 10½d to 11d per dozen. Kidderminster: 18. North Tawton: 16. Penistone: 15. Plymouth: 1s per dozen. Penzance: 9d to 10d per dozen. Ripon: 13 or 14. Scarborough: 12. Wellington (Salop): 1 5to 16. Wetherby: 12 or 13.

Friday.—Altrincham: 10. Ashburton: 9d to 10d per dozen. Barnstaple: 16 to 18. Camelford: 8½d to 9½d per dozen. Chester: 12. Congleton: 12. Crewe: 12. Derby: 13. Helmsley: 15. Knutsford: 12. Leyburn: 14. Lincoln: 14 and 15. Lostwithiel: 16. Macclesfield: 11 and 12. Nantwich: 13 and 14. Northwich: 12 and 13. Redruth: 9d per dozen. Runcorn: 10 and 11. St. Austell: 14. Stockport: 11. Tavistock: 14. Totnes: 10d per dozen. Otley: 12.

Saturday.—Appleby: 24 to 27 for 2s. Berwick: 9d to 10d per dozen. Bridgnorth: 14. Carlisle: 12 and 13. Doncaster: 12 and 13. Grantham: 12 and 13. Howden: 14. Ipswich: 12 to 14. Lancaster: 11 and 12. Malton: 13 and 14. Pontefract: 12 and 13. Retford: 1s 7d to 1s 8d per score. Richmond (Yorks): 12. Shrewsbury: 13. Skipton: 12 and 13. Stokesley: 13 and 14. Whitby: 13 and 14. Worcester: 12. York: 12 and 13.

MILK.

London, Saturday.—Week ending June 30. The supply of milk somewhat diminished, and, there being an increased demand, good prices were obtainable—viz., 7½d to 8½d per imperial gallon.—THE CENTRAL ASSOCIATION OF DAIRY FARMERS.

BUTTER.

(Prices at per lb., except where otherwise stated.)

Wednesday.—Barnsley: 1s to 1s 1d. Boston: 11d to 1s. Colne: 1s 0½d to 1s 1d. Dorchester: 9½d to 1s. Goole: 11d to 1s. Hereford: 1s to 1s 2d. Holsworthy: 11d. Keighley: 10d to 1s. Kirbymoorside: 9d to 10d. Knaresborough: 1s 2d to 1s 3d per 24oz. roll. Louth: 8d. Market Drayton: 11d to 1s. Market Weighton: 8d to 9d. Newton Abbott: 1s to 1s 1d. Northallerton: 1s 1d to 1s 2d per roll of 24oz. Stockton: 11d to 1s 0½d. Truro: 8d to 10d. Uttoxeter: 11d to 1s. Worksop: 1s to 1s 2d.

Thursday.—Axminster: 10d to 1s. Birmingham: 1s to 1s 2d. Brigg: 10d to 1s. Driffield: 9d to 10d. Devizes: 1s 2d to 1s 3d. Evesham: 10½d to 1s. Kidderminster: 1s. North Tawton: 9d. Penistone: 11d. Plymouth: 11d to 1s. Penzance: 8d to 10d. Ripon: 1s 2d to 1s 4d per 24 oz roll. Scarborough: 11d to 1s. Wellington (Salop): 1s to 1s 1d. Wetherby: 11d to 1s.

Friday.—Altrincham: 1s 2d to 1s 3d. Ashburton: 9d to 10d. Barnstaple: 10d to 1s 1d. Camelford: 10d to 11d. Chester 1s. Congleton: 1s 2d. Crewe: 1s. Derby: 1s and 1s 1d. Helmsley: 8d to 9d. Knutsford: 1s 2d. Leyburn: 1s 1d to 1s 3d. per 24 ounce roll. Lincoln: 11d to 1s. Lostwithiel: 10d. Northwich: 1s 1d. Otley: 1s 2d to 1s 3d. per 24 ounce roll. Redruth: 9d. Runcorn: 1s 1d to 1s 2d. Stockport: 1s and 1s 2d. St. Austell: 11d. Tavistock: 10d to 1s. Totnes: 9d to 10d. Macclesfield: 11d to 1s 1d. Nantwich: 1s 1d.

Saturday.—Appleby: 8½d to 10d. Berwick: 6d to 9d. Bridgnorth: 1s to 1s 2d. Carlisle: 10d to 11d. Doncaster: 11d. Grantham: 1s to 1s 1d. Howden: 9d to 10d. Ipswich: 1s to 1s 2d. Lancaster: 11d to 1s. Malton: 9d to 10d. Pontefract: 11d. Retford: 10d. Richmond (Yorks): 10d. Shrewsbury: 11d to 1s. Skipton: 10d to 1s. Stokesley: 9d to 10d. Whitby: 9d to 10d. Worcester: 10d to 1s 2d. York: 1s.

CHEESE.

Glasgow, Wednesday.—Supplies abundant, and owing to excessive heat, business curtailed. For anything outstanding 1s above top quotations asked. Cheddars, 44s to 48s; Dunlops, 42s to 48s per cwt. A few new Canadians are now reaching the market.

Newport, Wednesday.—A good supply; about ten tons pitched. A fair attendance and a good demand. Quotations: Cerphillies, 56s to 62s per cwt.; fancy dairies, 43s to 46s; truckles, 56s to 60s; doubles, 42s; Derbys, 56s to 58s.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Agriculturists up for the Royal Show at Ealing were agreed as to the over-average promise of the wheat and winter-sown beans and oats, but were not at all agreed as to the promise of spring-sown oats. Barley, if sown early, seems to have done well, but late-sown leaves a good deal to desire. Spring beans are not likely to be an average, and it is to be feared that this is the general opinion of spring oats also. The still close air has been wonderfully favourable for the blooming of the wheat, and a hot July should now give us a really fine crop of that cereal. The week has been very stormy in France, and vast acres of corn have been lodged by the heavy thunder rains.

The latest cabled estimate of the growing crops in America is as follows:—

	Bushels.
Winter wheat	428,011,000
Spring wheat	299,421,000
Total	727,432,000

The harvesting of winter wheat is in active progress, and about half the crop is probably secured. The spring wheat, on the other hand, has still to pass through a very critical period, and estimates of its eventual yield are liable to be very much out. The reports of the growing crops of oats in America are of a highly favourable description, but we have no fresh advices concerning barley or maize.

A telegram from Argentina, dated 1st inst., states that the area sown to wheat during May and June was 30 per cent. above that of the preceding season. The growth of wheat culture in La Plata is unquestionably a great fact, and the extension of the area goes on steadily from year to year.

The final report of the Indian wheat crop was published on June 26. A large area, 28,223,000 acres, was returned as devoted to the crop, but the yield, which is 35,250,000 qr. of 480 lb., is not at all good, to the acre that is to say. The Indian Government, in returning it as above an average, are speaking of the average yield for the past ten years, and not of the average yield per acre. An average yield per acre on the large area sown would have been about 42,334,000 qr.

Indian exports of wheat for the Indian shipping year ended March 31 are thus officially returned:—

	Tons.
1904-5	2,150,025
1903-4	1,295,566
1902-3	514,607
1901-2	366,091

The shipments for the new season, which began on April 1, are not expected to exceed a million tons, but as we are in considerable ignorance of the surplus left from 1904, any predictions are liable to be falsified. The shipments since April 1 have been on a rather liberal scale.

Supplies on passage on July 1 included the following quantities of wheat:—

	Quarters.
American	75,000
Indian	856,000
Russian	295,000
Argentine	650,000
Australasian	750,000
Various	50,000
Total	2,676,000

Last week's arrivals included 200,000 qr. from Australia. Of flour, 140,000 sacks are on passage.

Expectations of barley are as follows:—

	Quarters.
Californian	35,000
Russian	165,000
Smyrna	15,000
Various	20,000
Total	235,000

Of oats 370,000 qr., a good supply, is on passage. The expectations of maize rather exceed an average:—

	Quarters.
American	350,000
Argentine	500,000
Russian	20,000
Total	870,000

Other expectations embrace 251,000 qr. of linseed, 23,500 tons of cottonseed, and 27,500 tons of rice.

London returns for British produce are curious:—

	Deliveries. Quarters.	Sales. Quarters.
Wheat	437	736
Barley	1,655	none.
Oats	166	27

The demand for English wheat is so far in excess of supply that the warehouses and railway depots are being swept of their few remaining stores. The trade in heavy English oats is just now at an ebb, as indicated in the returns, but we must decline to believe that of 1,655 qr. of English barley arrived in town no sales took place. Perhaps the firms that have omitted to send in returns will supply them next week; or is it, as some allege, that so much business is now done by telephone that the averages are not the guide they used to be? Firms admittedly do more trade in their Mark Lane offices than they were wont to do, and these transactions are not within the authority of the market inspection.

The stocks of wheat in the U.K. on July 1, are thus estimated:—

	Quarters.
In farmers' hands	729,000
In merchants' hands	2,906,000
Total	3,635,000

These are very moderate holdings for the time of year.

The sales of British wheat at the statute markets since harvest have been below the average, and they are now at a very low summer ebb:—

This season, 1,576,000 quarters at 30s 7d per quarter.
Last season, 1,954,000 quarters at 27s 1d per quarter.

The improvement in price is gratifying. It is as much due to finer quality as to smaller offerings.

The sales of British barley have been liberal, and the price averaged, though not at all high, is fair, considering the increased competition among producers:—

This season, 1,117,000 quarters at 16s 10d per quarter.
Last season, 1,038,000 quarters at 16s 2d per quarter.

The sales of British oats have been as follows:

This season, 3,132,000 quarter at 24s 10d per quarter.
Last season, 2,71,000 quarters at 22s 1d per quarter.

The sales of oats have, of course, been much in excess of these market totals, this cereal is for the most part "placed" without market aid.

Of other British staples, beans, peas, and buckwheat command a fair price.

The imports of the United Kingdom last week were as follows:—

Wheat, 396,000 quarters; a good suppld.
Flour, 88,600 sacks; a small supply.
Barley, 87,000 quarters; small arrivals.
Oats, 227,000 quarters; heavy imports.
Maize, 172,000 quarters; a moderate arrival.

Shipments last week from Russia were very heavy, including 495,000 qr. of wheat, 181,000 qr. of barley, 385,000 qr. of oats, and 11,000 qr. of maize. June shipments from Russia of rye were 280.000 qr., and of linseed were 15,000 qr. The news of the spreading of disaffection in the Russian army and navy has influenced trade to some little degree, it being seemingly inferred that grain shipments may be interrupted. The shipments from Roumania last week were 106,000 qr. of wheat and 11,000 qr. of barley.

India last week shipped 284,000 qr. of wheat, 10,000 qr. of linseed, and 30,000 qr. of rapeseed. The total of wheat exceeded anticipations. Australasia shipped 18,000 qr. of wheat and 12,000 sacks of flour. Argentina sent off 235,000 qr. of wheat, 350,000 qr. of maize, 54,000 qr. of linseed, and 15,000 sacks of flour. The American shipments, other than of breadstuffs, last week were 30,000 qr. of oats, 26,000 qr. of barley, 3,000 qr. of peas, and 15,000 qr. of linseed.

The remarkably small exports of breadstuffs from America continue to be much remarked:—

AMERICAN BREADSTUFFS SHIPMENTS.

	Qrs.
1890	13,450,000
1891	18,727,000
1892	21,951,000
1893	21,950,000
1894	17,000,000
1895	15,950,000
1896	17,516,000
1897	20,928,000
1898	25,757,000
1899	21,716,000
1900	19,000,000
1901	22,200,000
1902	19,651,000
1903	11,939,000
1904	4,047,000
1905 (half year)	800,000

(Being at the rate of 1,800,000 qrs. for the year).

It is likely that after this month, however, exports will be much augmented, for the new crop of winter wheat, at all events, is ascertained to be considerable.

GAME AND POULTRY.

Smithfield, Saturday.—Good supplies, but a bad demand. Prices: Goslings, 4s to 4s 6d; country ducks, 2s 3d to 2s 9d; Aylesbury ducks, 2s 9d to 3s 3d; Surrey fowls, 3s to 4s; Essex fowls, 2s 6d to 3s; Lincolnshire fowls, 2s 6d to 2s 9d; Irish fowls, 1s 6d to 2s 5d; Russian fowls, 1s 9d to 2s; quails, 1s to 1s 6d; feathered pigeons, 7d to 9d; Bordeaux pigeons, 11d to 1s 2d; tame rabbits, 1s 4d; wild rabbits, 6d to 7d; live hens, 1s 6d to 2s 3d each; Australian rabbits, 6s to 8s per dozen; venison, haunches, 9d; forequarters, 3d per lb.

HOPS.

Canterbury, Saturday.—The plantations have a very promising appearance at present, but the bine is growing quite freely enough. A quiet trade in the market at from 95s to 97 per cwt.

Worcester, Saturday.—A few small sales are made, including some from growers who will take current rates. The reports from the plantations say hops go on satisfactorily, and no blight to hurt is noticed.—CHARLES FARAM AND CO.

TO-DAY'S MARKETS.

MARK LANE, MONDAY, July 3.

[FIRST REPORT.]

There was a firm tone at to-day's market for English, Russian, and Indian wheat, for Russian and Turkish barley, for English and Russian oats, for all sorts of maize, for Indian peas, for most sorts of beans, and for all sorts of buckwheat. Prices realised included 35s. for English white wheat (63 lb.), 36s. (64 lb.); 35s. to 36s. for Saxonka, 33s. to 34s. for Odessa Ghirka, 20s. for sound Russian feeding barley, 15s. for light Russian oats, 31s. to 32s. for Indian white peas, 27s. to 28s. for Indian dun peas, 24s. to 25s. for gram, 30s. to 31s. for French buckwheat, 29s. for Canadian buckwheat, and 17s. 6d. for Sorghum. Demand at former prices was rather improved for Australian and Argentine wheat. Almost the only articles which showed greater weakness from the close of June were oilseeds and oilseed cakes. There was scarcely any business doing, however, in English barley or oats, in Californian or Smyrna barley, or in lentils, millet, and Indian small pulse. Business on the new market was much interfered with by alterations and repainting.

CLOSE OF THE MARKET.

THE MARKET CLOSED FIRMLY FOR ALL STAPLES, BUT SALES WERE AT A SUMMER LEVEL ONLY.

THE FLOUR TRADE.

MARK LANE, MONDAY, July 3.

Some sellers of Town Households to-day accepted 25s. 3d., but the usual price was 25s. 6d. Country flour sold fairly well, and 26s. 6d. was paid for special samples from East Anglia. American at 30s. 6d. for best was dull and steady. Supply is very meagre. Kansas Patents were offered for August shipment at 24s. 6d. c.f.i. Australian, Argentine, and Hungarian sorts sold steadily at June's closing quotations. Pollard met with some inquiry at £4 per ton, but holders wanted £4 4s. Finest middlings touched £6 2s. 6d. per ton, there being very little foreign competition this summer. Other sales included paste flour at 21s. 6d. per sack, Cascadia at 25s. per sack, secondary grade whole meal at 190s. per ton, and Indian flour at 24s. per sack.

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club, St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Saturday at the close of the week's trade were :—

WHEAT (per cental).

No. 1 American	7s. 2d.	July delivery.
No. 2 Red Winter	6s. 11d.	,, ,,
,, ,,	6s. 10d.	Sept. ,,
,, ,,	6s. 10d.	Dec. ,,

MAIZE (per cental).

American	4s. 9d.	July delivery.
,,	4s. 8d.	Aug. ,,
,,	4s. 7d.	Sept. ,,

These are not official prices, but will, we believe, be found practically correct. Official quotations, we hear, are likely to be resumed very shortly.

The last three days of June trade showed decided firmness.

American wheat futures to-day are firm at 6s. 11d. per cental; those of maize at 4s. 10d. per cental. Maize finds a few speculative buyers, but the price asked for wheat futures practically stops forward business.

GRAIN AND FLOUR FACTORS REPORT.

Flour.—The demand continues slow without further change to report in prices.—GREENHILL BROS. (Belfast).

Offals. Bran unchanged; tendency easier.—GREENHILL BROS. (Belfast).

Flour. There is a better demand, with buyers showing some interest in New Crop American Winters, which are now held at 6d. per sack advance. Grain. Indian corn more plentiful, but firm at 14s. per 280 lb. Oats are inactive and rather easier. Barley and pease are scarce and 3d. per boll dearer. Beans are in small demand at full prices. Mill Stuffs. Bran unchanged, but Thirds are rather easier.—MCKINNON AND MCDONALD (Glasgow).

We have liberal arrivals of wheat. The trade is firm and prices are 6d. per quarter higher. Flour unchanged. Maize a slow sale at late prices. Barley and oats 3d. per quarter dearer.—COVENTRY AND CO.

Flour met an improved demand to-day at an advance of 3d. to 6d. over this day week.—T. S. MEDILL AND SONS, LTD.

Milling offals. There is an improved demand for middlings both fine and coarse. Bran and pollard unchanged.—JOHN BAWCOMB AND CO.

FEEDING STUFFS.

London, Monday.—Linseed cake: As is usual at this period, trade is very dull, but without any indications of prices easing for either now or future requirements. Undecorticated cotton cake: Demand is slow, and values barely maintained. Decorticated cotton cake and meal: The inquiry is very good for time of year, and prices tend upwards. Linseed: Market steady.

English Linseed Cake	ex mill	7	12	6 to 7	15 0

ROBERT AND JOHN HEWETSON

THE BALTIC, 1 p.m.

STATE OF TRADE.

Russian, Indian, and American wheat cargoes are held for 6d. more money and 3d. is paid. Argentine cargoes are firm but not dearer. Maize cargoes are the turn cheaper both for Argentine and American. Russian cargoes of barley and oats are irregular, some firms expect a decided advance but there is no general admission of the situation calling for higher prices for spring corn.

BUSINESS DONE.

WHEAT.—Hard Taganrog, 31s 9d per 492lb., on passage; Good Baltic, 35s per 492lb., July shipment; New South Wales, 31s 6d per 480lb., on passage; Victorian, 31s 9d per 480lb., on passage; Barletta, 30s 9d per 480lb., on passage; White Calcutta, 32s 3d per 492lb., on passage; White Calcutta, 31s 9d per 492lb., July shipment; White Kurrachee, 30s 9d per 492lb., July shipment; Red Kurrachee, 30s per 492lb., July shipment; White Delhi, 31s 9d per 492lb., July shipment.

MAIZE.—Argentine, 22s 6d per 480lb., August shipment; American, 22s 3d per 480lb., July shipment.

BARLEY.—Kustendje, 17s 9d per 400lb., September shipment; Californian, 24s per 448lb., September shipment.

OATS.—Roumanian, 13s 9d per 304lb., September shipment; White American, 15s 6d per 304lb., July shipment.

BEANS.—Smyrna, 31s 6d per 480lb., July shipment.

PEAS.—White Calcutta, 28s 9d per 504lb., July shipment.

LINSEED.—Calcutta, 42s per 410lb., on passage.

COTTONSEED.—Egyptian, £5 12s 6d per 2,240lb., arrived; Egyptian, £5 16s 3d per 2,240lb., July shipment.

SEEDS.

London, Monday.—The holiday season being now on, business on the market is practically at a standstill. There is an inquiry for rape and mustard. Prices unchanged.—JOHN PICARD AND CO.

HOPS.

London, Monday.—W. H. and H. Le May, 67, Borough, London, report: There is still a quiet consumptive trade going on, consumers buying only from hand to mouth. Crop prospects are generally favourable. The bine grows well.

HAY AND STRAW.

Bristol, Friday.—Old clover hay, 70s to 75s; old meadow hay, 65s to 72s 6d; wheaten straw, 65s to 67s 6d per ton.

Lancaster, Saturday.—Meadow hay, 5½d; clover hay, 6d; wheat straw, 4½d; oat straw, 4d per stone.

Whitechapel, Saturday. — Fair supplies were marketed this morning, and a fair demand was experienced at last prices. Best clover, 75s to 82s 6d; inferior ditto, 60s to 70s; specially picked hay, 80s; good ditto, 65s to 75s; inferior ditto, 45s to 60s; mixture and sainfoin, 67s to 75s; straw, 30s to 42s per load.

CATTLE.

Metropolitan Market, Islington.

	Monday, July 3, 1905. British.	Total.	Monday, July 4, 1904.
Beasts	1,070	1,070	1,020
Sheep and Lambs	5,000	5,000	8,520
Calves	20	20	10
Milch Cows	60	60	50

Quotations per 8 lbs. (sinking the offal):—

ENGLISH.

	Inferior.	Second.	First.
Beasts	3s 0d	3s 4d	4s 10d
Sheep	3s 10d	4s 8d	5s 6d
Lambs	5s 2d	5s 10d	6s 4d

Milch cows, per head, £16 to £21 10s.

British arrivals include as follows: Scotland, 10; Eastern Counties, 205; Midland, Home, and Western Counties, 754; Devon, 5; Ireland, 139.

We note to-day a decrease of 120 head in the number of beasts offered for sale to-day, compared with Monday last, the supply as usual at this season of the year consisting principally of grass-fed cattle from the Midland Counties. Trade for fat beasts of both prime and second quality was of a slow nature, rates being in favour of the buyer, in some cases to the extent of 2d. per 8lbs. Irish were in full supply, and consisted of 85 Dublins (10 of which were Black Polled Cattle), 26 Waterfords, and 28 Store Cattle, for which latter there was no demand. The few Scotch on offer cleared early. Fat butchering cows and bulls met a slow, but firm trade at late currencies.

The following are top quotations per 8 lbs. (sinking the offal):—

	To-day.			Monday, July 4, 1904.
Scotch	4s 8d to 4s 10d	...		—
Herefords	4s 6d to 4s 8d	...	4s 8d ex	4s 10d
Norfolks	4s 2d to 4s 4d	...	4s 6d to	4s 8d
Runts	4s 4d to 4s 6d	...	4s 2d to	4s 4d
Lincolns	3s 10d to 4s 0d	...	4s 4d ex	4s 6d
Irish	4s 0d to 4s 3d	...		—
Black Polled Dublins	4s 4d to 4s 6d	...		—
Fat Cows	3s 6d to 3s 8d	...	3s 6d ex	3s 8d

There was a decrease of 1,160 in the number of sheep and lambs penned compared with Monday last. Trade for wethers was of a slow but firm nature; ewes, on the other hand, were slow of sale at a decline of 2d. per 8 lbs. in value. Scotch and Yorkshire descriptions were in average numbers, and met a slow but steady trade. Lambs met with more enquiry, and fully made last Thursday's currencies. A clearance in this part of the market is confidently expected. The supply included 500 Scotch, 700 Yorkshires, and 1,703 from the Eastern Counties.

Undermentioned quotations are at per 8 lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.			Monday, July 4, 1904.
8 st Scotch	5s 6d to 5s 8d	...		—
17½ to 8 st Downs	5s 4d to 5s 6d	...	5s 4d to	5s 6d
9 st Downs	5s 2d to 5s 4d	...	5s 2d to	5s 4d
10 st Half-breds	5s 0d to 5s 2d	...	5s 0d to	5s 2d
10 st Yorkshires	4s 4d to 4s 6d	...	5s 0d to	5s 2d
12 st Lincolns	4s 4d to 4s 6d	...		—
10 st Down Ewes	3s 10d to 4s 0d	...	4s 0d to	4s 2d
11 st Half-bred ditto	3s 8d to 3s 10d	...	3s 10d to	4s 0d
5 st Down Lambs	6s 2d to 6s 4d	...	6s 6d to	6s 8d
6st Half-bred Lambs	5s 8d to 5s 10d	...	6s 0d to	6s 2d

Calves met with little demand, consequently quotations are not worth recording.

No pigs on the market.

London (Central), Monday. — Good supplies, moderate demand. Beef: Scotch, 3s 10d to 4s 8d; English, 3s 9d to 3s 11d; American, 3s 5d to 3s 9d. Mutton: Scotch wethers, 4s 2d to 5s 4d; ewes, 3s 6d to 3s 8d; English, 4s 2d to 4s 10d; New Zealand, 2s 4d to 3s. Lamb: English, 5s 6d; New Zealand, 3s 6d to 3s 10d. Veal: 2s 8d to 4s. Pork: 3s 5d to 3s 10d per 8 lbs.

St. Ives (Hunts), Monday.—Beasts 471, sheep and lambs 1,609, pigs 423. Beef, 7s to 7s 9d; mutton, 7s 7d to 9s 4d; lamb, 8d to 10d; pork, 6s to 7s. Fat and store cattle, slow trade; fat and store sheep and pigs, fair; milch cows, fair show and trade, prices £14 to £23.

FOREIGN.

Deptford, Monday.—Beasts, 676. To-day's supply of beasts was a fair average one, no market being held last Monday, no comparison can be shown. The supply consisted of 228 from the United States and 448 from Canada. Trade was of a firm and steady nature, the best States being quoted at from 4s 1d to 4s 3d; seconds, 4s; Canadians, 3s 10d to 4s; seconds 3s 6d to 3s 8d per 8 lbs (offal given in). Besides the above 487 more were withheld for Wednesday. On Saturday 1,866 beasts from the United States and 274 from Canada were offered for sale, and with a slow trade were quoted at from 4s to 4s 2d for the former and from 3s 10d to 4s for the latter. Besides the above, 400 more States were held back for Monday.

Liverpool, Monday.—Rather smaller supply of cattle to-day met with fair demand at prices slightly lower than last week, and for largely increased number of sheep and lambs there was no appreciable difference in values. Quotations:—Beef, 4½d to 6½d; mutton, 6d to 8½d; lamb, 8d to 9d. At market—577 cattle, 10,442 sheep.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were, from Ireland 1,847 bales, and from foreign ports 11,752. There was a great depression in the bacon market last week, and although prices were not officially altered, they were considerably lower on the week for all classes of bacon:—Irish, 56s to 62s up to 71s; Danish, 48s to 56s up to 64s; Canadian, 44s to 53s up to 58s. Butter: The butter market was firm, with advanced prices for most descriptions:—French, 80s to 98s up to 104s; Danish, 109s to 111s; Russian, 88s to 96s; Irish, 90s to 104s; Canadian, 94s to 102s; Colonials, 88s to 102s; Argentine, 96s to 98s. Lard: The lard market was quiet:—Irish, 39s to 50s; Danish, 46s to 48s; American, 35s 9d to 39s 9d.

POTATOES

Spitalfields, Saturday. — Trade proved of a quiet character, arrivals being more than ample for requirements. Scottish Magnums, 75s; Dunbar Up-to-Dates, 65s to 70s; Dundee, ditto, 60s per ton. New Canary, 10s; Jersey, 7s 6d to 8s; St. Malo, 7s 6d to 8s; Cherbourgs, 6s 6d to 7s per cwt.; Lisbon, 4s per box.

York, Saturday.—Old potatoes are practically finished. A good supply of new home-grown sorts from South Lincolnshire, Cheshire, and Scotland, and prices ruled at about 6s per hamper of four score lb. The supply of Jerseys has ceased with the ready supply of home-grown tubers.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

At the Islington Cattle Market during the week there was an increase in the number of beasts offered for sale, the majority of the supply consisting of grass-fed cattle from the Midland Counties, the season for this being now fully established, consequently a falling-off in the supplies from the Eastern Counties was noticeable. Trade for all descriptions of both prime and second second quality fat beasts was of an extremely slow nature, and was a disappointing one, so far as consignors were concerned, the tendency in value being a downward one, in some cases to the extent of 2d. per 8 lb. The Irish arrivals consisted of eighteen black polled Dublins, sixty-six Shorthorn Dublins, and thirty Waterfords. Trade for this class was firm, though slow, last week's currencies being well maintained. A small consignment of polled Aberdeens were also offered for sale, and cleared early to good advantage. On Thursday trade, as usual, was principally confined to fat butchering cows and rough cattle. These, on both market days, met with a slow trade, but nevertheless no decline in value was noticeable. Sixty store cattle were on the market, but met with no inquiry.

At the Foreign Cattle Market, Deptford, on Wednesday and Saturday (no boats arriving in time for Monday) trade was of a dull and heavy nature, at from 1d. to 2d. per 8 lb. less money. The total number of beasts on offer at both markets was 4,513, as against 4,241 during the previous week, and 3,303 foreign, consisting of 2,480 from the United States and 823 Canadians. The following were the top rates paid per 8 lb (sinking the offal):—80 to 90 stone Scotch, 4s. 8d. to 4s. 10d.; 90 to 95 stone Herefords, 4s. 8d.; 80 to 90 stone Black polled Dublins, 4s. 6d.; 95 stone Runts, 4s 4d. to 4s. 6d.; 90 stone Norfolks, 4s. 6d.; 100 stone Shorthorns, 4s. 4d.; 95 stone Irish, 4s. 3d.; 90 stone States, 4s. to 4s. 2d.; 95 stone Canadians, 3s. 10d. to 4s.; 90 stone fat cows, 3s. 6d. to 3s. 8d. ex.

The sheep trade at Islington, with a considerable increase in the supply on both market days, was of a dull and heavy nature, rates favouring the buyer to the extent of from 2d. to 4d. per 8 lb. Both Scotch and Yorkshire descriptions were in average numbers, and met a slow but steady trade at late currencies. Ewes met with a very steady demand. On the other hand, lambs met with a limited inquiry, only choice small breeds selling well; heavy descriptions were quite unsaleable. No sheep were offered for sale at Deptford. The total number penned was 12,340, as against 10,620 during the previous week. Best pens made per 8 lb. as follows:—7½ to 8 stone Downs, 5s. 4d. to 5s. 6d; 6 to 8 stone Scotch, 5s. 2d. to 5s. 8d.; 9 stone Downs, 5s. 4d.; 10 stone Downs, 5s. to 5s. 2d.; 10 stone half-breds, 5s. to 5s. 2d.; 10 stone Down ewes, 4s. to 4s. 2d.; 9 stone Yorkshires, 4s. 4d. to 4s. 6d.; 4 to 5 stone fat Down lambs, 6s. 6d. to 6s. 8d.; 6 stone half-bred ditto, 5s. 10d. to 6s

The calf trade, with a fair average supply (120), was of a slow nature, the best making from 5s. 4d. to 5s. 6d. per 8 lb. (offal given in).

No pigs on offer.

Trade in Scotland.

The number of cattle on offer this week has been rather smaller. In the price of heavy-weighted cattle there was no advance, but for moderate weights 1s. per cwt. more on an average was realised. Sheep were shown in moderate numbers. These have met rather a quiet trade at prices just the turn lower. Heavy-weighted ewes are exceedingly bad to sell. There was a large supply of lambs, and anything of good quality sold well at full prices. A very large and good show of calves, which were cheaper. Pigs in moderate numbers, and previous prices obtained. Owing to the great scarcity of grass, and the uncertainty regarding the turnip crop, the demand for store cattle has been exceedingly limited, and, considering the numbers shown, few sales were effected, at prices favouring the buyers. A small supply of store sheep. These also met a very dragging market, and a part were left over. Milch cows a fair show, and they met a slightly better demand at rather better prices. Quotations: Top price of cattle per live cwt., 37s. 7d.; current, from 34s. 6d. to 36s. Mutton, from 7½d. to 8d. per lb. John Swan and Sons, Limited.

Trade in Ireland.

There was a fair attendance of buyers, but they were chiefly home buchers and dealers, the Englishmen being conspicuous by their absence. The reason of the absence of the latter is attributed to the heavy arrivals of foreign meat, and to the close hot weather which has prevailed lately. Any shippers that were present were very cautious in their dealings, taking only just what exactly filled their commission, as might be expected. There was a drop of from 10s. to 20s. per head in cattle, which more than accounted for any improvement in rates effected last week. Fat cows and the coarser classes of bullocks suffered most, and a number of very fair beasts did not clear in consequence of their owners refusing to accept the prices offered. The cattle, generally, were of rather a poor class, the drought and hot weather appearing to have affected their condition. Good qualities of Hereford and Aberdeen crosses made about the prices ruling at previous market, but there was an all round "slump" on all other sorts. Choice ox and heifer beef sold at from 52s. to 55s., and, in a few cases, up to 58s. per cwt; good second-class beef from 46s. to 50s.; and inferior from 44s.

In the sheep department the rates of previous market were obtained for choice Cheviots and mountain sheep; but heavy coarse sheep were neglected, and ewes especially were hard to get rid of. All round, it might be taken that there was a reduction of about 2s. per head. The lamb trade was very slack too, owing to demand being chiefly for those of medium size and weight. Prime wether mutton sold at from 7d. to 7½d.; ewe, 6d. to 7d.; and inferior at from 5d. per lb. Large fat lambs were not much looked for, but made from 38s. to 40s. each. Medium weight lambs from 28s. to 30s. Prime fed veal moved off readily at 7d. to 7½d. per lb.; but coarse very hard to sell at from 5d. upwards. Dairy cattle of average quality were in fair supply, but changed hands slowly at from £10 to £14; choice cows making up to £19 and £21.

Store cattle of the right sort are selling well, but for the general run trade is not good owing to the dry weather still continuing, the late rain quickly drying up on the parched pastures. The pig market was very quiet, and the little done was at a concession of from 1s. to 2s. per cwt on previous week's rates. A small home trade was done at more satisfactory figures. Choice lightweight pigs from 50s. to 52s. 6d. per cwt.; inferior from 30s. upwards.

Trade in the West.

We have very little alteration to note in the store stock trade since our last report, business still keeping disappointingly dull, and prices very low, and this, too, despite the fact of only fair average supplies coming to hand. The best selling things at present are both two and three-year-old in-calvers, which are meeting a good demand at from £8 10s. to £10 10s. for the former, and from £11 to £15 5s. for the latter. In the absence of any active enquiry for heifers and calves, even the best meet a very slow sale; whilst for plainer descriptions, or cows, there is a great difficulty in finding buyers at almost any price. Barreners are also still very dull, which is all the more surprising seeing there is no lack of keep, only the best class of young beasts changing hands, these making from £10 to £14 each. The prospects for store sheep are generally good, owing to the prevailing scarcity throughout the country and the great decrease in the crop of lambs in recent years, the effects of which are still felt. The chief sales now in progress are those of draft ewes, which are making a good price, the best classes bringing 47s. to about 53s. apiece, which was the top figure at Blandford great Down fair on Thursday; whilst for early drafts of Down wether lambs prices range from 34s. to 38s. Trade generally keeps firm. But only very moderate numbers are yet available at any of the markets, most flockmasters, with more keep than they often have to depend upon at this time of the year, in all probability holding their stocks over to sell later on in the season.

As regards fat stock, a few grass-fed beasts of very fair quality are now being brought out; but the market undoubtedly lacks anything of special finish, there being apparently a disposition on the part of graziers to get rid of the more ordinary runs first, reserving their better-class animals for later markets. Just now the trade is by no means fast for anything in the way of beef, but good steers make up to £1 11s. 6d. per score (or £23 to £24 apiece), and heifers 10s. 6d. to 11s. for the best (or £19 to £22); but cows are a very poor trade at not more than 9s. to 10s., even if so much, the hot weather at the same time exercising an adverse influence on sales. In mutton the market is being kept fairly well supported in point of supply with wethers, which are bringing from 46s. to 55s. apiece for the best (or 7½d. to 8¼d. out of the wool); but the ewe trade is greatly neglected at prices ranging from 5½d. to 6½d. per lb., even the very primest not bringing over 6¾d. Lamb keeps fairly firm for young cross-bred sucklers just being brought out, the best qualities bringing 10d. per lb. and over, and others a trifle over 9½d. Calves are easier for big weights, 8½d. per lb. being the top price now for the very choicest animals, coarse vealers only making 7d. to 7½d. In pigs, attention is confined almost entirely to the lightest weights in baconers and small-size porkers, the former making 9s. 3d. to 9s. 6d., and baconers 8s. 9d. to 9s.; anything coarse is most difficult to cash at 7s. 6d. to 8s. 6d.

LONDON.

Islington, Thursday.—The few transactions recorded in the beast market were confined to sales of butchering cows and bulls, rates for which were governed by late currencies. Top value, fat cows, 3s 6d to 3s 8d; fat bulls, 3s to 3s 3d. Decrease of 40 in number penned in sheep market, supply consisting chiefly of consignments from Midland Counties. Sheep trade ruled generally slow, with downward tendency in value. Lambs were slow of sale, but late rates were maintained. Best pens made per 8lb as follows:—7½st to 8st Down sheep, 5s 4d to 5s 6d; 9st ditto, 5s 2d to 5s 4d; 10st half-breds, 5s to 5s 2d; 10st Down ewes, 3s 10d to 4s; 11st half-bred ditto, 3s 6d to 3s 8d; 8st fat Down lambs, 6s 6d to 6s 8d; 6st half-bred ditto, 5s 10d to 6s. Calves in fully supply, the best being quoted at 5s 2d to 5s 4d per 8lb. Quotations per 8lb, sinking the offal:—Sheep, 3s 8d to 5s 6d; calves, 3s 8d to 5s 4d; lambs, 4s 10d to 6s 8d. Total supply; Beasts 20, sheep and lambs 3,090, calves 80.

London Central, Friday.—Supplies were of large extent this morning, for which a very slow demand again was experienced, values, however, being firm. Arrivals of beef included 100 tons Scotch, 550 Liverpool sides, 2,400 hindquarters, and 1,700 forequarters American refrigerated; also 1,700 Argentine chilled hindquarters and forequarters. Quotations: Beef, Scotch short sides, 4s 4d to 4s 6d; exceptionally, 4s 8d; long sides, 3s 10d to 4s; extreme, 4s 2d; English, 3s 9d to 3s 11d; American Deptford killed, 3s 6d to 3s 9d; Liverpool sides, 3s 5d to 3s 8d; American refrigerated hindquarters (best), 3s 8d to 4s; forequarters, 2s 3d to 2s 5d; New Zealand hindquarters, 2s 4d to 2s 6d; forequarters, 1s 8d to 1s 9d; River Plate hindquarters, 2s 3d to 2s 4d; forequarters, 1s 7d; Argentine chilled hindquarters, 2s 8d to 3s 2d; forequarters, 1s 10d to 2s. Mutton, Scotch wethers, light, 5s to 5s 4d; extreme, 4s 10d; ewes, 3s 4d to 3s 6d; Scotch ewes, 3s 6d to 3s 8d; New Zealand, 2s 4d to 3s; Dutch wethers, 4s 2d to 4s 4d; ewes, 3s to 3s 4d. Lamb: English, 5s to 6s. Veal: English and Dutch, 3s to 4s. Pork: English, 3s 6d to 3s 10d; Dutch, 3s 5d to 3s 8d per 8lbs.

COUNTRY.

Ashford, Tuesday.—Beef sold very well, and best beasts commanded 4s 10d to 5s per stone; secondary, up to 4s 8d; and cows, 4s 2d. Mutton rather cheaper; best Down wethers, 5s 4d to 5s 10d; small neat Kents, up to 5s 4d; barrens, 4s to 4s 4d. Veal fell 2d a stone, and pork was exceedingly cheap, best small roasters going at 3s 6d to 3s 8d.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a fair attendance of buyers to meet a supply of 43 fat beasts, 71 calves, 525 fat sheep and lambs, 201 fat and store pigs, and 55 head of dairy and store cattle, for which the following prices were realised:—Shorthorn stores made up to £22 15s, heifers £20 5s, cows £20, Devon steers £21, fat calves 80s to £5 10s, small 20s to 30s, fat porkers 26s to 49s, store pigs 10s 6d to 27s 6d, dairy cows £10 to £20, best Down wethers and young ewes 50s to 55s, small ditto 44s to 48s, old Down ewes 32s to 42s, Dorset ewes 28s, young cross-bred ewes 42s, cross-bred wethers up to 49s 6d, six months old Down lambs 38s to 46s 6d, small 32s to 36s, three months' old sucking lambs, Downs, 30s to 36s Southdowns 28s to 32s, cross-breds 35s to 37s 6d, etc. The how of fat beasts included some quality shorthorns and Devons, which were mostly cleared at last week's figures. Prime quality sheep of moderate weights and shorn lambs had the best of the trade; not much demand for heavy over-fed sheep, and ewes were lower in price. Milch cows and heifers of good class found buyers at late rates. Store cattle a short entry with a quiet trade. Fat calves, with a small entry, sold well at late quotations. The pig trade, owing to the hot weather, continues a slow business. Store pigs also met a dull trade. Ruling values:—Best fat beasts, 7d to 7½d, secondary ditto 6½d to 7d, bulls, cows, and inferior 5d to 6d per lb. Best fat sheep 8½d to 9d, secondary ditto 7½d to 8d, old ewes, rams, and inferior 6d to 6½d, choice fat sucking lambs 9d to 10d per lb, fat calves 7d to 8½d per lb, fat porkers 8s 6d to 9s 6d per score.

Birmingham, Thursday. — Small supply of beasts, sheep, and pigs; trade slow. Beef, 5½d to 6¾d per lb.; a few Herefords, 7d per lb.; mutton, 6½d to 8½d per lb.; lambs, 8d to 9d per lb; veal, 6½d to 7½d per lb.; bacon pigs, 9s 2d to 9s 3d per score; cutting pigs, 9s 3d per score; sows, 7s to 7s 3d per score.

Berwick, Saturday.—There was a falling-off of about 100 cattle. Calves, £6 10s; heifers, £9; stirks, £7 15s to £9 15s; two-year-olds, £12; three-year-olds, £13; shorthorn bulls, £12 10s.

Bristol, Thursday.—Moderate supply of beef, and trade steady at 60s per cwt. for best qualities, and 57s for secondary sorts. Fair number of sheep. Light Down wethers, 8d per lb.; best wethers, 7½d; heavy, 7d; ewes, 6d; lambs, 9d to 9½d. Short supply of pigs; baconers, 9s 6d per score; porkers, 10s 6d. About 1,000 store cattle on order, and trade very quiet, at about late rates.

Calne, Friday.—Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of Back.	Price per Sc. s.	d.
6sc. 10 lb. to 9 sc. 10 lb.	2½ in. and under	9	3
Under 10 sc.	Not exceeding 2½ in.	9	3
Under 11 sc. 10 lb.	2¾ in.	8	9
Under 12 sc.	3 in.	8	3

C. and T. Harris and Co., Ltd.

Carlisle, Saturday. The number of Irish store cattle on the Sands was small; buyers were scarce, and trade ruled dull. Small heifers, £8 10s to £10 10s; medium sorts, £10 10s to £12 10s; best descriptions to £14 10s each.

Canterbury, Saturday. Good yearling cattle are making up to £9; two-year-olds, £11 10s to £12; cows and calves, up to £18. Sheep rather scarce just now. A good run of shorn ewes averaged 35s, and lambs 21s to 24s per head.

Chester, Thursday.—Supplies were fully up to average, and the quality generally was good. Quotations: Milch cows, £17 to £22; calvers, £15 to £20; barrens, £10 to £13; heifers, £9 to £13; stirks, £6 to £10; and sheep, 16s to 33s.

Colchester, Saturday.—There was a short supply of beef and mutton, but a fairly good supply of lamb and pork. Beef, 4s 4d to 4s 6d per stone of 8lb; mutton, 5s 6d to 5s 8d; lamb, 6s to 6s 8d; pork, 9s to 9s 6d per score.

Doncaster, Saturday.—An exceedingly small show of cattle and poor attendance. Trade very slow and except in the case of milch beasts, which were easier, prices were unchanged. Milch beasts, £15 to £22 ;bullocks, £12 to £17; heifers and drapes, £11 to £16; stirks, £7 to £9; youngsters, £4 to £6 each. About an average supply of sheep and hoggs, 38s to 48s each.

Dorchester, Wednesday. To-day's market well supplied throughout, but trade was quieter. Calves scarcely so saleable, 8½d per lb. for the best; heavier animals, 7d to 8d. Wether mutton in very few cases exceeded 7½d to 7¾d, and heavy coarse sheep 6½d to 7d. Fat lambs, 9½d to 10d, and coarser breeds 9d. Small weight pigs made 9s to 10s per score; heavy, 8s to 8s 6d.

Dorchester, Saturday.—There was not what might be called a full market at Messrs. T. Ensor and Son's repository sale to-day; still, there a fair supply, and a good business was done, though prices generally ruled rather low, especially for mutton, which made a very poor price. In stores, barreners sold up to £15 17s 6d in one case, though a more general range was from £9 10s (for cows) to £12 10s, milch beasts £14 10s to £20, store bulls £11 10s to £13 10s. In fat beef the range was from £10 to £10 10s each (or 10s to 11s per score). Fat ewes out of the wool sold from 37s to 42s, and lambs (which are back a good bit) 25s 6d to 35s, anything but a good price.

Dublin, Thursday.—Numbers in market: Beasts, 1,761, increase 458; sheep, 10,648, increase 1,572; calevs, 39, increase 16.—In sympathy with cross-Channel markets, and assisted by the heavy increase in numbers on offer, trade for beef was of much quieter description, and prices for all classes decidedly in favour of buyers. With a much larger market of sheep and lambs, trade ruled slow and dragging throughout at prices favouring buyers. Cattle, live weight (best), 31s to 33s per cwt.; secondary and inferior sorts, 25s to 30s per cwt. Mutton, dead weight, 5½d to 7¼d per lb.—GANLY SONS AND CO.

Edinburgh, Wednesday.—The market was small and dull owing to the prolonged drought, and there was a slow selling trade. Polled bullocks realised £13 10s, horned £10 15s, stirks £8 10s to £10, half-breds hoggs 35s to 38s, Cheviot ditto to 38s, half-bred sheep 36s to 40s, cross sheep to 43s, shorthorned cows £25 10s, and Ayrshires to £18 per head.

Exeter, Friday.—About the usual supply of fat beasts, among them being a good many of first-class quality. Quiet trade throughout at late prices; best steers and maiden heifers, 11s 6d; cows, 10s to 10s 6d; some unsold. Rather more sheep than last week, but very quiet trade, only best choice wethers making 8d, large size 7¾d. A few sheep unsold. Ewes made 6d. Lambs in good demand at 10d for best quality; 9d second-class. Calves, 7½d.

Glasgow, Wednesday.—Market easier for both cattle and sheep. Butchers limited their purchases owing to excessive heat. Heavy class bullocks were difficult to cash at £1 per head reduction. Top Scotch, 62s to 63s; secondary, 58s to 60s; States and Canadians, 56s to 58s per cwt.; best home sheep, 8½d; secondary, 8¼d; lambs, 9½d per lb.

Gloucester, Saturday.—Messrs. Bruton, Knowles and Co. report their sales as follows:—A very short supply of both cows and calves and store cattle, with a total clearance.

Hereford, Wednesday.—Large supplies all round. In the beef trade there was not much of the best ox and heifer purchased, the demand being limited. Hardly anything reached 6½d per lb, the best going at 6d to 6½d; fat cows, 5d; bull beef, 4½d. The sheep trade fluctuated. The choicest wethers did not reach higher than 7½d to 8d per lb. Fat ewes 6d. The lamb trade was not very brisk, about 8d to 9d per lb. Veal was in limited demand, the price being 7d and upwards. The pig trade was fairly good, porks selling at 5d to 6d per lb, bacons 4½d, and stores being in good demand.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report a heavy supply of fat cattle at market, and an average attendance of buyers. The trade may be quoted much on the lines of last week, the best qualities up to 8s, but secondary animals were rather cheaper. Fat sheep in moderate supply, the trade for which was slightly in buyers' favour. Not so many store cattle penned, and a slow sale was experienced. Milking cows were in good demand. For fat swine of all descriptions a lower trade had to be met. The monthly sale of horses was held at the Drill-hall, when 95 animals were catalogued. All the best cart horses and hackneys were in fair demand, the former to 38 guineas. Numbers at sales and market: 610 cattle, 2,528 sheep, 1,022 swine, and 125 horses.

Leicester, Saturday.—Moderate consignments of home-bred bullocks. Buyers were moderately represented and with the copious rainfall trade ruled brisker at £20 to £21; secondary descriptions, £15 to £18; shorthorn bullocks, £13 to £16; choice Irish cattle, £20; secondary, £13 to £14 10s; Welsh runts, £10 to £14; heifers, £6 to £9; calves, 20s to 40s each.

Lincoln, Friday.—Poor consignment of horned stock, which met with a slow sale. Young beasts, £8 to £10; cows, £18. No sheep.

Manchester, Friday.—Beef: First class, 5¾d; second class, 4¾d to 5¼d; third class, 3¾d to 4¼d per lb. Mutton: First class, Cheviots and Scotch, 8d; others, 7¼d; second class, 6¼d to 7d; third class, 5¼d to 6d per lb. Veal: First class, 6¼d; second class, 5¼d to 5¾d; third class, 4¼d to 4¾d per lb. Lamb: First class, 8d; second class, 7¾d per lb.

Norwich, Saturday.—Fat beasts in limited supply, and barely more than equal to home demands; prices fetched from 7s 3d to 7s 9d per 14lb. Small show of store cattle met with quiet trade at £6 to £17 per head, beasts being mostly of second-class quality. Dull trade for sheep and lambs, which were in smaller supply; lambs fetched 15s to 32s per head; breeding ewes, 33s to 35s. Better demand for fat pigs, which met with an easier trade, at 6s 3d to 6s 6d per stone. Small supply of stores met with good demand.

Nottingham, Saturday.—Short supply of stock all round. In-calf cows made £15 to £23, and in-calf heifers from £17; strong steers, to £21 10s; and yearling steers and heifers, £7 to £8 10s. Calves fetched anything from 30s to 60s.

Retford, Saturday.—The store stock on offer was limited, and the attendance of farmers and dealers rather worse than usual. In no kind of stock was there any quotable change in values, and trade generally was quite stationary.

Romford, Wednesday.—Large supply of fat beasts; trade slow. Best animals, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in large supply; trade lower at 4s 10d to 5s per stone. Average supply of sheep; trade slow. Best sheep, 5s 4d to 5s 6d; middlings, 5s to 5s 2d; ewes, 4s to 4s 2d per stone. Lambs in short supply; trade a little better at 6s to 6s 4d per stone. A few store beasts offered; slow demand. Pig trade slow.

Thame, Tuesday. It is seldom a choicer selection of stock is seen in this market than was the case last Tuesday. There was again an excellent attendance of buyers, the riverside towns being particularly well represented, no doubt on account of the needs of Henley Regatta. Beef trade was fully up to late markets, finishing particularly good. Sheep and best lambs were again in great demand, showing considerable advance on late markets, practically every lot being disposed of. A choice bunch of store lambs sold readily. No change in bacon, pork, or veal. Messrs. Bond and Burrowe' sale comprised 97 fat beasts, 414 fat sheep, 52 fat and weaning calves, and 98 fat and store pigs. Fat oxen made from £16 10s to £22 17s 6d, fat heifers £16 15s to £21, fat ewes 40s to 50s, fat lambs 30s to 42s, fat wethers 45s to 64s, fat calves £4 5s to £5, weaning cow calves 30s to 66s, bull calves 20s to 50s, bacon hogs £3 5s to £4, porkets 26s to 42s, store pigs 0s to 20s.

Truro, Wednesday.—Fat bullocks, 56s to 60s per cwt.; barreners and store bullocks, 40s to 45s; cows and calves, £10 to £17 each; rearing calves, 30s to 45s; wethers, 7½d per lb.; ewes, 6d.; lamb, 7½d to 8d; pigs, 10s to 30s each.

Wolverhampton, Wednesday.—Moderate supply, and slow trade all round. Beef, 5½d to 7d per lb; mutton, 6d to 8½d perlb; veal, 6½d to 7½d per lb; lamb, 8½d to 9d per lb.

Worksop, Wednesday.—Fair show of beef and smaller supply of mutton than usual, with trade somewhat slow. Best beef, 7s 6d to 7s 9d; secondary qualities, 7s to 7s 6d per stone; best Southdown wethers and cross-breds, 7½d to 8d; other sorts, 6d to 7d; lamb, 8½d to 9d; veal, 8d to 9d per lb.

FOREIGN

Yorkhill, Tuesday. Small supplies of cattle were on offer at the usual weekly sales held at the Foreign Cattle Wharf to-day, only 200 head being penned in the lairages. There was a small attendance ofbuyers present, and business was very quiet throughout the day, little disposition being shown by buyers to deal beyond immediate requirements, the heat wave having a dulling tedency upon all branches of the trade, and in consequence there was a slight easing of prices as compared with recent markets. The consignment consisted solely of American bullocks, among which were many animals of really choice quality, and beasts of useful sizes and weights, suitable for all trade requirements, made from 56s to 58s per cwt. dead weight; while secondary, middling, and inferior qualities were cashed down to 54s per cwt.

Yorkhill, Wednesday.—Five sales o fAmerican and Canadian cattle were held to-day, 700 head being on offer. There was a fair attendance of buyers present, but business was generally quiet, and prices, owing to dull trade caused by the heat wave, were slightly easier than of late. Bullocks of handy size and weight sold from 55s to 56s per cwt. dead weight, with a few superior animals touching 58s per cwt., while secondary, middling, and inferior qualities were cashed down to 53s per cwt. Bulls met a poor trade, and prime beasts changed hands at about 47s per cwt.

MANURES.

Liverpool, Friday.—Fertilisers are dull, and likewise feeding stuffs, a characteristic of the summer months. Prices in some instances are easier; but, on the whole, values are firm. 1,000 bags Brazalian cottonseed meal sold ex quay at £5 7s 6d per ton. To-day's quotations are as follows:—Nitrate of soda, best quality, i.e., guaranteed 95 per cent. pure, in bags, £10 15s to £11; East India bone meal, in bags, £5 7s 6d to £5 10s; kainit, prime 23 per cent., sulphate of potash, in bags, £2 2s to £2 5s; linseed cake, American thin oblong, prime, in bags, £7 10s; ditto English, prime, in bulk, £7 18s 9d to £8 7s 6d; ditto foreign rounds, prime, in bags, £7 17s 6d to £8; cottonseed cake, N.A. decorticated, prime, new, in bags, £6 17s 6d to £7 1s 3d; ditto English decorticated, new (soft), prime, new (soft)i n bags, £7 5s; ditto English undecorticated, prime, in bulk, £4 7s 6d to £4 12s 6d; ditto (crushed), 20 to 25 per cent. oil guaranteed, prime, in bags, £6 17s 6d to £7; maize germ meal, prime, in bags, £5 7s 6d to £5 10s; corn oil cake, 10 to 13 per cent. oil, prime, in bags, £5 superphosphate of lime, guaranteed 35 to 36 sol., in bags; £4 12s 6d to £4 15s—per ton; Indian meal, coarse to fine grinding, prime, in bulk, 12s 6d per 240lb; linseed, fine bold feeding, in bags, £2 7s 6d per quarter (416lb); cod liver oil, cattle feeding, prime,in casks, 4s 6d per gallon; treacle, feeding prime, in barrels, 4s 4½d to 4s 6d per cwt.; D.N.S. brand superphosphate of lime, guaranteed 25 to 27 sol., in bags; ditto, guaranteed 30 to 31 sol., in bags; superphosphate of lime, guaranted 35 to 36 sol., in bags; basid slag, prime quality, guaranteed 30 to 35 per cent. phos., in bags; ditto, prime quality, guaranteed 38 to 45 per cent. phos., in bags; finest quality, guaranteed 42 to 60 per cent. phos., in bags—per ton, nominal.

WOOL

Canterbury, Saturday.—Buyers are still offering 12½d for Kent fleeces, and have done a good business with lamb wool at 8d.

Glasgow and Leith.—The month of June has been an active one in the wool trade. The first sale of the season took place in Leith on June 6, and, with an unusually large number of buyers present, the bulk of the wools changed hands under strong competition at prices about 1d per lb on unwashed and 2d per lb on washed whitefaced wools above last season's opening prices. Only small quantity of early clipped hogg wool was forward in the blackfaced class. During the month values of finer classes hardened still further, and at Glacgow on June 28 whitefaced wools were cleared out at a further advance of fully ½d per lb. Blackfaced of which there was a capital show, consisting almost entirely of newly-clipped wool, was not quite in such request as whitefaced wools, but prices were firmly maintained.—J. AND W. GREIG.

London, Saturday.—English—per pkge. of 240lb.—Fleeces, South Down hoggs, £11 10s to £13; half-bred hoggs, £11 10s to £12 10s; ditto wethers, £11 10s to £12 5s; Kent fleeces, £11 to £12; South Down ewes and wethers, £11 10s to £13; Leicester ditto, £11 10s to £12. Colonial—per lb.—Vic., fleece super., 1s 11d to 2s 1d; scoured good, 2s 1d to 2s 2d; scoured average, 1s 11d to 2s; greasy average to fair, 1s 1½d to 1s 2½d. N.S.W., second average, 1s 7½d to 1s 8½d; greasy average, 10½d to 11½d. S. Aus., greasy average, 8½d to 9½d. N.Z., scoured average, 1s 8d to 1s 8½d; greasy average, 10½d to 11½d. Cape, scoured super, 1s 9d to 1s 10d; fleece average, 9½d to 10d; greasy average, 7½d to 8½d. Natal, scoured, 1s 5d to 1s 6d; greasy average, 8½d to 9½d. Crossbreds—Grs.—Vic., good to super, 1s 2d to 1s 3d. New Zealand, fine, 1s 1½d to 1s 2½d; ditto medium, 1s to 1s 1d; ditto coarse, 9d to 10d.

Halifax, Saturday.—The excitement which has characterised the last month in the wool trade still continues. It is certain that a large part of the business done in home-grown wool has been of a speculative character, or for export, America having been a free buyer. To these circumstances is largely attributed some of the recent advance, which is well maintained. Business for home requirements, however, is very limited, and full rates are difficult to obtain.

FEEDING STUFFS.

London, Thursday. Linseed. The feature of the week has been the disappearance of the discount on Calcutta spot seed, which we now quote 41s 3d against June-July at 41s. Calcutta-London, spot 41s 3d, June-July 41s, July-August 41s 3d. La Plata, May-June 40s. Hull has remained inactive, with prices a shade lower. La Plata spot 39s, passage 39s to 39s 6d, June-July 40s, Bombays, May-June 41s 6d. Rapeseed continues exceedingly quiet. Quotations are more or less nominal. Brown Cawnpore, June-July 36s 6d, brown Calcutta, June-July 36s. To the Continent, yellow Guzerat 42s. Yellow Cawnpore 41s 9d, brown Cawnpore 36s 6d, brown Calcutta 36s sellers. Cottonseed: Egypt has continued firm, but prices there are so far in excess of those ruling here that business has been much restricted. London, spot £5 17s 6d, July £5 15s 6d sellers, August £5 18s 9d, September (old), £6 1s 3d, November-January £6. Hull, spot £5 12s 6d, June £5 19s, November-January £5 18s 9d. Linseed oil weak, the demand being very limited. We quote spot in pipes £19 7s 6d, barrels £19 12s 6d, July-August £19 15s, September-December £20 5s, Hull naked spot £18 5s, July-August £18 7s 6d, September-December £19. Oil cakes: Linseed cakes firm London made £7 12s 6d to £7 15s. Cotton cakes steady. London made £4 7s 6d to £4 10s.—THE PRODUCE BROKERS CO., LTD.

Hull, Tuesday. Cottonseed: There has been little variation in values during the week, and spot Egyptian has remained steady without activity at £5 12s 6d, June shipment being quote d £5 13s 9d to £5 15s, at which latter there are sellers to-day. July-September Fayoumi £6, and a little November-January sold at £5 18s 9d. Bombay, July-August done at £4 17s 9d to £4 18s. Linseed: The arrivals are 250 quarters Libau, 14,451 Rosaria; total, 14,701 quarters. Shipments week ending June 28 were as follows: Plate: 2,500 London, 8,000 Hull, 4,000 orders, 16,000 Continent. Calcutta: 4,000 London, 8,000 Continent. Bombay: 41,000 Continent. Total, 83,500 quarters. Linseed dull and inactive. Plate, spot 39s nearest value, June-July 40s 3d, July-August 40s 9d quoted. There is no business doing in forward positions to test values. Oilseed cakes.—Linseed: Firm at previous rates, but the demand is quiet. Cotton: Considering their very low relative price the demand is poor, but the market is very firm, rather inclining better.—KEIGHLEY MAXSTED AND CO.

Mark Lane, Monday.—Linseed cakes: The trade during the past week has been of the smallest possible character, the only business passing being a retail consumptive inquiry, in spite of which, however, prices are firmly held up in consequence of short shipments of foreign and limited home productions. Russian command most attention, being relatively good value, at last week's prices. American are unchanged. East India seed pures are also without alteration. London made meet very little response in response to crushers' demands, which are unchanged. Cotton cakes: Egyptian remain fairly plentiful in warehouse, although most of the mills have now shut down, and consequently arrivals will in al probability be extremely light for the next two or three months; prices rule quiet. English and Bombay se ll slowly, and are without change. Decorticated: London made move off rather more freely at £6 17s 6d for cake and meal and £5 5s for special digestive meal, while American "Open Hand" brand offers at £6 17s 6d, "Ley" brand at £6 8s 9d, and meal at £6 7s 6d. Rape cakes: Scarce and dear; East India and Ravison unaltered. Maize germ meal: A limited quantity of white American on the quay may now be bought at £5 7s 6d; but English makes are again held for rather more money. Maize gluten meal is in good request at £5 10s per ton. Rice meal: Landed lots of Rangoon are still available at £4 5s, but shippers ask the prohibitive prices of £4 7s 6d to £4 10s for steamer parcels to arrive. Nitrate of soda is without alteration at £11 2s 6d per ton ex quay. Locust beans attract more attention, being comparatively low in value at £5 per ton for whole and £5 10s per ton for kibbled.

MOLASSINE FEEDING MEAL, packed in bags of 1 cwt. each. Price per ton, £6 15s., in ton lots and upwards. £7 10s. per ton in less than ton lots. Free on rail, Liverpool or London. Uniform delivered price for small quantities, 10s. per bag of 1 cwt.

POTATOES.

Borough, Saturday.—The market was supplied to a good extent this morning, and a generally good demand prevailed. Up-to-Dates, 60s to 70s per ton. New: Jersey, 8s; St. Malo, 7s 6d to 9s; Cherbourgs, 7s; and Teneriffe, 7s to 9s per cwt.

Manchester, Saturday.—Yorkshire Warps, 7s 6d to 9s 6d; Sands, 6s to 7s; Cheshire New, 5s 6d to 8s 6d; Kidneys, 5s to 6s; Lincoln, 6s 6d to 7s 6d; Scotch New, 8s to 10s; Irish new, 8s to 10s per 18 stone; Jersey, 7s 6d to 8s per cwt.

Southwark (Waterside), Saturday.—During the past week the trade for old potatoes has been limited, with prices weaker. The supplies of new have been more plentiful, with prices lower. To-day's prices are as follows:—Old Scotch Up-to-Dates and Langworthies, 55s to per ton; new Jersey Flukes and Kidneys, 8s 6d to 9s per cwt.; St. Malo Flukes and Kidneys, 8s to 8s 6d; Cherbourg Rounds and Kidneys, 7s 3d to 7s 6d.

Cattle Stock Sales at the Royal Shows.

Messrs. J. T. Thornton and Co. sold a very fine lot of Shorthorn cattle at this sale, and the demand was particularly good. Many notable prices were made, including 1,000 gs. for Mr. J. D. Willis' Doynton Brave Archer, a bull just over two years old, which, like most of the higher priced animals, was purchased for the Argentine. The forty bulls sold averaged £106 4s. 1d., and the twenty cows £91 16s. 5d., making a general average for the sixty head sold of £101 8s. 3d. The demand for the other breeds of cattle was a poor one, and very few were sold. These are included in our detailed list given below:—

The Sheep Auction.

Messrs. Mansell and Co., of Shrewsbury, who were appointed this year by the Royal Agricultural Society as the official auctioneers for the sheep section of the show, are to be congratulated upon the success that attended their first sale. Leaving out of consideration for the moment the special selling class of Shropshire yearling rams, there were a considerable number more sold in the other classes than has been the case in previous years. The first breed offered were the Oxford Downs, only three were sold, i.e., Mr. J. Horlick's r.n. pen of yearling ewes, these made 5 gs. each. The same breeder's second-prize pen of ewe lambs made a similar price, and his unnoticed pen of this age made 3½ gs.

The Shropshires were well competed for, and a large proportion of those offered were sold at capital prices. The two-shear ram owned by Mr. B. Wall opened the proceedings in this breed, and he was sold for 5 gs. to Mr. Poels. Then commenced the yearling ram sale, and we have put the whole of these together, namely, those exhibited either as single, or pens of five, or in the selling class, so that each breeders sheep are all given together. Mr. R. P. Cooper claims first place here on many grounds, for his was a very excellent lot of sheep The ten offered, all of which were sold, averaged exactly £50 each. His first-prize pen of five went at the following prices, 90 gs. to P. L. Mills, 82 gs. to V. Cavendish, 56 gs. to Mr. La Husen for the Argentine, 51 gs. to Mr. C. T. Pulley, and 55 gs. to Lord Barrymore. The average of these five was £70 2s. 9d. The first-prize ram in the selling class went to Mr. La Husen at 51 gs., and the other four were sold to Mr. W. Sellar, New South Wales, at 45 gs., Lord Falmouth at 18 gs., Mr. C. G. Wheeler at 16 gs., and Mr. Fitzroy at 16 gs.

Mr. E. Nock's consignment, numbering six, also made a capital average, i.e., £31 13s. 4d. Mr. V. Cavendish taking the top-price one at 60 gs.; Mr. H. L. Wardell took two for the United States at 50 gs. and 35 gs. Mr. La Husen took two at 16 gs. and 15 gs., and Mr. Poels the other one at 5 gs. Mr. A. T. Buttar sold two rams, for which he received 72 gs. The first one offered went to Lord Falmouth at 50 gs., and the others to Mr. La Husen at 22 gs., the latter buyer taking one of Mr. Victor Cavendish's at 23 gs. Mr. John Harding sold four, at an average of £21 10s. 6d., M. Cottard taking two for France at 34 gs. and 16 gs., Mr. F. Harding one to the United States at 17 gs., and the Earl of Macclesfield one at 15 gs. Mr. A. S. Berry sold six at just over £13 per head. The Earl of Macclesfield taking one at 16 gs. and one at 12 gs., and Mr. La Husen two at 16 gs.; Mr. Cooper giving 9½ gs. for another, and Mr. Poels 5 gs. for the other. Four of Mr. B. Wall's were sold; the best one making 16 gs., and the others 5 and 5½ gs. Mr. Victor Cavendish sold two at 6½ gs.; Mr. B. A. Mander one at 15 gs.; Mr. P. L. Mills two at 9 gs. and 7½ gs.; and Mr. R. Morgan one at 6 gs. Two of Mr. E. Nock's third-prize pen of ewe lambs were sold, Mr. F. Harding purchasing both for the United States at 15½ gs. and 12 gs. No Southdowns were sold.

The Hampshire Downs were in better request than we have ever seen them at this sale. Five two-shear rams were offered, and all five were sold, making the excellent average of 15 gs. Mr. Carey Coles' first prize went to Mr. La Husen at 22 gs., and the same buyer took Mr. T. F. Buxton's third-prize sheep and Mr. B. Hanbury's commended sheep at 16 gs. and 10 gs. Mr. H. C. Stephens' two rams making 20 gs. for the second-prize sheep, and 12 gs. for the commended sheep. There were four yearling rams offered; three from Mr. J. A. Keith Faulkner. Two of these were purchased by Mr. A. J. Cotton for Queensland. The highly-commended ram making the particularly high price of 37 gs., and the other one 17 gs. For the third ram of this flock Mr. La Husen gave 15 gs., and for Mr. H. L. Ovey's ram 10 gs. was realised to Mr. Poels.

ADVERTISEMENTS RECEIVED TOO LATE FOR CLASSIFICATION.

ANNUAL SALE OF RAMS.

BRANDESBURTON BARFF.

MESSRS. HORNBY & WILBERFOSS are favoured with instructions from Mr. T. C. B. Dixon to SELL BY AUCTION,

On FRIDAY, AUGUST 18th, 1905, about

80 LONG-WOOL SHEARLING RAMS (Flock Book No. 69),

when they will be glad to see their friends and breeders of sheep.

Luncheon One o'clock.

Conveyances meet Beverley and Driffield morning trains

ERNEST J. GALE will SELL the above by AUCTION, at the Mart, Tokenhouse Yard, E.C., on MONDAY, JULY 17th, 1905.

Particulars of the Auctioneer, Southminster Essex.

Live Stock Record.

HOW STOCK-BREEDERS HAVE FARED AT THE ROYAL SHOW.

Few, unless closely connected with the stud stock interests, have any conception of the large volume of business transacted at the Royal Show. The demand this year has been fully an average one, and many an exhibitor has left the Show-yard considerably better off than when he went there. The larger proportion of the money expended for these purchases comes from abroad, and hence the profitableness of the transactions needs no further comment.

Were it possible to secure a full list of all transactions it would, we believe, be found that but a very small section of the Show was not included therein. However, the compilation of such a record is out of the question, and certainly not within the power of any single representative to compile, nor is the summary given below with reference to the sheep section by any means a complete one, but the transactions there recorded are amply sufficient to show the value and volume of the export demand, not taking into consideration any of that other excellent demand received from the home breeder, many of whom were good customers for stud sires.

Elsewhere is given a full report of the auction sale, and these, taken together with the transactions concluded privately show once again, without question, that so far as regards the selling of pedigree stock, the present site of the Show is probably better than any other. What is wanted to make the Show a success in its present location is not so much a larger attendance of buyers, but of the general public.

During the past half-century there has been upon more than one occasion, periods of keen demand for particular breeds of stock. In the early seventies it was the Shorthorn, a breed that at the present time looks like having a repetition of notable prices being made, and so on at different periods, other breeds of cattle and sheep, etc., have been in greater or less request. At the present time, amongst the sheep section, there is no breed in so keen demand as the Lincoln. Probably no other breed of sheep, at any rate in England, have ever experienced the same excellent demand as that now being enjoyed by the Lincoln breeders. We are unable to give anything like a full report of all the sales transacted in connection with this breed at the Show, nor can we give the full details of all the prices made, but we can say that the range of prices this year, for all the best sheep, is higher than ever before. Hitherto Mr. Henry Dudding, who has not sold any sheep or cattle at the Show, because he has declined to part with any of his leading animals until his auction sale next Thursday, has had the honour of being the only English sheep-breeder to make a thousand guineas of a ram. This he has done twice, and now he is joined by the Messrs. Wright, who sold their first-prize yearling ram for 1,000 gs. to Mr. F. Miller, the well-known export agent, who has thus purchased all three of the 1,000gs. yearling rams. Mr. F. Miller also purchased from Messrs. Wright their first-prize pen of five yearling rams, at 1,500 gs. Mr. E. N. Casares purchased Mr. Tom Casswell's champion two-shear ram, at a very high figure indeed, this ram being one of the finest specimens of the breed seen out this season. Six other yearling rams, all that Mr. Casswell had present at the Royal Show, were also purchased by Mr. Casares. This export buyer took all that Mr. T. C. B. Dixon had present—i.e., six. Messrs. Dean sold a very large selection of their exhibition sheep for export to the Argentine, together with about forty-five more yearling rams sent direct from home. Mr. C. File sold, for the Argentine, to Mr. H. Harding, his first-prize Kent or Romney Marsh yearling ram, and the same buyer took from Mr. H. Rigden a very choice ram lamb out of his first-prize pen at the Show. Mr. A. Amos reports the sale of two yearling rams, and three yearling ewes, from his Romney Marsh flock, at home, to go to Australia.

The demand experienced in the Hampshire Down classes was a large one, particularly for the Argentine. Mr. H. Harding through Messrs. Mansell and Co., secured a very grand sheep indeed for that country—i.e., Mr. James Flower's first-prize yearling ram, and from the same flock he also took six other rams of the same age. Mr. H. L. Cripps sold that particularly fine ram of his "Shifford No. 42" for export to the same country, and Mr. W. W. Chapman sold, on behalf of Mr. H. C. Stephens, to Mr. E. N Casares, the first-prize single ram lamb at the Wiltshire County Show, to go to the Argentine, at the highest price ever paid for a ram lamb of this breed for export to that country.

Mr. Cary Cole's third-prize yearling ram, a very fine sheep, goes to Chili, through Messrs. Cooper. Mr. W. W. Chapman, on behalf of Mr. E. Ellis, sold to Messrs. Mansell and Co., for export to Australia, the second-prize pen of yearling Southdown ewes, together with a fourth ewe from the same owner's h.c. pen, and that very specially fine two-shear ram, the r.n. in its class.

Messrs. Mansell also report the purchase of Mr. C. Adeane's ram that won first prize at the Nottingham Show, also for export to Australia. This well-known firm of export agents secured for export to America that particularly fine lot of Cotswold ram and ewe lambs exhibited by Mr. W. T. Garne, and with these go a selection of some thirty or forty other sheep of the same breed. From Mr. T. S. Minton Messrs. Mansell secured the first-prize pen of ewe lambs, and they also secured a selection of ramlambs from Mr. J. Harding for Canada. In addition to which several other large and important transactions were concluded by this well-known firm.

Mr. D. Maclennan secured for the Argentine a very notable lot of Oxford Down sheep. These included Mr. A. Brassey's unbeaten champion sheep this year—i.e., first, second, and third prize winners at the Oxford County Show, together with two other rams of the same age. Mr. J. T. Hobbs reports the sale of a very choice selection of ewes and ram lambs from his flock, four of the former and two of the latter, for export to Chili. Mr. W. A. Treweeke, whose fine and typical sheep were generally admired at the Show, has sold a commended pen of ram lambs for export to the United States, which are being accompanied by four ewe lambs of very superior merit, and the same breeder reports the sale, to Mr. J. P. Case, who judged this class,

Shorthorn Heifer Lady Amy 7th, winner of the Championship for female Shorthorns at the Royal Show last week.

Born January 24, 1903, sire Cornish Knight, 78641, dam Lady Amy 5th; breeder, the Earl of Powis, Powis Castle, Welshpool; Exhibitor, Mr. F. Miller, La Belen, Clifton Road, Birkenhead.

of the pick ram lamb from his second-prize pen.

Mr. D. W. Philip reports the sale of three sows and a boar of the Tamworth breed, to go to Russia, and since the above was written we have received information to the effect that Lord Verulam has sold, for export to the Argentine, his third-prize pen of ewe lambs, and some more of the same age, direct from the flock at home.

STOCK AND SHOW NOTES.

By Herdsman.

The tenth annual show of the Upholland and District Agricultural Society will take place on July 19, at Abbey Lakes Pleasure Grounds, close to Orrell Station. A liberal prize schedule has been drawn up, including classes for horses, cattle, dogs, poultry, and pigeons. The Society is a member of the Federation of Lancashire Agricultural Societies so that the arrangements for the closing of entries will be strictly adhered to, viz.; dogs, 10 a.m., Friday, July 14; other exhibits, 10 a.m., Saturday, July 15. Prize schedules etc., can be had on application to the hon. secretary, Mr. G. H. Scrivener, Glenfield, Upholland, Wigan.

The East Berks Horse Show will be held on Hawthorn Hill Racecourse (between Maidenhead and Bracknell, Berks), on Thursday, August 17, when the usual attractive classes will again be provided. Entries close July 25; or with double fees August 1. Schedules, etc., may be obtained of the hon. secretary, Mr. C. H. W. Dixon, 4, Henrietta Street, Covent Garden, London W.C.

August 22 is the date of this year's show of the Barnsley Agricultural and Horticultural Society and it will be held at Queen's Grounds, Barnsley. Entries close August 9 with Mr. F. C. Browne, secretary, Westgate, Barnsley, Yorks.

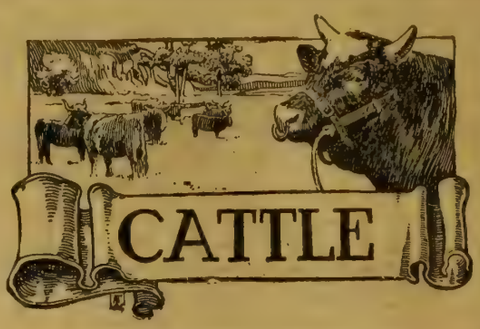
There is I hear, to be no sale of the famous Arab horses bred by Mr. Wilfrid S. Blunt, at Crabbet Park, Three Bridges, this year, Mr. Blunt having sold many of the horses to the Indian Government and private buyers. The sale has not been held at Crabbet now for two years and has always been a fashionable and interesting event.

The Whalley Agricultural Society's show will be held at Whalley, on Thursday, the 27th inst., and for it a good prize schedule has been drawn up. Entries close July 22 with Mr. J. M. Rawcliffe, secretary, Whalley, near Blackburn.

Worthing and West Sussex Horse Show and jumping and driving competition will take place in Beach House Park, Worthing, on Wednesday, August 9, and gives promise of being as successful as in other years. Entries close July 26. Prize schedules and entry forms can be had of the secretary, Mr. Walter Paine, Sumner House, Worthing.

More attention is being paid to pig breeding by our Colonial cousins. A Mr. James Lang from near Melbourne is in England after Shorthorns, Clydesdales, and pigs. Some few weeks since he journeyed to Holywell Manor, near St. Ives, Hants, and selected a most promising Middle White boar whose parents are well-known Royal winners, and for its mate he bought a sow whose dam has been a wonderful brood sow, no fewer than twelve of her produce having won at the various Royal shows. The pigs were shipped by Messrs. Sanders Spencer and Sons from Liverpool by the White Star Line s.s. "Tropic."

At Selby June Horse Fair, held on Monday, there was a poor display, and trade was limited. One carting mare made £25, and other specimens sold from £5 to £15 each.



Notes and Jottings.

The chief feature in the past week with all breeders of live stock was the holding of the annual show of the Royal Agricultural Society of England at Park Royal, and at least one of the chief features of that exhibition was the magnificent collection of cattle, which was not only of great interest to spectators, but was also amongst the most remunerative from a business point of view. Cattle were most in request by breeders of practically any section of the show, and a great number of foreign buyers were present from America, including Canada, the States, Buenos Ayres, etc., as well as Australia and New Zealand and the continent of Europe. All parts of the British Islands were also well represented.

As has been the case for some time past, the Shorthorn breed was most in demand, both to view and also to purchase. As the judging was proceeding the ring side was thickly attended, and on the third day of the show, when the auction was held, the sale was equally well patronised, and good prices prevailed throughout these, culminating in a thousand guineas for the first prize two-year-old bull Doynton Brave Archer, whose destination appears to be the Argentine. It was a long figure at a public auction, but the bull is a grand one, handling well, and with even and good flesh in abundance; he has size too, and carries himself well. High prices were offered privately also for many animals that were not submitted to auction.

The Lincolnshire Red branch of this family was also well represented, some capital cows of this class being shown, cows that have size and abundance of flesh, some of them also showing satisfactory signs of milk. The milking element, however, does not commend itself to spectators on such an occasion. To stand at the ring side and watch the parade of the whole of the prize winners, the beef section of this great breed are more attractive than the milkers, the latter being generally plainer in symmetry, the flesh, which hides such faults very much in the beef animals being in a measure absent, or at least not as prominent, in the milk division. Milk, however, has its value and cannot be ignored.

Herefords made an excellent display. Milk forms but a very small item with this breed, but its quality is evidently very good, or the calves which were accompanying their dams would not look as well as they did. Their growth, too, for age is very satisfactory. The young stock (yearlings) of both sexes displayed extra development, and the breed always commands admiration for the pronounced white of the face and other markings, contrasting so pleasantly with their deep red bodies. From the rent paying point of view, too, these cattle are said and generally known to be raised and maintained at considerably less expense than many others.

Devons were well shown, though not in a superior degree, we thought, to some previous years; still there were some beautiful animals of the North Devon breed of both sexes, and they were like all the other breeds, in very fine condition, quite fat enough one might say for breeding stock. South Devons are of a totally different type, apparently having been raised in the far distant past from Guernsey blood grafted upon native stock, at least the shape and colour of them as well as the milky character of some of the cows induces this thought. The bulls and cows, too, of this breed were, some of them, of great size, and apparently good beefers.

Aberdeen Angus were a grand lot. The aged bulls, massive and symmetrical to a degree, filling the eye to perfection as they paraded the large ring, and their flesh is so evenly laid on. Several of the cows, too, contrary to general belief, carried very neat and good udders under them, and were also well covered with beef of the best quality. The young stock of these, like some of the others, were very heavy and well developed for age, and all of them appeared to be very quiet to handle and lead round the parade ring. Their jet black shiny coats, too, are not by any means a small item in their beauty.

Galloways and Highlanders were not as numerous as some of the other breeds; neither were the former quite as pleasing as we have sometimes seen them. The latter breed had several fine representatives, well-grown ones, with quality and good hair quite characteristic of their race. Both bulls and cows created a good deal of comment from the ring side as to their picturesque appearance generally, and it is well known that their beef, when fattened, is the most juicy and best of all beef.

Welsh cattle were not a strong section numerically, and these seemed rather to have a tendency to look upon milk production as being beneath their notice. Their udders were not by any means of very milky appearance. Where calves were with the dams, however, they would rather lead one to think that they had not fared badly. From a beef point of view, these cattle were mostly very good in their roasting parts.

Ayrshires were a very highly-bred and choice-looking lot, the cows having beautifully shaped bags and well filled. The teats, however, were in nearly every instance very small, which makes milking a tedious and difficult work, and often has a tendency to make the milker leave his task before all the milk has been drawn from the udder. Longhorns were very good in quality, and some very big animals of this breed were shown. They too, however, as far as the females were concerned, were very short of milk appearance.

Sussex were grand massive cattle, devoted entirely to beef, their backs and ribs well covered, and many of them of great weight and also shapely in build. Red Polls were one of the best displays in the yard. These made an admirable show. The judge here, we thought, went quite enough for the all-beef type, as several of the first-prize animals were exceedingly beefy; cows with large bags and milky appearance not being apparently as favourably entertained. Some of

these, however, were rather high at the setting on of the tail, a failing rather common with great milkers of any breed.

Channel Island cattle of both the Jersey and Guernsey breeds were a good representation, milk being very conspicuous in many of the cows and heifers of this breed, and richness was also pretty well apparent, as it should be in these cattle, whose chief feature is richness of quality in the milk, cream, and butter they produce.

Kerry and Dexter cattle were also a very creditable and useful display. These cattle may be considered dual-purpose breeds of a small size. The shape of the udder in the cows is one of their weakest points at present, and requires great attention from breeders. The Dexter cows were an especially good class, both in symmetry, breeding, and milk appearance; and the bulls of this breed were also very neat.

The question of temper and treatment of animals demands careful attention. One of the bulls of the Channel Island breed turned upon his attendant whilst on parade, and was with difficulty taken away from the ring to his stall. Kindness and firmness are very necessary with these animals, and a good nerve is indispensable; to have them well secured in their stalls, and when taken out to have them so secure with a good leading staff fastened to their nose ring so that they can be managed without resorting to whipping or otherwise abusing them is one of the great essentials and preventives of danger and trouble. Once you have to illtreat a bull he never forgets it, and will invariably seize his opportunity for revenge at some unexpected moment, which often results very seriously. It is not wise to breed from a bull that is naturally savage and vicious.

Contagious Diseases of Animals.

Notes.—The figures for the current year are approximate only.

The first hay hirings at Kirkby Stephen were held on Monday, when labourers attended in good numbers, but, owing to the backward condition of the grass crops, only occasional bargains were arrived at. A few engagements took place at £6 to £7 for the month, plus board and lodgings, and second-rate men and youths in proportion.

A Lincolnshire estate, known as the Laughton Manor Farm, within a mile of Folkingham, and comprising 569 acres, with residence and farm buildings, has been offered for sale by auction, and withdrawn at £10,250. Twenty-seven years ago the property cost upwards of £30,000, whilst the present tenant has occupied the farm for many years, and pays a rent of £630 per annum.

The usual June hiring fair for the hay harvest at Clitheroe was held on Monday, and was very largely attended, but the continued fine and hot weather, together with the unusually light hay crop, caused hiring to be very slow, except at lower wages. English labourers secured £4 to £7 for the month, youths £2 10s. to £4 10s., Irish labourers £3 to £6, and youths £2 to £4.

Horse Notes.

"He doth nothing but talk of his horse."
—Merchant of Venice.

The visitor to the Royal Show last week must have been very much struck with two things. First he must have noticed how thoroughly representative the show was of our English breeds. In this column I have nothing to do with anything but horses, and to the representative character of the horse show I wish to bear tribute. At no other show is there to be seen so many British breeds got together, and this shows that in one sense of the word the Royal Agricultural Society's Show stands upon a different platform to any other show in the kingdom. There are, of course, at the Royal classes for jumping and other attractions to draw the public; but the fact that every breed that is acknowledged as a separate one finds some sort of recognition in the programme of the Royal Agricultural Society shows that its main object is encouraging British breeds, whether they be what for want of a better word I must call fashionable, or not.

This very fact goes to prove that the resources of the Royal Agricultural Society cannot be expected to depend to a very large extent upon the gate. The general public know and care nothing much about Cleveland Bays and Yorkshire Coach Horses. It does not know the difference between them—it does not want to know the difference. As was the case with Peter Bell, to whom a primrose on the river's brim was a primrose and nothing more, so to the public a pony is a pony, and a moorland or mountain pony to them is only a sort of inferior hackney pony which would be, so far as they are concerned, as well at home. But it is the duty of everyone who takes an interest in our agriculture to do all in his power to support the national society so that it can continue its career of usefulness without having to depend upon the gate so much as it has done.

The other thing which was very much in evidence was the great number of buyers, foreign and colonial, who were present. The writer's experience of the Royal Show goes back to 1883, and never does he remember seeing anything like so many buyers at a show. From this it is pretty clear that the site, though not the most convenient in the world, is not such an awkward one after all, and if every convenience is given to would-be vendors and purchasers, as there seems every reason to believe there will be, Park Royal will become one of the greatest live stock markets in the world.

It is some years since the Cleveland Bays and Yorkshire Coach Horses have been shown in separate sections, except at the Yorkshire Show, the Royal when it was near Yorkshire, and at district shows in the county of many acres. The policy, however, is much to be commended, for there is a difference, and a great difference, between the Cleveland Bay and the Yorkshire Coach Horse, though in appearance they are very similar, and the Cleveland Bays that are on the light side—hanging more to quality than to substance—are frequently found winning in Coach Horse classes.

The Cleveland Bay is the older and the purer breed, and in these days, when it is the fashion to insist in some quarters that a new breed can be formed by an elaborate system of crossing, it is perhaps necessary to point out that the purity of the older breed should be maintained at whatever cost. It is really a matter of serious importance, and there is not the least doubt that English horse breeding has suffered to a serious extent by the neglect of the Cleveland Bay.

I am told that it was only by pertinacity on the part of the admirers of the breed that a section was devoted to it at the recent show, but I think everyone who was present at Park Royal and saw what excellent specimens of the breed were shown, could not fail to be satisfied that the policy adopted by the Council was a correct one.

What I would particularly wish to draw attention to in the Cleveland Bays is the improvement which has taken place in quality and action during the last few years. And this improvement has not been like some so-called improvements in stock, which are really changes rather than improvement. The modern Cleveland Bay has preserved the character and substance of his ancestor, and two finer classes of horses than the Cleveland Bay stallions and brood mares it would be difficult to find. As the four brood mares stood in the centre of the ring, as like each other as peas in a pod, one great enthusiast in horse breeding said, "What a beautiful lot! It is a pity there are not forty of them instead of four."

It is a pity there are not more of them than there are. There would be if it were not for the fact that the good Cleveland Bay mare will breed something that comes to money more readily than a pure-bred animal if crossed with either the Hackney or the thoroughbred, and in consequence of this many good mares have been kept breeding cross bred animals, with the result that pure bred animals are now fewer in number than they should be. The Cleveland Bay, however, is such a good worker on the farm that there is no need to apologise for his appearance on any farm, and one or two may well be kept to advantage in many places where they are unknown. A very little effort in this direction would soon increase the stock of Cleveland Bays, a circumstance which would tend to our advantage as a horse-breeding nation.

One feature of the shows I have recently visited—and I have been at a considerable number this year—has been the excellent classes of brood mares, and the number of young, or comparatively young, mares which have been exhibited in them. It has become the fashion to depreciate our modern horse, especially the light breeds, such as hunters and Hackneys; but a careful inspection of the brood mare classes shows that there is, after all, no falling off in quality or type. Increasing numbers in the brood mare classes means an improvement in horse breeding, for one thing which does not need insisting upon is that there are many excellent brood mares which it would be the height of folly to show at all. And when the brood mare classes are better filled it is pretty plain and the quality and character, and perhaps, though not necessarily, the numbers of our brood mares are increasing.

A friend remarked the other day what a lot of handsome women were going about, if they only went to the best dressmakers and milliners and were taught deportment by the best descendants of Mr. Turveydrop that could be found. Obviously this is a truism, and it is equally a truism when it is applied to horses, as my friend did. We were speaking of the success that a certain exhibitor had at a show we both of us attended when he used the above as an illustration of his argument that we do not make the best use of our horses. We are, or we were, a nation of horsemen, though I rather fear we are now beginning to live on our reputation; yet how seldom do we a see a horse with manners, or that is properly balanced and taught to do his work not only in the easiest way to himself, but in the way which looks the best? The two are synonymous, whatever some utilitarians may say.

Even in the show ring, what exhibitions do we not see? Hacks that cannot or will not walk; harness horses that lean upon their driver's hand in a way which should exclude them from all chance of winning a prize; hunters that pull and throw themselves about without the slightest attempt at balancing themselves; cart horses that slouch from side to side as if it did not matter how they take their feet up or where they put them down again.

And if this is the case in the show ring, how much more is it the case in the roads, in the fields, and on the streets. Yet a very little pains would improve matters; for a horse has a good memory, and if he easily learns bad habits he is quite as ready in learning good ones. And when a horse has manners he does his work with ease. Just watch a couple of teams at plough, one driven by a good horseman who loves his horses and loves to see them going together as they ought to do, and the other driven by a man whose sole object is getting to the other end of the field and back again, and that not in a very great hurry. The one team not only looks a picture, but it does its work more easily, it does it better, and it does more of it. It is certainly one of those things which are not easily explained that we, a professed nation of horsemen, should allow so much of our riding and drawing to be done by "rule of thumb."

THE LOOKER-ON.

Notes and Jottings.

The difficulty that meets the writer this week is not where to find notes of interest, but what to select from the many interesting and important matters concerning the sheep industry. The great annual international live stock gathering—as the Royal Show could so well be termed—brings together flock-masters from all over the world. Naturally, at such gatherings matters of great interest are spoken of and discussed.

Amongst these subjects one may be fittingly referred to here, namely, the long period of quarantine which all British sheep have to undergo when shipped to the Australasian colonies. This subject was some nine or ten years back thoroughly discussed and ventilated by the National Sheep-Breeders Association. Unfortunately, no satisfactory result was secured. There are, however, indications that were representations of the same character made again, it is probable a more favourable reception will be accorded them.

It was pointed out by the sheep-breeders at Park Royal to whom the question was mentioned, that the additional cost the lengthened period of quarantine imposed entails, was, after all, a matter for the importer rather than the vendor. With this opinion I cannot agree, because even if the whole of the cost incurred is paid by the importer, it follows that, owing to this fact alone, he is able to buy less sheep, and, more than this, owing to the fact of the long period the sheep are kept in quarantine, it very often happens that the sheep miss at least one season of service. It may also be contended, and rightly so, that if there were no hindrance and less costs incurred, more sheep would be taken out to these colonies. That this would be so we believe is correct, because from not only information received from the Colony, but from actual experience, there are many indications of a growing demand for the English mutton breeds.

At the Royal Show several good sales were made of the Down breeds for Australia, and many other inquiries were made for the same countries, and thus we have here good evidence of the existence of a demand. Under these circumstances, this is a matter that is well worthy the consideration of the National Sheep-Breeders' Association.

The great and wide interest taken in the sheep industry in Australasia and New Zealand is well known, but a glance at the attendance list of the Guildhall meeting, held on Monday last at the Guildhall, London, shows how practical such interest is. No less than twelve visitors from the Australasian Colonies were present. This fact brings home to the English breeder that his Colonial confreres fully realise the importance of unity of action on the part of all sheep-breeders.

The sheep sales, both public and private, which are recorded in detail elsewhere, all tend to prove what a calamity it would be were the Royal Show to cease holding its annual meeting. The attendance of the Argentine buyers was quite as full as usual, whilst the Colonials present were in excess of the average of former years, and what is quite as satisfactory is that the number of sheep purchased for these countries was larger than usual.

The arrangements at the Royal Show, so far as the sheep section were concerned, call for no criticism, save that it is inconceivable why so large and important a breed as the South Devon or South Hampshire sheep is that it should be omitted from the schedule. This point proves how necessary it is to have a full local representative on the council of the Royal. Such will be the case in the new council if the spirit and letter of the new rules, etc., be fully carried out, which we trust may be the case.

A feature of the Royal Show last week was the extraordinary demand for Lincoln sheep for the Argentine; nearly every flockmaster was talking of those notable sales made in connection with this breed. It is, however, not only the Lincoln breed that was in request for the Argentine, but the Kent or Romney Marsh breed, and the Hampshires also. It is quite sure that more sheep of both these breeds have either been purchased or arranged for during the past week than at any previous Royal show. Then, again, quite a good number of sales have been effected for Chili.

The North American demand has, however, been a very small one, and the attendance of visitors from both the States and Canada was the smallest in number for very many years.

The increased price of wool has put the flockmaster into better spirits, and far more note has been taken of the quality of the fleeces than was the case even a couple years or so back. As an indication of the large increase in the price of wool, we may mention that a large Lincoln wool-grower stated that he had just disposed of two years' clip at 30s., which was exactly double the price he made at his last sale, equalling a rise of just 100 per cent.—a remarkable increase in value.

An interesting and instructive bit of information is available to all who care to compare the results secured by the different breeders competing at the Royal Show. For instance, we find that Mr. Henry Dudding, whose sale of fifty grand Lincoln yearling rams takes place at Riby next Thursday, made of twelve pens at the Royal Show. Of these, no less than eleven were either winners of prizes or in the award list. Messrs. Dean and Sons did even better than this, for the whole of their dozen entries were all noticed by the judge. These two examples of an idea were selected at random, and clearly shows the marked uniformity of the merit of their particular flocks. Equally satisfactory results could doubtless be quoted for other breeders, but those two quotations just show how the careful breed could apply a test to the merit of any flock without any great trouble. If such awards were made for several years' bulk, still more interesting and valuable would the information become. This is perhaps a novel use to put the result of showyard contests to, but, if carefully thought out, there is no doubt many will appreciate the suggestion, and adopt it.

An examination of showyard award lists is an easy matter, and as these are available for many years past, it would not be a matter of insuperable difficulty to very soon compile a record of any breed for many years past, and thus have placed at command information the importance of which has not yet been fully realised.

Sheep breeders' Conference.

The principal business at the sixth International Conference of Sheep-breeders, held under the auspices of the National Sheep-breeders' Association, was the reading of a paper by Professor Cave on the diseases of lambs. The Conference, which took place in the Guildhall, London, on Monday, was presided over by Earl Cadogan, K.G., and in attendance were a large number of British breeders, with representatives from Australia, New Zealand, United States, and the Argentine.

Professor Cave's address dealt generally with the diseases of lambs, and referred to them in the order in which they might occur from birth to the age of twelve months. Navel-ill and joint-ill, he said, were frequently met with during the lambing season, a few cases only occurring in a flock; but in some cases heavy losses might be caused. Treatment, he thought, was of very little use in such outbreaks, but every care should be taken to prevent newly born lambs from being contaminated by ewes affected with septic metritis. Where the lambing pen had been contaminated, its use should be discontinued until it had received a thorough cleansing and disinfection. As to preventive measures in the case of lambs affected with tetanus, the writer of the paper laid stress on the necessity of extra precautions in performing the necessary operations of docking and castration, and advocated the use of the hot iron in each operation, it being a powerful anti-septic, also sealing the surface of the wound and forming a protective coating which would prevent the entrance of dangerous microbes.

The tape worm disease in lambs was described as sometimes causing very serious losses in certain seasons, and especially on marsh lands. By giving dry, nourishing food as early as possible, the lambs are better able to withstand the debilitating effect of the invasion when it occurred. Salt and sulphate of iron were given as tonics, but it was possible that some good effect might be derived from the vermicidal action of drugs. The symptom of parasitic bronchitis of lambs, commonly known as husk or hoose, was stated to be a troublesome spasmodic cough. One of the preventive measures Professor Cave suggested was the daily administration of common salt with the dry food, for if, as nearly all authorities agreed, the young thread worms reached the lungs by way of the stomach, the presence of a small amount of salt in the food would be sufficient to destroy the worms, and so prevent them reaching the lungs. Other diseases mentioned by the writer of the paper were gid, sturdy, blobwhirl, or pothery. The symptoms of these, he said, were due to the pressure of the hyatid upon the brain of the sheep.

The concluding section of the address dealt with parasitic gastro enteritis in lambs. In the autumn of 1895 a serious outbreak of disease in lambs occurred in Lincolnshire and several other counties. The lambs, when seven or eight months old, suffered from diarrhœa associated with a rapid loss of condition. In many flocks the rate of mortality was very high. In the following autumn a similar outbreak took place, and Professor McFadyean found the disease, which was again causing a heavy mortality, was due to the presence of parasites in the fourth stomach and duodenum. In all the cases examined by Professor McFadyean large numbers of small nematode worms were discovered. These worms were described by him as belonging to a new species, for which he suggested the name—Strongylus cervicornis. The small, delicate, round worms were only detected by a careful examination of the stomach contents, or by a microscopical examination of a scraping of the mucous membrane. When mixed with the contents of the stomach and duodenum the worms escaped notice, but they were easily seen when a small portion of the ingesta was examined microscopically. Since this discovery was made of the true cause of the Lincolnshire lamb disease, much attention has been given to the presence of nematode worms in the fourth stomach, and outbreaks of disease in lambs, sheep, and cattle have been found to be due to parasitic invasion of the true digestive stomach. I have recently been engaged in investigating a disastrous outbreak in a flock of ewes, in which the cause of death was found to be an enormous invasion of the abomasum by another nematode worm—Strongylus contortus. From my own experience I may say that the chief factor in the successful treatment of these cases of parasitic gastritis seems to be the early detection of the parasites, and the commencement of the treatment *before* the animals become markedly emaciated. The various parasites which are found in the fourth stomach do not appear to cause trouble to the host except when they are present in enormous numbers. As Professor McFadyean has pointed out, land which is constantly heavily stocked with sheep gradually becomes saturated with the parasites which are peculiar to sheep, and so in time extensive outbreaks of disease are sure to occur. He suggests a change of stock for a year or two, in order to allow the dangerous parasites in the soil to die off. Whether dressing the land with salt and lime, as has been suggested in other diseases, will prove effective in destroying the larval forms of the parasites of the fourth stomach is yet unknown. It is certain, however, that these parasites do not increase in number in the soil, but they only breed while inhabiting the bodies of their hosts, and if anything can be done which will prevent them from reaching the stomachs of their proper hosts, then they must ultimately die out, and the land will again become safe for sheep.

A discussion on the paper was opened by Mr. Geo. Street, and was continued by Mr. Cassares, of Argentina; Mr. A. Mansell, of Shrewsbury; Mr. A. E. Russell, of New Zealand; Mr. J. W. Anderson, Australia, and others, all of whom expressed themselves indebted to Professor Cave for his suggestions. The meeting passed a vote of thanks giving effect to this sentiment, and then adjourned.

Blandford Sheep Fair.

Blandford (Dorset) great prize sheep fair was held on Thursday, when there was an unusually large number of sheep, some 10,000 being penned, and there was also a very full attendance of buyers. The customary large sales were held by Messrs. Ensor and Son (Dorchester and Wimborne), Senior, Godwin, and Young (Sturminster and Sherborne), and Roberts, Son, and Tory (Dorchester and Yeovil), two of the firms offering prizes for the best drafts penned. The sheep, as a rule, came to hand in excellent condition, and, though the want of rain for the roots made buyers somewhat cautious, the scarcity of sheep told in an opposite direction, and a very good business was done at prices showing an improvement on last year's rules, all being readily cleared.

The sheep penned were confined very largely to draft Down ewes, with a few lots of wether lambs and couples, a general run for best ewes being from 48s. to 55s., and from 38s. to 47s. for others; grazing Down ewes, 32s. to 38s.; couples from about 58s. to 64s.; wether lambs, 32s. to 38s.

Lamb Sale at Sudbury.

The annual lamb sale at Sudbury, the first of the season in the district, was held on Monday, and attracted a more than usually numerous company. Two thousand sheep and lambs were penned, including Southdown, Suffolk, and half-bred. Some very choice Southdown ewe and wether lambs from the Executors of the late Mr. Henry Meeking (by whom the dispersal was for a good many years carried out), fetched as high as 70s. 6d.; first cross ewe lambs from Colonel Burke 35s., Suffolk ewe lambs from Mr. W. Pinhey 34s. 6d., half-bred lambs from Mr. W. Rolfe 50s. and 40 fat half-bred lambs from Earl Howe's Cavendish farm averaging 35s. 3d. Trade was not so sharp as had been anticipated, but late market rates were fully maintained.

Wool Sales and Fairs.

Huntingdon.

There was a good attendance of buyers, chiefly from Bradford, at this fair on Wednesday, but trade was slow from the buyer's standpoint, farmers holding out for higher prices, but all the wool was sold. The pitch was 5,578 fleeces, weighing 1,279 tods 15 lb., slightly less than last year. Prices ruled from 28s. to 31s. per tod, the top figure last year being 26s. per tod.

Guildford.

At the wool sale held at Guildford on Thursday, over 10,000 fleeces were pitched, and Mr. Ellis sold 3,500, and Messrs. Hewitt and Lee about 7,000. More buyers were present than usual, all the principal woollen centres being represented, whilst prices showed a considerable advance on last year's, washed fleeces fetching 13d. to 14d. per lb., and unwashed made 8½d. to 13d. per lb.

Northampton.

The pitch at this fair on Thursday numbered upwards of 18,000 fleeces, or about 1,000 less than last year. There was a good attendance of buyers, and a brisk trade was done at prices which showed an advance on those of twelve months ago. Fifteen thousand fleeces were sold, the best price given being 32s. per tod, which was 5s. better than top price last year. The general run of prices was from 28s. to 30s.

Sheep Scab Regulations.

Two questions dealing with the above were addressed to the President of the Board of Agriculture in the House of Commons last week by Mr. Allan Bright. In the first he asked for an explanation why sheep, from areas infected with sheep scab in Scotland are allowed to come into England without being under inspection, while sheep from infected areas in England and Wales cannot be moved without such inspection. Mr. Ailwyn Fellowes, in a written reply, says: The formulation of arrangements for the control of the movement of sheep from the northern counties of Scotland has been attended with considerable difficulty, and has been the subject of prolonged negotiations with the local authorities concerned. An order has now been passed which prescribes the compulsory dipping of sheep in those counties between July 15 and September 1 next, and imposes restrictions on the movement of sheep out of the dipping area. The new order will, it is believed, afford adequate security against the spread of the disease from the county in question.

In his second enquiry Mr. Bright directed attention to the difficulties caused by the various sheep scab regulations, and asked whether the President of the Board of Agriculture was prepared to substitute for the present rule the system of proclaiming an area immediately round the infected place, and of applying more stringent measures with regard to the movement of sheep to and from that area. Mr. Fellowes, in his reply, says "Under the Sheep Scab Order of 1905 provision is made for the detention of sheep believed to have been in contact with sheep affected with sheep scab, and under the Sheep Scab (Compulsory Dipping Areas) Order of 1905 the compulsory dipping of all sheep in a particular area may also be required. In addition, however, it is also necessary to take measures to prevent the spread of the disease from districts in which it is generally prevalent, and it is under this head that some difficulties have arisen in connection with the measures we are taking to stamp it out. I am hopeful that the modifications we have been able to make in our orders on this subject will remove any serious cause of complaint respecting them. I do not think we could with any advantage increase the stringency of the measures taken on the spot when the disease is reported or discovered."

THE ROYAL SHOW.

(*Continued from page 12.*)

Among Shropshire yearings, Mr. R. P. Cooper's being pretty nearly complete. Mr. R. P. Cooper's thick and good quality ram was placed second; here it would probably have been more nearly correct to have put Sir P. A. Muntz's ram, that had to be content with h.c. honours. This ram had much to admire, and will probably be in request if sold. Mr. E. Nock took third honours with a very evenly-fleshed ram, not quite so wide and deep as the leading rams, but, still, one of first-rate merit. A second entry from Mr. R. P. Cooper's flock was given r.n.; this was a ram of very choice quality. Five others were h.c.

The pens of five yearling rams were, taken all through, a capital lot. Many of the pens were very superior in type and character. Mr. R. P. Cooper won here with a beautiful pen of the right stamp, having, coupled with great substance and width, the finest of quality and fleece. They were full worthy of being at the head of this particularly strong class. Mr. M. Williams came in for second honours with another grand lot of rams; these were, perhaps, not quite so even as the winning pen, but the quality and type were undeniable. Sir P. A. Muntz, who has not had the best of luck this season, had a pen that have all the attributes of real stud sheep, coupled with a fine and even fleece and excellent flesh; they were third. Mr. E. Nock, who has Mr. A. E. Mansell's old farm at Shifnal, is keeping up the renown of that holding for typical Shropshires, and his pen of five, the r.n., were of a very superior character, handling well and moving equally as good. Four pens were h.c, one of which is deserving of notice, at any rate, namely, that beautiful pen sent from Scotland by Mr. T. A. Buttar, the quality and type of which was very good indeed.

find so good a lot of lambs present. Mr. E. Nock won with a beautifully matched and even trio of high merit, when viewed either from the breed point of view or by reason of their flesh and fleece. Mr. R. P. Cooper's good handling pen were square and deep in the carcase, with real good skins and flesh, moving well, and having a good masculine character. Another pen of more than average merit was that very choice pen of good fleshed lambs which came from Mr. J. Harding's flock. Mr. T. S. Minton took the r.n. with a particularly good and even pen, which walked well, with capital merit and substance. The yearling ewe class was a grand one all through, better than we have seen for several years. Here, again, Mr. R. P. Cooper's flock took the premier position with a pen of wide-spread, good-backed ewes, with flesh and fleece of the finest description; these ewes are likewise grand specimens of their breed. Next them came another pen from the same flock, which were practically as good, but not quite so firm to the hand. Third honours went to Sir P. A. Muntz for a pen, the like of which are seldom seen. True, they did not win, but despite this fact they were a pen which is not often beaten. The scale and quality of these ewes, coupled with their fine flesh, rendered them dangerous competitors for top honours. Mr. P. L. Mills' r.n. pen were hardly so even in size, nor quite so nicely matched; and those two superior pens from Sir W. O. Corbet and Mr. T. Fenn were well deserving of the h.c.s they obtained.

The ewe lambs were a very choice lot indeed, particularly that real good pen from Mr. T. S. Minton, which were beautifully matched and well fed. These went first, but Mr. John Harding, with his excellent pen, ran them a very

Peel Champion, the Champion Berkshire Pig, at last week's Royal Show.
Bred and Exhibited by Mr. J. Jefferson, Peel Hall, Chester.
It was born Jan. 10, 1903, sire Peel Swansea, 2nd 8748, dam Peel Rosebud, 2nd 7506.

The new class of yearling rams entered to be sold got a very large entry indeed; and not only was it large in number, but its average merit and quality left but little to be desired. The value of the prizes was the reason for this keen competition, because these were four in number, £20, £15, £10, and £5. In this class the special merit of Mr. R. P. Cooper's flock was emphatically shown, for not only were the first three prizes won, but the r.n. and two h.c.s also, an achievement upon which their owner can be justly proud. Individually, the merit of these rams was excellent, as a reference to our sale record will show. Mr. B. Wall sent several rams to this class, one of which, a particularly choice one, secured fourth honours; this was not a large ram, but a small one of very superior merit and grand character. Amongst the h.c.s were two from Mr. P. L. Mills that were greatly admired; three from Mr. J. Harding, that were recipients of the same honours; and one from Mr. T. A. Buttar, whose fine conformation and level character made him in great request when sold by auction.

The three ram lambs class was one of the best we have seen of this breed for some time. Taken as a whole, it was satisfactory to close second; here we found very first-class type. The remarks in respect to the last-mentioned pen are equally applicable to that which won third honours for Mr. E. Nock, whilst in Mr. A. Tanner's pen, the r.n., were found three lambs of more than average merit and quality. Mr. R. P. Cooper, with a pen that only need time to develop into an excellent trio, was h.c.

Southdowns.

This breed made the largest entry of any in the show, and a larger one than has represented the breed for many years past. There were, of course, more entries of ordinary merit, but we consider that, as a rule, the average quality all through the section was an excellent one. The value of the two shear ram class was distinctly seen in this breed, for the class secured an entry of eighteen—i.e., eighteen rams that had been adjudged worthy by many of the leading flock masters to use in their flocks for breeding purposes. Surely no higher recommendation than this could be desired. The competition was keen, but the winner was somewhat easily selected, being a square and deep-bodied ram of large scale and grand flesh from the Duke of Northumberland's flock, and bred by the Earl of

Cadogan. Next to this ram came one from Goodwood, that for quality of flesh and fleece was clean ahead of the winner, and was a ram that with many judges would have gone to the first place. His Majesty the King had a ram of very superior merit, a well-balanced and very even-fleshed ram indeed, that handled well and true. Two rams from Mr. E. Ellis's flock were h.c., either of which could well have gone also in the running. These were made r.n. and higher up in their class, for the merit of both flesh and wool in them was very good indeed.

Twenty-seven entries made up a very fine and large class of yearling rams. The selection for the leading honour was a very fine ram of great merit from the King's flock. This ram, to which more objection was raised on account of want of width and fuller development of the leg, was a true-topped ram, with first-class fleece and skin, and as such was well worthy of being made champion of its breed, this being the second year in succession the King has won this honour. His Majesty was also third with another ram of useful character, with very excellent flesh, but not so good in the fleece as the winner. Between these two high-class sheep came one from the Goodwood flock, a ram of exceptional quality and merit, and, had its type been more masculine, would have readily been the winner—in fact, some would, despite this defect, have given him this position. Mr. C. H. Berners took the r.n. with a ram of nice scale and type, and very good in its flesh. Five others were h.c., those coming from Mr. C. Adeane's, Mr. E. Ellis's, and the Earl of Cadogan's flocks were well deserving this distinction.

Twelve entries were secured for the new class of three yearling rams, and, taking the entry all through, we consider it a most creditable one. The destination of the first prize was soon decided, because there was no other pen which, taken from every point of view, equalled that owned by his Majesty the King. After these came a pen of average merit, but lacking the uniformity a pen of three should have. Two were good enough, but the third not so, and preference ought here to have been given to Mr. E. Ellis's pen, which were well matched and fully as good in other points as the second pen. Mr. E. Henty's trio were of high quality, a pen of grand type and very even flesh, whilst the preference shown by the award of r.n. to the Duke of Northumberland's pen over that most typical pen of Mr. C. Adeane's, is a matter we cannot understand, for the latter were preferable, both for touch and quality of flesh and evenness of fleece. The ram lamb class for pens of three secured a grand entry, and in the winning pen, that came from Mr. E. Ellis's, were found a pen of the right type, quality, and character, with fine flesh and good fleeces. Mr. C. Adeane, whose double entry was second and third, sent forward six very excellent lambs indeed. His Majesty the King was r.n. with a choice pen of first-class lambs, well matched, and the h.c.'s that went to the Earl of Ellesmere, Colonel A. F. Walter, and the Pagham Harbour Company were well deserved.

The yearling ewe class was an excellent one, but here the judge let depth of flesh gain the upper hand of true breed, point, and character, for the champion female pen that came from Sandringham were not of that type and character generally considered to be typical of the best specimens of the breed. Next them came a pen that would have done honour to any class of this age, whether type, quality of flesh, or character of the fleece were considered either singly or collectively. These came from Mr. E. Ellis. Next them, in the third place, but which should have been second, came a very choice and well-matched pen from the Duke of Devonshire's flock, whose prominent position in so strong a class is a matter of gratification. The Earl of Cadogan was r.n. This pen were hardly so good to handle, nor were they quite as true in conformation.

As in the class for ram lambs, so it was in the one for ewe lambs. Mr. E. Ellis won with a grand pen, quite one of the best seen out for some time. Mr. C. Adeane was quite close up in the second place, with a wonderfully good fleshed pen, very even in their flesh and fleece. Third honours went to a very neat and even fleshed pen from Sandringham that came well to the hand and were very true in formation. The r.n. pen were from Mr. E. Henty's flock, and here again, as in the previous pens, we found merit well deserving of the honour conferred. The Duke of Northumberland's pen, as well as that owned by Mr. C. Adeane, were both well deserving the h.c. they won.

Hampshires.

This breed hardly ever made a better display than at the present show, and the exhibits were notably uniform in type and very true in character all through each of the classes. Five two-shear rams made up a class of very superior sheep. The winner here, that came from Mr. Cary Coles's flock, was a superior ram from nearly every point of view, and had very fine flesh and touch. The second honours went to Mr. H. C. Stephens for a ram of great scale coupled with very fine quality, both of type and flesh. This ram handled well and was well brought out. The second entry from this flock was one of those to which the commendations were given, a suitable acknowledgment of its merit. Mr. T. F. Buxton took r.n. honours with a ram of very first-class quality, very true to type, and good in its flesh. The yearling ram class was a fine one, of large number, and here the difficulty was not in the selection of the winner, but in those that came after. The winner was Mr. James Flower's excellent ram that has been first all through the leading shows this year, save at Somerset Show, where the judge at the Royal put him second, an oversight, we are pleased to note he did not hesitate to repair on this occasion. Mr. T. F. Buxton was second and c. with a pair of very fine rams of excellent quality, scale, and type. Some exception has been urged against the former ram, but we have closely examined him and agree with the award. Mr. Cary Coles's third winner has a particularly fine back and loin, well covered with a wealth of flesh, and of fine character; whilst in the third ram from Mr. H. L. Cripps's flock we found a ram of particular excellent quality with very fine scale and first-class type. Mr. J. A. Keith Falconer's h.c. ram was another of real quality and merit, as was also the grand ram, the second string from Chilmark.

The Hampshire ram lambs have been a larger class in some former years, but we question if ever a better or more typical pen was ever selected for the first prize and champion honours than the one which won first honours this year for Mr. James Flower. This pen's quality of flesh and trueness of type and character was most noticeable. Sir W. G. Pearce's young flock secured the second place. This pen did not match so well as we have seen winning pens, nor were they quite so uniform as some other pens, but they had very fine merit and touch. Mr. H. C. Stephens's pen were very close up for second honours; some would probably have given them this place, and had it been so, a pen of very superior merit would have won the prize. Mr. Cary Coles's pen was one sometimes seen—i.e., a pen of three particularly fine and first-class lambs, but which, when viewed as a whole, was unable to take any higher place than r.n., an award which we thoroughly agree with. Mr. T. F. Buxton's h.c. pen was a very choice one indeed.

The yearling ewe class was not a large one, but its merit all through was undeniable, particularly so in respect to those six grand ewes that won first and second honours for Mr. James Flower. These ewes by this victory practically complete the showyard season of the present year with an unbeaten record, an achievement Mr. J. Flower has accomplished for several years in succession. Mr. T. F. Buxton's choice pen of great merit came third, with the second entry of almost as good ewes h.c., leaving the barren honour of r.n. to acknowledge the high merit and fine type of Mr. H. L. Cripps's pen of very first-class ewes. The winning pen in the ewe lamb class was that which has won all through, save at the Wiltshire, for Mr. H. C. Stephens. The quality, scale, and evenness of the merit of this pen ought to have carried them ahead all the season, for they were quite the best pen of their age seen out this year. Sir W. G. Pearce took second honours with a pen that has great merit coupled with very good quality. These were followed by Mr. Cary Coles's pen that pretty nearly went second, a place they would have worthily filled, for their merit, etc., was very good indeed. Mr. James Flower took the r.n. with a pen of excellent merit, but not so forward as the winners. Three other pens were h.c.; these included a particularly fine and typical pen from Mr. T. F. Buxton's flock.

Suffolks.

The quality of this section was not so good as we have seen it at recent Royal Shows, and neither were its entries so numerous. Four two-shear rams were entered, but Mr. R. Barclay's pair had no difficulty in taking both first and second honours. The leading ram was a typical one. The yearling ram class produced a keener competition, and Mr. G. Hale won first honours with one bred by the late Colonel H. McCalmont. This was a lengthy and good fleshed ram; but preference, had it been given to Mr. H. E. Smith's ram, would have recognised more quality with fully equal substance and good flesh. The latter ram was also very good in its flesh, and rather more even than the winner. A choice ram from Mr. S. R. Sherwood's flock took third honours. This was a real good type of its breed. Mr. R. Barclay came in for r.n. The single ram lamb class was a weak one. The better lambs were unquestionably that pair that won first and third honours for Mr. H. E. Smith. Messrs. Traylen, with a very useful and good fleshed lamb, came in second; Mr. S. R. Sherwood r.n. The pens of ram lambs were better in quality. Here, again, the leading honours went to Mr. H. E. Smith. We admired these lambs much, for there was found fine flesh and even fleeces in them. Messrs. Traylen's pen again came in for second honours. Mr. S. R. Sherwood was third, and Mr. M. G. Hale r.n. The yearling ewe class was one of more than average merit, the winning pen that came from the Earl of Cadogan's flock was of specially high merit, having fine flesh and type, and well able to move. Mr. R. Barclay's two pens, like the winning pen, had merit, and were of fine type, with real good flesh and symmetry. The ewe lamb class was practically a repetition of that for ram lambs, with rather better merit. Mr. Sherwood took the first award, and second prize went to the pen from Mr. H. E. Smith's flock.

Lincolns.

The great interest taken in this breed at the present time was clearly indicated by the closeness with which the work of the judge was watched all through. Probably no one acting as a sheep judge had ever greater responsibility placed in his hands, because upon the awards made it really depended whether or not a ram made a thousand or half that price. However, we must digress no further because if we do we shall trespass upon the work of another far better and more competent to deal with the sale reports that ourselves. The two shear ram class came first, and here Mr. Tom Caswell with the Nottingham champion ram won again the same honours, namely, first in its class and champion of its breed. This award was one not questioned for the ram was easily first; next him came a very typical ram bred by Messrs. Wright, and exhibited by Mr. H. Dudding, of it is needless to say very superior merit, for none without this would be used for stud purposes at Riby. The same exhibitor came in for r.n. with another grand and typical ram, very level and uniform in its fleece. The yearling ram class was a thoroughly good one all through, the contest here was by no means a one-sided one, for until the award was given it was open to question which of the two at the top would be preferred. The preference was given to Messrs. R. and W. Wright's ram, and this, when examined, was found to be of a very superior type, having excellent flesh, great spread, and good loin, but somewhat deficient in masculine type. However, so greatly are the best rams of this breed in request that Messrs. Wright sold him without difficulty for the record showyard sale price of 1,000 gns. The next ram in the award list came from Mr. Henry Dudding's flock. Here we found an exceptionally good ram, having in addition to a grand and timely formed carcase, that fine masculine type not seen in the winner, and a fleece of that description that is one of the most valuable characteristics of the Riby flock, as is proved once again at this show by notable success in the wool section of the show, in which both first and second honours were won. Mr. Tom Casswell, with a couple of very typical rams came in third and c.; the former ram was eagerly looked for by the Argentine buyer because of its even fleece, which was of the character so highly appreciated in that country. Mr. H. Dudding secured also the r.n. for another ram of special merit, whose quality of flesh and touch was much appreciated by those that examined it. Two from Messrs. S. E. Dean were h.c., both being rams of superior type and character.

The class for pens of five yearling rams was another one of special quality and merit. The winning pen here was another from Nocton, and Messrs. Wright are certainly deserving of hearty congratulations upon this further evidence of the merit of their flock. The pen were beautifully matched, and well brought out, winning with ease in a thoroughly good class. Second honours went to Mr. T. Casswell's pen that were well matched, but not quite so satisfactory when under hand; Mr. H. Dudding's third prize pen were preferable from many points of view, but they were hardly square enough behind, and not quite so even when taken as a whole. Mr. J. E. Casswell's reserve pen were of fine quality, and were admired; they matched well and were clothed with fleeces of the description so well appreciated in the Argentine. Messrs. S. E. Dean and Mr. T. C. B. Dixon were again h.c. The ram lamb class was a small one of high merit, and in those two very superior pens with which Mr. Henry Dudding won first and second honours, high merit and grand type were found, as well as fleeces of a superior quality. Messrs. S. E. Dean Bros. had two pens in this class and these were respectively third and r.n., honours fully deserved.

The yearling ewe class was not a large one, but its merit undeniable, particularly in respect to the two first pens that came from Messrs. Wright's flock. These grand ewes, most typical of their breed, were probably two of the best pens that have won these honours during the past two or three years. Mr. H. Dudding's pen were not quite so good a match as should

have been the case, nor did they handle so well, but when the fleece was examined here in each case was found superior quality. The ewe lamb class was another of high average of merit, small it is true, in regard to number, but a good one all through. Messrs. S. E. Dean Bros. won leading honours with a couple of pens of nice type and superior merit, they handle well and were well matched in the fleece. Mr. H. Dudding's two pens were third and r.n., and very choice indeed is the quality found in them.

The most important class however, in connection with this breed is that which comes last in the schedule, i.e., that one for the best three ewe hoggets in full fleece. This class had special merit and most superior quality, and in it, better than in any other class, those two great qualities of the Lincoln sheep were seen in full prominence, namely, ability to produce a wealth of both wool and mutton. Once again the Messrs. Dean won leading honours here, their prize pen was a notable one, full of true character and having fleeces of the highest merit; the second prize went to another pen of the same flock, of practically as good merit. Mr. H. Dudding's entry came third, these were hardly so wide as the winners, and lacked a wee bit of the spread, hence the position they secured in the class.

Leicesters.

A thoroughly typical and first-class entry was found of this breed, whose value for crossing purposes is much more highly appreciated in the Colonies than at home at the present time. The entry, though good, was not a large one, but about the same in number as in the two preceding years. The yearling ram class had for its winner a deep-fleshed good ram from Mr. Jordan's flock that handled first class; the r.n. was another excellent ram from the same flock, showing very true type and excellent character. Mr. G. Harrison's grand old flock, represented by three entries, received full recognition of its merit by the award of second, third, and c. Mr. E. F. Jordan repeated his success in the yearling ewe class again, for he won here both first and second honours, the leading pen being of excellent scale and fine quality; but the second pen were hardly as even in the fleece and touch as were the third-prize pen, which came from Mr. G. Harrison's flock, this was a fine and good pen. Mrs. S. Perry-Herrick had a couple of typical pens, to which were given the r.n. and c. In the lamb classes, Mr. G. Harrison was first and third in each case, these were all very typical lambs, and each of the trios were well matured. Mr. E. F. Jordan was second and r.n. in each class with well-grown and evenly matured lambs.

Cotswolds.

This breed once more made its appearance in the showyard and though the entry was a small one, the merit was of a very high degree of excellence all through. Mr. W. P. Garne, with a grand ram—one of the best we have seen for some time—was first in the yearling class, and Mr. W. Houlton came in for second and r.n. with a deep-fleshed and very even pair of well grown rams. The latter exhibitor, too, won first honours in the yearling ewe class with a nicely brought out pen of even quality and good fleeces. Mr. W. P. Garne's entry here having to take the second place, an event that has not often been the lot of the yearling ewes from this flock. Mr. Garne's lambs were a grand lot, and he won first and r.n. honours for both ram and ewe lambs.

Border Leicesters.

This breed was not represented at the Royal Show last year, but its entry, though small, upon the present occasion, fully justified its inclusion again in the prize schedule. The Right Hon. A. J. Balfour won in all four classes with sheep of special merit. The winning sheep in the yearling classes were notably good, and typical of their breed. Mr. P. Winter was second all through the section, his entries, though of high merit, had not the same scale which was found in the winning entries, coupled with a quality of very high order.

Kent or Romney Marsh.

Never before do we remember finding at the Royal Show so fine and good an entry of this breed. As year succeeds year the great improvement effected in this breed since the formation of its Flock Book nineteen years back, becomes more and more noticeable. The transformation that has taken place in the merit of the entries now as compared with ten years ago is simply astounding, and, further, the great increase in the demand form is an equally striking fact. This breed, thanks to its Breed Society, is one that has a two-shear ram class to show to its customers from across the sea the true type and character of the mature sire. In this eight entries were made, and the winner was a particularly fine and good-fleshed ram, the property of Mr. H. Rigden, whose fine scale, even type, and good fleece made it a ram of high merit. Mr. F. Neame took second honours with another very superior ram indeed, particularly good in its fleece and scale. Mr. G. Farmer's ram was one of fine character, being masculine in type, with a first-class fleece and plenty of substance. This came third, but was closely pressed for its position by Mr. C. File's thickset, good-carcased ram, having fine legs and good fleece.

The yearling ram class was another of very superior merit. Here Mr. C. File, with the Royal Counties winner, took precedence, an award that was fully in accord with the merit of the exhibit. Next him came one with rather more height, but hardly so compact, from Mr. H. Rigden's flock, but a very good-fleshed ram indeed. For third honours one from Mr. W. Miller's flock was selected; some questioned this award, but when run out of its pen the award was fully confirmed, because we found in this ram high merit, excellent wool, and plenty of substance and bone. Mr. F. Neame's ram, that came r.n., was another particularly good ram, which handled well and was of nice type; and the h.c. which went to Mr. W. Miller's second entry was well deserved.

The ram lamb class was a large one, and, at the same time, of great merit. A better, more evenly matched, and truer pen have seldom taken the first prize, which went to Mr. H. Rigden's excellent pen; next came Mr. F. Neame's pen, these were somewhat wider and thicker lambs, but had hardly so much height as the winners. A third prize recognised the specially good merit and fine type of Mr. J. D. Blount's well brought out pen of very masculine lambs, showing real good merit and quality; whilst the r.n. that went to the Earl of Verulum was given to a pen of three most typical lambs, with grand flesh and substance.

The yearling ewe class of seven entries was one of the best we have seen out for some years, and its winning pen that came from Mr C. File were no question, now they were looked at, of the highest merit; quite one of the best pens that have been seen from this flock for some time. The second entry from the Elham flock secured Mr. C. File the third prize; this pen were pretty nearly as good in quality as the winners, but did not match quite so evenly, hence their place in the class. The pen selected to divide Mr. File's entries came from Mr. F. Neame's flock; here, again, merit was very prominent, and the pen, as a whole, were real good ewes. Mr. G. Farmer's pen, that took the r.n., were of good merit, with very excellent scale, but hardly so well brought out as the winning pens. The ewe lamb class was another most excellent lot as a whole, the winners here were a thick set, well-made pen of good-fleshed lambs of a very superior type, with very even fleeces. Mr. H. Rigden's pen was again representative of very special merit, and they won the second prize, being beaten by Mr. Neame's pen, but they in turn beat, by but a very narrow margin indeed, a particularly fine and good-fleshed pen that came from Lord Verulum's flock, which were thoroughly typical of their breed, although bred in Hertfordshire. The r.n. pen was owned by Mr. J. E. Quested, an even and level pen.

Royal Emblem, the Champion Shorthorn Bull at the Royal Show last week.
Born March 4, 1901; sire Lord Lynedoch, 74900, dam Rose of Elbe; Breeder, Mr. J. Durno, Jackston, Rothie-Norman; Exhibitor, Mr. R. Taylor, Pithvie Farm, Carnoustie.

Wensleydales.

Another capital entry was found in this class, the pluck of those who are interested in this breed in making so large an entry at this show is deserving of high commendation. The yearling ram class had for its winner one from Lord Henry Bentinck's flock, a ram of nice type with plenty of masculine character and scale, accompanied by a very even and typical fleece. Second and third honours went to two real good rams from that well-known flock owned by the Exors. of Mr. T. Willis. The flesh, fleece, and character of both these rams were of very high merit indeed. Mr. E. K. Cleasby was owner of a very typical ram that came in for h.c. In the yearling ewe class the Exors. of Mr. T. Willis went clearly to the fore with a particularly well matched pen of high class ewes, which were excellent in respect to both fleece and flesh when under hand. Mr. John Hargrave, who came in for second honours, had a very good pen of typical ewes that were most creditable to his flock. The third place in this good class had Lord Henry Bentinck's pen for its occupant, another pen of high-class merit, Mr. E. Horseman taking the h.c. The classes for ram lambs and ewe lambs were very typical; the winning ram lambs owned by the Exors. of Mr. T. Willis were greatly admired, as were also that fine pen of ewe lambs which went to the front in this class owned by Lord Henry Bentinck.

Dorset Horns.

The entry of these sheep was one of the best we have seen at this show for several years. All through the classes merits and quality was found. In the yearling ram class Mr. E. A. Hambro was fortunate enough to get first place, which, however, would have been occupied by Mr. James Attrill's entry had the best ram in the class been selected, as it was this very true ram has to be content with second honours, being followed in its class by one of Mr. W. R. Flower's, a very nice ram indeed, but one that should not have been preferred to Mr. S. Kidner's unnoticed ram. Mr. F. J. Merson took the r.n. In the ram lamb class two pens of very grand merit and superior quality from that excellent flock owned by Mr. W. R. Flower, first and second honours were secured. These awards were not only correct but generally approved of. The second pen was followed by a capital pen of good-fleshed lambs from Mr. F. J. Merson's flock, and Mr. E. A. Hambro had to be content with r.n. The yearling ewe class was a strong one, the winning pen being of special merit and type. Mr. W. R. Flower owned them, and he won in addition to the class prize the special champion prize for the best exhibit in the section. Mr. E. A. Hambro took second honours. This pen had more scale than the winners, but did not handle so evenly, nor were they as a whole so well matched. Third honours went to Mr. F. J. Merson, whose pen were very typical of their breed, and Mr. James Attrill's very choice pen took the r.n. First and r.n. honours were won in the ewe lamb class by Mr. W. R. Flower with two real good pens of ewe lambs; these being well matched and very true to type. The second place in this excellent class had for its occupants Mr. F. J.

Merson's very even and fully typical pen. Mr. E. A. Hambro's pen came in third, but the following pen might have exchanged places with them.

Ryelands.

The increased activity amongst those who are breeding these sheep was shown in the larger numbers found at the show this year. The older ram class had its winner and r.n. in two very excellent rams owned by Mr. W. T. Barneby, which were fine masculine and typical rams of their breed. Second honours went to a very choice and good ram owned by Mr. F. E. Gough, whilst in the third prize ram from Mr. Davies' flock was found a fine masculine ram of typical character. In the yearling ram class Mr. W. T. Barneby took first and third honours; the former ram was a clear first, excellent in touch, with grand top and even fleece; he is a valuable ram. The second entry here, which was third in the award list, had hard luck, because the ram from Mr. W. H. Davies, that came in second, had not the same even fleece as the third ram. Mr. F. E. Gough came in for r.n. The last-named exhibitor was first prize winner in the next class with a real good pen of ewes full of fine merit. Mr. W. T. Barneby came in second and r.n., leaving Mr. W. H. Davies the third place for a very useful pen of ewes.

The Minor Breeds.

The award list furnishes full information as to the winners in the several breeds included under this heading, amongst which it may be said, with the exception of the Dartmoor classes, excellent merit was found. One matter that needs being put right is the omission of the South Devon Longwool breed from the Royal schedule, because when any breed society numbers over two hundred members, as this one does, such a breed is surely worthy of being included in its schedule.

Pigs.

The pig section was undoubtedly equal to anything yet seen at Park Royal, the exhibits being fine indeed, the numbers good, and the competition keen. This is, in a great measure, due to the slackening of the swine-fever regulations and the now nearly certainty that the show will be open, and that it will include pig classes. But this could not be adduced as the explanation of the numerous empty pens and withdrawals. It is pretty well known that some exhibitors made a slacker entry in order to have a pen in which the herdsman can store his box, utensils, etc. This is an anomaly that should be abolished, as it causes a break upon the continuation of the class, and it would be better if a few pens were set aside for the herdsmen of each breed close to the classes. This would also prevent misapprehension on the part of the foreigner. We overheard a party of them going through this section, and the invariable remark made at each pen was "pig sick," and a mark against the breeder's name went down in the catalogue.

Large Whites.

These made some superb classes. In the old boar class the Earl of Ellesmere was first with Worsley Duke 4th; he is a rare pig, very level, with deep sides and plenty of development in the hams. Second to him was Mr. Sanders Spencer's Holywell Czech, a rather long pig, well shown; third went to Mr. Richard A. Ayre, that, though looking nearly equal in the pen, was not so even beneath when out in the open. Mr. Rothwell's reserve, Fulwood Duke, was a big one, but it scarcely showed the quality of the others. The first-prize pig in this class was subsequently placed reserve champion. There was a much larger entry of pens of three boar pigs farrowed in 1905. The Earl of Ellesmere continued his Nottingham success with three very even-matching ones sired by Roger, and he was also reserve with another pen not quite so matching. The second prize went to Mr. T. Simpson Jay for a nice pen with plenty of activity, and which had fleshed themselves much more heavily since Nottingham; in consequence of this, Mr. R. Daybell had to take up the unusual position of third, for him. They were lengthy pigs, and another judge might have placed them otherwise. There was a magnificent class of Large White breeding sows; at one time these showed length without depth, but now they have been moulded, and, many of them approached, in carcase weight, that of some of the horned stock. The Earl of Ellesmere determined to win, and so he took first with Worsley Sunbeam 1st, Borrowfield Rose 70th, and Dame Worsley 35th; it was certainly a clean sweep, but the sows were worthy of the position they held. Sunbeam was subsequently awarded the championship. Sir Gilbert Greenall had a capital sow in his Royal Counties winner Lindsey A.

There was a good class of three-sow pigs, and in came the Earl of Ellesmere again with another new broom, and made a clean sweep of the money; and not all the produce of one sire. The Earl evidently thinks that there is nothing like having a double strain and both of them good ones. The reserve card went to Mr. R. Daybell, whose pigs were well up to their usual merit, but they were evidently outclassed on this occasion.

Middle Whites.

Though not so many in number, there was very little indeed to complain of as regards the quality of the Middle Whites. The majority of them were much more typical than have been seen on some previous occasions; in fact, they must be considered the best lot of Middles seen out for a long time. In the old boar class, Sir Gilbert Greenall was placed first, and given the gold champion medal of the breed for that very fine boar Walton Turret 7th; it has a genial look of well content, denoting its feeding qualities, and has a very level, even top; and he carries this evenness down where the streaky bacon comes from as well. Second to him was placed Mr. Sanders Spencer's Holywell Rosario and the same exhibitor's Holywell Royal Viscount; both of them are smart, good pigs, the youngest of which has a future. Sir Gilbert Greenall was also reserved with Walton Turret 8th. The class for three young boars was small, the difficulty with smaller breeders being to obtain a matching trio of the same age. First went to Mr. T. Simpson Jay with a very fleshy lot that walked out evenly and well, they being of lovely quality. Second to him, as well as reserve, were the two pens sent by Mr. Sanders Spencer; these pigs were well shown. Sandwiched between them was that of Sir Gilbert Greenall, individually smart, but scarcely matching as a whole; the Hon. D. P. Bouverie being commended. The sow class was indeed a grand one, and the best of these was Sir Gilbert Greenall's Walton Jewel 2nd, that was placed reserve for the gold medal; as she stood, she formed a perfect picture, so even, so well finished, and yet having plenty of activity. Second to her was Holywell Barbara, exhibited by Mr. Leopold C. Paget, but of Mr. Sanders Spencer's breeding. Mr. Spencer was placed third for Holywell Carlisle, though it was somewhat of a consideration whether Sir Gilbert Greenall's Walton Rose 13th, a nice, well-made sow, would not have ascended higher than reserve.

The class for three sow pigs was rather small, but here the Hon. D. P. Bouverie drew to the fore with a pen of very lengthy pigs full of quality. Second to him came a pen from Mr. T. Simpson Jay that were also lengthy, but scarcely showed the depth of the others. There was very little to choose in point of merit between Mr. Sanders Spencer's pen by Holywell Middleton, which was third, and Sir Gilbert Greenall's pen by Offley John.

There were but two classes for Small Whites, and these brought but one exhibitor, the Hon. D. P. Bouverie, who sent some of his fine Coleshill stock, and these, being so full of merit, the judge gave them four prizes. In the boars, Coleshill Marquis 3rd was first, and Coleshill Marquis 4th second. In the sow class he exhibited two young sows by Coleshill Marquis 2nd out of Coleshill Graceful and Coleshill Ely respectively.

Berkshires.

It is perhaps as well that sometimes we have a judge who has the courage of his convictions, and who, knowing what a type should be, has the courage to keep breeders running away from it, and this may account for some alterations in the decisions of the Berkshires. As a whole, too many were small and short, heads and faces not showing character enough, and ears too pricky; and, besides, there is now a tendency to introduce too much white in the markings. In the old boar class the first prize went to Mr. J. Jefferson's Peel Champion, and a rare grand pig it is, but it was a decided uplifting of the Duchess of Devonshire's Polegate Dollar was low down in the ranks at the Bath and West. Another step up was Sir Alexander Henderson's Buscot Reliance, a good, substantial sort of pig, not too big or too fat; the reserve going to an unnamed pig sent by Mr. J. A. Fricker. The champion prize was subsequently given to Peel Champion. The young boar class was a difficult one for any one to judge, as it was very difficult indeed to pick out three matching pens in the whole lot; they were either two big and one small, or vice versâ. Some were leggy, others had an insufficiency of bone to carry weight, and some were not perfect in their marking. The first prize went to a smart pen sent by Mr. Julius A. Fricker, by Hightide F. B., but even here one pig stood out above the others. Mr. G. Talford Inman was second, but there was hardly enough of them in comparison with the first. In the Duchess of Devonshire's third prize pen, the last of one being out above the rest was most marked, and her Grace was reserved with another pen, where, on the other hand there was one a little smaller than the others; it was so throughout the class. On the other hand, in the sow class, it was indeed difficult to tell which was best, so many were there that half a dozen might be turned out before the untrained eye, and it would not detect which was which. Here the first and reserve championship went to the Duchess of Devonshire's Polegate Dahlia; a very fine sow of good length, depth, and quality, but rather inclined to be long in the snout for a Berkshire. Previously, this sow was only highly commended at Nottingham, to rise to reserve at Bournemouth, and to be top winner of the class here. Then comes another twist with Lord Calthorpe's Compton Dolly, which walks well up from third at Bournemouth, over the back of Mr. Hudson's Pretty Polly, which was champion at Bournemouth; whilst perhaps as keen a lesson as any is that imparted by the position taken by Mr. G. T. Inman's Compton Rose, who found her hitherto untarnished laurels placed in the reserve.

The young sow class filled very well, and here there were about half a dozen top pens, after which there was a big falling off. Mr. Julius A. Fricker was well to the fore with an even-growing matching pen; these were of Hightide get. Second to them in the prize list, but scarcely discernable otherwise, was Mr. G. T. Inman's fine pen of the get of Supremes Boy. Third prize went to Mr. R. W. Hudson's pen, but they would not have had it had Mr. James Laurence, who was reserved, had a third hilt to have put with that pretty pair, but two, however good, with one not so good, could not hope to win.

The Tamworths made very fair classes, their breeders being fairly consistent as to the number of pens that they occupy. If anything, the breed showed up better than it did at the Bath and West, from which the prize positions were very considerably reversed. Thus Mr. Ibbotson's Knowle Bounder, which was reserved at Nottingham, goes up to first at Park Royal; whilst Knowle King Rupert descends from first at Nottingham to third prize here. Whereas Mr. D. W. P. Philip's Whitacre Radium holds his own as second at both places, and it is an open question, with its good back loin and hams, as to whether it should not have been placed higher than it was. There was a very small entry of young boars, only three, Mr. Ibbotson most rightly maintaining his lead from the Midlands; it is a nice pen with nice coats, good size, and well modelled, with even top and bottom lines. The second pen of Mr. H. C. Stephens is well balanced, the reserve lot of Mr. D. W. Philips, though matching, being scarcely large enough. The sow class was undoubtedly the best of the Tamworths, Mr. E. J. Merant bringing in a fine big sow of good length and more level than usual, and very deep in the sides. Second went to Mr. H. C. Stephen's Childerton Favourite 5th, a very useful lengthy sow, Mr. Philip being reserve with Whitacre Cactus, one of the right sort, a typical Tamworth that was second at Nottingham; the reserve going to Mr. Robert Ibbotson's Childerton Buzzer. It was a small class of young sows, only three threes being present; Mr. H. C. Stephens was first here with a pen that had plenty of quality, which, combined with their length and excellent hams, made them attractive. The second prize went to a pen sent by Mr. Robert Ibbotson, Mr. D. W. Philip being third with a pen that did not disclose size enough.

Large Blacks.

The exponents of the Large Blacks are evidently determined to keep them well to the fore by judicious selection; they have bred out the coarse points, and now have the best of quality, grown so that the flesh can hang all round them; the thick shoulders have been reduced. Perhaps there is no class in which the interest increases as much as in these, as here the Black Suffolks and Cornish Blacks meet to fight it out under the now well-recognised designation of Large Blacks. There was a big class of big-weights in the Large Black boar class, Mr. G. F. Marriner coming in well to the fore with his grand two-year-old boar, Bodminson 1st; it has substance and size combined with evenness. Sir Robert Wilmot was placed second with Harketon Lord 1st, another fine pig, also bred by Mr. Marriner. The third went to Mr. Richard O. Olver for Trescames Pride, which was third at Nottingham; whilst the reserve went to Mr. John Warne's Trenegler Darkey Jim, which was first in its class at Nottingham, a big, shifting round of positions. Mr. K. Clark's Sudbourne Steward 2nd, which was second at Nottingham, was now only highly commended. Mr. Marriner also secured the championship of the Large Blacks with Badminton 1st. Instead of having a pen of Large Blacks, the class is for bacon pig farrowed in 1905. Why this distinction should be made in favour of the Large Blacks is unknown, as it certainly places them at an advantage as compared with the others. Here Mr. John Warne was placed first and reserve for the championship with Trevesquite Victor, a very smart growing youngster, very choice, fine in the bone, and no coarseness. Second to him was placed Mr. H. J. Kingwell's Brent Excelsior, that did not get noticed at Nottingham; Mr. Arthur S. Mann being a capital third. The sow class was undoubtedly the best of the lot, some tremendous specimens being shown, but they were somewhat marred in appearance by the excessive oiling to

which they had been subjected. Mr. Marriner came to the fore with that big, deep-framed, heavily fleshed sow with tremendous hams, Harketon Long Bess 3rd. Second to her was Mr. Ephraim Gimblett's Davidstow Model, another big one of great scale. These two sows were placed first and reserve for the twenty-guinea challenge cup. The third prize went to Mr. Olver's Trescame Beauty 10th. Some of the other sows were just a trifle inclined to coarseness. The classs for pen of three young sows brought a capital entry. Mr. J. Kingwell was first with his Nottingham pen, very typical, good length, and capital coats. The second went to Mr. Thomas Warne, with a very matching trio, rather thin in the coat, but hardy. Third went to Mr. R. R. Rothwell, which shows how the breed is spreading northward these pigs were rather smaller, but they looked well when out. Mr. Kenneth M. Clark's exhibit was commend.

Butter.

It is evident that if the Royal has to carry on a show elsewhere more attention must be paid to the produce department, more especially the butter. As it is at present, butter, cheese, cider, and meal are all exhibited under one shed, and neither of them is seen to the best advantage. At the Bath and West, and other shows, it is not found necessary to hedge in the butter and cheese exhibits with netting and thus render them unattractive to the visitors. The butter had either arrived in a very bad condition, or else it got like it on Monday and Tuesday. The butter is kept in what is supposed to be a refrigerator, the general construction of which appears to be to consume as much ice as possible with correspondingly little benefit. The ice melts in a sort of derelict whale backbone arrangement, which allows the ice water to drip right down into a trench, thus it takes a lot of ice to reduce the temperature of the air in the jeweller's case arrangement in which the butter is exhibited. The salt butter class gets rather less interesting year by year, or the need for it decreases; but this year interest revived because competitors from England, Wales, and Ireland entered into a friendly rivalry, and Ireland won. The Urney Co-operative Dairy sending a splendid butter neatly packed in a square box. The Lisbellam Co-operative Agricultural Society, who were second, also sent their produce in a box. There was a rather large class of butter, slightly salted, made up in pounds without restriction of breed of cows from which made. The first prize went to a well-known Somerset exhibitor, Mrs. George Adlam Wackey, Hale Wells.

[Pressure on our space compels us to hold over our comments on the cheese and cream and perry sections.]

JUDGES.

HORSES.

Hunters.—T. H. Hutchinson, The Manor House, Catterick.

Hunters.—J. M. Richardson, Edmondthorpe Hall, Oakham.

Cleveland Bays.—F. P. Baker, Ingmanthorpe Grange, near Wetherby.

Coach Horses.—Richard Foxton, Manor Farm, Dringhouses, York.

Hackneys.—Robert Whitworth, Southwood End Halifax.

Ponies.—Tom Mitchell, Upwood, Bingley, Yorkshire.

Shetland, Mountain, and Moorland Ponies.—John M. Martin, Murleston House, Mid-Calder, N.B.

Polo and Riding Ponies.—Edward Mucklow, jun., Wood Hill, Bury, Lancs.

Shires.—Joseph Morton, Stow, Downham Market.

Clydesdales.—John McCaig, Challock, Leswalt, Stranraer.

Suffolks.—Cordy S. Wolton, Ixworth, Bury St. Edmunds.

CATTLE.

Shorthorn Bulls.—John C. Toppin, Musgrave Hall, Skelton, Penrith. Cows and Heifers.—Harry Butler, Badminton, Chippenham.

Lincolnshire Red Shorthorns.—C. W. Tindall, Wainfleet, Lincolnshire.

Herefords.—Christopher Williams, Glenthorne, Holmer, Hereford.

Devons.—Samuel Kidner, Bickley, Milverton, Somerset.

South Devons.—William P. Vosper, Merafield, Plympton, Devon.

Sussex.—Alfred Heasman, Court Wick, Littlehampton.

Welsh.—J. W. Harris, Pilshoth, Llanstephan Road, Carmarthen.

Red Polled.—D. F. Smith, Steward's Office, Easton Park, Wickham Market.

Aberdeen-Angus.—Robert Bruce, Leinster House, Dublin.

Galloways.—Samuel Thomson, Buxley, Duns.

Highland.—Duncan McDiarmid, Camusericht, Rannoch Station.

Ayrshires.—John Murray, Carston, Ochiltree, Ayrshire.

Jersey Bulls.—W. P. Arkwright, Sutton Scarsdale, Chesterfield.

Jersey Cows and Heifers.—W. Ashcroft, 13, The Waldrons, Croydon.

Guernseys.—Dav. Michie, Tichborne Park Estate Office, Alresford.

Longhorn.—A. S. Berry, Church Farm, Whittington, Lichfield.

Kerry and Dexter.—F. A. Hordern, Buxted, Sussex.

SHEEP.

Oxford Downs.—James P. Case, Binham Abbey, Wighton, R.S.O., Norfolk.

Shropshores.—J. E. Farmer, Felton, Ludlow.

Southdowns.—George F. Hempson, Good Hall, Ardleigh, Essex.

Hampshire Downs.—Joseph Dean, Chitterne, Codford, Wilts.

Suffolks.—Charles T. A. Robertson, Little Horringer Hall, Bury St. Edmunds.

Lincolns.—Charles Clarke, Brookside, Scopwick, Lincoln.

Leicesters.—Benjamin Painter, Cow Close Farm, Burley-on-the-Hill, Oakham.

Cotswolds.—Robert Jacobs, Eynsham, Oxford.

Border Leicesters.—Joseph Lee, Congalton, Drem.

Kent or Romney Marsh.—Francis de B. Collard, Minster Abbey, Ramsgate.

Wensleydales.—Metcalfe Spensley, Castle Bank, Leyburn, R.S.O., Yorks.

Dorset Horn.—John Chick, Compton Valence, Dorchester.

Devon Long-wool.—E. R. Berry-Torr, Instow, North Devon.

Dartmoor and Exmoor.—William P. Vosper, Merafield, Plympton, Devon.

Cheviots.—John Elliot, Hindhope, Jedburgh.

Black-faced Mountain.—C. Howatson, Glenbuck, Scotland.

Lonks.—George Dewhurst, 222, Portland Street, Southport.

Herdwicks.—John Hawell, Armboth House, Thirlmere, Grasmere, Cumberland.

Welsh Mountain.—David Price, Bulwark House, Brecon.

Ryeland.—Francis Hawkins, Sugwas, Swainshill, R.S.O., Herefordshire.

PIGS.

Large Whites.—John Angus, Whitefield, Morpeth.

Middle and Small Whites.—Anthony F. Nichol, Bradford, Belford, Northumberland.

Berkshires.—John Watts, Fair Green, Sarsden, Chipping Norton.

Tamworths.—W. H. Mitchell, Elmdene, Kenilworth.

Large Blacks.—Robert Beaumont Bond, The Red House, Sproughton, Ipswich.

PRODUCE.

Butter.—Professor H. J. Drummond, Dairy School, Kilmarnock.

Cheese.—J. Hudson, jun., 50, Ludgate Hill, London, E.C.

Cider and Perry.—John H. Wootton, Byford, Hereford.

Wool.—Charles Willey, 3, Eldon Terrace, Bradford.

PRIZE LIST.

Horses.

HUNTERS.

Class 1.—Mare (with foal at foot), up to 13 stone and upwards: 1, F. B. Wilkinson (Glosspore); 2, Sir Walter Gilbey (The Witch); 3, E. W. Robinson (Golden Leaf); r. and h.c., Sir M. R. Burrell; h.c. and c., J. A. Mullens (2) (Gaiety Girl and Glowworm).

Class 2.—Filly, foaled in 1902: 1, Lord Middleton (Mercy); 2, F. B. Wilkinson (The Duchess); r. and h.c., J. L. Nickisson (Limelight).

Class 3.—Filly, foaled in 1903: 1, C. Kelway-Bamber (Columbine); 2, M. B. Lindow (Sunshine); r. and h.c., C. H. Dixon (The Squaw).

Class 4.—Filly, foaled in 1904: 1, J. L. Nickisson (Success); 2, W. and J. A. Cheney (Lady Madcap).

Class 4a.—Mare or gelding, foaled in 1901: 1, W. and J. A. Cheney (Casual); 2, J. H. Stokes (Kitchener); 3, J. H. Stokes (Artist); r. and h.c., J. H. Stokes (Knicknack); h.c., Lord Middleton (Scruple); C. J. Robinson (The Rector).

Class 5.—Mare or gelding, up to 14 stone and upwards, foaled in or before 1901: 1 and 2, J. H. Stokes (Gold Leaf and Lady Emily); 3, F. G. Colman (Chance); r. and h.c., A. J. Brown (Ireland); h.c., F. G. Colman (Android); c., J. P. Hornung (Draco).

Class 6.—Mare or gelding, under 14 stone, foaled in or before 1900: 1, A. J. Brown (Huntsman); 2, J. H. Stokes (Rosebud); 3, A. Cory-Wright (Grandee); r. and h.c., P. B. Rondocanachi (Princethorpe).

Best hunter mare; gold medal offered by the Hunters' Improvement Society: W. and J. A. Cheney (Casual); r., J. H. Stokes (Rosebud).

Best hunter filly; gold medal offered by the Hunters' Improvement Society: Lord Middleton (Mercy); r., J. L. Nickisson (Success).

CLEVELAND BAYS.

Class 7.—Stallion, foaled in 1902 or 1903: 1, G. Scoby (Beadlam Fred); 2, F. H. Stericker (Radium); 3, J. Lett (Rillington Reliance); r. and h.c., T. Naggs (Saltburn Favourite).

Class 8.—Mare (with foal at foot): 1, F. W. Horsfall (Lady Salton); 2, G. Grandage (Lady Toft); 3, F. Bateman (Queen of Beadlam).

Class 9.—Filly, foaled in 1902 or 1903: 1, G. Grandage (Woodland Briar); 2, C. Butters (Cholderton Farndale).

COACH HORSES.

Class 10.—Stallion, foaled in 1902 or 1903: 1, John Lett (Special Delight); 2, Bert Kitching (Young Mischief); 3, F. H. Stericker (Aneroid); r. and h.c., G. Scoby (Walwin); c., J. Lett (Special Brand).

Class 11.—Mare (with foal at foot): 1, J. Webster (Bell of Harum); 2, G. Elders (Aislaby Beauty); 3, F. W. Horsfall (Perseverance).

Class 396.—Three fleeces of Welsh wool: 1 and 2, William Leathes; 3, Joseph L. Gratton.

Class 397.—Three fleeces of Scotch wool: 1, Jacob Robson; 2, William Leathes; 3, John Dargue.

Annual Meeting.

The annual meeting of members was held in the big tent in the showyard on Wednesday, just after noon, when there was a fair attendance, although not so large as on many previous occasions. Lord Middleton (the President), who was accompanied by Lady Middleton, took the chair, and there were also present H.R.H. Prince Christian, the Earl of Feversham, the Earl of Jersey, the Earl of Northbrook, Lord Onslow, and many members of the Council.

The President, in his introductory speech to the members, said there was no need to remind them of the conditions under which this year's show was being held, and he voiced a fervent hope that the results would be as satisfactory as the public-spirited subscribers to the guarantee fund could wish. (Hear, hear.) We shall know better in a few days where we stand, continued his Lordship, and there will be a further meeting of the society in a little more than a month's time at Hanover Square, to discuss the future. By that time, too, they would know the result of the various elections to the Council, which process would be carried out in accordance with the supplemental charter granted by the King. Whatever may be the financial result of this show, we can say with confidence that it cannot be excelled in quality by any in the world. (Hear, hear.) The showyard was visited on the previous day by his Royal Highness the Prince of Wales, and that day they looked forward with pleasureable anticipation to a visit from their illustrious patron, his Majesty the King. (Cheers.) It was an additional gratification to know that he would be accompanied by her Majesty the Queen. (Cheers.) Proceeding, Lord Middleton said that during the past years there had been times of anxiety and uncertainty as to the future. He should only claim for himself and his colleagues on that Council that they had tried to do their best under exceptionally difficult and somewhat disappointing conditions. (Hear, hear.)

Lord Feversham, in proposing a vote of thanks to Lord Middleton, remarked upon his public spirit and patriotism in coming forward at a time when some declined to accept the office, and working with zeal, energy, and success to advance the interests of the society. That his efforts had met with success was undoubted. (Hear, hear.) Lord Middleton had the great advantage of being a practical agriculturist. (Hear, hear.)

Mr. George Adams (Faringdon) seconded the resolution, and it was cordially adopted.

The President, in response, said he felt that his efforts had met with a measure of success. He thanked the members of the staff for the unceasing manner in which they had worked for the society.

Sir John Thorold proposed a vote of thanks to Sir Jacob Wilson, the hon. director of the showyard, for the efficient way in which he had performed his duties.

Mr. Henry Webb seconded the vote, and it was enthusiastically endorsed.

Sir Jacob Wilson, who was touched by the goodwill with which the resolution had been passed, feelingly expressed his thanks.

On the motion of the Earl of Jersey, seconded by Sir Walter Gilbey, a vote of thanks was passed to the railway companies for the facilities which they offered in connection with the show, especially to country members.

Suggestions being invited from the members,

Mr. Machen, of the Gloucestershire Chamber of Agriculture, adverted in an ironical vein to the subject of "railway facilities," and said that privileges ought to be extended to first and second, as well as to third class passengers. Would it be believed, he said, that the Great Western Railway Company had advertised a special train to leave Gloucester at 6.30 p.m. on the last day of the show. (Laughter.) The train could not possibly reach Paddington until after the showyard was closed. (Renewed laughter.)

Dr. Gillespie (Dumfries) said his countrymen had better facilities offered them for attending this show than had the English public. "Keep at them" was his advice in the society's dealings with the railway companies. "Give them no rest until they give you the same facilities as we have north of the Tweed." (Hear, hear, and laughter.)

Mr. Rd. Brown, without casting any reflection upon the judging of this or past Royal shows, advised that dual judging should be introduced. The responsibility of distributing the awards was too great to be left in the hands of any man. The alteration would entail an extra cost of perhaps £300 or £400, but this could be met by reducing the salary of the secretary by £500. No injustice would be wrought, because the work of the office was less now than it was in the itinerant days.

Mr. Fred. Street (St. Ives, Hunts) urged that the railway rates for trussed straw should be altered, but a member reminded him that this was a matter for the Board of Agriculture to deal with.

Mr. Eldred Walker (Bristol) voiced a grievance felt by the cider exhibitors, and others, at the manner in which their produce had to be exhibited. It was a fact, though almost incredible, that the cider casks were fitted with brass taps. ("Oh.") The metallic influence upon the cider was most injurious, and tasters were disgusted with it. Moreover, the butter in the tents was melting, and a prominent exhibitor of cheese has declared that he would never show again because his goods were so puffed by the heat.

The President said the suggestions would receive the attention of the Council.

The meeting was then adjourned to August 1.

VESTA CAKES and MEALS.

In order to enable us to supply clean Cotton Seed and a Cotton Cake of good quality we have taken over a mill lately fitted up with the very best modern machinery, which enables us to sell at the lowest possible and at the same time turn out an Undecorticated Cotton Cake practically free from LINT, DIRT, and SAND.

The Cakes are branded "VESTA" PURE.

Buyers of the "VESTA" FEED CAKES can have the Cottons shipped at same time, thus saving any delay.

LIVERPOOL VESTA CAKE CO.

Blackstock Street, LIVERPOOL.

THREE UNRIVALLED CALF MEALS

THE

LANCASTER CALF FOOD

13/- per cwt., or in 4 cwt. lots 12/6 per cwt.

This Meal does not swell out so far as the "Milk Equivalent," but is much easier to prepare, and is recommended to those who do not personally see to proper preparation.

BIBBY'S

MILK EQUIVALENT

12/6 per cwt., or in 5 cwt. lots 12/- per cwt.

This Meal swells out splendidly, but needs careful preparation. It is, however, a first-class Meal, and probably the most economic in use of all the Calf Meals in the Market.

BIBBY'S

CREAM EQUIVALENT

The most popular Calf Food ever produced, 15/- per cwt.

Is the latest and most popular of our foods; **we believe it is the nearest approach to the ideal that has yet been reached in preparations of this kind.**

CARRIAGE PAID to BUYER'S NEAREST STATION.

HAYMAKING.

Crops of meadow hay are somewhat light this year, it is generally reported; but there has been very little difficulty to secure them, such as they are, in good condition, during the past fortnight. "Make hay when the sun shines" is a very old proverb, and the monarch of day has so rapidly extracted verdure and sap from the mown grass that in all probability a great many go-ahead farmers who were well equipped in hay-harvesting machinery have already stacked the whole of the hay they intended to make this year. The weather in the Royal Show week brought sufficient rain to some districts to cause delay, but those who suffered therefrom were few indeed compared to those who regarded the cloud-droppings as pre-eminently beneficient.

No kind of field work has undergone such revolutionary transformations during the past half-century as haymaking. Horse-drawn machines now perform the work which formerly gave incessant, severe toil to numerous troops of men, women, and children. The horse-mowers, if kept continuously in action, effects the cutting of a hundred acres of meadow-grass in a very short space of time; and only such weather as we have recently been experiencing is required for the grass to be converted to hay with equal celerity by the aid of swath-turners, tedders, rakes, etc. The farmer who has these machines is far more independent of the weather than those were who had the work to do in the first half of the last century. By using utmost dexterity, their processes could only have very slow action, so that it was impossible to make the best of the sunshine when it came, and too often they were caught with stormy, atmospheric tribulations when in the very midst of the mowing season. The farmer of to-day can almost choose his own time, and, if caught similarly, can stack for silage what he has lying about, and stop the horse-mower until the clouds have rolled by. He can make more hay in a day when fine weather comes than in the pre-machinery times could be performed in a week.

When we consider the matter as to whether hay is made any better nowadays than in olden times no very confident reply can be made. There were immense quantities of badly-weathered and spoilt hay in the old times; but when the sun shone, and there were several continuous fine days in succession, the hay that in making had been kept continually on the pick or hand-fork was often of a very superior quality indeed. The statement may be affirmed confidently that the bulk of it secured in fine weather was far superior to what is at present stacked after being made by the system of Mr. McConnell, who not long since stated in the *Journal* of the Board of Agriculture that the best method of haymaking was "to let the hay make itself." But the actually spoilt hay of modern times belongs to small farmers having little or no machinery, and those who endeavour to make hay out of season. There was ample proof of this two years ago when, after Midsummer Day, there were three sunshiny weeks during which nearly all the farmers possessed of ample machinery secured their hay in very prime condition. But there were large numbers of the non-systematic, indolent class who were found haymaking after the wretched weather of the last ten days of July and nearly the whole of August came. And these men had not the wit or sagacity to make silage of their weathered fodder instead of labouring for its thorough spoliation.

There is another admirable modern invention besides haymaking machinery which saves enormous waste, no less than unnecessary labour. This is the lofty, light, open shed, with a roof of corrugated iron, of which so many are to be found in different parts of the kingdom. They are so decidedly economical both for hay and corn, especially on farms devoid of material for making thatch, that few farmsteads can be considered properly equipped without one of them.

Two valuable draught horses, the property of the Duke of Northumberland, have died from the effects of eating some branches of yew trees in Alnwick Park.

Sale of Poisonous Agricultural Compounds.

The President of the Board of Agriculture, received in his room at the House of Commons on Monday, a deputation from the Pharmaceutical Society who urged reasons against the proposed legislation to extend to others than chemists the right of selling poisonous products used in agriculture and horticulture.

Mr. Fellowes in reply, said there was influential evidence of a strong desire for the proposed extension, especially in rural districts where chemists were few or distant, but if the Bill in contemplation were proceeded with this session strict precautions would be taken for the safety of the public. The regulations to be made under the Bill would provide, inter alia, that no poisonous substance should be kept in any shop or premises where articles of food were stored or kept for sale, that all poisons must be kept in a separate cupboard from other goods, be sold in an enclosed vessel labelled with the word "poison," that all liquid poisons should be sold only in bottles or tins easily distinguishable by touch from ordinary bottles or tins, and that, in granting licences to sell agricultural poisons, the local authority should have regard to the facilities already existing in the neighbourhood for the purchase of poisonous compounds.

The Small Holdings Committee.

The Departmental Committee appointed by the President of the Board of Agriculture and Fisheries to inquire into the subject of small holdings held a meeting on the 6th inst.

The following members were present:—The Right Hon. the Earl of Onslow, G.C.M.G. (Chairman), the Right Hon. the Earl Carrington, G.C.M.G., the Right Hon. Jesse Collings, M.P., Sir R. Anstruther, Bart., Major P. G. Craigie, C.B., Mr. C. Bidwell, Mr. W. Brown, Mr. F. A. Channing, M.P., Mr. Jas. Long, Mr. J. W. Willis-Bund, Mr. R. A. Yerburgh, M.P., and the Secretary (Mr. T. H. Sutton).

Evidence was given by Mr. James Long, a member of the Committee, and Mr. R. Winfrey, Sutton House, Peterborough.

Chester Cattle Fair took place on Wednesday, when both supply and demand were smaller, but quite as much business was done as could be expected. Prices were about the same as at the last fair, but with a firmer tendency. Milch cows, £16 to £22; calvers, £15 to £20; barrens, £10 to £13; heifers, £9 to £14; stirks, £6 to £10; sheep, 18s. to 37s.

Castle-Douglas Fair.—The horse and hiring fair was held on Monday. Good useful harness horses were in demand from £25 to £38. The trade, except for the best class of animals, was very poor. The hiring fair for harvesters was also held, turnip hoeing and hay-making being in full swing. There was only a moderate supply of harvesters. Engagements were made at from £4 10s. to £5 10s., with board for men; £3 to £4 for lads.

The principal haytime hirings at Kirkby Stephen were held on Monday, when labourers were present in large numbers. That the supply considerably exceeded the demand was shown by the reduced wages prevailing, engagements being entered into at £1 to £2 less than last year for the month. The best-known men accepted service, with rare exceptions, at £6 to £7, plus board and lodgings; and second-rate hands, £1 per week.

Seasonable Topics.

Perhaps of all the topics which are now seasonable that of the weather is the most important, for are we not in the swing of the hay harvest, and the expense and trouble of getting in this essential crop is increased or lessened according to the vagaries of the clerk of the weather. In most districts there are what are known as early mowers and late mowers. The former invariably commence their haymaking operations in June, and the latter usually wait till July. Neither are in the habit of breaking their rules, except by force of circumstances, but this season many of the early mowers have been persuaded to do so on account of the scantiness of herbage and the hope that the rains in June would help on the growth a little. There is no longer any hesitation about beginning, for that stage is past, and the anxiety is rather to finish. We have had rain enough of late to soak everything which needs moisture, and the general desire is for continued fine weather to get the haymaking finished. This anxiety is only natural, for when the weather is unsettled in July and the hay hangs about a long time, it is not to be wondered at if the farmer grows irritable as he sees money going out that might be saved if only the sun would shine. Not that good harvest weather is always an unqualified blessing, because when everything is favourable some men are so anxious to get the hay in before a change comes that they do not leave it long enough to make properly, and stack fires are often more general after a good haymaking time than when the weather is unsettled. In districts where hay is the chief crop the farmer shows how very human he is when the last load is in, for he rests on his oars, so to speak, looks satisfied with himself and the world in general, and, not infrequently (but tell it not in Gath) treats himself to a week at the seaside. Fancy a farmer lolling on a pier, listening to the band! Yet he does it, and enjoys it. What would his grandfather think if he could come back and see how times have changed?

July Weather.

Some pieces of potatoes are looking very well just now, and promise a good yield, but in others a deplorable patchiness may be observed. There are gaps in the rows, and here and there plants which are dwarf, weak, and spindling, instead of producing strong haulm. Why this weakness on the part of some plants, and the failure of certain tubers to send up growth at all? There is something wrong. What is it? Dig up one of the tubers which are behaving unseemly, and behold, it is as hard and firm as the day when it was planted. Cut the tuber open and there find a dark ring underneath the skin. A disease, no doubt, of some kind; but what, and how can it be prevented or cured? Scientific men have had it under notice for some time, and have attached a long and almost unpronounceable name to it; but that is about as far as we appear to have got at present. Curiously enough, too, the seriousness of the trouble does not appear to be realised. People notice that their potatoes fail in the above way and wonder what is the reason—perhaps blaming the ground, the seed, the variety of the weather—but this peculiar disease, which causes spindling growth, curled leaves, and no crop, has been responsible during the past few years for a very serious reduction in potato returns. Growers will awake to the necessity of getting to the bottom of the trouble some day; but, in the meantime, information is generally wanted as to what this peculiar disease is, what causes it, how it can be prevented, and is there a cure? Here is a chance for some investigations on the part of the Board of Agriculture, and a leaflet on the subject would be read with greater interest than some that are published.

Potato Troubles.

Opinions continue to differ as to the actual benefits to be derived from spraying potatoes with Bordeaux mixture, as a preventive of potato blight (Phytophthora infestans). Many people spray their potatoes, but more do not; though possibly some of the latter might be disposed to do so if they had a proper apparatus for the purpose. The man who grows perhaps hundreds of acres of potatoes may look upon a spraying machine as being part of the necessary equipment, but the small grower, not having the same needs, does not see his way to spending money on a machine, and his potatoes go unsprayed. It may be urged, however, that a knapsack sprayer would serve the purpose of many growers, and this is a most useful apparatus to have in any establishment where there is a garden, orchard, and potato ground. No one claims for Bordeaux mixture that it is an infallible remedy for potato disease, and, as a matter of fact, it is not a remedy at all, but a preventive, and the best known up to the present. This is just the point. It is no good spraying potatoes when the foliage is covered with the fatal black patches, which denote the presence of the disease, but the fungicide should be applied before in order to prevent the above. As a rule, first early potatoes do not need spraying, but in the case of maincrops, a dressing at the end of June, another about the middle of July, and a third in August, if necessary, are advised.

Spraying Potatoes.

No one need be prevented from spraying potatoes on the grounds of the cost of the mixture, which can be easily prepared at home. In the first place, dissolve 1 lb. of bluestone in 10 gallons of water; secondly, boil 1 lb. of lime with the same weight of soft soap, or treacle, in water till they are dissolved, strain the latter, and pour it into the bluestone mixture. Stir the solution, and it is ready for use. Generally speaking, for the prevention of disease, it is sufficient if the upper surface of the leaf is sprayed, but if there are signs that the blight has got a hold, then the under as well as the upper side of the foliage should be sprayed. To give an idea of the time spent over the operation, it may be added that with a knapsack sprayer it is not difficult to get over three-quarters of an acre in the course of a day.

Bordeaux Mixture.

In these days of so many hay barns, the building of ricks and the thatching of the same are not such important farm operations as they used to be, but, nevertheless, haystacks are by no means gone out of fashion, and a disorderly rickyard is offensive to the eye of a neat and tidy farmer. Rick-building, by the way, is by no means a fine art, but everyone does not excel at it, and on most homesteads there is a man whose post of honour during haying time is on the rick, and woe unto his reputation if one of his stacks is out of shape or lopsided. This does not often happen, however, in the case of an old rick-builder, and when you see a stack devoid of shape, or one that looks as if it was about to fall over, you may come to the conclusion that a young hand or a novice has had the building of it. We are not quite sure whether there is as much pride taken in thatching as there used to be, or even whether the work is so well done, despite the fact that thatching is part of the agricultural instruction given under the direction of the Education Committees of County Councils. We may perhaps blame the introduction of hay barns, useful though they are, for the decrease of interest and skill in thatching; but we should be sorry to see farm hands cease altogether to take a pride in such operations as ricking and thatching. If a thing is worth doing at all it is certainly worth doing well, and whereas nothing looks better than a stackyard, with the ricks evenly placed and the latter well-built and neatly thatched, we can conjure up a no more slovely picture on a farm than an untidy rickyard with loose hay kicking about; stacks giving the appearance of having been thrown together rather than built, and thatch put on in a careless manner. And if the good thatcher likes to ornament the top of his stack with a game cock made of straw, it need not necessarily be condemned as a waste of time, for it shows that the man takes an interest in his work. We fear that this is just what many farm hands of to-day are disposed to lack—a pride in doing work well, not altogether for the wages received for it, but for the sake of the personal reputation of the individual who performs the task. In the old days it would have been a slur on the reputation of the rick-builder to erect a lobsided or misshapen stack. Let that spirit remain by all means.

Rick-Building and Thatching.

Agriculturists, perhaps above all men, are subject to disappointments, and were it not that a kindly nature has endowed them with a hopeful disposition, they would often, we fear, be in a state of abject despondency. At the same time there is a bitterness about blighted hopes, which would affect the nature of any but a veritable Mark Tapley, and, as it happens, there are not many of these characters about. Last week we had a dismal story to tell in connection with the financial failure of the Royal Agricultural Show, and it was with despondent feelings that we wrote, because we, in common with agriculturists in general, hoped that the big effort made this year would end as everybody wished—successfully. Unfortunately, however, this was not to be, and all the regrets in the world will not alter matters. We have had opportunities of discussing the position with farmers and others since the disastrous figures were published, and the one question asked is: What will be done now? We can only re-echo the question. What, indeed, for the time has not come for giving an answer. Hope, however, will not be suddenly and absolutely quenched, as long as there is a vestige of a chance left; and, with his inborn tenacity of nature, the agriculturist is now centring his hopes partly on the new Council, which comes into power next month, and partly in his belief that the agricultural interest in this country is too powerful to prevent the Royal Show from dropping out of existence. It is said that the right men are always to be found when a crisis comes. We hope it will be so in this case, for there is no denying the deplorable fact that a crisis is reached in the affairs of the Royal Agricultural Society.

Blighted Hopes.

OBITUARY.

Mr. A. Fletcher.

The death is announced of Mr. Arthur Fletcher, of Greenbooth, near Rochdale, a member of the firm of Messrs. James Butterworth and Sons, woollen manufacturers. He was 45 years of age. He was a familiar figure at the local agricultural shows, at which he was often a judge.

Mr. E. Osmond.

The death took place at Exeter, the week before last, of Mr. Edward Osmond, formerly of Oakford House, Upton Pyne, and known throughout the West of England as a land agent and surveyor, and especially as the steward to the Earl of Iddesleigh. The stewardship has been in the family for generations, and the deceased succeeded his father in that capacity over fifty years ago. The deceased never missed a rent audit for 60 consecutive years. His advancing age compelled him about three years ago to relinquish his active interest in his business, and he resigned the stewardship in favour of his son, Mr. Henry Osmond. He was also agent for Mr. Durant for the Sharpham Estate, Totnes, and he at one time farmed largely.

Mr. Richard Chatterton.

Mr. Richard Chatterton, the well-known stock-breeder and member of an old Lincolnshire family, has recently died from pneumonia at the age of 50, at Stenigot, near Louth. Mr. Chatterton was a son of the late Mr. Robert Chatterton, of Tathwell, and his first farm was at Welton-le-Wold. In 1884 he and his brother, Mr. Robert Chatterton, purchased the estate of their late uncle, Mr. William Chatterton, at Stenigot, and the firm of Messrs. R. and R. Chatterton is now well known as exporters of live stock. The development of the Lincolnshire Red Shorthorn is due in no small measure to the efforts of Messrs. Chatterton, and in the section of the Royal Show devoted to that breed their name figures prominently as prize-winners last week. Mr. Chatterton had represented Stenigot on the Louth Board of Guardians since 1891. He resided with his brother at Stenigot, and never married.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended July 1st, 1905, together with the quantities imported in the corresponding week of the previous year:—

	1904.	1905.		1904.	1905.

By a Lobbyist.

The Conservative success at Kingswinford—the Liberals, all the same, regard the reduction of the majority by nigh on a thousand as a moral victory—has a lesson associated with it. The Conservative champion was a Chamberlainite, but a Chamberlainite with a difference. He accepted the whole programme of Colonial preference; but he demanded that a bounty should be paid to the English wheat-grower out of the 10 per cent. duty imposed upon imported foreign manufactures. This is an intelligent policy and might supply some compensation to the English farmers for the encouraged rivalry and competition of Canada. But does the new M.P. represent in this matter his leader? Is Mr. Chamberlain himself in harmony with this suggestion? At all events, the proclamation of this policy served, I am assured, to relieve the Chamberlainite purpose of the danger with which it has been hitherto held to be fraught. While constituencies have been lost in Dorsetshire and in Shropshire and in Herts by men lisping the Chamberlainite shibboleth without any mitigating explanation and addition, here the Conservative candidate was enabled to carry a breath of consolation to his party leaders. The meaning of the incident should not be lost sight of by the Conservative organisers. If they do permit their men to accept Colonial preference, they should see to it that the pill is sugared. A bounty for the farmers from a 10 per cent. tax on imported manufactures is a gratifying addition to the economic menu. It is not the *pièce de résistance;* but it is an excellent savoury.

• • •

Colonel William Woods, of Warnford Park, Bishop's Waltham, a Deputy-Lieutenant for Hampshire, and himself a very considerable farmer, has presented me with another piquant illustration of how the farmer may be unfairly penalised by the road-hoggers. "A motorist," said the Colonel, "dashes along the road at a furious pace, heedless of all but his own mad delight. He affrightens the horses attached to the waggon of the farmer, who has been compelled to maintain this very road. The unfortunate carter is knocked down and seriously hurt. The cloud of dust which the motor has raised has obscured the number-plate, and the identity of the motorist is thus rendered almost an impossibility. As a sequel, the farmer has to compensate the carter for the injury sustained by him while in his employment." "I myself," added the Colonel, "know of a case in which, as a result of a horse being thus frightened, the carter was thrown on to the hedge, and two barrels of paraffin, with which the waggon was loaded, were smashed, and their contents spilt. The carter, when he recovered from his plight, could only see the motor disappearing in the thick cloud of dust which it had itself created. Any recognition was thus out of the question." "But how," I asked the Colonel, "would you deal with these fellows, and, at the same time, make them pay towards the cost of the maintenance of the roads they outrage?" The Colonel confesses that we cannot revive the toll-gate system; but he does hold that this system did carry out the excellent principle that the cost of the maintenance of roads should be borne by those using them.

"Why not," he asked me, "let the Imperial Exchequer bear the expense of road maintenance, and recoup the State by means of an Imperial graduated wheat-tax? Why not insist that business-wheels should pay less than pleasure-wheels, an additional tax being imposed on motorists because of the fact that they do greater damage than ordinary vehicular traffic, and even impose still another responsibility by compelling the adoption of means to counteract the injurious effect of the cloud-dust? By the acceptance of some such a policy as this we should not only put a proper burden on the mere pleasure-seeker, but we should impose the responsibility now unfairly centred on local shoulders, and should wisely discriminate to the advantage of trade and industry." Well, there is much in what the Colonel says. However, even this taxation of the road-hogger would not release the farmer of the necessity of compensating the labourer who may have been injured while in his employment as a result of the rollicking buffoonery, or rattle-dash speed, or callous brutality of the scurrying motorist. The incident which the Colonel has repeated rather suggests the necessity of an improved method of identification.

• • •

The Conservative authors of the proposed amendment of the Workmen's Compensation Act have placed a pretty weapon in the hands of their political antagonists, a weapon which they will not be slow to take enthusiastic advantage of. You will hear the Bill described as a Tory device to rob the agricultural labourer of the right to compensation from his employer for injuries sustained while in his employment. The Act of 1900 conceded the right to this compensation to the labourers. This, indeed, was the specific object of Mr. Goulding, the Conservative Member for the Devizes division of Wiltshire. Now, the amending Bill has a series of discriminations by which the labourer would be deprived of this right unless he could prove continuous service. I heard a Liberal lawyer declare the other night that if this legislative proposal became law it would be sufficient for a farmer to dismiss a labourer with the intention of re-employing him at the expiration of a fortnight or so in order to evade all the responsibility of the 1900 Act. "It is not merely an attempt," said he, "to deprive the agricultural labourer of a right deliberately conceded him by the State, but it is also a provocative to bad employment and insecure employment. Instead of rendering his rural employment and life more agreeable—and this is held by all sociologists and economists to be absolutely necessary in the best interest of the State—it would render them repellent. It would, in a word, canker village labour."

• • •

Of course, this is an exaggeration; but it reveals the pretty hyperbole which is destined to be associated with the electoral propagandas of the next few months. The Bill will not become law; and thus, in their own strategic interests, the Conservative organisers should have prevented its publication. They seem to be haunted by a weird, perplexing maladroitness on the part of men who should consult them.

• • •

The discussion in the House of Lords upon the Rates' Act Continuance Bill was mere beating of the wind, mere make-believe. I could have outlined beforehand exactly what happened. We all knew, of course, that Lord Spencer would criticise the principle of the Bill without opposing it, that he would let-I-dare-not-wait-upon-I-would, like the cat in the adage. What, however, did he mean by saying that the principle of the Bill would benefit a class which had less claim to relief than other classes in the country? We knew, too, that Lord Lansdowne would, as Leader of the House, confess that the Act was "not a scientifically-perfect measure," and that it was originally only intended as a temporary palliative. We knew, too, that economists of the dry-as-dust school like Lord Welby would urge that urban ratepayers are as much entitled to relief as are their rural fellows. We knew that Lord Carrington would rattle out boisterous philippics after the approved Radical fashion, but that he would dexterously avoid the necessity of dividing the House. All these things we were persuaded of, just as we knew that the second reading would be finally carried without a murmuring remonstrance. The fact is that the Rates' Act is now accepted by men of all sides as an imperfect, halting preface to a great reform, and that to abandon it would mean the accentuation of the present anomalies and inflictions. The Radical attitude in the House of Commons lacked courage, lacked the grace of consistence, was without the redeeming virtue of contrition. Any Radical opposition in the House of Lords would have been grotesque. No, the Radical organisers are too wise at this juncture to permit of any independence or irrelevance such as is too often prejudicing the Conservative position in the rural constituencies. They would permit no such unnecessary blunder as the foredoomed attempt to amend the law of workmen's compensation in the direction I have indicated.

• • •

Of course, the question which the Duke of Richmond asked on Thursday in reference to the school holidays and hay harvest—the result of which is to make it clear now that the local authority may close the school for a fortnight in time of hay harvest, providing the general summer holiday be shortened by that period—was asked by pre-arrangement. As a fact, the education executive was anxious that the rural public should be made aware in the most definite manner possible that local managers have the right to satisfy local requirements in this respect. It rightly conceived that a formal declaration by no less a personage than the Minister for Education would attach significance and an added authority to the fact.

• • •

I am exceedingly glad that the House of Commons has added a new clause to the Compensation for Damage to Crops Bill, by which a railway company will be able to enter upon land and seek to extinguish or arrest the spread of any fire caused by sparks or cinders emitted from any locomotive engine. Of course, the insistence that the consent of the owner of a plantation, wood, or orchard affected by the cutting down or mutilation of trees, bushes, or shrubs should be obtained was very proper. It was altogether a wise concession, and an admirable evidence of the judicious temper of the authors of the Bill. It was a dignified rebuke of Banburyism and its irritating suggestions.

The annual hiring fair for hay and harvest at Newton Stewart took place on the 1st inst., and there was a good demand for workers, and many engagements were made, the average wages being:—Hay mowers, 22s.; winnowers, to 12s. per week with board; harvesters, to £5 10s. for the period of harvest, with board and lodgings.

Chesterfield Fair was held on Wednesday, when there was a good demand for milch cattle, and prices ranged from £18 to £22; in-calf cows and heifers, £14 to £18; fat cattle, £16 to £20; barren and laying-off beasts, £11 to £14; grazing beasts, two or three years old, £10 to £12; stirks, £7 to £9; and yearlings, £4 to £6. A few good Shire horses sold up to £40, and Welsh ponies at £10 to £14 each.

Mr. Rider Haggard's Report.—Mr. Lyttelton, in reply to a question put by Sir John Gorst in the House of Commons, said that the importance and difficulty of the subjects dealt with in Mr. Rider Haggard's report have induced him to propose the appointment of a Departmental Committee to consider the questions raised in the report, in the light of the large experience gained from previous schemes of colonisation.

A meeting of the committee of the Allotments and Small Holdings Association was held at Birmingham on the 6th inst. Present: Mr. F. Impey (in the chair), Howard S. Smith, Arnold Harris, J. Crouch, H. New, C. C. Smith, and C. D. Sturge. It was resolved to call the attention of the various associations connected with small holdings and land law reform to the desirability of holding a joint conference before the next Session of Parliament, in order to urge upon the Liberal leaders the need of adopting a definite line respecting land law reform, and the creation of small holdings. Public attention having been of late repeatedly called to the great size of the farms on the Crown lands, and to the loss arising from the difficulty of finding tenants for these, it was proposed to arrange for asking a question in the House of Commons as to whether the Commissioners of Woods and Forests would be prepared to arrange for dividing these large farms, as they become vacant, into small holdings, a course which has proved so successful in other cases.

NORTHERN NOTES.

Thunder showers and other falls of rain have occurred in many parts of the country, but the eastern freeboard of the northern counties is exceedingly dry and arid. In many places there has been only one slight shower during the last seven or eight weeks, and the consequences are very serious. The hay crop is an entire failure; at any rate the yield is only half what it is in an ordinary season. The pastures are burnt up, especially the clover pastures, and the spring grain is suffering severely. Oats will be very poor; even the few fields which held out against the drought for so long have now given way, and the prospect is most depressing.

The worst feature, however, is the outlook of the turnip crop. It is really surprising, considering how unfavourable all the circumstances of growth have been, that so little damage has been occasioned by the fly, but a worse enemy is now making its presence felt—the caterpillar of the diamond backed moth, and by the time these lines are in print the farmers on the east coast will realise the danger with which they have to contend. For the past week or ten days in many districts, there have been innumerable specimens of these moths flitting about the turnip fields, and even the gardens and other green fields have been visited by them. Four years ago this pest did immense harm to the turnip crop; in some places the swede crop was absolutely destroyed after the plants had been hand-hoed for the second time. At the time of writing the moths are less plentiful, but the eggs they have laid are just hatching out, and when this issue of the MARK LANE EXPRESS is put on sale the crop of caterpillars will be very perceptible. Only rain can save the situation, and to preserve the crop continued rain is necessary.

Some experience has now been gained of the pests in question, but there is no royal road to their destruction. The use of "Hobbes" mixture, and of soot, applied in liberal quantities while the dew is on the plants, has been found of some service, and the scuffler kept constantly at work in the crop also helps to destroy many of the caterpillars. Bunches of furze, hay, or even straw, fastened to the front of the implement, have been found useful, and the turnip harrow with sacking hung behind it has been found to shake or brush many of the caterpillars from the leaves. But, spider-like, these fall suspended from a slender thread, and unless covered with the soil, soon find their way back to the leaves. Various devices have been used, and anything that will shake or remove the caterpillars will be beneficial. Four years ago some armed their men with brooms and sent them brushing their way along the turnip rows, following up closely with the scufflers and turnip harrows to cover up the fallen insects with earth. But the success of all these devices was very partial, and on some farms three-fourths of the crop was destroyed.

The character of the season and the advent of the diamond backed moth lead to the apprehension that the surface caterpillars or surface grubs, which eat through the roots of the plants just below the surface of the ground, and which remain hidden in the soil during the day and come up at night to feed on the leafage, may also make their appearance. There is absolutely no way of coping with these surface caterpillars, and in a dry season they continue to ravage the turnip crops far into autumn and destroy what has escaped the fly and the diamond back. Four years ago their ravages were ruinous—is history about to repeat itself? Truly the outlook for the northern farmer is at this moment as black as it can well be. At the moment of writing the skies are darkening, but there is no real promise of rain.

The late Miss Ormerod did a great work for the English farmer, and the handbook she published is still the recognised authority amongst us; but after all entomologists have a great work before them. They tell us very little about the life-history of the pests of our root crops, and the "whence" and the "whither" of these are practically unknown. How comes it that the diamond back moths most abound along the sea coast? Is the moth the original form, or has it existed as another moth of more familiar appearance during the earlier months of the present year? Some do not hesitate to aver that such is the case, and they predicted six or eight weeks ago that later in the summer there would be a plague of diamond backs when they recognised the white moths which they allege to be the progenitors of the diamond backs.

After all, how much further than the knowledge our fathers and grandfathers possessed does our science carry us in these matters? Or in the methods of dealing with anbury and with clover sickness? They knew that lime, in any of its forms, was, if applied in sufficient quantity, a pretty certain cure, and they also knew that if root crops other than cruciferous were sown in one rotation, comparative immunity from anbury was secured in the next rotation. And they knew too, when clover failed from clover sickness, that if no more clover was sown for seven or eight years, a crop could then be secured, but that if another crop were taken four or five years later, it would probably fail from a similar cause. And how much more than this do we know to-day?

In one sense the great question of the day is the future of the Royal Agricultural Society. The last exhibition at Park Royal has proved a financial failure, and there is absolutely no reason to hope for anything better so long as the present location is adhered to. Some men place stress upon its work in other departments, upon the experiments at Woburn and other places, but their glory is departed, and the results attained there are dwarfed by the operations of the various agricultural schools and colleges and experimental farms of the county councils. The work done in the North, in Yorkshire, and in Northumberland, and in Lancashire, and in Cumberland, is dwarfing the experimental work of the Royal Agricultural Society, and there are other districts, notably in Kent, where similar satisfactory work is being done. The new Council of the Royal have a serious and a difficult task before them—it is to be hoped the new members will rise to the occasion; it is to them that the rank and file look.

July 6. M. Y.

Agriculture in Holland.

V.*

Exigencies of space compelled us to break off in the middle of the rules to which control stations are subject. To resume in detail rule

(g) Provides that butter producers and butter merchants shall at all times, and without any reserve, give free access to all places referred to under (c) second paragraph, to all fully appointed persons acting under the authority of the control station or of the Government.

They are bound to furnish all information these persons may require; to allow them to inspect all lists kept by them, including those kept in conformity with the provisions of sections (e) and

(f); permit them to take samples, free of charge, of butter as well as of the raw materials of which it was made; and assist them in so doing, if required.

(h) Unless provided for in another way, the packing of butter has to be stamped with a mark approved by the Government. This mark is intended as an indication for the inspectors of the control station, and for the persons charged with the Government supervision of this control.

The merchandise itself should bear a further mark. This is a mark of guarantee, and it assures the purchaser that he receives butter the manufacture of which has taken place under control. This mark is identical for every control station under Government supervision. It consists of the arms of the Netherlands, over which the word "Nederlandsch" (Netherland), and under which the word "Botercontrole" (Butter control), and in smaller characters, "onder Rijkstoezicht" (under Government supervision) are placed. By the side of this mark some further indication has to be made of the control station concerned, and whatever the Department may further consider necessary to identify the origin of the merchandise. This mark of guarantee will be placed on paper to be obtained, on certain conditions, from the Government at the charge of the persons concerned.

Any member obtaining possession of the paper bearing this mark is responsible for its exclusive use for the butter made or sold by him.

Producers and merchants are entitled to use their own mark in addition to this general mark.

(i) The control exercised by the station—and likewise the Government supervision shall, if considered advisable by the Department, extend to other matters beyond the guarantee against fraud for which the Butter Act provides (such as the guarantee of a not excessive percentage of water).

(j) A sufficiently heavy penalty shall be fixed for such producers and merchants as act in contravention of any of the regulations sub. (e) to (g) inclusive, or the provisions in the third paragraph under (h), or for such as in the opinion of the station concerned wilfully contravene the stipulations imposed by virtue of sub (i).

Such persons, unless the Agricultural Department considers the above-mentioned penalty sufficient, shall be irrevocably struck off the roll of members, notice hereof to be given to whomsoever it may concern. If, however, any of the stipulations under (c) are contravened, no such reserve is possible, the persons offending, without exception, being in these cases always struck off the roll and their names published.

The penalty referred to in the first paragraph of this section shall also apply to such producers and merchants as do not fulfil the conditions laid down in the first and second paragraphs under (h).

(k) The chemical and further examination of samples, and everything connected therewith, shall be carried out in conformity with the rules prescribed by the Government.

(l) Any station desiring to be placed under Government supervision shall, in addition to its regulation, etc., be required to furnish a complete list of the members composing the management, of the staff, and of the affiliating members. The station shall also submit estimates of income and expenditure.

(m) Any station placed under Government supervision shall at all times furnish complete information to the Department of all projected amendments of, or additions to, its regulations, as well as of any changes of its staff and management, and of the names of all new members and of all members who may have been struck off the rolls, with a statement of the reasons for such action. All such amendments of, and additions to, its regulations, and all new appointments, shall require the sanction of the Government if the station wishes to retain Government supervision.

The station shall send every year accounts of its income and expenditure.

(n) Any publications of stations under Government supervision, intended for distribution abroad, shall require the approval of the Government.

(o) The directors of all stations under Government supervision shall communicate every month to the director of the Government dairy station at Leiden all figures obtained as a result of their analysis or inquiries.

(To be continued.)

* *Previous instalments appeared June 5, 12, 19 and 26.*

Wednesday next is Speech day at the Dauntsey Agricultural School, Devizes, and the prizes will be distributed by Mr. Ailwyn Fellowes, M.P., President of the Board of Agriculture and Fisheries.

Dumfries Hiring Fair was held on Wednesday in showery weather. Stack-yardmen were receiving £5 for the period of harvest, with board; experienced harvesters, £3 15s. to £4; boys, £3.

At Sleaford on the 1st inst, before his Honour Sir G. Sherston Baker, Francis Bembridge, Billinghay, sued George Fisher, of March, for injuries sustained through being knocked down and trod upon by defendant's stallion at Sleaford Shire Horse Parade on April 10 last. His Honour held that everybody had an equal right to the King's highway, although motorists usually usurped a great deal more than they had any claim to. But when a highway was converted into a market in which bulls, horned cattle, and stallions were to be found, any one passing through ran a certain risk, and was guilty of contributory negligence. Although he deplored plaintiff's injuries, there would be a verdict for defendant with costs.

A Coroner on Motor Cars.—Dr. C. W. Iliffe, the coroner for Coventry and North-East Warwickshire, has complained to the Coventry Rural District Council, to which he is medical officer, that motor-cars are absolutely destroying the Council's roads. The hay crops on both sides of the road were very much damaged, he reports, by the dust caused by the cars, and such dust not only spoiled the crops, but did injury to horses, as the latter had to eat the hay, and its dust-laden condition caused them to lose their wind and become broken-winded. It was only necessary to go over the roads under the control of the Council to see everywhere that the highways were worn down to their foundations, because of the finer material being thrown up by the motor cars. He thought that the speed of cars within three miles of a city should be regulated to ten miles an hour. The clerk promised to look up the law as to whether motor cars would be considered as heavy traffic.

EAST ANGLIAN NOTES.

The odour of new-made hay is predominant in the atmosphere around every homestead in East Anglia at the moment, and the traveller through the Eastern Counties cannot but notice the picturesque scene of the busy hay-makers, that at intervals gives colour to the landscape. But the writer notes with regret that fewer hands are now employed in this occupation; and there is an absence of the old-fashioned sun-bonnets that gave such colour to the scene of merry workers. Although the grass is somewhat light this season, clovers and the sainfoin crop have yielded well, and fully makes up for the deficiency of grass.

Fears of a summer drought are again beginning to agitate the farming community, and, as the character of the season determines the degree of maturity reached at harvest, it has necessarily a great influence both on the composition and quality of the cereal crops. The present warm weather suits wheat; and a fine malting barley, rich in starch, can only be produced in a fine season, although lack of moisture, it is feared, will prematurely ripen the grain and so cause it to be poor in starch and relatively rich in nitrogenous matter that is not desirable.

East Anglians are proud of the fact that Mr. Thomas B. Freshney, who has on many occasions acted as judge at agricultural shows held in the Eastern Counties, has been selected to fulfil the very important position of judge of the awards among the grade and cross-bred bullocks at the International Agricultural Show at Chicago, and to assign the championships. In making the announcement, the *Breeders' Gazette* of Chicago says:—"In pursuance of established policy, a foreign judge has again been secured to place the awards among the grade and cross-bred bullocks at the International and assign the championships. The honour of the selection for this important duty falls this year on Thomas B. Freshney, one of the most experienced and best esteemed judges in Britain, whose record at his home shows is quite sufficient to warrant the highest expectations of intelligent and discriminating decisions, the uniform favour won by foreign judges in this section of the International for the past five years, and the clever and acceptable work of Mr. Blofield among the Red Polls in the breeding classes last season suggests strongly the expansion of the policy of securing judges from abroad so as to include the leading breeds, now and again. Great Britain has acknowledged the international comity of such an exchange of judicial talent, and much of real profit and pleasure lies in drawing thus closer the bonds which unite the brotherhood of breeders on both sides of the water."

Farmers do a good deal towards keeping up the roads; it is, therefore, of interest to know what the Chief Surveyor reports to the Essex County Council about the Essex roads. In the first place, the total mileage of the main roads of Essex is 793 miles 6½ furlongs, and, after giving particulars of their condition, the Surveyor goes on to say that the principal feature in connection with this matter during the year is the increase in expenditure due entirely to locomotive traction traffic.

July 7.

The "Bollettino Ufficiale" of the Italian Ministry of Agriculture, Industry and Commerce announces that tenders are invited for the supply to the Italian Government of thoroughbred English stallions. Offers of sale, made out on stamped paper of 1 lira 20 cents (obtainable from the Italian Consulate-General in London, 44, Finsbury Square, E.C.) should reach the "Ministero di Agricoltura, Industria e Commercio (Direzione Generale dell' Agricoltura—Ispettorato zootecnico), Rome," by October 10. Stallions may be presented for inspection at Milan on November 1; at Pisa on November 4; or at Santa Maria Capua Vetere on November 6.

The Fruit Industry of Great Britain.

Departmental Committees Recommendations.

The Departmental Committee appointed by Lord Onslow, when President of the Board of Agriculture, to inquire into the fruit industry of Great Britain, and to consider whether any further measures might with advantage be taken for its promotion and encouragement, has now issued its report, which is a very lengthy one, extending to close on 40 pages of close printing on foolscap-size paper. A very large number of witnesses were examined, and some most interesting details obtained; in fact, to a farmer the whole report should prove interesting reading, and well worth spending 4½d. on.

As regards the railway rates question, the committee express the opinion that a more simple and uniform system of charges for fruit transit is desirable, and that railway companies should make greater efforts for securing the prompt delivery of perishable fruit. In addition, railway companies should be urged to provide suitable ventilated goods vans for fruit traffic, similar to those recently introduced by the Midland Railway Company. All fruit should be consigned at company's risk, the so-called owner's risk rates should be abolished, and in the event of owner's risk rates being retained the liability of the railway companies should not be confined to cases where only wilful misconduct, but to those where culpable negligence, can be proved. In view of the recent tendency to combine amongst the railways, the committee submit that it would be an advantage if the Government were to appoint an official or a department to watch over the companies' actions, and to report to Parliament; and that in years of glut railway companies should be urged to lower their rates for fruit temporarily.

As to the other grounds covered by the committee, these will be seen from the following summary of the recommendations and suggestions made by the committee:—

(1) That a special sub-Department of the Board of Agriculture and Fisheries be established to deal with matters connected with the fruit industry. That there be two branches of such sub-Department—(a) a bureau of information; (b) an experimental fruit farm.

(2) That after the establishment of the Government sub-Department, its attention be directed to the necessity of preventing the importation of diseases and insect pests through the importation of diseased fruit and nursery stock.

(3) That the question as to the desirability of setting up compulsory powers for the eradication of diseases and insect pests in this country be postponed until we are in possession of fuller knowledge through the work of the Government sub-Department.

(4) That horticulture be taught in elementary schools in country districts, and that such schools should have school gardens attached wherever possible. That the attention of local education authorities should be called to this, and also to the desirability of encouraging the study of practical horticulture in training colleges.

(5) That the present defective form of returns made by growers for land under fruit should be improved and amplified.

(6) That estimates of home and foreign crops should be published, together with forecasts of the probable date of arrival of imports.

(7) That the various Agricultural Holdings Acts should be consolidated into one Act.

(8) That the Market Gardeners' Compensation Acts be amended by making section 4 retrospective.

(9) It is further suggested that, in cases where a tenant gives notice to quit, he shall not be entitled to receive compensation unless he presents to the landlord a successor who is willing to take over the holding at the same rent; that in the event of his so doing, and the landlord accepting his nominee, the compensation be paid directly by the new tenant to the old tenant, but that the landlord have the right to refuse to accept the outgoer's nominee, in which case he must pay compensation to the outgoer under the provisions of the existing law.

(10) That the Board of Agriculture should appoint experts in fruit valuation, and should call them together for the purpose of formulating general rules for estimating the amount of compensation to be paid to an outgoing tenant of a holding under the Agricultural Holdings Acts on the basis of the value to an incoming tenant.

(11) That the State be empowered to lend money to landowners who have fruit on their estates, subject to suitable conditions, for the purpose of supplying the ready money required for the payment of compensation at the determination of a tenancy.

(12) That it would be to the advantage of landowners and tenants in fruit districts if, under the provisions of section 5 of the Agricultural Holdings Act, 1883, they settled the basis of compensation by the "particular agreement" therein referred to.

(13) That a Bill should be passed for facilitating the purchase of small holdings by tenants with assistance from public funds, somewhat on the lines of the measure brought in by the Right Hon. Jesse Collings, M.P., in the session of 1904.

(14) That Rule No. 8 for the assessment for Income-tax, whereby market gardeners and nurseries are assessed for schedule B according to the rules of schedule D, be repealed so far as it applies to market gardens.

(15) That in the assessing of agricultural holdings for local rates, the assessments should not be raised by reason of the planting of fruit for a period of five years after the planting in the case of small fruit, of seven years in the case of mixed plantations, and twelve years in the case of orchards.

(16) That in the case of glass-houses the allowance of one-sixth, given to dwelling houses for repairs in the assessment for Income-tax, be increased to one-third, by making a special allowance of one-sixth for renewal in addition to the one-sixth for repairs.

(17) That the benefits of the Agricultural Rates Act of 1896 be extended to glass-houses used for commercial purposes.

(18) That it is highly desirable that a more simple and uniform system of rates for fruit be introduced by the railway companies. This can be done without a statutory re-classification, with the assistance of the Board of Trade.

(19) That railway companies should make greater efforts for ensuring the prompt delivery of perishable fruit.

(20) That railway companies be urged to provide suitably ventilated goods vans for fruit traffic, similar to those recently introduced by the Midland Railway Company. That sheeted trucks without sheet supporters should never be used.

(21 That it is most desirable that all fruit be consigned at company's risk, and that the so-called owner's risk rates be abolished; the rates at company's risk being reduced to a figure approximating to those now in force at owner's risk, but providing the companies with just a sufficient margin for the extra liability incurred. That 5 per cent. would be a fair margin.

(22) That in the event of owner's risk rates being retained, the liability of the railway companies should not be confined to cases where only wilful misconduct, but to those where culpable negligence, can be proved.

(23) The committee also suggest that, in view of the recent tendency to combine among the railways, it would be an advantage if the Government were to appoint an official or a Department to watch over the companies' actions, and to report to Parliament.

(24) That in the case of all serious grievances against the railway companies, growers and merchants should at once send their complaints to the Railway Department of the Board of Trade, and ask them to exercise their powers under the conciliation clause of the Act of 1888.

(25) That in years of glut railway companies should be urged to temporarily lower their rates for fruit, just as excursion pasenger fares are lowered on special occasions, and that, if this cannot be done by agreement, it is desirable that the Railway and Canal Traffic Act of 1894 should be amended for that purpose.

(26) That jam made wholly or in part from foreign fruit be so labelled.

(27) That the Government should undertake the inspection of imported fruit and fruit pulp at the ports of entry.

(28) That it would be an advantage to fruit growers, and to the public generally, if the Local Government Board collected statistics of the fruit seized and condemned as unfit for food.

(29) That the present by-laws for building in country districts be modified so as to allow of the cheaper construction of cottages.

(30) That boys in industrial schools be allowed to stay away from such schools for the purpose of fruit-picking, subject to suitable regulations.

(31) That the provisions of the Robson Act as to "half-timers" be made generally known, and applied by local education authorities in country districts.

(32) That with regard to markets, it is desirable that more local markets, similar to that of Kew Bridge, be established in the suburbs of London. That as regards the large distributing markets in provincial centres, it is desirable that certain of these be extended and improved. That the provision of retail markets in many country towns is urgently needed, and that very good results would be likely to follow if the Councils of other towns followed the example set by Hereford in establishing a fruit market under their own authority.

(33) That the telephone should be further extended in country districts.

(34) That County Councils, in the publication of any orders made by the Home Secretary on their application under the Wild Birds' Protection Acts, should clearly state the powers be-

longing to owners and occupiers of land under these Acts.

(35) That it is desirable that an inquiry be instituted into the alleged practice of growing fruit on sewage farms, and the effect of such a practice on the public health.

(36) That fruit growers should pay more attention to the careful packing and proper grading of better-class fruit, and to the selection of the right kinds of fruit to plant according to the soil, and to the importance of cultivating fewer varieties, especially of apples.

(37) That the establishment of co-operative societies, similar to that existing at Blairgowrie, for the disposal of fruit, and for other purposes, such as the obtaining of adequate supplies of pickers, would be beneficial, particularly in districts where there are many small holdings.

(38) That it would be an advantage to fruit growers if they kept bees in connection with their fruit plantations.

(39) That the attention of landlords, especially in the West of England, should be called to the pressing need of renovating and replanting the decayed orchards on their property.

(40) The committee are also of opinion that, in connection with the proposed Government sub-Department, it might be advantageous that a large fruit farm should be established in proximity to the experimental farm, where fruit growers and lecturers could receive a practical training.

Yorkshire Agricultural Union.

A meeting of the Yorkshire Agricultural Union was held on Thursday at York, but there was only a small attendance.

The General Purposes Committee's report, which was adopted, recommended that the union should encourage the formation of co-operative societies under the auspices of the Agricultural Organisation Society. The Committee also recommended that the union should support the Highways Protection League in their endeavours "to prevent the infringement by persons using motor power of the common law rights of the public to the free and full use of the highways." Letters were also read from the Sheriff Hutton, Derwent, Craven, and Bridlington Clubs in favour of the objects of the League, and from the Howdenshire Club suggesting that imprisonment without the option of a fine should be the penalty in any case where it was proved that injury had been occasioned to any human being in an accident caused by the carelessness of any driver.

Mr. John Newton moved the adoption of the report of the Parliamentary Committee, which related to the growing of chicory in the British Isles, and detailed the steps taken by the Yorkshire Agricultural Union in conjunction with Alderman Foster, of York, in pressing the matter upon the attention of the Board of Agriculture. Section 6 of the Revenue Bill now before Parliament, they reported, proposes to enact that in future high dried chicory shall be subject to the same customs duty as roasted or green chicory, and accordingly "low dried or white dried" shall be substituted for "kiln-dried," as regards the duty on chicory in the Customs tariff of 1876, etc. The Parliamentary Committee welcome the proposed alteration as an official condemnation of the unfair conditions which growers or importers of foreign chicory have enjoyed at the expense of cultivators of the home-grown article.

A long letter was also read from Mr. L. Foster on the subject of chicory, in which he said if the Customs duty on low dried chicory could be raised to 14s. 4d., or a trifle more, to cover difference in assessment re accumulated moisture, it would induce the English grower to once more cultivate the crop.

The report was adopted.

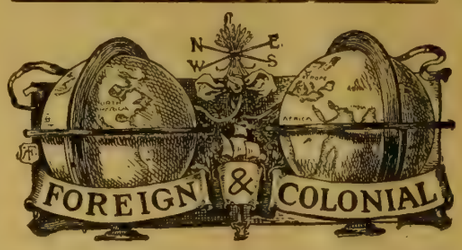
Mr. E. Robinson moved—"That the Union is in favour of the substitution of a compulsory dipping order for the whole of the United Kingdom for the 'Compulsory Dipping Areas Orders' and the 'Movements of Sheep Order.'"

The Chairman (Major F. W. Dent) said if they had a compulsory dipping order for the whole of the kingdom the difficulties and annoyances caused would be enormously increased and intensified. When they came to consider the difference in climate and the different methods of sheep farming, they would see how difficult it would be without great restrictions and hampering of trade to have a universal compulsory order. An order simply to be carried out on the guarantee of the individual farmer was impracticable because he regretted to have to say it—there were many farmers in the country whose guarantee in the matter would be scarcely worth the paper on which it was printed. For himself, he had come to the conclusion that if farmers in the districts scheduled would loyally accept the orders and get their sheep dipped they would go a long way towards stamping out sheep scab in many districts.

No one seconding the resolution it fell through.

British Possessions
beyond the Seas
AND THEIR
London Representatives.
NOVA SCOTIA.

Offers advantages to British Agriculturists with moderate capital. Improved Farms at Low Rates. Fertile Lands. Famous Fruits. Enormous mineral deposits of Coal, Gold, Silver, Iron, Copper, Lead and Tin. Climate temperate and healthy. Easily accessible to all the principal markets.—Full information supplied by the Agent-General for Nova Scotia, MR. JOHN HOWARD, 57a, Pall Mall, London, S.W.



How to Fight Insect Pests.

In the last Report of the Agricultural Department of Western Australia some interesting particulars are given of the work of Mr. Geo. Compere, the travelling entomologist. His special cult is pests and their parasites. He believes that every insect pest has its parasite, as, according to the moralist, every evil has its remedy. In the pursuit of this principle Mr. Compere enjoys the unique distinction of being in the joint service of the Western Australian and Californian Governments—a form of union for commercial and agricultural purposes which cannot but commend itself to the advocates of union between the United States and the British Empire. Mr. Compere's duty takes him into many lands. He has to go, indeed, wherever he can find the original home of the insect pests whose ravages inflict such immense loss upon the farmer and the fruit grower.

According to the West Australian Report, Mr. Compere has succeeded in finding parasites of various Vine Scales, of the Cabbage Moth and Cabbage Aphis, and of the Codlin Moth, that most destructive of all insects in the orchards of the world. He has also discovered a valuable beetle (Styphalinidæ) whose avidity for maggots of every kind, particularly blow flies, is phenomenal. Whether these parasites will do all that is claimed for them the future only will tell, but certainly the progress of the work in which Mr. Compere is engaged should command the attention of all who are interested in agriculture and fruit growing.

Evidently the Western Australian Government is prepared to adopt up-to-date methods in their desire to look after the interests of those who settle on their lands—a fact that gives emphasis to the efforts the Government is making to inform the British public of the advantages offered in that country for land settlement.

The Argentine's Agricultural Exports.

Statistics now available show that the shipments of agricultural produce from Argentina have been on a remarkably heavy scale this year. The total amount of wheat exported since January was 8,112,500 quarters, as against 7,141,000 quarters last year, and 5,202,000 quarters in 1903, while the maize shipments since the beginning of the new season in May have been 2,259,000 quarters, as against 1,545,000 quarters last year, and 1,691,000 quarters in 1903. Only in linseed is there a falling off of 1,400,000 quarters, and this decrease, of course, has been compensated for by the expansion in wheat.

It is an interesting fact that according to the Board of Trade returns Argentina provided £3,989,000 worth of wheat for this country in the first five months of the current year, thus surpassing India, Russia, and, of course, the United States. Argentina in the period named, supplied 11,182,000 cwt., against Canada's 973,000 cwt.

"PAYING POULTRY"
is the book you need if you would make your poultry keeping a SUCCESS.

The Utility Poultry Club Twelve Months' Laying Competition.

In response to a generally expressed desire, the Utility Poultry Club has now completed arrangements for the holding of a laying competition for pure breeds over a period of twelve months, commencing on October 1, 1905, and ending on September 30, 1906.

The competition—the first held in England—will be carried through at one of our most modern and best equipped agricultural colleges, the Harper-Adams Agricultural College, Newport, Salop.

In coming to a decision as regards a site for the competition the Committee of the club was influenced by the prominent position occupied by the Harper-Adams College in agricultural matters generally, by its central, convenient, and healthy situation, and by the interest displayed in poultry matters by those in authority at the college.

The college land stands some 220 ft. above sea level, and the large field in which the competition will take place is well sheltered on the north and east by tall trees.

Accommodation will be provided for forty-two pens of pure-bred pullets hatched in 1905—six in each pen. Eighteen birds (three pens) will be housed together. For the purpose of more uniform feeding the heavier and lighter breeds will as far as possible be separately penned.

All the houses and runs will be similar in size and position. The houses, which are all being specially made for the competition, will have open wire fronts with sliding shutters and at least 15 cubic feet of air space will be allowed per bird.

Duplicate grass runs of large size will be attached to each house, and these will be used alternately. The combined area of the two runs will be about 720 square yards, or 40 yards per head. Individual laying records will be noted, and the prizes will be chiefly awarded to those pens producing eggs of the highest market value in twelve months.

Owing to the great expense of the competition the entry fee will be £2 per pen, and no person will be allowed to make more than one entry. A system of penalties, as in the four months' competitions, will be enforced in cases where the standard is very low. In order to minimise as far as possible the loss arising from the entering of inferior birds, a sub-committee will make an inspection of all birds before the competition begins. A competitor will be allowed to replace any bird rejected.

Should there be more entries than accommodation is provided for, selection will be by ballot, arrangements being made for the representation of the various breeds of poultry entered.

The club will have absolute control as to the system of housing and feeding, and it is intended to adopt such methods as the ordinary poultry-keeper could follow without pampering the birds.

Arrangements will be made for frequent inspection of the pens by the Committee of the club.

As will be understood, the Utility Poultry Club, in undertaking work of this magnitude, has to face a larger expenditure than its own resources can meet, and it is necessary, therefore, that some other assistance be forthcoming from persons who are interested in seeing the competition established. The club requires donations to meet the estimated deficit of the competition, in addition to a guarantee fund of not less than £50, and any donations or promises for the guarantee fund will be gratefully acknowledged.

A number of prizes will be given by the club, but it is hoped that they will be supplemented by specials from other sources, and any offers will be very acceptable. Donations to the management fund, and promises to the guarantee fund, and all offers of specials should be made to the Hon. Assistant Secretary, Mr. Cyril Dunkley, Wednesfield, Wolverhampton, to whom all communications with regard to the competition should be addressed.

In view of the shortness of time for making the necessary arrangements, it is particularly desired that all offers of assistance may be made as soon as possible.

Particulars as to membership of the club may be obtained from the Hon. Secretary, Mr. E. W. Richardson, 260, Nantwich Road, Crewe.

Home Notes.

The Borough

The chief matters now occupying the minds of traders are expressed by the two words "crop" and "arsenic." Apparently antagonistic, or at least disconnected, these words are really very intimately associated, for upon decisions concerning the latter the results of the former necessarily, and to a large extent, depend. The declaration of the Government authorities with respect to arsenic in hops is manifestly absurd. It may be necessary, according to the opinion of chemical experts, to limit the presence of arsenic in articles of food or in beverages to 1-100th of a grain per pound; but as hops are only a small, though important, ingredient of beer, it seems to be altogether ridiculous to insist upon this proportion being applied to them. Supposing this limitation were increased to 1-50th of a grain per pound of hops, as this quantity is the utmost used in 18 gallons of beer, the proportion per gallon would only be 1-900th of a grain, and in a pound, or a pint of beer, would not exceed 1-7200 of a grain. I am neither a chemist nor a physician, but, as a layman, I venture to say that such an infinitesimal quantity may be considered as absolutely negligible and innocuous. The question of responsibility is, however, being seriously considered by the trade, as already there are cases of rejection of hops by brewers on the ground of the Government limitation; therefore the interests of growers are directly affected, and the results to them of the coming crop is, at the moment, a most important question. It seems to me that no time should be lost by planters in bringing before the proper authorities the urgent necessity for the modification of the present stringent rule, and I trust I may soon hear that the industry is awakened, and that steps are being taken in the desired direction.

Reports from the Plantations

are, on the whole, very favourable. Although washing is persevered in to a moderate extent in some gardens, fly and lice have practically disappeared. The bine, assisted by the high temperature and occasional showers, is generally looking exceptionally strong and healthy. Mould is certainly present here and there, but the prevailing climatic conditions, if continued, will probably be sufficient to prevent any further run of the disease. It can hardly be denied that the present outlook favours the anticipation of a full average yield, unless, indeed, the excessive luxuriance of bine and foliage should hinder the production in due proportion of burr and cones. The weather during the coming few weeks will decide this point.

In the meantime, the trade is very quiet, and buyers, encouraged by the present prospect, are lowering their offers. Holders do not, however, as yet show any readiness to give way, so that, on the whole, the market may be quoted as having remained fairly steady during the past week.

All official reports and notices of the National Association of English Hop Growers are printed in the MARK LANE EXPRESS, *and current information from all parts of the world, likely to be of interest and benefit to the members of the society, and Hop Growers generally.*

Foreign Notes.

America.

A cable message received from reliable correspondents this week indicates that the hop markets of the United States are not likely to attain at present to the stronger position that has been anticipated since we were informed of the combination of growers. Their expressed determination to hold their hops until August 1 for 30 cents has apparently been shaken by the pressure of the "Bears." It appears that no actual bond of unity existed, beyond the verbal agreement of holders, from which any individual was at liberty to free himself at any moment on his own initiative. The action of certain outsiders who pressed their hops for sale, seems to have alarmed the timid members of the combine, and the process of disintegration, once commenced, rapidly spread, until, as I am informed, the Oregon combination hops are now offered at 18 cents. Doubtless the panic has been intensified by the reports from the plantations, as I learn from the same source that it is now expected that the United States crop for 1905 will probably exceed that of last year by 20 per cent. The New York market, however still retains an appearance of firmness, choice States being quoted at 26 to 28 cents, and choice Pacifics at 26 to 27 cents. Dealers are, however, not unwilling to entertain lower offers.

Nuremberg.

Although the climatic conditions of clear sunshine, alternated with occasional rains, are generally very helpful to the growth of the plant, the presence of insect pests being very seldom reported, there are complaints from many districts that the intervention of cold nights is tending to check progress, and some of my Continental correspondents are inclined to think that on the whole the condition of the Bavarian plantations is not so promising as it was a fortnight ago. In Bohemia, drought has been persistent, and the absence of rain is being severely felt. The Nuremberg market is extremely sensitive to crop reports. It is estimated that present stocks of 1904 hops do not exceed 1,000 cwts.; it is therefore not surprising that with a fair demand for local consumption, and continued orders from Bohemia, values are maintained at previous advanced figures. It is, perhaps, possible to obtain some concessions upon medium or low qualities, but full prices are demanded and obtained for green samples that can claim any merit or quality. The probable early appearance of samples of the new crop, which may be expected in about five weeks, has induced country holders to send their small reserves to market, so that arrivals have recently been somewhat in excess of sales. It is, however, anticipated that brewers will be active buyers as soon as the new market opens, and consequently that values will not be reduced, unless the total crop should exceed the present prospect.

Belgium.

Brewers are buying with caution, and only moderate quantities, holders are therefore showing a little more inclination to induce business by slight concessions, so that the general tone of the market is rather easier, Alosts being now quoted at 145 and Pops 127½ francs. Reports from plantations continue to be favourable, the plants making good progress under the influence of the fine weather. Recent storms do not appear to have damaged the hop gardens.

Hop Report.

THE VALLEY OF THE MEDWAY (JULY 3).—"There is still a good deal of vermin hanging about, and growers cannot leave off washing; they have some time to go over by steam power, as there is a great deal of bine generally. The hops are very forward, burr can be found in the early soils. It is a great question whether they are not altogether too forward to grow a crop, and should they get anything of a check it is feared mould will do a lot of mischief. Already in places favourable to mould, spots can be found, and growers will have to watch the burr pretty closely, as when once mould seizes the burr it is very difficult to stop it.

National Pig Breeders' Association.

The general meeting of the members of the National Pig-Breeders Association was held by permission of the Council of the R.A.S.E. in the large tent on the show-ground, Park Royal, on the Wednesday, Mr. H. H. Owtram, President, in the chair. The minutes of the last meeting were read and confirmed, and the report and balance-sheet, which had been previously sent to the members, was taken as read, the Chairman remarking that the affairs of the association were in a flourishing condition.

The Council again wish to call particular attention to Bye-Law 32, which reads thus: "It shall be incumbent on all members desirous of entering their stock, to make a return of the birth of all pigs born, alive or dead, during the month of January in each year, within one month of the date of birth of such pigs, and of all other pigs born during that year as soon as possible, but, in any case, on or before December 31, on birth forms, to be supplied by the Secretary, who will forward the same on application."

The scrutineers reported the election of Messrs. Ecob, Hall, Hiscock, Philip, and Owtram to the Council in the place of those retiring by rotation.

Mr. P. L. Mills was elected President, Hon. D. P. Bouverie President-Elect, and Mr. Henry Smith auditor for the ensuing year.

Mr. Howard Taylor moved the following resolution:—(a) "That it be recommended to the Editing Committee not to accept the names of pigs bearing prefixes other than those of the breeder, but to accept the names of pigs bearing the affixes of the owner." (b) "That it be a recommendation to the Council to decide as to the length of time which should elapse after a member (owning a prefix) resign membership, before the same prefix can be registered by another member." Considerable discussion took place, and eventually it was deferred until the next meeting.

Mr. Gibson moved "That the dams of all entries after Vol. XXII. shall be registered." He said that the registration of all the dams would help the Editing Committee, and he did not think that it would cause any hardship to members; he suggested that the question be referred to the Council for consideration. Mr. Hall seconded this proposition, and it was agreed to. Mr. Spencer then moved that an alteration be made in the 16th Article of Association, viz., "A retiring councilman shall not be eligible for re-election for the period of one year if he has not attended at least one-third of the meetings held during his term of office." The Chairman pointed out that it was necessary for the resolution to be carried by a majority of three-fourths of the members present, and that another general meeting must be called within twenty-eight days to confirm the resolution if passed. The vote was then taken, and, as the necessary majority was not forthcoming, the resolution fell through.

Mr. Elliott moved "That a person be allowed to include the ear number or letter of a pig when registering its pedigree in the Herd Book." It would be a convenience to him, and he did not think it would interfere with the numbers given to the registered animal. Upon the vote being put to the meeting, the Chairman said the numbers were equal, and he should give his vote against the resolution, remarking that it would be better to give the matter more consideration.

A vote of thanks was given to the President and the auditor for their services during the past year, and to the Council of the R.A.S.E. for the use of the tent.

At the conclusion of the annual meeting a council meeting was held, Mr. P. L. Mills taking the chair. The minutes of the last meeting were read and confirmed. The Finance and Editing Committee were re-elected, and Messrs. A. S. Gibson, A. Hiscock, and C. Howard Taylor were elected the Joint Board Committee. The question of medals of 1906 was deferred until the next council meeting.

Messrs. Chas. Bathurst, jun., Wm. Drury Lowe, P. E. Hughes, and W. W. Theobald were elected members of the association.

Mr. Bathurst's application for the prefix of "Lydney" was granted. The next meeting was arranged to take place on the second day of the Smithfield Club Show in December next.

"BE WISE IN TIME."

FARMERS should take care (especially in view of the comparatively low rates of premium) to insure against loss through **STORMS** and **FIRE.**

The **HOMESTEAD, FURNITURE, OUT-BUILDINGS, LIVE STOCK, IMPLEMENTS, STACKS, AND GROWING CROPS** all represent property which can, by the present modern system of **INSURANCE**, be covered at a trifling annual outlay.

INSURANCE against death or injury through accidents should not be neglected.

ROYAL INSURANCE COMPANY.

FIRE, LIFE, HAILSTORM.

Invested Funds . . £13,062,125.

HAILSTORM INSURANCE.

The Royal, besides being the largest Fire Insurance Company in the world, is one of the few offices that undertakes risk from Hailstorm. The important feature for Agriculturalists when effecting protection on their property is the opportunity afforded them of combining insurance against Hailstorm and that of Fire Insurance in one office.

Gentlemen able to influence introductions with this object are invited to make application for Agencies.

Prospects in South Hants.

SIR,—Farmers in some other districts appear to be still crying out for rain, whereas we in this part of the country are devoutly hoping for a cessation of the rain. We have had too much already for much of the growing corn; whilst as to the outlook for haymaking, this is far from cheering, a very large proportion of the seed hay is cut, but not one-fourth of it yet carted. The crop may perhaps turn out about threefourths of an average. The quality of that carted is grand. Much of that still out must be damaged, even where it is well cocked, whilst that uncocked will be of little feeding value.

We have cut about one-third of the meadow hay and had begun carting it. The crop is heavier than was looked for a month since. On the high lands and poor clays the return will be very light and not of the finest quality.

The wheat crop is most promising, as good as we have had for some years. It is too early yet to give an opinion as to the blooming period, this does not appear to have been very satisfactory. The growing barley varies greatly, some of that which was drilled early and the late sown are not nearly as good as where it was drilled about the middle of the month of March.

Stock have done well, but, so far as one can tell, cattle are not likely to pay much for the summer's grass. At present their value is less than when they were purchased in April.

Labour is fairly plentiful, and prospects are brighter than for some years could we but get fine weather. L. T.

June 30, 1905

Highland Prospects.

SIR,—Inverness-shire and Ross and Nairnshire, and all the northern counties of Scotland were not to my experience in a more prosperous state up to this date, June 30, since the last 30 years. We have heavy crops of hay, oats, barley, wheat, beans and peas are in small acreage grown in said counties, but looks well. Potato crops are excellent, looking fresh and flourishing; we have had new potatoes daily this week in the neighbourhood of Inverness of excellent quality, and young garden vegetables are also looking everything desirable. The field swedes are well thinned and yellow, and some fields only sown this week all look fresh and good, and there are no complaints of blue destructors in turnips. We have showers almost daily, and the sun shines magnificently over our glens, mountains, and lovely valleys, so that the beauty of Nature is beyond utterance in language. The prospect of cattle is good, and there is plenty of good pasture for store sheep and cattle. Prime beef and mutton is high; eggs, 10d. per dozen; fresh butter, 1s. to 1s. 2d.; milk, 1s. per gallon, warm. I have been over these counties myself, and the aforesaid is from my own personal knowledge. Our prospect is good, and weather for growing is all that could be desired at this time. My own crop of potatoes (new varieties) Eldorado, Duchess of Cornwall, Recorder, May Queen, Gold Coin, Maid of Coil, the Prime Minister, Sutton's Discovery, and various others are all out and look a fair crop, fresh and sound apparently. J. C.

July 4, 1905.

Good Crop Prospects in Mid Essex.

SIR,—To all appearances we look like having a very good crop all round, except beans, which have not set so well as they might. The weather has been so nicely balanced between wet and dry that it has practically suited all farming operations, the mangold and roots looking well. Peas which have been picked for London markets have been a very disappointing price, and a good many acres will be cut for seed which would otherwise have been picked. The red clover crops grown from Russian seed are nothing like so good as the general stocks of English seed, and care should be taken that seed from this stock should not be sold next year as English seed. At present there is a good plant of young clover for next year. Harvest looks like coming on a bit later than the average. All live stock is not so good a price as was expected, probably on account of the shortage of money, store lambs especially being disappointing.

Haymaking is now in full swing, and is being got well and is a good medium crop.

Apples will be a short crop.

The relief under the Agricultural Rating Act on the highly rented good grass lands of the Midlands is out of all proportion to our heavily tithed corn lands of Essex, a large proportion of which will not grow good grass. If farmers would only drop Party politics and go for their own industries as trades do, then there would be some hope for agricultural legislation.

Mid Essex, July 6, 1905.

Outlook in Hants.

SIR,—The season, on the whole, I consider a favourable one, and, had there been no frosts in May, the best for some years. The wheat is good, barley and oats quite an average. The hay crop a poor one, two-thirds of which is secured in good condition, the remainder being seriously damaged by heavy rain of Friday last, June 30. Roots are coming on well. Sheep are healthy, and plenty of feed. Tares particularly good.

A. ARNOLD.

July 6.

The Season in Wilts.

SIR,—The spring corn is very light, owing to the long period of dry weather. Wheat is looking better, and, should the yield be good, promises to be an average crop. We have a good breed of lambs. Sheep, generally, are healthy, and selling at about 2s. per head above last year. The price of wool is also better than of late.

Hay is a very light crop, which we are now busy securing. It has been selling this last year for less than straw, which I have never known before.—Yours faithfully,

SIMEON RUDDBY.

Hay Harvest in Shropshire.

SIR,—We are having beautiful hay harvest weather, which is now in full swing—some have even finished.

Turnips are a failure, but as many thistles as need be; nothing seems to affect them.

The corn looks healthy, but it will never make a first-rate crop. It is thin on the ground.

Very slow markets for beef, mutton, and pork; they are a drag. E. BRIGHT.

July 7.

Lancaster Summer Fair was held on Thursday; there were only about thirty horses present. Some changed hands at prices ranging from £5 to £10 each, and one or two better animals were offered at £16 to £20.

At the Middlesbrough Police Court, Joseph Ellerton, farmer, of Mandeville, Darlington, pleaded guilty to three separate charges of selling adulterated milk. Defendant in the witness box denied that the milk was adulterated. He milked the cow himself, and personally despatched the milk. Defendant was fined 20s., 30s., and 40s., and costs.

Dairy Shorthorn (Coates Herd Book) Association.

A meeting of gentlemen, who have signified their intention of joining an association to further the interests of pure-bred dairy Shorthorns, was held at 12, Hanover Square, London, on Monday, June 26, 1905. Among those present were: The Right Hon. Lord Crewe, Messrs. C. R. W. Adeane, Richardson Carr, J. P. Cross, W. Crosland, A. C. Hall, R. W. Hobbs, R. H. Hutchinson, F. H. Jennings, J. C. Robinson, C. A. Scott-Murray, Richard Stratton, and F. N. Webb (hon. secretary). Mr. Adeane was in the chair.

Several letters were read from members regretting their inability to be present, and making suggestions as to details connected with the association; and the names of the forty-seven members who had already joined were announced.

The Chairman, in opening the proceedings, briefly explained the object of the meeting. He said that—"The association now being formed was not in any way antagonistic to the Shorthorn Society, of which they were all members. It was, however, necessary that something should be done to maintain the position of the Shorthorn as a dairy cow. Milk was the only monopoly which remained to the British farmer, and it was not surprising, therefore, that they should take steps to develop the source of their milk supply. The farmer required an animal which would yield a large amount of milk, and which was capable at the same time of carrying flesh; the dairy Shorthorn was the ideal animal for that purpose. The association would, by offering prizes for milk tests, by securing classes for dairy Shorthorns, and by recommending judges, do their best to sustain and popularise the Shorthorn for dairy purposes, a breed which had for many years been so justly famous for beef. There was no question of starting a separate herd book, and he believed they had the approval of the 'Shorthorn Council.'"

Mr. Richard Stratton, in proposing "That an association be formed to be called The Dairy Shorthorn (Coates Herd Book) Association," remarked "That he hoped this association would be able to assist agricultural societies, and to persuade them to provide more classes for pedigree dairy Shorthorns, and generally to give greater support to the dairying industry, which had so greatly increased of recent years that it had become of national importance."

Mr. Richardson Carr seconded the proposition, which was carried unanimously.

Lord Crewe proposed that Lord Rothschild be asked to become the first President of the association, and alluded to the great support his Lordship had always given to dairying. Mr. Geo. Taylor seconded this proposal, which met with universal approval.

A temporary council was selected to draw up the rules of the association, to be confirmed at a general meeting, and generally to manage the business of the association.

Mr. F. H. Jennings proposed, and Mr. A. C. Hall seconded, that the promoters of the association, viz., Sir Oswald Mosley, Bart., the Right Hon. Lord Crewe, C. R. W. Adeane, Richardson Carr, Walter Crosland, Robt. W. Hobbs, F. Punchard, C. A. Scott-Murray, Richard Stratton, George Taylor, with the addition of Mr. J. P. Cross and Mr. F. N. Webb, form the temporary council. Mr. F. N. Webb, of Babraham, Cambridge, consented to act as hon. secretary for the time being.

The members now number fifty, and, since the meeting, Lord Rothschild has consented to accept the presidency of the association.

In the current issue of the "Bath and West Journal" there is a most interesting article on "Simple Farm Accounts," by Mr. H. Trustram Eve, F.S.I., the new secretary of the Farmers' Club, and this has now been issued in cheap pamphlet form, and in this form it will doubtless secure the larger circulation it deserves.

Harvest Weather.

The "Mark Lane Express" Special Three-Day Forecast.

1 Essex Street, Strand, 12 Noon, Monday, July 10th, 1905.

GENERAL PREDICTION.

The general conditions are favouring seasonable warmth, with at first some spells of cloud and local rains, followed by more generally fresher and cooler westerly weather. At first some rain and thunderstorms, chiefly in the North, then local showers in many parts. Finally some showers chiefly in the West and North; fairer elsewhere. The wind, apart from local variations, will be chiefly S.W. to N.W. or W., and moderate to fresh. The temperature will be warm to cooler.

LOCAL PREDICTIONS.

No 1.—**Scotland**:—At first some scattered local showers, and thunder. Later fairer, finally some showers in the West. Wind S. to W. and S. to variable, and then S.W. to N.W.

„ 2.—**England (N.E.) and part of Scotland**:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire (N. & E. Ridings).—At first cloudy. Some local showers, then fairer. Wind S.W. to N.W., and then S. to W. moderate to fresh.

„ 3—**England (East)**:—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.—At first cloudy and mild, some local showers. Later fairer. Finally warm, with local rain and thunder to fairer and cooler. Wind S.W. to W. and S.

„ 4—**Midland Counties**:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford-Rutland, Shropshire, Stafford, Warwick, Worcestershire, York, shire (West Riding).—At first cloudy, warm to mild, some local showers. Later temporarily fairer. Then fair to cloudy and warm with local rain and thunder. Finally fairer and cooler.

No. 5.—**England (South)**:—Middlesex, Berkshire, Kent, Surrey, Sussex, Wiltshire, Channel Islands, Hampshire.—At first, cloudy, warm to mild; later, fair to cloudy and warm with some local showers to cooler; finally, fair to cloudy, warmer again; wind, S.W. to N.W., then S. to S.W.

„ 6.—**Ireland**.—At first, cloudy and showery in the West and North; moderate to fresh S.W. to W. winds; later, W. to S. winds; fair to cloudy; finally, some showers to fairer; temperature, mild to normal.

„ 7.—**England (North-West) and North Wales**. Cheshire, Lancashire, Westmoreland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.—At first cloudy to fairer, fresh W. to S.W. winds, and cooler; later S.W. to S. winds, fair to cloudy, some showers; finally S. to W. winds, fairer and mild.

„ 8.—**England (South-West) and South Wales**:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.—At first cloudy to fairer and cooler. Later fair to cloudy, warmer and local showers. Finally fairer.

Where the winds are not alluded to in the local predictions, they may be taken as similar to those given in the general prediction.

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Monday, July 10th

GENERAL INFERENCE.—The South-Eastern portion of England will probably remain under the influence of the anticyclonic system covering France. In the North and West shallow disturbances are likely to develop and give rise to close and unsettled weather, with thunderstorms in many places.

SCOTLAND, N. and E. and ENGLAND, N.E.—Light variable breezes, finally Westerly; cloudy and close, with thunderstorms locally.

ENGLAND, E., MIDLAND COUNTIES, and LONDON AND CHANNEL.—South-Westerly or Southerly breezes; fair or fine; very warm.

SCOTLAND, W.—Same as Scotland N. & E.

ENGLAND, N.W. (and N. Wales) and ENGLAND, S.W. (and S. Wales).—Southerly to South-Westerly winds; unsettled, fair intervals, with rain or thunderstorms locally.

IRELAND, N. and S.—Southerly to Westerly winds, moderate or light in force; cloudy or dull, rain at times.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat steady, quiet for English; supplies very limited. Foreign held at Monday's prices, but only in small request. South Russians quoted at 32s 6d to 36s 6d; No. 2 Club Calcutta, new crop, at 32s 9d; No. 2 Northern Manitoba, at 35s 6d; Australian, at 33s 6d. Flour firm, but quiet at unchanged prices; Hungarians quoted at 31s; Pillsbury's best at 30s 9d; Gilt Edged, 29s 6d. Maize rather firmer for mixed American; steady, unchanged, La Plata; mixed American quoted at 23s 9d ex ship, and 24s 6d landed; La Plata, at 24s ex ship, and 24s 9d landed. Barley: Sellers ask Monday's prices, but buyers are slow to follow; Odessa (Nico.) Kherson, ex ship, quoted at 20s 3d, and landed at 20s 9d. Oats: Slow trade at about Monday's prices.

Mark Lane, Friday.—Wheat: English, steady, quiet, unchanged prices; foreign slow, and 3d lower to sell, with only a very small demand; South Russians quoted at 32s 3d to 36s; No. 2 Club Calcutta, at 32s 6d; Red Kurrachee, at 30s 3d; No. 2 Northern Manitoba, at 35s 6d. Flour steady, at unchanged prices, with only a small retail business passing; Iron Dukes quoted at 20s 9d, ex ship, and 21s 3d landed; Pillsbury's best, at 30s 9d. Maize steady, quiet, at fully late rates. Mixed American quoted at 23s 9d ex ship, and 24s 6d landed; Plates, at 24s ship, and 24s 9d landed. Barley very firm, and occasionally 3d dearer. Odessa-Nico.-Kherson quoted at 21s landed. Oats dull, unchanged prices. Common sorts quoted at 14s 6d to 15s ex quay. Arrivals, July 1-6: Foreign wheat, 78,210 qr.; oats, 120,000 qr.; maize, 44,200 qr.; flour, 26,040 sacks.

COUNTRY.

Banbury, Thursday.—Wheat (red), 32s to 33s per qr.; barley, 30s to 32s per qr.; beans (new), 31s to 33s per qr.; oats, 22s to 24s per qr.; peas, 28s to 34s per qr.

Berwick, Saturday.—Small attendance, with little grain on offer. Prices all round unchanged.

Birmingham, Thursday.—A very poor market, the attendance being small and the general tone quiet. Sellers of foreign wheats were firm at late rates. No English wheat on the market. Grinding barley advanced 9d. per qr. on the week, sellers now asking 20s 6d. per qr. (400 lb.), for same at Sharpness. Plate maize 6d dearer at 24s 6d per 480 lb. at Bristol. Flat maize also 6d dearer at 24s 6d Bristol. English oats and beans unchanged.

Brighton, Thursday.—Barley, 28s to 33s; grinding ditto, 22s to 23s; English oats, 20s to 23s; peas, 29s to 30s; beans, 31s to 32s. Small attendance, and slow trade. Oats 3d to 6d dearer; grinding barley 1s 6d dearer. Wheat finished for the season.

Bristol, Thursday.—No English wheat offering at our market to-day. Foreign very firm at 6d. rise on the week. Maize 6d dearer. Barley 9d dearer. Oats unchanged. Flour, firm and unaltered.—GRACE BROTHERS. FEEDING

Bury St. Edmunds, Wednesday. — We had a poorly-attended market, even for the time of year, people being busy at home with the haysel. Wheat was in small supply, and met only a retail demand, at the full prices of last week—33s to 34s per qr. Feeding corns, although not in any large demand, were firm all round, grinding barley being 1s dearer, at 24s to 25s, and maize firm at 26s to 26s 6d per qr.

Cambridge, Saturday.—With perfect weather, and farmers busy with their hay, very little business is doing. The crops are making rapid progress. At this market there was a very small attendance and most limited trade. The few samples of wheat on offer made the full prices of last week, 32s to 34s per 504lb. Oats the turn against sellers.

Canterbury, Saturday.—A fair demand for feeding stuffs, but English supplies are practically exhausted. Oats, 20s to 22s; grey peas, 32s to 33s; tick beans, from 32s 6d to 34s 6d. English wheat tends rather higher, owing to scarcity, and 36s was paid to-day for a 63lb sample delivered.

Carlisle, Saturday.—Very few samples were forward, and the demand was quiet at 8s to 8s 6d per three imperial bushels.

Chelmsford, Friday.—Very little on offer, and trade very quiet. Best wheat made from 34s to 36s into the mills.

Chester, Saturday.—The market was of a very quiet character. English grain maintained full market rates, but the demand was quiet. Egyptian beans were 1s per sack dearer, while American maize was 3d per sack dearer. New white wheat, 4s 7d to 4s 9d per 75lb.; new grinding barley, 3s 3d to 3s 6d per 64lb.; beans, 5s 9d to 6s per 80lb; Egyptian beans, 33s 6d to 34s per 480lb; old oats, 3s 2d to 3s 4d; new ditto, 2s 9d to 2s 11d per 46lb.; old Egyptian corn, 10s 6d to 10s 9d; new ditto, 10s to 10s 6d per 240lb.

Chichester, Wednesday.—White wheat, 34s to 34s 6d; red ditto, 34s to 34s 6d; grinding barley, 21s; English oats, 20s to 22s; maize, 26s; flour, 27s to 29s 6d. Fair attendance, but very little doing, and practically nothing on offer. Barley was 1s dearer.

Colchester, Saturday.—Scarcely any grain offering to-day, prices unaltered. Hot forcing weather is bringing harvest on, and should it continue so it will be here sooner than seemed likely a fortnight ago.—JOSEPH WILES AND CO., LTD.

Coventry, Friday.—Attendance was small. Wheat in very small supply, and last week's prices were obtainable. Oats scarce and firm; other kinds unchanged. Quotations: Wheat, 12s 6d to 13s per 196 lb; barley, 29s to 32s per 448 lb.; oats, 22s to 25s per 352 lb.; beans, 12s 6d to 13s per 196 lb.; peas, 11s 6d to 14s per 196 lb.

Derby, Friday.—Scarcely any wheat offering, and prices very firm, without any alterations in value. Spring corn unchanged. Quotations: Wheat, white 34s to 35s, red 32s to 33s; malting barley, 23s to 24s; beans, 34s to 35s; oats, 22s to 25s.

Devizes, Thursday.—English corn of all descriptions still very scarce. The following were the quotations:—New wheat, 16s 6d to 17s 6d, secondary, 15s to 16s; best barley, 26s to 27s; secondary, 20s to 24s; rye, 22s to 24s; old black oats, 19s to 21s; white ditto, 19s to 22s; malting barley, 26s to 27s; beans, 16s to 18s; fine flour 24s to 26s, extra fine, 27s to 30s.

Dorchester, Saturday.—Very small attendance to-day, in consequence of Thursday's fair, and business of a trifling character. The market was again completely barren of home-grown wheat, of which there was not a sample offering; foreign on some cases brought rather more money. Barley, maize, and oats, from scarcity, brought extreme rates, and all other articles were up to old prices, though the business transacted was of the most trifling character through out.

Doncaster, Saturday.—Market very thinly attended, and supplies exceedingly small. English wheat was firm, and made 12s 3d per qr., and foreign has recovered from the decline of a few days ago. Maize showed a great degree of firmness, and was 1s per qr. dearer. Oats and beans were rather dearer.

Dublin, Friday.—Wheat, 18s to 20s; grinding barley, 11s to 12s; malting ditto, 18s 6d to 20s; oats, 11s to 14s; oatmeal, extra pinhead, 11s 6d to 13s; pollard and bran, 6s to 6s 6d.

Exeter, Friday.—Trade slow. English wheat scarce and somewhat dearer; foreign firm. Maize, 6d to 9d dearer; oats firm, but unchanged. Flour also firm. English wheat, 4s to 4s 3d; superfine flour, 24s to 28s; fine, 23s 6d to 26s.

Glasgow, Wednesday.—There was the usual attendance at our corn exchange. Wheat firm, and held for 3d advance, which checked sales. Flour quiet, but steady. Maize, barley, beans, pease, and oats firmly held at unaltered prices. Oatmeal the turn dearer.—GIBSON AND CLARK.

Glasgow, Friday.—Wheat a slow sale at nominally late rates. Flour quiet, without change in price. Mixed American maize dull at 13s 10½d to 14s per 280 lb. Oats steady, and held for previous rates. Feeding stuffs quiet at former figures.

Grantham, Saturday.—Farmers being busy in the hay field, the attendance was very small. The supply of corn was of a limited character, and what sales were effected were at recent rates.

Hereford, Wednesday.—The fine haymaking weather kept farmers away from market, and business in English grain was at a standstill. Maize was 6d per qr. dearer, and foreign grain and barley 1s to 1s 6d per qr. dearer. No quotable change in oats. Wholesale quotations: Wheat, 3s 10d to 4s per 62lb.; barley, 2s 9d to 4s per 53lb.; oats, 2s to 2s 6d per 40lb.; beans, 3s 6d to 3s 8d per 55½lb.; vetches, 4s 6d to 6s 6d per 65½lb.

Ipswich, Tuesday.—Wheat: With only a limited supply, the demand was firm, but chiefly from inland country mills, as there are other wheats of better value coming into the port; reds made from 33s 6d to 34s 6d per quarter. Oats firm at full prices—21s to 23s per quarter; Libau, 19s 6d to 20s; very fine, 20s 6d to 21s per 336lb. Grinding barley firmer at 1s advance; English screenings, 26s; Marianople, 24s to 24s 6d; fine screened, 26s per 448lb. Beans and peas and Indian corns firm all round. Maize firm at 25s to 25s 6d per quarter. Oil-cakes in quiet demand, but steady. Bran steady at £4 10s per ton.

Leeds, Tuesday.—We have had a week of favourable weather for the crops. Deteriorating crop accounts from America, combined with the serious news from Russia, have caused quite a flutter in the trade, and notwithstanding heavy shipments, wheat has met an improved demand, both speculative and consumptive, prices for Indans and Russians being advanced 6d to 9d per qr. on the week. Maize and beans 6d dearer. Oats unchanged. Flour has been advanced 1s per sack.—DUNNS AND CO.

Leeds, Friday.—Both English and foreign wheats fully maintained Tuesday's prices, with a further upward tendency for American, Russian, and Indian descriptions. Malting and feeding barleys the turn dearer; flour firm at the late advance. No change in beans, peas, oats, and other articles

Leicester, Saturday. — Limited supplies of home-grown wheats. Moderate attendance. Trade rather sluggish at steady rates. Red wheats, 33s to 34s; white wheats, 34s to 35s per 36 stones; beans steady; fine oats firm at 22s to 24s per 26 stones.

Lincoln, Friday.—Fair attendance at the Corn Exchange, but business on a limited scale. No English wheats came to hand; foreign a small show and slightly easier than at the beginning of the week. Oats quiet and unaltered. Beans firm at last week's quotations.

Liverpool, Friday.—Wheat: The market was moderately attended. Wheat only moved in moderate quantities, but ruled firm at last market day's full rates. Flour firmly held at unchanged prices, although the demand is not brisk. Maize: Mixed corn firm at fully ½d per cental advance, and Plate 1½d to 1¾d dearer than last Tuesday, but the advance checks the demand. Barley dull for brewing, whilst feeding is in fair demand at ½d per bushel advance. Beans firm, 3d dearer owing to great scarcity. Peas in moderate demand at 1d to 2d per cental advance. Oats steadily held at late rates, but the demand is only slow. Oatmeal in retail demand, but held firmly at recent figures. Oilcake firm in tone notwithstanding the very quiet trade.—SEGAR AND TUNNICLIFFE.

Manchester, Thursday.—English and foreign wheat were dearer. Flour sellers were very firm, and asked 5s 3d to 5s 4d; Plate, 5s 4d to 5s 5d per 100 lb. Oats —Foreign steady, and English ½d to 1d per bushel higher. Beans met with an advance. Peas were unchanged. Feeding stuffs easier. The market will be closed next Thursday.

Newark, Wednesday.—A small show of wheat at full prices of last week. Oats and beans unchanged in value. Quotations: Wheat, 32s to 34s; oats, 22s; beans, 33s to 34s per qr.

Norwich, Saturday.—Hardly any wheat on offer at our market to-day, with a firm trade at late rates. Glorious, fine weather continues, with high temperature. Wheat, red, 33s 6d to 34s per quarter, weight 63lb per bushel imperial. Corn inspector's return for the week ending July 3, 1905:—Wheat, 163, 32s 3d.—J. A. MILLS.

Newcastle-on-Tyne, Saturday.—A fair demand for wheat prevailed at our to-day's market, and holders were firm at last week's quotations. Maize advanced another 6d per quarter over last week's prices. Peas firm at late rates. Beans firmly held for 6d advance. A fair demand for oats of all descriptions at last week's prices. A limited demand for barley at unchanged prices.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—Small attendance, farmers being busy with the hay harvest, which is proving, much better than was at first thought. Corn, prospects, too, are much brighter than for several seasons, wheat and barley being particularly healthy and promising. Wheat, 31s to 33s; barley, 24s to 32s; oats, 19 to 22s; beans, 31s to 33s; peas, 28s to 33s; flour, 24s to 29s.

Nottingham, Saturday. Wheat: No English offering. Foreign held firmly. Both shop and grinding barley make full rates. Oats and beans in small supply, and held for previous values.—ROBT. HUBBLE.

Oxford, Saturday. There was a very poor attendance at to-day's market, but a fair business was done at steady rates. English wheat was not offered. Feeding stuffs met a fair demand at late rates.

Peterborough, Saturday. The two or three lots of wheat offering to-day were held for very full prices, but millers were not anxious buyers. Spring corn firm at late rates. Weather fine and warm. THOMAS HILL AND SON.

Plymouth, Thursday.—There was a fair attendance on our market, which was very firm. Wheat was 6d, barley 6d, maize 3d. dearer, while oats remained unaltered.—ORLANDO DAVIS AND CO.

Reading, Saturday.—Market very firm. Prices:—Wheat, 33s to 37s; grinding barley, 23s to 27s; oats, 20s to 23s; peas, 27s to 32s; beans, 32s to 35s.

Retford, Saturday.—Corn would have sold readily had the supply been adequate to the demand, but it was deficient, and the business passing was extremely limited. Prices were on the up grade at 32s to 33s per quarter. There was a scarcity of all kinds of grain for feeding purposes. Maize made 6d to 1s more money, round selling at 28s and flat 27s per 34 stones delivered here; black oats, 20s; white ditto, 21s per 24 stones; English beans, 31s to 32s per 38 stones.

Ripon, Thursday.—English wheat and round maize firm, and in some cases 6d. per qr. dearer. A fair attendance. English wheat, 33s to 33s 6d; foreign wheat, 32s to 35s; barley, grinding, 23s to 24s; oats, 20s to 21s; maize, round, 26s 6d to 27s 6d; maize, flat, 26s 6d to 27s 6d per qr.

Shrewsbury, Saturday.—Quotations:—Wheat, 14s to 14s 6d per 225lb; old white oats, 16s to 17s per 225lb; new white oats, 14s to 14s 6d per 225lb; peas, 11s 6d to 12s 6d.

Stamford, Friday.—Fair attendance. Wheats 32s 6d to 33s 6d, oats 22s to 24s, beans 32s to 34s, maize 23s 6d per qr.

Sunderland, Saturday.—Wheat held for the full prices of last week. Little doing in barley and oats. Arrivals:—Coastwise: Wheat, 700 quarters; foreign, nil.—E. AND F. RICHARDSON.

Tunbridge Wells, Friday.—White wheat, 33s 6d to 34s 6d; red ditto, 32s 6d to 33s 6d; barley, 27s to 32s; grinding ditto, 19s to 23s; English oats, 19s to 22s; rye, 23s to 24s; peas, 31s to 36s; beans, 32s to 36s; tares, 48s to 56s; maize 22s to 28s.

Warwick, Saturday.—The market was poorly attended. There was not a sample of wheat on offer. Very little other grain of any kind on offer; prices may be considered normal. Feeding stuffs in good demand all round at an increased rate.

Winchester, Saturday.—Supply of English wheat almost exhausted. Foreign generally 6d dearer on the week. Barley 1s and maize 3d per quarter advance. Oats unaltered.—Flour fair consumptive trade at late rates.—FEAR, COLEBROOK AND CO., LTD.

Wisbech, Saturday.—A poor attendance at market; little or nothing offering from farmers. Red wheat, 34s; oats, 20s 6d to 22s. No chance in other articles.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was only a moderate attendance, and but little business was transacted. Quotations: Wheat, 13s to 14s per 216lb; English beans, 13s 6d per 196lb.; oats, 13s 6d per 196lb.

Worksop, Wednesday.—Very poor attendance, and very little grain on offer. Wheat, white, 32s to 33s; red ditto, 31s to 32s; secondary barley, 26s to 28s; grinding barley, 24s to 26s. Oats made more money. White oats, 21s to 22s 6d; black oats, 20s to 21s; maize, 27s to 28s, an advance of about 1s; beans, 35s to 37s, 1s per qr. more than late rates.

Yeovil, Friday.—Foreign wheat, 33s 6d to 34s 6d; home-grown wheat of best quality, 31s to 33s; secondary, 28s 6d to 30s 6d; best barley, 26s to 30s; secondary, 22s 6d to 24s 6d; oats, white, 16s 6d to 22s 6d; black, 15s to 21s 6d; Irish, black, 17s 6d to 19s; round maize, 24s 6d; flat, 23s to 24s. Flour quiet, superfine realising 26s 6d to 28s; fine, 23s 6d to 26s. Meal and offal at last week's quotations.

York, Saturday.—Very small show of wheat and practically no business done. Wheat makes 31s 6d to 32s per qr. of 36 stones; oats, 19s 6d to 20s per qr. of 24 stones. Beans, peas, and maize firm; no alteration.

FOREIGN

Hamburg, Saturday.—With the exception of local storms, causing damage, the weather has been favourable for the growing crops. There is a great demand for maize, while all other articles remain at unaltered prices. Fine German wheat, Mecklenburg and Saale, is offering at 33s to 33s 6d per 504lb. f.o.b.; American hard winter No. 2 July-August shipment, 30s 6d; 80 Ko River Plate afloat, 30s 9d; Australian near at hand 31s 3d per 480lb. c.i.f. Hamburg. Rye quiet; the crop in this country promises a rich result; 9 15-20 South Russian on the spot and afloat is offering at 24s 9d to 25s per 480lb. c.i.f. Hamburg. Crop reports on malting barley continue favourable from the Saale, Silesia, Austria, and Hungary, rainy weather having benefited the crops in right time and it now requires a few weeks more of favourable weather to secure a rich harvest. Feeding barley is held at higher prices in the growing districts than offered by secondhand; 60-61 Ko South Russian afloat, 18s 9d; Danubian prompt, 19s; Russian and Danubian September-October, 17s to 17s 3d per 400lb. c.i.f. Hamburg. River Plate maize, which arrives in fine condition, is in brisk demand, spot parcels selling at 23s 6d to 23s 9d; floating at 23s per 480lb. c.i.f. Hamburg. For mixed maize, prompt shipment, 23s 3d to 23s 6d per 480lb. has been paid.—JOHN TATLOCK.

Paris, Wednesday.—At the Bourse de Commerce the market has been most feverish during the whole day, the numerous cases of laying reported from all quarters causing serious apprehensions among "shorts," who, owing to their pressing inquiries, caused the tone of the market to stiffen, and prices to advance from 20c. to 45c. for wheat, and from 20c. to 50c. for flour, according to dates of delivery, sellers remaining very reserved.

THE BALTIC.

Wheat cargoes are dull, but *nulla dies sine lined* is a market truth; rare, indeed, is the day on which there is no single line in the market liste recording sales. Since the 3rd sales have included sound Azima at 34s. 6d., Odessa Ghirka at 33s., Rosario at 30s., Bahia Blanca at 31s., Australian at 32s., No. 2 Calcutta Club at 32s. per qr. The Russian and Indian cargoes have weighed 492 lb., the others 480 lb. per qr.

Barley cargoes make 20s. per 400 lb. on passage, but 17s. 4½d. is accepted for September shipment of Russian new crop. Oats are rather out of favour, but a cargo of Vologda has fetched 15s. per 320 lb.

Maize has been quoted 23s. 9d. per 480 lb. for La Plata, and 23s. has been paid for American. Other cargo sales have included White Calcutta peas at 28s. 3d. per 504 lb., and Saida beans at 34s. per 480 lb.

Arrivals at ports-of-call, July 1 to 8-inclusive, were 6 wheat, 1 linseed, and 1 locust beans. The wheat was from Australia and Argentina exclusively. Since January 1 arrivals have been:—218 wheat cargoes, with 2 of flour; 23 of barley; 5 of maize; 5 of locust beans; 29 of linseed; 1 of beans; 1 of rye; and 1 of canaryseed.

Saturday.—Appleby: 9d to 11d; Berwick: 9d to 1s; Bridgnorth: 1s 1d to 1s 2d; Carlisle: 11d to 1s; Doncaster: 11d; Grantham: 1s to 1s 2d; Howden: 9d to 11d; Ipswich: 1s to 1s 2d; Lancaster: 10½d to 11½d; Malton: 9d to 10d; Pontefract: 11d to 1s; Retford: 1s 1d to 1s 2d; Richmond (Yorks): 10d to 1s; Shrewsbury: 1s; Skipton: 11d to 1s; Stokesley: 9 to 10d; Whitby: 9 to 10d; Worcester: 10d to 1s 2d; York: 1s to 1s 2d.

CHEESE.

Chester, Wednesday.—Farmers brought in 50 tons of new season's cheese, and with a good attendance of buyers, representing the large wholesale houses of the North and Midlands, the demand was brisk, and a clearance was made at the following quotations:—Fine Cheshire 48s to 55s; medium qualities, 42s to 47s; and common, 30s per cwt. and upwards.

Glasgow, Wednesday.—Arrivals were light this week, with demand still limited, especially for Cheddars. A few outstanding Dunlops commanded 1s above top prices. Trade generally holding up from buying till warm weather is over. Cheddars 46s to 48s, Dunlops 43s to 48s per cwt.

Newport, Wednesday.—Quotations:—Caerphillys, 35s to 43s per cwt.; fancy dairies, 44s to 45s; ordinaries, 30s to 33s; doubles, 40s to 42s; Derbys, 50s to 52s. A good supply, between ten and eleven tons, pitched. An average attendance, and a good demand.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter.—There is no change to be recorded this week in the Danish position, but values of French have advanced about 4s per cwt., notwithstanding the increased supplies from that country. Cheese: The demand for Canadian continues of sluggish, and values have advanced 1s per cwt. on the week.—W. WEDDEL AND CO.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The first half of 1905 had a rainfall of 12.59 inches, against a decennial average of 25.02 for a whole year. The large falls of March and June balanced very dry periods in January, February, and May. The sunshine of the half year, 690 hours, against a decennial average of 1.226 hours for a whole year, shows a gratifying excess; but the temperature of the half year, which is 47.5 degrees, is rather below the average. July is doing its best, happily, to remedy this. Our record of the six months is :—

1905.	Rainfall. Inches.	Sunshine. Hours.	Warmth. Degrees.
January	1.08	45	36.0
February ..	0.70	61	42.5
March	3.70	108	48.0
April	1.80	90	47.5
May	0.81	215	52.0
June	4.50	171	59.0

The weather since July came in has left little to be desired. All the cereals have blossomed and gone through the fertilising period under highly favourable circumstances, and there has also been a good and robust growth of straw since the June rains. It is feared by some that this year's crops may be easily laid by storms, but the wheat plant, at all events, strikes us as particularly strong in stem and stalk.

Foreign crop news is in the main favourable. Grotesque reports of an approaching famine in Russia have escaped editorial blue pencils in the leading dailies, but Russia has every prospect of fair to full yields per acre this season, and will doubtless be a liberal *exporter* if only the social disturbances permit trade to take place. The corn markets, happily, have long since become aware that Russian advices of crops and commerce are nearly always, if not political inventions, at all events, politically influenced. The Russian Statistical Bureau is of high repute for accuracy, and its publications, almost alone among documents from Russia, command the general assent of the statistical and commercial world.

The new crops in Persia show very good quality, some of the barley weighs 424 lb. and has steeping and distilling value. The supplies of wheat, barley, and dari from Persia cannot be large, but they are likely to meet with more than customary favour.

London grain stocks as returned since the new century came in have been as follows, the unit being a thousand quarters in the cases of wheat, barley, oats, and maize, a thousand sacks in that of flour. It will be seen that present wheat stores are the smallest since April, 1904, and that those of barley and maize are below the average; of oats and flour we hold rather more than had been anticipated. American flour has been held with some persistency above buyers' ideas, and now the summer has to be faced with more in warehouse than the trade supposed. There are also larger holdings than anticipated of La Plata, of Australian, and of French flour. Sorts which are really scarce are Hungarian, Californian, and the finest North-Western patents. Since July 1, and therefore not included in official returns, 4,173 sacks of flour have arrived from Canada. The produce of Canadian mills is favoured by London bakers for its excellent strength and fine bread-making capacity.

July 1, 1905	117	87	331	30	337

Fifteen leading ports hold 1,342,000 qr. of wheat, against 1,538,000 qr. in the same ports a year ago. Liverpool holds exactly 300,000 qr. of wheat, as compared with 420,000 qr. at this time last year.

The sales of British wheat since harvest at 190 statute markets have been small, but the price realised, without being really high, has not been unsatisfactory :—

This season, 1,586,000 qrs. at 30s. 7d. per qr.
Last season, 1,375,000 qrs. at 27s. 1d. per qr.

Sales of British barley have been liberal, but the trade was done comparatively early in the season, and latterly so little has been offered that averages have been unsteady :—

This season, 3,132,000 qrs. at 24s. 10d. per qr.
Last season, 2,771,000 qrs. at 22s. 3d. per qr.

Of British oats, the sales at the markets never bear any very large proportion to the total crop yield. Returns are as follows :—

This season, 1,121,000 qrs. at 16s. 11d. per qr.
Last season, 2,771,000 qrs. at 22s. 3d. per qr.

The imports of the United Kingdom last week were as follows :—

Wheat, 427,000 qrs.; a large supply.
Flour, 45,600 qrs.; an extremely small suuply.
Barley, 41,000 qrs.; a third of an average.
Oats, 215,000 qrs.; a very large importation.
Maize, 162,000 qrs.; less than usual.

The sales of foreign breadstuffs since harvest have been :—

Wheat	20,085,000 qrs.
Flour	3,214,000 qrs.
Total	23,299,000 qrs.

London averages for wheat are as follows :—January, 31s.; February, 31s. 10d.; March, 32s. 1d.; April, 30s. 11d.; May, 31s. 10d.; and June 32s. 3d.; the advance of 6d. on the month is satisfactory.

London averages for oats are as follows :—January, 17s. 6d.; February, 17s. 10d.; March, 17s. 10d.; April, 18s. 7d.; May, 19s. 6d.; and June, 20s. 2d. When the average is over a sovereign London attracts a choice of samples.

No average for English barley has been published in London since the end of May, but at least a thousand quarters have been sold since then. We must assume that the transactions have been put through in private offices, and not in Mark Lane.

London arrivals of grain have been as follows :—

January ..	255,000 ..	96,000 ..	224,000
February ..	284,000 ..	138,000 ..	311,000
March	345,000 ..	34,000 ..	251,000
April	401,000 ..	30,000 ..	272,000
May	299,000 ..	105,000 ..	363,000
June	285,000 ..	28,000 ..	328,000

The supplies on passage are as follows :—

Wheat	2,780,000 qrs.
Flour	132,000 sks.
Barley	200,000 qrs.
Oats	270,000 qrs.
Maize	965,000 qrs.
Rice	30,000 tons.
Linseed	240,000 qrs.
Cottonseed	21,500 tons.
Beans	5,000 qrs.
Peas	7,000 qrs.

Of these totals, wheat, oats, maize, and linseed exceed an average, while there is a marked deficiency in flour, barley, beans, and peas.

American shipments last week were 40,000 qr. of wheat, 9,000 qr. of barley, 17,000 qr. of oats, 157,000 qr. of maize, and 40,000 sacks of flour. Russia shipped 585,000 qr. of wheat, 187,000 qr. of barley, 319,000 qr. of oats, and 10,000 qr. of maize. The exports of Roumania were 160,000 qr. of wheat, and 12,000 qr. of barley. India sent off 100,000 qr. of wheat and 45,000 qr. of linseed; while 46,000 qr. of wheat were exported from Australia. The Argentine Republic continues to be a free shipper, sending off from July 1 to 8 232,000 qr. of wheat, 315,000 qr. of maize, and 27,000 qr. of linseed.

HAY AND STRAW.

Manchester, Friday.—Clover, old 5½d to 6d, new 5½d; straw (oat), 3½d to 4d per stone.

MANURES.

Liverpool, Friday.—Nitrate of soda is easier at £10 10s to £10 15s, per ton, but there is practically no demand for fertilisers, and, as regards feeding stuffs, they are in small consumptive request, yet the market is firm owing to the English crushers shutting down their mills and the limited supplies of foreign on offer. Nitrate of soda, best quality, i.e., guaranteed 95 per cent. pure, in bags, £10 10s to £10 15s; East India bone meal, in bags £5 7s 6d to £5 10s; kainit, prime 23 per cent., sulphate of potash, in bags, £2 2s 6d to £2 5s; linseed cake, American thin oblong, prime, in bags, £7 10s; ditto, English, prime, in bulk, £7 18s 9d to £8 7s 6d; ditto foreign round, prime, in bags, £7 17s 6d to £8; cottonseed cake, N.A. decorticated, prime, new, in bags, £6 17s 6d to £7 2s 6d; ditto, English decorticated, prime, new (soft), in bags, £7 5s to £7 7s 6d; ditto, English undecorticated, prime, in bulk, £4 7s 6d to £4 12s 6d; ditto (crushed), 20 to 25 per cent. oil guaranteed, prime, in bags, £6 17s 6d to £7; maize germ meal, prime, in bags, £5 7s 6d to £5 10s; corn oil cake, 10 to 13 per cent. oil, prime, in bags, £5 17s 6d to £6; rice meal, Rangoon, as imported, in bags, £4 17s 6d to £5 15s—per ton. Indian meal, coarse to fine grinding, prime, in bulk, 13s per 240lb; linseed, fine boild feeding, in bags, £2 7s 6d to £2 10s per quarter (416lb); cod liver oil, cattle feeding, prime, in casks, 4s 6d per gallon; treacle, feeding prime, in barrels, 4s 4½d to 4s 6d per cwt.; D.N.S. superphosphate of lime, guaranteed 25 to 27 sol., in bags; ditto, guaranteed 30 to 34 sol., in bags; superphosphate of lime, guaranteed 35 to 36 sol., in bags; basic slag, prime quality, guaranteed 30 to 35 per cent. phos., in bags; basic slag, prime quality guaranteed 38 to 45 phos., in bags; basic slag, finest quality, guaranteed 42 to 50 phos., in bags, nominal.

TO-DAY'S MARKETS.

MARK LANE, MONDAY, July 10.

[FIRST REPORT.]

English wheat to-day sold steadily at 34s. for good red and 35s. for fine white; even chicken wheat was held for 31s. Foreign was firm for all sorts, but very dull, business being small, even for July. Maize was in fair retail request, both yellow and flat kinds going steadily into use at subjoined prices of our quotation list. Barley was 6d. to 9d. dearer for Russian, but other sorts were quiet and without price change. Oats were quiet, 16s. 6d. paid for good 320 lb. Courland samples, 15s. for 320 lb. North Russian, and 13s. 6d. for 304 lb. White Sea oats. Beans advanced 1s. per qr. for all foreign sorts, English being firm, but not quotably dearer. Peas were quoted the same as on the 3rd inst. Linseed advanced 6d. per qr. for Indian and Argentine. Sowing rapeseed, useful for catch crops, made 50s. to 56s. per qr. Fine rolled oats, sent round from Edinburgh, made 14s. per cwt. Malt, fresh up from Norfolk, realised 32s. to 35s. per qr. of 336 lb.

CLOSE OF THE MARKET.

THE CLOSE. HOT WEATHER WAS AGAINST TRADE, AND BREADSTUFFS CLOSED VERY DULL; MAIZE AND RUSSIAN BARLEY WERE VERY FIRM, DESPITE THE PREVAILING LETHARGY.

THE FLOUR TRADE.

MARK LANE, MONDAY, July 10.

London Town Whites and Town Households are now 6d. cheaper from the close of June, the weather having told steadily against inquiry, and stocks of foreign flour proving heavier than the trade had supposed. Country, despite a good supply, is perfectly steady in price. Bakers are consistently free buyers of this sort this season. Australasian is steady at 23s to 23s 6d landed. Fine American is held above buyers' notions, but there is some sale of first bakers' grades at a guinea cash. Bran and pollard are still tending to rise in price, but arrivals of foreign middlings have checked advance in that section of the offal trade. Linseed and cottonseed cakes are held for 2s. 6d. per ton advance. Rice meal and oat meal are unchanged.

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club, St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Saturday at the close of the week's trade were :—

WHEAT (per cental).

No. 1 American	7s. 2d.	July delivery.
No. 2 Red Winter	6s. 11d.	" "
" "	6s. 10d.	Sept. "
" "	6s. 10d.	Dec. "

MAIZE (per cental).

American	5s. 0d.	July delivery.
"	4s. 11d.	Aug. "
"	4s. 10d.	Sept. "
"	4s. 9d.	Oct. "

These are not official prices, but will, we believe, be found practically correct. Official quotations, we hear, are likely to be resumed very shortly.

Maize futures showed a decided improvement, but wheat was substantially unchanged.

There are buyers of American new crop wheat for early autumn shipment this morning at 6s. 10d. per cental, but holders stand out for 6s. 11d., thereby stopping business. Maize is rather excited for near delivery, 5s. 11d. being paid. But 4s. 11d. is accepted for remoter futures.

GRAIN AND FLOUR FACTORS REPORT.

Offals.—Bran continues dull; tendency of prices in favour of buyers. Flour.—Prices unchanged, with a moderate demand.—GRLENSHILL BROS. (Belfast).

Flour is held for 6d. per sack advance, with more business passing. Grain.—Indian corn quiet at 1½d. per boll decline. Oats are in good supply, the demand is fair, with prices about unchanged. Barley and pease firm. Beans in retail demand at unchanged prices. Mill Stuffs.—There is no change in bran, but thirds, especially fine, are in active demand.—MCKINNON AND MCDONALD (Glasgow).

Flour has met a quiet demand to-day at late rates.—T. S. MEDILL AND SONS, LTD.

Milling offals are unchanged in value from last week, with a fair demand for middlings.—JOHN BAWCOMB AND CO.

We have liberal arrivals of wheat. Trade is steady, and prices are unchanged except for Indians, which are 6d. per qr. lower. Flour unchanged in value. Maize 3d. per qr. dearer. Barley and oats unchanged in value.—COVENTRY AND CO.

FEEDING STUFFS.

London, Monday.—Linseed cake: Trade is just as quiet as last week, but with the advance in linseed, 2s 6d more money is asked for London made. Foreign makes, both spot and forward, are very firm. Cotton cake (undecorticated): Quiet and unchanged. Decorticated cotton cake and meal: Some good sales are reported during last week and prices again 2s 6d dearer. Linseed: Market 1s to 1s 6d up and firm.

ROBERT AND JOHN HEWETSON.

THE BALTIC, 1 p.m.

STATE OF TRADE.

Wheat cargoes this morning open with a very quiet trade. America is very reserved, but India offers more freely than expected. Maize has taken a firmer turn, but oats are depressed. Linseed cargoes are held for a slight advance.

BUSINESS DONE.

WHEAT.—White Calcutta, 32s 6d per 492lb. on passage; red Calcutta, 31s 6d per 492lb. on passage; white Delhi, 32s 6d per 492lb. on passage; white Kurrachee, 32s per 492lb. on passage; white Kurrachee, 31s 6d per 492lb. prompt shipment; white Kurrachee, 31s per 492lb. August shipment; Santa Fe, 31s per 480lb. on passage; Barletta, 30s 9d per 480lb. on passage; Roumania, 30s per 492lb. new crop, September shipment; No. 3 Northern Manitoba, 32s per 480lb. prompt shopment.

BARLEY.—Odessa, 20s per 400lb prompt shipment; Odessa, 17s per 400lb. new crop, September shipment; Persian, 18s per 400lb. new crop, prompt shipment; Californian, 24s per 448lb. new crop, September shipment.

OATS.—Viatka, 14s 3d per 304lb. prompt shipment.

MAIZE.—Argentine, 23s 9d per 480lb. nearly due; American, 23s 3d per 480lb; nearly due; American, 23s per 480lb, just sailed.

LINSEED.—Argentine, 40s 6d per 416lb, arrived; Calcutta, 41s 6d per 480lb, arrived; Bombay, 42s per 416lb, August shipment.

POPPYSEED.—Calcutta, 40s 1½d per 377lb, July shipment; Bombay, 40s 6d per 337lb, July shipment.

COTTONSEED.—Egyptian, 6s per 112lb July shipment.

POTATOES.

Borough, Saturday.—Good supplies of new qualities were forthcoming, and the demand proved of a fair character. Old potatoes, 60s to 70s per ton. New: Jersey, 5s 6d to 6s; St. Malo, 5s to 5s 6d; Cherbourg, 5s; and Teneriffe, 7s to 8s per cwt.

Goole, Wednesday.—There was a small attendance. In the retail market new potatoes were making 1d to 1½d per lb. but no old ones were on offer.

Spitalfields, Saturday.—New descriptions are arriving in larger quantities, and meet a generally fair demand. Scottish Maincrops, 70s to 75s; and Up-to-Dates, 65s to 70s per ton. New: English, 5s 6d to 6s; Canary, 10s; Jersey, 6s to 6s 6d; St. Malo, 5s to 5s 6d; Cherbourg, 5s to 5s 6d per cwt.; Lisbon, 4s per box.

HOPS.

London, Monday.—W. H. and H. Le May, 67, Borough High Street, London, report:—The market must be quoted weak in consequence of favourable report from the plantations. There has been again a great falling off in the imports, and an increase in the exports during the past month. The imports of hops from January 1 to June 30, 1905, were, 32,286 cwts., less foreign hops reshipped for same period, 6,102 cwts.—Total, 26,184 cwts. The imports of hops for the same period last year were, 95,776 cwts., less foreign hops reshipped, 2,660 cwts.—Total, 93,116 cwts. The exports of British and foreign hops for the month of June, 1905, were, 1,849 cwts.; for the corresponding period last year, 614 cwts.

CATTLE.

Metropolitan Market, Islington.

Monday, Jul[illegible] 1905. Monday, July [illegible], 1904.

	British.	Total.	British.	Total.
Beasts	[illegible]	[illegible]	[illegible]	[illegible]
Sheep and Lambs	[illegible]	[illegible]	[illegible]	[illegible]
Calves	[illegible]	[illegible]	[illegible]	[illegible]
Milch Cows	[illegible]	[illegible]	[illegible]	[illegible]

Quotations per 8 lbs. (sinking the offal) :—

ENGLISH.

	Inferior.	Second	First
Beasts	3s 0d	3[illegible]	4[illegible]
Sheep	4s 2d	5s 0d	6s 4d
Lambs	5s 4d	[illegible]	6s 4d

Milch cows, per head, £16 to £21.

British arrivals included as follows: Scotland [illegible] Western Counties, 88; Midland, Home, and Western Counties, 64; Devon, 15; Ireland, 104.

We note to-day a decrease of 210 head in the number of beasts offered for sale to-day, compared with Monday last, the majority of the supply being drawn from the Midland Counties. The Irish consignments consisted of Dublin Shorthorns and Waterfords (no store cattle being on offer). The former cleared at good money. Trade for Irish cattle of both prime and second quality was of a slow nature, nevertheless late rates governed all transactions. There was a good demand by both town and country buyers for fat butchering cows and bulls, consequently late rates were well maintained.

The following are top quotations per 8 lbs. (sinking the offal):—

	To-day.	Monday, July 11, 1904.
Scotch	4s 6d to 4s 8d	—
Devons	—	4s 8d to 4s 10d
Herefords	4s 6d to 4s 8d	4s 6d to 4s 8d
Norfolks	4s 4d to 4s 6d	4s 2d to 4s 4d
Runts	4s 4d to 4s 6d	4s 2d to 4s 4d
Lincolns	3s 10d to 4s 0d	4s 0d to 4s 2d
Irish	4s 0d to 4s 3d	4s 0d to 4s 2d
Fat Cows	3s 6d ex 3s 8d	3s 6d to 3s 8d

There was a decrease of 1,190 in the number of sheep and lambs penned compared with Monday last. Trade for both wethers and ewes was of a firm and steady nature at an advance of 2d. per 8lbs in value. The Irish season being now fairly well established trade ruled firm, an early clearance being made. Both Scotch and Yorkshire sheep shared in the generally better trade experienced and the rise in value. English lambs being slightly in excess of the demand favoured the buyer to the extent of 2d. per 8lbs. on last Thursday's rates. A clearance will be made in this part of the market.

Undermentioned quotations are at per 8 lbs. (sinking the offal), and are for the best of each class penned :—

	To-day.	Monday, July 11, 1904.
7½ to 8 st Scotch	5s 8d to 5s 10d	—
7½ to 8 st Downs	5s 8d ex 5s 10d	5s 4d to 5s 6d
9 st Downs	5s 4d to 5s 6d	5s 2d to 5s 4d
10 st Half-breds	5s 2d to 5s 4d	5s 0d to 5s 2d
10 st Yorkshires	4s 6d to 4s 8d	—
12 st Lincolns	4s 6d to 4s 8d	4s 6d to 4s 8d
9 st Irish	5s 2d to 5s 4d	5s 2d to 5s 4d
10 st Down Ewes	4s 2d to 4s 4d	4s 0d to 4s 2d
11 st Half-bred ditto	3s 10d to 4s 0d	3s 10d to 4s 0d
5 st Down Lambs	6s 4d to 6s 6d	6s 6d to 6s 8d
6st Half-bred Lambs	6s 0d to 6s 2d	6s 0d to 6s 2d

Calf trade not worth noting or quoting.

No pigs on the market.

London (Central), Monday.—Fair supplies; trade quiet. Beef: Scotch, 4s to 4s 8d; English, 3s 10d to 3s 11d; American, 3s 5d to 3s 9d. Mutton: Scotch, wethers, 4s 6d to 5s 8d; ewes, 3s 6d to 3s 10d; English, wethers, 4s 6d to 5s; ewes, 3s 4d to 3s 8d; New Zealand, 2s 5d to 3s. English lamb, 5s to 6s 4d; New Zealand, 3s 6d to 3s 10d. Veal, 2s 8d to 4s 4d. Pork, 3s 8d to 4s 2d.

St. Ives (Hunts), Monday.—Beasts, 272; sheep and lambs, 2,260; pigs, 70. Beef, 7s to 7s 6d; mutton, 7s 7d to 9s 4d; lamb, 8s to 10s; pork, 5s 9d to 6s 6d; fat and store cattle, sheep and pigs fair demand; milch cows short supply, fair demand; prices £14 to £22.

FOREIGN.

Deptford, Monday.—Beasts, 747.—To-day's supply of beasts, compared with Monday last, showed an increase of 71 head, and consisted of 642 from the United States and 105 from Canada. Trade was of a much slower nature, at a decline in value. The best States on offer to dress about 720 lb., made from 4s to 4s 2d; seconds, 3s 10d; Canadians, 3s 10 to 4s; seconds, 3s 8d to 3s 10d per 8 lb. (sinking the offal). On Saturday, 1,026 beasts from the United States and 150 from Canada were offered for sale, and, with a firm and steady trade, were quoted at from 4s 1d to 4s 3d for the former, and from 3s 11d to 4s 1d for the latter. Besides the above, 350 more were withheld for Monday.

Liverpool, Monday.—Demand good for cattle, and prices rather better than last week. Sheep trade slow, heavy sorts in particular being difficult to sell, except at much lower prices. Handy weights, however, were not quotably lower. Lambs, good selling trade; top quotations more general. Beef, 6½d to 5d; mutton, 8½d to 6d; lamb, 9d to 8d per lb. At market, 711 cattle and 10,015 sheep.

SEEDS.

London, Monday.—With good prospects in general for the growing crops there is an entire absence of speculation; business is consequently at the standstill usual at this time of the year. There is an increasing inquiry for rape and mustard; prices unchanged.

PROVISIONS.

London, Monday.—Bacon: The [illegible] last week were From Ireland, 1,855 bales; and from foreign ports, [illegible]. The bacon market was steadier last week, [illegible] parcels of bacon being cleared. Prices ranging: Irish, 56s to 56s up to 71s; Danish, 50s to 56s up to 64s; Canadian, 48s to 51s up to 56s. Butter: The butter market was firm and dearer—French, 94s to 104s up to 105s; Danish, 109s to 112s; Russian, 88s to 98s; Irish, 91s to 106s; Canadian, 96s to 104s; Colonials, 96s to [illegible]; Argentine, 86s to 100s. Lard: The lard market was quiet; Irish, 34s to 50s; Danish, 46s to 48s; American, 34s 6d to 36s 6d.

WOOL.

Whitechapel, Saturday.—A small [illegible] offer experienced a brisk demand at [illegible] quotations. Best clover, 75s to 82s 6d; inferior ditto, 60s to 70s; specially picked hay, 85s; good [illegible] 65s to 75s; inferior ditto, 45s to 60s; mixture and sainfoin, 60s to 75s; straw, 35s to 42s per load.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

At Islington, on the chief market day of the week, namely, Monday, trade was of a decidedly slower nature, rates ruling in favour of the buyer in some cases to the extent of from 1d. to 2d. per 8 lb., notwithstanding a decrease in the number offered for sale. The majority of the supply was drawn from the Midlands, consisting of grass-fed Herefords and Runts. A few Scotch cattle cleared early in the day, and commanded our top quotation. Irish were in full supply, and consisted of 85 Dublins (out of which were 10 Black Polled beasts), 26 Waterfords, and 28 store cattle; these latter, owing to their meeting with no enquiry, were quite unquotable. Fat buchering cows and bulls were in fair average number, and met with a slow but firm trade, late currencies governing all transactions. On Thursday the supply consisted chiefly of fat butchering cows and rough cattle, trade for which was slow, nevertheless late rates were fairly well maintained. Trade throughout the week at Deptford was firm, prices being well upheld, with the exception of Wednesday. The total number of beasts offered for sale on both market days was 4,301, as against 4,513 during the previous week. The supply consisted of 1,100 British (decrease 110) and 3,201 foreign (decrease 102), these latter comprising 2,603 from the United States and 598 from Canada. The following were the top rates paid per 8 lb. (sinking the offal):—80 to 90 stone Scotch 4s. 8d. to 4s. 10d., 80 to 90 stone Black Polled Dublins 4s. 4d. to 4s. 6d., 90 to 95 stone Herefords 4s. 8d., 95 stone Runts 4s. 4d. to 4s. 6d., 90 stone Norfolks 4s. 2d. to 4s. 4d., 100 stone Shorthorns 3s. 10d. to 4s., 95 stone Irish 4s. to 4s. 3d., 90 stone States 4s. 1d. to 4s. 3d., 95 stone Canadians 3s. 11d. to 4s. 1d., 90 stone fat cows 3s. 8d. The sheep trade at Islington on both market days was of a slow but steady nature, rates being well upheld; ewes, on the other hand met with very little enquiry, consequently 2d. less money had to be accepted to effect sales. Both Scotch and Yorkshire descriptions sold at late currencies. The lamb trade on the first market day of the week was of a fairly steady nature; on Thursday there was a short supply, anything small and choice finding ready purchasers at an advance in value of from 2d. to 4d. per 8 lb. No sheep on offer at Deptford. The total number penned was 5,670, as against 12,340 during the previous week, showing a decrease of 6,670. Best pens made, per 8 lb., as follows:—7½ to 8 stone Downs 5s. 4d. to 5s. 6d., 7 to 8 stone Scotch 5s. 6d. to 5s. 8d., 9 stone Downs 5s. 4d., 10 stone Downs 5s. 2d., 10 stone halfbreds 5s. to 5s. 2d., ewes 3s. 10d. to 4s., 12 stone Lincolns 4s. 6d., 9 stone Yorkshires 4s. 6d., 5 stone fat Down lambs 6s. 4d., 6 stone halfbred ditto 5s. 8d. to 5s. 10d. (offal given in).

Calves numbered 100, and met with a slow trade on both market days, the best being quoted at from 5s. to 5s. 2d. per 8 lb.

Trade in Scotland.

The number of fat cattle on offer this week has been rather less. For good quality, nice weighted, cattle, a better trade has been experienced at an advance of 10s. per head, heavy weighted bullocks being without change. Sheep have been shown in moderate numbers. These have met a fair trade at rather better prices than last week. No advance can, however, be quoted in the price of heavy-weighted ewes. A good supply of lambs on offer and everything of nice quality made rather more money. Calves not quite so plentiful, and prices were unchanged. A smaller show of pigs, and they met a worse inquiry at rather lower prices. There was a moderate supply of store cattle. These met a very dragging trade, and a considerable number were left unsold. Sheep also in short supply, and a clearance was effected without change in price. Milch cows a fair show, and a rather better trade was experienced at slightly higher prices. Quotations: top price of best cattle per five cwt., 38s. 9d.; current from 35s. to 36s. 6d.; mutton to 8¼d. per lb.—John Swan and Sons, Limited.

Trade in Ireland.

There was a small decrease in the supplies of both cattle and sheep at last Thursday's Dublin market, and, with a larger company of shippers and a good attendance of home buyers, trade was firmer than the previous week, though it could not be said that there was any quotable advance in prices. The better inquiry was mainly due to the Manchester men, and to the stocks of Scotch and English beasts being pretty well exhausted, so that Irish grass-fed beef is now coming in for its turn, and it is expected that for the future it will meet with a good sale, as being preferred by the English Eastern Counties' buyers. There was an early clearance in anything good in the way of bullocks and heifers, prime ox and heifer beef making from 52s. 6d. to 55s., and extra up to 56s. and 58s. per cwt.; good second quality, from 46s. to 50s.; and other sorts, from 44s. to 45s. per cwt. Good dairy-fed cows met with a better demand, but it was difficult to find buyers for the rougher kinds. The trade for sheep showed no improvement on the previous market. There were very few really prime wethers on offer, and these went off steadily, but the buying for export hoggets was very slow and dragging. Heavy and coarse sheep met with very dull sale, and a number of pens were left over unsold at the close of the day. Prime wether mutton was worth from 7d. to 7½d. per lb., ewe from 6d. to 7d., and inferior from 5d. per lb. Hoggets sold from 32s. for small, light, up to 56s. each for large, heavy. The demand for lambs was fairly brisk for those in good condition, which sold at from 35s. to 40s. each, but small, thin lambs were quite neglected. On the whole, however, the lamb market ruled in favour of sellers. Veal of prime quality made from 7d. to 7½d. per lb. readily, but inferior was difficult to move at from 5d. upwards.

Milch cows were in rather small supply, but quite equal to the demand, which was weak for all classes. The best springers were worth from £18 to £21 each, while other sorts could be bought from £8 to £17. Rain not having come so generally, or in such quantity, as to improve the pastures, graziers complain of the shortness of the grass throughout the country, and the store cattle trade suffers in consequence. At the Dublin market on Thursday only a few calves and stirks were offered for sale, but there was little demand for them. Messrs. Ganly, Sons, and Co. had a sale of 600 head, which were all sold at fairly satisfactory prices. At the Dublin Pig Market last Thursday there was a good supply of fat swine and a fair attendance of home buyers and shippers. Owing to cheaper English markets, the latter bid lower prices than last day, and, their lead being followed by home buyers, values underwent an all-round fall of from 1s. to 2s. per cwt., but a good clearance was effected. Choice light-weight pigs made from 49s. to 50s., and some fancy lots up to 52s. per cwt.; heavy pigs 45s. to 49s., and coarse from 30s. per cwt. upwards.

Wool has been selling, for the last month, at higher rates than across Channel, but buyers here have now reduced prices accordingly. Ordinary mixed wools sell at 12d. to 13d., and Shrop. and Down wool 13d. to 13½d. per lb.

Trade in the West.

With keep again fairly plentiful everywhere, there have been only very moderate deliveries of store cattle at most of the markets, but sheep have been much more plentifully offered. There has been a very restricted inquiry for cattle, only the most useful descriptions being wanted, and for these there has been a fair trade at prices once again approximating the old level, from £28 to £32 having been made at several of the principal centres for really good grazing beasts, ranging down to £22 for animals showing promise; but for poor quality beasts there has been practically no sale, in spite of the fact that many pasture fields, which have already been cleared now, offer far more abundant keep than is often the case, so soon after the first crop being cleared. Consequently, it is more a question of money than of keep that is now influencing trade. Business in the milch beast line is even more stagnated, except for the very best, which is the only class at all saleable at anything like a price, which only in very rare cases bring over £21 apiece, a more general average for the very best type of either heifers or cows with calves being from £16 to £20; secondary heifers, and anything showing age in cows being a very dragging business all through at widely varying prices, some making as much as £15 apiece, and anything very rough as low as £10. The inquiry for two and three-year-old heifers continues unabated, with prices still hardening, the more forward lots bringing as much as £15 to £16 apiece in extreme cases, though the more ordinary runs may be more accurately quoted as making from £10 10s. to £14 10s. apiece, and everything offering is eagerly caught up on terms given, whilst older, but still useful, dairy beasts are much neglected, if not altogether overlooked. Sheep are meeting a very good sale indeed, and, though some flock-masters in view of the favourable season and the general shortage that exists expected to make rather more money, still, with the prices now ruling, especially by those realised at Dorchester Fair on Thursday, the trade cannot by any means be considered unsatisfactory when ewes make, for good useful drafts, from 47s. to 55s. or 56s. apiece, and from 43s. to 46s. for secondary descriptions—all, however, being suitable for flock purposes. Good grazing ewes are also selling very well at from 34s. to 40s. apiece, and, with the improved keep prospects—both for grass and roots—this class of sheep, with the season continuing favourable, will possibly be dearer rather than cheaper at no very distant date, though, of course, a good deal will depend upon how the roots turn out later on. Lambs were exceptionally dear at Dorchester, making from 28s. to 38s. 6d. apiece; and wether sheep were almost dearer than anything else, making 48s. to 51s. At present, however, the prospect for store sheep is distinctly promising. The trade all round at Dorchester showed a marked improvement, a rise of from 1s. to 2s. a head being realised on all classes of sheep. The whole of the 13,000 or 14,000 sheep and lambs penned were bought up with the greatest avidity, keener competition not having been experienced for a very long time past. Store pigs still keep at their full value, and heifer calves are as difficult to obtain as ever.

Fat bullocks of a good type, grass-fed steers, and heifers, about maintained their value, but that is all, and it is only the very neatest weights that make 11s. per score and over. Secondary qualities sell anything but freely at 9s. 6d. to 10s. 3d.; whilst heavy weights and coarse contract bullocks are a great drug on the market at as low a figure as 7s. 6d. to 8s. 6d. per score. The beef trade is all the more disappointing in the face of the comparatively limited number of really prime beasts at present offering, the great bulk consisting of animals of very questionable quality. But the hot weather is no doubt the most adverse factor that has to be reckoned with; and this is affecting the calf trade, even more so than the beef, for coarse weights and vealers—those selling from £5 to £6 apiece ad over—have dropped back to 7d. and less, whilst the neatest weights now seldom bring over 8d. The mutton trade, if anything, is even worse than it has been all along, old ewes and overfed sheep only with difficulty making 6d. to 6½d. per lb., if as much; and buyers are cautious, even at this low price. For small wethers and neat-handling ewes there is some demand—in fact, very little else is wanted—prices ranging from 7½d. to 8½d. per lb., and most is cleared on these terms. Lambs, too, met a very poor sale, prices having declined a good bit from what they were; 10d. now is the top, and plenty of good lamb only makes 9d. to 9½d. Small pigs keep up in value.

LONDON.

Central, Friday.—Large supplies were available, and met with better support at steady rates. Beef arrivals included 80 tons Scotch, 520 Liverpool sides, 2,600 hind quarters and 1,850 forequarters American refrigerated; also 1,300 Argentine chilled hindquarters. Beef quotations:—Scotch short sides 4s 4d to 4s 8d, long sides 4s to 4s 2d, English 3s 10d to 3s 11d, American (Deptford killed) 3s 6d to 3s 9d, Liverpool sides 3s 5d to 3s 8d, American refrigerated hindquarters (best) 3s 10d to 4s 1d, forequarters 2s 4d to 2s 5d, New Zealand hindquarters 2s 3d to 2s 5d, forequarters 1s 7d to 1s 8d, River Plate hindquarters 2s 2d to 2s 3d, forequarters 1s 6d to 1s 7d, Argentine chilled hindquarters 3s 2d to 3s 4d. Mutton: Scotch tegs 5s 2d to 5s 6d, extreme 5s 8d, ditto wethers 4s 6d to 5s 4d, ewes 3s 6d to 3s 8d, English wethers 4s 6d to 5s, ewes 3s 4d to 3s 8d, New Zealand 2s 5d to 3s, River Plate (frozen) 2s to 2s 3d, Dutch wethers 4s 6d to 4s 10s, ewes 3s 8d. Lamb: English 5s to 5s 8d, extreme 6s 4d, New Zealand 3s 6d to 3s 10d, Dutch 4s 8d to 5s 2d. Veal: English and Dutch 3s to 4s 4d, Irish 2s 8d. Pork: Town killed 3s 8d to 4s 2d, country 3s 8d to 4s, Dutch 3s 8d to 4s per 8 lb.

Metropolitan, Thursday.—The supply of beasts consisted of fat butchering cows and bulls. Trade was slow but steady, last week's quotations being well maintained. Top value:—Fat cows, 3s 6d to 3s 8d; exceptionally fat bulls, 3s to 3s 3d per 8lb. Decrease of 670 in number penned in sheep market, supply consisting entirely of Downs and half-breds, no Scotch or Yorkshire sheep being offered. Trade for both wethers and ewes was fairly steady, but Monday's money governing all sales. Lambs were in very short supply, and made from 2d to 4d per 8lb more money. Best pens made 8lb as follows:—7½st to 8st down sheep 5s 6d, extreme 5s 8d; 9st ditto, 5s 4d; 10st ditto, 5s 2d; 10st half-breds, 5s 2d; 10st down ewes, 4s; 12st Lincolns, 4s 6d; 5st fat down lambs, 6s 8d; 6st half-bred ditto, 6s to 6s 2d. Full supply of calves, which met very limited demand. Quotations for 8lb, sinking the offal: Beasts, 3s to 3s 8d; sheep, 3s 8d to 5s 8d; calves, 3s 6d to 5s 2d; lambs, 5s 4d to 6s 8d. Total supply:—Beasts, 30; sheep and lambs, 2,420; calves, 80.

COUNTRY.

Ashford, Tuesday.—Market being dull made beef cheaper all round, best making 4s 4d to 4s 8d, and cows about 4s; best mutton unchanged up to 5s 2d, but heavy Kent wethers 2d cheaper at 4s 8d to 5s 2d; barrens, 3s 8d to 4s; veal, 4d cheaper; roasting pigs almost unsaleable and down to 3s 4d.

Basingstoke, Wednesday.—At Raynbird and Sons' saleyard there was a fair attendance of buyers to meet a supply of thirty-three fat beasts, 68 calves, 515 fat sheep and lambs, 68 pigs, and 101 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £28 15s to £30 10s; fat calves, 65s to £5; small, 30s to 50s; fat porkers, 28s to 37s; store pigs, 12s 6d to 27s; dairy cows, £11 15s to £24; fat Down wethers and ewes 50s to 56s; small, 44s to 48s; old ewes, 35s to 38s; Exmoor ewes, 35s 6d; six months old lambs, fat, 38s to 40s; small, 30s to 36s; three months old sucking lambs up to 30s. The show of fat beasts included some quality Shorthorns and Devons, which were mostly cleared at last week's figures. Lower prices had to be taken for fat sheep and fat lambs, the reduction being the most in ewes and half-fat wethers. The best class milch cows were in demand, and were easily sold at high prices; secondary sorts met a dull trade. Store cattle remain a quiet

business. Fat calves realised less money. Fat porkers a short supply, with no alteration in prices. Store pigs met a brisk trade. Ruling values:—Prime Devon beasts, 6½d to 7¼d., ditto Shorthorns, 6d to 6½d; bulls, cows, and inferior beasts, 5d to 5¾d per lb.; best fat sheep, 8d to 8½d; second ditto, 7d to 7½d; old ewes, rams, etc., 5½d to 6d; choice sucking lambs, 9d to 9½d per lb.; fat calves, 7d to 8d per lb; fat porkers, 8s to 9s per score.

Berwick, Saturday.—There was a very small show of cattle, only 165 beasts being penned, as against 343 the previous week. The attendance of farmers and buyers was small, quality of stock medium, and trade slow. Calves, £6 10s; heifers, £8 10s; stirks, £7 10s to £9 15s; two-year-olds, £11 15s; shorthorn bulls, £12.

Birmingham, Thursday.—Small supply of beasts, sheep, and pigs. Trade fair for bacon pigs. Trade slow for beasts and sheep. Beef, 5d to 6½d; Herefords, 7d per lb.; mutton, 6d to 8½d per lb.; lambs, 8½d to 9d per lb; veal, 6d to 8d per lb.; bacon pigs, 9s 4d to 9s 6d per score; cutting pigs, 9s 4d to 9s 6d per score; sows, 6s 10d to 7s per score.

Bristol, Thursday.—The market to-day was quiet and prices ruled much the same as last week. There was a moderate supply of beef, and trade was dull at late rates; whilst for mutton, which was in average quantity, there was a fair demand. Best wethers advanced ½d., whilst lambs receded ½d per lb. There was a limited number of pigs, and values declined 3d per score.

Calne, Friday.—Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in Price per Sc. any part of Back.	s.	d.

Under 12 sc.	3 in. ...	8	3

C. AND T. HARRIS AND CO., LTD.

Canterbury, Saturday.—Yearlings of rough quality were offered to-day at £5 5s, and others of better quality up to £7 and £8. Two-year-olds, forward in condition, were worth from £10 10s to £13 10s; milch cows, £14 to £16.

Carlisle, Saturday.—The supply of Irish cattle on the Sands showed a considerable falling off, and there being very few buyers, the market was exceptionally dull, and trade dragging. Small heifers were quoted at £6 10s to £8 10s, while the best sorts made up to £12 10s each.

Chichester, Wednesday.—Fat cattle met a better trade at 2d to 4d per stone advance on last fortnight's prices, and dairy cattle sold well at fully 30s per head more money. The show of grazing cattle was not very good as regards quality, and consequently trade was rather dull. Quotations: Beef, 4s 10d to 5s 4d; Southdown mutton, 6s 4d to 6s 8d; West country mutton, 5s to 6s 2d; veal, 5s to 5s 4d; pork, 4s 2d to 4s 6d.

Colchester, Saturday.—Beef, 4s 4d to 4s 6d per stone of 8lbs; mutton, 5s 4d to 5s 8d per stone; pork, 9s to 9s 6d per score; lamb, 6s to 6s 4d per stone. There was a poor supply all round. Messrs. Sexton and Grimwade report a short supply of fat beasts, which met a beter trade; neat quality cattle wanted. An average supply of fat sheep, for which the trade was firm. Pork trade dull on account of hot weather. Large entry of lambs, which sold fairly well.

Doncaster, Saturday—Very meagre supply of cattle owing to the continue dry weather, and trade only nominal; prices unchanged. Milch beasts, £16 to £22; bullocks, £12 to £16; heifers and drapes, £11 to £15; stirks, £7 to £9; young stores, £4 to £6 each. Average supply of sheep, and the pastures having gone off the demand suffered, hoggs making 38s. to 46s each.

Dorchester, Wednesday.—Full average supplies at to-day's market, but trade was quiet in several departments. Best wether mutton sold at 7½d to 8d per lb., and heavy coarse sheep 6½d to 7d. Choice lambs up to 10d, and secondary sorts 9d. Calves made 8½d for the best; heavier animals 7d to 8d. Small weight pigs made 9s to 9s 6d per score; medium baconers, 8s 6d to 9s; heavy pigs, 7s to 8s.

Dorchester, Saturday.—At the cattle market, considering the fair on Thursday and also that Blandford wool sale clashed with the fair, there were very good offers of stock and a good business was done, milch cows generally making a better sale, the day's range for the best being from £16 to £19, and for seconds, from £11 to £15. Barreners brought from £21 to £33 10s per pair in one case. Good inquiry for fat beasts, from £18 to £22 each, for heifers and steers (or 10s 6d to 11s 6d per score); fat cows, £15 10s to £17 15s each (or 10s per score); fat bulls, £11 15s to £21 10s each (or 8s to 9s). Mutton met a fair sale at fully late rates; fat ewes selling from 46s 6d to 50s each (or 7d per lb); wethers, 49s to 52s; and lambs were a trifle more inquiry, 34s 6d to 44s 6d. To-day's market sales were conducted by Messrs. Duke and Son and by Messrs. Symonds and Sampson.

Dublin, Thursday.—Numbers in market: Beasts 1,718 (decrease 43); sheep 10,168 (decrease 480); calves 27 (decrease 12). The choicer qualities of cattle met an improved demand and realised somewhat better prices. Other sorts were easier, sold at last week's rates. Sheep, slow trade at unaltered prices. Lambs easier sold; choice qualities making a shade more money. Cattle: Live weight (best), 31s to 33s 6d per cwt; secondary and inferior sorts, 26s. to 30s per cwt. Mutton: (deadweight), 5½ to 7½ per lb. Lambs, 16s to 38s.—GANLY, SONS AND CO.

Edinburgh, Wednesday.—Cheviot Dinmonts, 38s to 40s; hoggs, 32s to 34s; cross sheep, 34s to 36s; black faced, 20s to 25s; horned bullocks, £13 10s; polled cattle, £13; stirks, £8 17s 6d; Shorthorn cows, £21 to £24 10s; cross cows, £20 to £23 per head.

Exeter, Friday.—Small supply of cattle, but sufficient for the demand; tendency to lower prices; 11s to 11s 3d top price for heifers and steers; cows, 9s to 10s, some unsold. Owing to the hay harvest the supply of sheep was very small; quiet trade at late rates; hogs, 7½d; very small ones, 8d; lambs, in wool, 10d; shorn, 9d; ewes, 6d; calves, 7d to 7½d.

Glasgow, Wednesday.—Demand fair and prices firm. Best hoggs, clipped, 9d; current, 8d to 8½d; best lambs, 9d per lb.; top Scotch cattle, extreme 64s, current 58s to 60s per cwt. There was a moderate demand for dead meat, and prices were steady. Best Scotch beef, 6d; best States, 5½d; best Canadian, 5½d to 5¾d; best cows, 5d per lb. At market: Cattle 694, sheep and lambs 4,562.

Gloucester, Saturday.—Messrs. Bruton, Knowles and Co. report their sales as follows:—A very short supply of both cows and calves and store cattle, with a small attendance of buyers and very little change in prices.

Hereford, Wednesday.—This was a July fair, but none of the Hereford fairs are now of greater importance than the weekly cattle markets, excepting October and Easter, and there was the smallest market since the new year. The beef trade was rather better, particularly for the best ox and heifer, the top price being fully 6¼d per lb; fat cows, 5d to 5½d. The sheep were quite a small supply of all sorts, compared with late markets, and trade looked up, wethers being 8d and ewes 6d to 7d per lb. Lambs were decidedly dearer, Birmingham buyers sharpening the demand for the small supply, which averaged 9d per lb. The veal trade also showed an improvement at 7d to 7½d per lb. The weather and a large supply were unfavourable to the pork trade at 5d to 5½d per lb.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report a shorter supply of fat cattle which sold freely, prices an upward tendency, ranging from 2s 7d to 7s 5d per stone. Grazing cattle were forwarded in smaller numbers; there was a fair demand at last week's prices; Polled Steers, twenty months old, in good condition, £11 12s 6d; Lincolnshire Red Shorthorns, twenty to eighteen months, £10 15s to £9 7s 6d; Red Polls, sixteen months, £9 2s 6d to £8 17s 6d; growing steers, £7 10s to £6. At the special sale of dairy stock fifty cows and heifers were offered. There was a large attendance of buyers and better prices were realised. About twenty fresh calved Shorthorn heifers were well competed for and realised from £20 10s to £15. The best cows made from £20 15s to £17. A large entry of lambs, which sold freely at an advance of about 2s per head; Suffolk ewe lambs to 40s; wether ditto, 35s 6d; first-cross ewe lambs, 36s 6d; wethers, 32s 6d; halfbreds to 31s; Southdowns, 30s 6d to 33s 6d. Fat sheep were in fair demand at recent values. Fat swine sold freely at rather more money. Numbers at sales and market: 604 cattle, 2,766 sheep, 862 swine.

Leicester, Saturday.—Larger consignments of home-bred bullocks. Trade ruled sluggish at a decline of fully 20s per head all round. Choice milch cows, £20 to £23; good lots, £17 to £18; secondary, £14 to £16; Shorthorn cattle, £12 to £15; choice Irish bullocks, £18 to £19; good lots, £13 to £14 10s; Welsh cattle, £10 to £14; young stock, £5 to £7; and calves, 20s to 40s each.

Lincoln, Friday.—Small show of horned stock, and a slow trade. Young beasts made £8 to £10, and older ones up to £18 per head. No sheep or pigs were for sale.

Lynn, Tuesday.—Average show of fat beasts, trade slow at 7s to 7s 6d per stone. Very few store beasts sold at £6 to £11 each. Smaller show of fat sheep, trade slow at about 8s 9d to 9s per stone. Store sheep few, prices 39s to 45s each. Store lambs 25s to 32s, fat lambs 25s to 35s each.

Norwich, Saturday.—Prices for store beasts, which were offered in small numbers, were practically unchanged, and trade dull. Fat beasts were quoted at 7s 6d to 8s; store and fat sheep averaged 9s. Store sheep in good supply, but met with slow trade, lambs fetching 20s to 36s, and shearing ewes 48s to 69s per head; trade not brisk. Good demand for fat pigs, at 5s 6d to 6s per stone.

Nottingham, Saturday.—Owing to the hay harvest there was very little shown this week, and prices were about the same as last. Very few store cattle were offered.

Retford, Saturday.—There was a demand for really first-class milch cows, which were scarce, and worth £18 to £20; secondary, £15 to £16; two-year-old, steers and heifers, £10 to £12; yearlings, £6 to £8; calves, 40s to 45s each.

Romford, Wednesday.—Fat beasts in average supply, and trade about the same. Best animals, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in average supply, trade slow at 4s 10d to 5s per stone. Short supply of sheep, trade a little better; best sheep, 5s 4d to 5s 6d; middlings, 5s to 5s 2d; ewes a slow trade, at 4s 2d to 4s 4d per stone. Lambs in short supply, trade better at 6s 4d to 6s 8d per stone. No store beasts on offer. Short supply of pigs; trade lower.

Thame, Tuesday.—There was a smaller supply of stock; no doubt on account of haymaking operations. The attendance of buyers was fully up to the average, and there was a decidedly better trade for cattle, cows being in better demand. Sheep were a brisk trade throughout, being dearer than on any previous market this season, realising fully 2d per stone more money. Good supply of veal at late prices. Bacon and pork, small supply, sold freely. Store calves and pigs easier. Messrs. Bond and Burrows' sale comprised 65 fat beasts, 299 fat and store sheep, 54 fat and weaning calves, and 59 bacon pigs, porkets, and stores. Fat heifers made from £15 to £19 10s; fat oxen, £16 to £21 12s 6d; fat wether sheep, 45s to 64s; fat ewes, 40s to 50s; fat lambs, 31s to 40s; fat calves, £3 to £4 13s; weaning cow calves, 30s to 60s; bull calves, 15s to 48s; bacon hogs, £3 to £4 15s; porkets, 26s to 38s; store pigs, 10s to 19s 6d.

Truro, Wednesday.—Fat bullocks, 56s to 60s per cwt.; barreners and store bullocks, 40s to 45s; cows and calves, £11 to £17 each; rearing calves, 25s to 45s; wethers, 7½d per lb.; ewes, 5½d to 6d; lambs, 7½d to 8d; pigs, 8s 6d to 50s each; beef, 6d to 8d per lb.; mutton, 6d to 8d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8d.

Wolverhampton, Wednesday.—Moderate supply all round; fair trade for best. Beef, 5½d to 7d per lb.; mutton, 6½d to 8½d per lb.; lamb, 8½d to 9½d per lb.; veal, 6d to 7d per lb.

Worksop, Wednesday.—Small supply of stock, with trade exceptionally brisk for mutton. Best beef, 7s 3d to 7s 9d per stone; secondary, 6s 6d to 7s; best Southdown and crossbreds, 8d to 8½d; prime hoggs, to 9d; ewes, 6½d to 7½d; lamb, 10d to 11d per lb.

York, Thursday.—A very small show of Irish and English store cattle, which more than equals the demand, as the continued drought makes buyers very dubious. Only a few sales were effected, and these were at a shade less money. Quotations are impossible. A smaller show of both calving and milch cows, and of rather inferior quality, but there was a slight improvement all round in this department. Nice young fit cows sold well for £17 to £20 per head, and in a few cases up to £21 10s. A nice class of newly calved cows could be bought from £16 to £18, a general advance of about 10s. a head being recorded for in-calving cows. Only a very poor show of sheep. Twice-crossed hoggs, 40s. to 46s. each; crossbreds, 30s to 38s.

HOPS.

Canterbury, Saturday.—The hop plant continues to grow very satisfactorily.

Worcester, Saturday.—Our plantation reports continue favourable. Some small growers are now disposed to meet the market, and 28 pockets have been weighed this week, prices for best sorts being fairly maintained. Inferior samples are not so firm.—CHARLES FARAM AND CO.

GAME AND POULTRY.

Sheffield, Saturday.—A fairly good demand met a good supply. Prices:—Goslings, 4s to 5s 6d; country ducks, 2s to 2s 6d: Aylesbury ducks, 2s 6d to 3s; Surrey fowls, 2s 9d to 4s; Essex fowls, 2s 3d to 3s; Lincolnshire fowls, 2s to 2s 9d; Irish fowls, 1s 6d to 2s; Russian fowls, 1s 5d to 1s 9d; feathered pigeons, 8d to 10d; Bordeaux pigeons, 1s to 1s 2d; tame rabbits, 1s 4d; wild rabbits, 6d to 7d; live hens, 1s 5d to 2s 3d each; Australian rabbits, 6s to 8s per dozen.

FEEDING STUFFS.

Hull, Tuesday.—Linseed: Two steamers are [illegible] from Buenos Ayres, 90 qr Harlingen, 1,[illegible] qr Rotterdam, 1,000 qr Libau, 1,000 qr Riga, [illegible] qr Petersburg, total, 21,945 qr. Shipments were during June 9,[illegible] as follows: Plate, 3,[illegible] qr Libau, [illegible] qr Riga, 24,000 qr Continent, Calcutta, [illegible] qr Libau, Russian, 7,[illegible] qr London, 1,000 qr Hull, [illegible] qr Continent, total, 64,000 qr. Linseed dull, and prices somewhat lower. Plate: spot and afloat, 38s 9d sellers; May-June, 38s, sellers; July-August, 38s 6d the quotation. Cottonseed: The demand has been slow during the past week, prices ruled steady. Spot, Egyptian, [illegible] £5 10s net, without further sellers under £5 13s 9d. A few hundred tons July changed hands at £5 15s, [illegible] £5 16s 3d, and £5 18s 9d remains asked for Nov-Jan. Bombay done at £4 17s 3d, £4 17s 6d June-August, and latter price accepted to-day Aug.-Sept. Oil-seed cakes: Linseed: Firm, unchanged. Cotton: Easy, unaltered. Bombay, 2s 6d per ton lower. Tea pasture: relatively low prices should soon improve the demand, maize being about £5 10s per ton, and other feeding stuffs in similar ratio.

London, Thursday.—Linseed: A decline set in last week with India offering more freely, and now, as cargoes coming from the oil trade, prices are now nominal: Egyptian Calcutta London Spot 41s 3d, June-July 41s 6d, July-August 41s 9d. La Plata, June-July 41s. Rapeseed continues exceedingly quiet. Quotations are more or less nominal. Brown Cawnpore, June-July 26s 6d. Brown Calcutta, June-July 26s. Cottonseed: Egyptian has continued firm and better prices paid. London.—Spot £5 17s 6d, July £5 18s 9d, sellers, August £6, September (old) £6 1s 3d, November-January £5 1s 3d. Hull—Spot £5 16s 3d, July £5 18s 9d, November-January £6 1s 3d paid buyers. Oil Cakes:—Linseed cakes firm. London made £7 12s 6d to £7 15s. Cotton cakes steady. London made £4 7s 6d to £4 10s. THE PRODUCE BROKERS CO., LIMITED.

Mark Lane, Monday.—Linseed cakes: The trade rules dull and inanimate, with scarcely any business passing, while present high values continue to check the consumptive demand, and for the same reason there are practically no forward contracts being made, buyers and sellers being too far apart in their ideas. Russian are relatively best value at last week's prices. American are unchanged, attracting no attention. East India seed pures to arrive may be bought at late rates. London made continue to meet a dragging trade, although crushers would be willing to shade prices somewhat to effect sales. Cotton cakes: Egyptian are fairly plentiful on spot, in spite of the small shipments, but with only a poor inquiry quotations are unchanged. English move off quietly without alteration in value. Decorticated London made are temptingly offered at £6 17s 6d for cake and meal, and £5 5s for special digestive meal, while £6 17s 6d is demanded for American "Open Handle" brand, £6 16s for "Ley," and £6 7s 6d for meal. Rape cakes: Calcutta slightly cheaper; Ravison unchanged. Maize germ meal: Only a limited quantity of White American is available in warehouse and for this an advance of 2s 6d is asked, with English makes again dearer: maize gluten meal is in good request at £5 10s per ton. Rice meal: Landed lots of Rangoon make £4 6s 3d to £4 7s 6d, but shippers do not offer in forward positions, and the market has a very firm tendency. Nitrate of soda is quiet at last week's price of £11 per ton ex quay. Locust beans are relatively a cheap cattle food at £5 per ton for whole and £5 10s for kibbled.

MOLASSINE FEEDING MEAL, packed in bags of 1 cwt. each. Price per ton, £6 15s., in ton lots and upwards. £7 10s. per ton in less than ton lots. Free on rail, Liverpool or London. Uniform delivered price for small quantities, 10s. per bag of 1 cwt.

WOOL.

London, Tuesday.—There was a large attendance of both home and foreign buyers, and animated competition. The catalogues were mainly composed of crossbreds, the coarser qualities of which were in strong demand and realised an advance of 10 per cent. on May rates. On the finer grades and on slipes the rise was about 5 per cent. Merino wools commanded also an advance which may be quoted 5 per cent. on the average; good combing qualities realising often 7½ per cent. more than in May, but inferior and faulty sorts being only slightly dearer. Cape wools remained unchanged.—HELMUTH SCHWARTZE AND CO.

London, Saturday.—English—per pkge. of 240lb.—Fleeces, Southdown hoggs, £1 1s to £[illegible]; half-bred hoggs, £1 1s to £15 5s; lots wethers, £11 10s to £13. Kent fleeces, £12 to £12 10s; Southdown ewes and wethers, £1[illegible] to £15 15s. Leicester lots, £[illegible] to £[illegible]. Cape—per lb. Vic., fleece super, 1s 11d to 2s 1d; scoured good, 2s 1d to 2s 4d; scoured average, 1s 11d to 2s greasy average to fair, 1s 1d to 1s 5d. N.S.W., scoured average, 1s 8d to 1s 9d; greasy average, 11d to 1s 1d. S. Aus., greasy average, 9d to 1s 3d. S.Z., scoured fine to 1s 8d to 1s 9d; greasy average, 10d to 11d. Cape, scoured super, 1s 8d to 1s 10d. fleece [illegible] 1s 3d to 1s 4d; greasy average, 7½d to 8½d. Natal, scoured, 1s 5d to 1s 6d; greasy average, 1s [illegible] 2½d. Queensland—Very good to super, 1s 8d to 1s 9d. New Zealand—fine 1s 3d to 1s 5d; ditto medium, 1s 2d to 1s 4d; inferior coarse, 1s 1d to 11d.

Belfast Horse and Sheep Show.

The annual horse and sheep show, under the auspices of the Royal Ulster Agricultural Society, was held last week, and the entries in horses were slightly in excess of last year, while as regards quality the standard has in some respects been improved on.

In the class for thoroughbred stallions to get high-class hunters or harness horses there was a very good representation. The palm of merit was awarded to Spook, a dark bay belonging to Mr. John J. Gilmour, Lisboy, Omagh. The class for half-bred stallions brought out six competitors, of which Mayboy, the property of Mr. Patrick Turley, Dechomet House, Castlewellan, was declared first. The same owner took third in this class with Astrologer II., a four-year-old bay of good points. The six-year-old chestnut roan Master Blair II., belonging to Mr. R. W. Needwill, Magherafelt, took second place. A nice group of five competed in the two-year-old Hackney stallion class, the Honourable Mrs. Ward, Old Colwyn, and County Down, carrying off first. Eight competitors invited the decree of the judges in the thoroughbred brood mare class. The Louisa of Lord Dunleath, Ballywalter, County Down, was the fortunate one among the lot, though there was little to choose between her and the Patience II. of Mr. Wm. Carr, Killyleagh, County Down, which took second place. The award for best foal was deservedly carried off by Mr. Charles Dundee, Ballycarry, County Down. There was a numerous array in the class for hunter-breeding brood mares, other than thoroughbred, with foal at foot, and the chief honours went to Mr. P. Turley, Castlewellan, whose five-year-old chestnut, Nora, took first place both for herself and foal—the Deramore Challenge Cup and two gold medals. Lucy Grey, the property of Mr. R. G. Nash, Finnstown, Lucan, County Dublin, took second place. Right Honourable Frederick Wrench, Ballybrack, took premier award in the class for Hackney brood mares with Bright Gartin Duchess, a chestnut, eight years old, of much distinction, and very finely bred. The Flora of Sir H. H. Smiley, Bart., was a good second. There was a gratifyingly numerous competition for the rosette in the case of the important class of thoroughbred yearlings, a handsome lot of eight having to be inspected. Mr. H. D. M. Barton, the Bush, Antrim, won with an elegant bay colt out of Cyanine Blue by St. Aidan, and second honours were the lot of Mr. Charles Dundee, Ballycarry, for his brown colt out of Costabelle by Toison d'Or. An even more numerous group appeared in the class for yearlings other than thoroughbred, from which was selected as best the chestnut colt of Mr. Wm. Savage, Leggamaddy, County Down. Sir H. H. Smiley, Bart., again won distinction in the two-year-old Hackneys with Inver Princess, a very handsome chestnut filly. The three-year-olds were a well completed class, both in the case of those for harness and those for hunting purposes. Of the former Endora, a chestnut mare, entered by Mr. E. D. M'Naughtan, Parkside, Milnthorpe, Westmoreland, annexed the first prize. The extremely encouraging number of twenty-nine entries filled the list in the first section of the hunter class, that for four-year-olds up to 12 st. to 13 st. 7 lb., the judges selected for highest distinction an admirably set bay brown gelding Coropin, the property of Mr. J. Milling, Comber. Liscarroll, the second, belonging to the same owner, and likewise a bay-brown gelding, has many admirable points. In the heavier weight lot the palm fell to Mr. Anthony F. Maude, Hillsborough, whose Matchlock, a very pretty chestnut gelding, attracted much attention. Mr. Milling, Comber, was also to the fore in this class, winning second place with Lord Rosslea, a nice grey gelding. Of the top weights Mr. Patrick Meenan, Muckamore, produced the best in Patrician, a chestnut gelding of much fire and pace. Mr. N. Morton was second with Raratonga, a brown gelding. This owner was more successful in the light-weight five-year-olds, winning first place with Queen of the Bog, a well paced chestnut mare. In the heavier weights of same age he scored again with his bay gelding Look Out; and in the top weights of this aged class his Simplicity, a bay gelding, achieved premier distinction. The class for horses, cobs, and ponies was a good one, and well competed. The harness horses judged were an excellent lot. Miss Ella S. Ross, Beechfield, Sale, Cheshire, made a splendid turn out, and took first place in the double harness competition. Mr. Wm. M'Bride, North Street, Belfast, was a very good second. Of the single harness cobs, Colonel W. Moore, High Blantyre, N.B., was adjudged best, the same competitor taking second place.

Speaking generally the sheep were a distinct advance on last year, and this was especially the case in regard to the Border Leicester and Blackfaced sheep. There were 37 entries in the five classes reserved for the former, and one of the most successful exhibitor was Mr. Robert W. Bell, of Blackbridge, Hillsborough, who for the second time in succession carried off the challenge cup in the best group of Border Leicesters, in addition to securing first prizes for shearling ewe and ewe lamb, second for shearling lamb and ewe lamb, and third for shearling ram. Viscount Bangor's fine ram Tariff gained premier honours in his class, while Deuchrie Stamp, owned by Miss Carleton, Gilford Castle, was a good second. In the shearling ram class, which was the largest in the Border Leicester section, Major W. G. Forde, Seaforde, secured the scarlet card.

Shropshires were not so numerous, and the challenge cup for the best group was once more won by Mr. W. Lenox Naper, of Loughcrew, Oldcastle, who also bore off the special prize offered by the Shropshire Sheep Breeders' Association to the exhibitor winning the greatest number of points for prizes in this section. Blackfaced Mountain sheep numbered 61, nearly one-half of the total entry. The strongest class was that for shearling rams, in which there were sixteen entries, and here Mr. H. D. M. Barton, of The Bush, Antrim, one of the best known of northern exhibitors, secured the chief honours. He took the first prize with a splendid ram, which was also awarded the challenge cup, the reserve card going to Lieutenant-Colonel Lowry for his County Councillor. Mr. Barton further won the challenge cup presented by a few admirers of this breed of sheep for the best group of the shearling rams, and as he had previously gained this trophy in 1903 and 1904, it now becomes his property.

Shorthorn Society.

The annual general meeting of the Shorthorn Society was held in the Royal Agricultural Society's showyard at Park Royal, on Wednesday, June 28, Sir Oswald Mosley, Bart., President, in the chair. The minutes of the last meeting having been approved and signed, the report of the Council was submitted.

In the interval between the last general meeting and the present twelve life members and twenty-one annual members have died; twenty annual members have withdrawn; twelve annual members have been removed by order of the Council, and twenty-five life members and eighty-three annual members have been elected.

The Society now consists of—

552 life members and
905 annual members,

making a total of 1,457 members on the register.

The accounts of the society for the past year have been examined and certified by the society's auditors, Messrs. Welton, Jones, and Co. An abstract of the cash account to the end of the year 1904, and a copy of the balance-sheet have recently been forwarded to the members. The balance in the hands of the society's bankers was, on the 1st inst., £745 0s. 10d. on the current account, and £1,300 on deposit, the society's reserve fund in the Consolidated Stock, valued at 85 per cent., being £7,650.

In moving the adoption of the report the President referred to the satisfactory trade in Shorthorns during the past year, the number of exportation certificates issued by the society being largely in excess of former years, and if the prices were not as high as was the case some years ago, he believed the trade was on a firmer basis. The society was in a good financial position, and they were offering this year nearly £1,000 in prizes.

Mr. W. J. Hosken had great pleasure in seconding the adoption of the report, which he considered made very cheerful reading.

The report was thereupon adopted.

The scrutineers reported the election of the following gentlemen on the Council, to replace the seven gentlemen who retired and were not eligible for re-election until the expiration of one year. Mr. J. P. Cross, the Right Hon. F. J. Savile Foljambe, Sir John Gilmour, Bart., Mr. Joseph Harris, Mr. W. J. Hosken, Mr. C. H. Jolliffe, and Mr. W. Parkin-Moore.

On the motion of Mr. Henry Dudding, seconded by Mr. G. Harrison, Messrs. Welton, Jones, and Co. were re-elected auditors to the society.

Mr. A. M. Gordon, in proposing a hearty vote of thanks to the President, Sir Oswald Mosley, Bart., for the very able discharge of his duties during the past year, said Sir Oswald had never allowed his own convenience to interfere with his duties, which he had carried out faithfully and diligently.

Mr. J. P. Cross seconded the motion, which was unanimously adopted.

Sir Oswald Mosley thanked the members for their kind vote of thanks and regretted that latterly his health had prevented his giving as much time to the society's work as he would have wished.

The meeting then terminated.

SALE OF MR. JONAS WEBB'S SHORTHORNS.

The successful sale at Riby was followed on Friday by another equally satisfactory one at Melton Ross, when a large portion of the well-known herd belonging to Mr. Jonas Webb was disposed of. Mr. John Thornton again officiated, and a splendid company of breeders had gathered round by the time the sale commenced. The stock, though not in quite so high condition as that at Riby, was brought out in capital breeding form, and met with splendid competition. The sale opened well, the old cows making good prices; but when lot 8, Duchess of Melton 3rd, came into the ring, bids came very quickly, and, at 100 gs., she became the property of Messrs. Dean and Sons, her red heifer calf, oddly enough, making exactly a similar amount to the same buyers. Messrs. Dean were frequent purchasers throughout, among their lots being a beautiful two-year-old heifer, Nancy Lea 2nd, at 85 gs., and a yearling, Melton Duchess Vittoria 3rd, at 75 gs. Mr. Henry Dudding gave the top price among the females for Melton Rose 2nd, a charming red yearling, for which he had to pay 115 gs. The bulls also made satisfactory prices. Lord Sandgrove 54th went to Mr. Kirkconnel at 85 gs. and Melton Baronet to Mr. Sanderson at 125 gs., while Mr. Wilkinson got a nice pair of young bulls at 35 gs. and 52 gs. All these, it was said, were bought for South America.

The following were the prices and buyers' names :—

COWS AND HEIFERS.

Live Stock Record.

THE WOOL TRADE.

The country wool fairs and London sales have commenced, and at market ordinaries and all promiscuous agricultural assemblies the talk runs on the generally good clip of fleeces which has been taken this year, and the gratifying fact that there is a rising tendency in market rates for wool. At the Shrewsbury annual auction over 35,000 fleeces were offered, the greater part of the Shropshire ones making from 1s. 1d to 1s. 2d. per lb. But Mr. Savage, of Woodhall, realised as much as 1s. 3¼d. per lb., or 35s. 7d. per tod. We have not as yet seen a higher rate than this reported; but at Northallerton, on the 29th ult., 15,000 fleeces were auctioned, and the best prices reached 32s. per tod, or 5s. per tod above the top rate at the corresponding auction last year.

There has been stagnant trade with Bradford manufacturers, who have been deterred from offering over 1s. per lb., because the demand which led to the recent advance came from the activity of American buyers, and they have been waiting to see whether there will be any change when this ceases. Moreover, although they expected some advance in rates at the London wool sales, they preferred to await their issue ere considering the higher level of prices to be on a settled permanent basis. Probably the high rates on Tuesday in last week at the first of the fourth series of Colonial wool sales will prove to them that, whether the American demand is speculative or justified by circumstances, it is not likely soon to cease. The better appreciation of wool at this London sale would appear to be quite equal to, if not greater than, what had been experienced at the previous English fairs. Compared with the closing rates of the previous auctions, there was a reported rise of fully 5 per cent. for fine and medium cross-breds, while for coarse cross-breds the advance was reported as fully 10 per cent.

The recent rise having brought up higher some varieties which were lagging previously, there is at present no great difference in the leading kinds of English wools as regards market rates. In the market circular of the Board of Agriculture the top rates for the chief kinds of washed wools per pound are thus given:—Lincoln, 1s. 1¼d.; Leicester, 1s. 1d.; Kent, 1s. 0¾d.; other Long-wool, 1s. 0½d.; Southdown, 1s. 2½d.; Hampshire, 1s. 1d.; Shropshire, 1s. 1¾d.; other Down, 1s. 0¾d.; half-bred, 1s. 1d.; Cheviot, 1s. 1d. But there is immense difference in the character of wools of the same denomination. All who have the slightest technical knowledge on this valuable textile commodity are well aware of this, and the fact could be readily discerned by all who had opportunity to inspect the exhibition of wools at the recent Park Royal Show. The object-lesson there disclosed was not, it is to be feared, studied so much or by so many, as it deserved to be; but there has always been proof that the wool of a flock admits of quite as much improvement by skilful breeding as its grazing property. Just as the employment of bulls from a deep-milking family generates progeny of excellent dairy character, or sires from early-maturity lineage by the law of heredity impart the same characteristic to offspring, is the Golden Fleece transmitted from one generation to another.

STOCK AND SHOW NOTES.

By Herdsman.

A meeting of the Bath and West and Southern Counties Society's Show Dates Committee was held at the Town Hall, Swindon, on Wednesday, in order to consider what would be the most suitable dates for the Society's 1906 Exhibition at Swindon. The Mayor presided, and it was unanimously resolved to recommend to the Society's Council that the exhibition be opened on Thursday, May 31, and closed on Whit Tuesday, June 5, a very strong opinion having been expressed by those well acquainted with the locality that these would be the most suitable dates for Swindon that could be selected.

The following sales were effected at the Royal Show last week from the Buscot Park herd: — One Berkshire boar, to H.R.H. Prince Christian; one boar and one gilt, to Mr. E. N. Casares, for exportation to South America; also ten shearling pedigree Hampshire Down ewes and ten ewe lambs, to Mr. C. Olivera, also for exportation to South America.

The steamship Moravian (Aberdeen Line) left London last Tuesday with some choice stock on board for Australia. Among them were three Suffolk colts, a number of Shorthorns, a Devon and a Dexter bull, as well as a thoroughbred stallion and a couple of pigs.

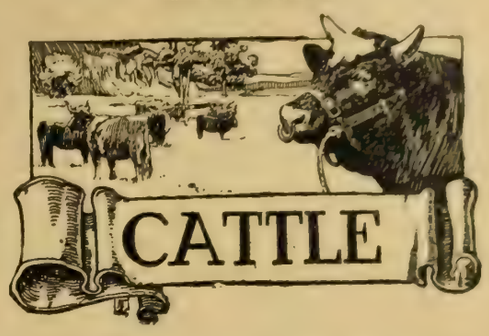
At a Council meeting of the Devon County Agricultural Association, held at Exeter, it was estimated that they would have very nearly £1,000 balance at the end of the year. So far as the late show was concerned, the total receipts were £3,431, and expenditure £2,760, leaving a profit of £671.

Mr. G. Harrison (Flock No. 42, Leicester Flock-Book) has sold three shearlings to Mr. Simonds for exportation to Tasmania. The sheep are very good specimens of Leicesters, with fine quality of wool, which is a desideratum with Tasmanian flockmasters. Mr. Harrison sold a ram three years ago for the same destination, and this is a repeat order, the previously exported sheep having given every satisfaction.

The Morsel Co., London, have purchased from Mr. Knowles, of Colston Bassett, from the Borrowfield herd, a very fine young boar for exportation to Russia. Mr. Knowles has also shipped from the Colston herd two boars and three gilts, including the prize-winning boar, Vanguard II., to Herr Wolfe, Eichenbronn-Rojairowa, Kreis, Rawitsch, Posen, Germany; also a boar to the order of Messrs. Schütt and Ahrens, of Stettin, for shipment to Russia; also two boars and three sows to the order of H. R. Hawkens, Esq., London, for shipment to Schleswig-Holstein, Germany; and the young boar, Borrowfield Duke of York V., who was first in his class at the late Suffolk Show. He was sold to a well-known breeder in Scotland.

Arrangements for the annual show in connection with the Staffordshire Agricultural Society, fixed for July 19 and 20, at Walsall, are rapidly approaching completion. This year the Society has increased its prize-list to over £1,700, and it is creditable to the local committee that the amount raised by them has been about £1,100. As regards the show itself, its success, as regards number and quality of exhibits, is already fully assured, the number of entries, which in some classes may yet be added to, being easily a record in the history of the Society. For stock the figures are as follows:—Cattle 246, last year 181; horses 318— 247; sheep 75 — 66; pigs 23—30; extra stock 4—1; total 671—525.

The Departmental Committee appointed by the President of the Board of Agriculture and Fisheries to investigate epizootic abortion in animals has decided not to examine witnesses at the present stage of the inquiry.



Notes and Jottings.

The weather in most parts of the country continues, on the whole, very dry. Water in some places is running very short, and feed is also very short indeed, yet in most places it retains its verdant colour, and is therefore sweet. In the best pastures, while clover is now very luxuriant, so far as its blossoms are concerned, the pastures in some cases being quite white over with these sweet and succulent flowers. Cattle have been very much affected with the warble fly; in the past two or three weeks little rest and peace have fallen to their share. This troublesome pest causes immense loss to all cattle owners during a hot summer; the very small calves, even, affect the effects of the sting of this troublesome fly. Any preventive measures at present known do not appear to be both useful and convenient.

Haymaking is now in pretty full swing throughout a very large portion of the country, and, with labour more plentiful, and the weather on the whole favourable, much first-class hay ought to be secured. The crops, it is true, are in many districts exceptionally light, not being anything like an average; but, where help to secure it is at hand, crops ought not in such a season to cost much in the manipulation, neither ought they to be much damaged by excessive working with the tedder or swathe turner. Too much machinery is not conducive to quality, or to the nutritive properties of hay. The stems and blades become broken by it, and a great deal of matter that ought to remain in the grass exudes, and leaves it of much less value.

Since permanent pasture increased to such an extent in the British Islands, many more cattle have to be fattened or wintered upon hay than was at one time the case, therefore the quality of that hay is of great moment. There is, I know, a theory that when hay is too rich, sweet, and appetising it takes the animals so much off any other food that they do not grow and thrive as much upon it as upon more inferior fodder or straw. This may be correct enough so far as it respects animals that are being wintered outside upon land that has a good deal of the previous summer's growth upon it to be cleared off. Very tempting hay, in such a case, is a superior attraction, and when the morning's foddering has been consumed the cattle hang about the place looking for more, rather than seeking to satisfy themselves with the grass.

Nevertheless, it is always wise to secure hay in the finest possible condition. Such hay is highly valuable as a food for any animals, and if a case occurs where rougher and less valuable fodder would be of advantage in helping to get the wasted summer's grass cleared off, hay of such quality can almost invariably be purchased at a price far less than the cost of growing. Really nutritive, early mown, and quickly and carefully harvested hay is of immense value to milking cattle, feeders, and even young stock. Good steers, or other cattle intended for the shambles, will get thoroughly ripe and fat upon hay of this kind and about 4 lb. of linseed cake per day. Our fattest matured cattle will often winter in very high condition upon hay only.

There is an almost incredible difference in the feeding value of hay, straw, roots (especially turnips), and many other foods in different parts of the United Kingdom. Scotland stands highest,

and behind in the nutritive value of its oats, oat straw, and yellow and swede turnips. It has many times been noticed that bullocks in Scotland will fatten more rapidly and give more weight upon turnips and oat straw than they would in the South of England upon this same diet and several pounds of cake per head per day. Ireland, too, provides green food, both grass, roots, and cabbage, of a quality much superior to English-grown produce of the subjects mentioned. Mangel appears to be of somewhat similar quality or feeding properties the world over.

The season in many parts bids fair, as already intimated, to cause a shortage of hay. In the early districts, winter-sown oats will soon be ready for the binder, and, as soon as cleared, this ground can be utilised to great advantage by being sown down with a green crop of some kind to be mown in the fall for the cattle that are housed. Black oats and common mustard, sown broadcast and harrowed or scarified in, will yield a great bulk of food for mowing green in October and November, and, with growing weather, a commencement may be made by the middle of September. This mixture is a very acceptable food, and wholesome, at that time of year, and will assist the beefing steers or the milking cows amazingly.

The time for abatement in our milking herds is now well upon us. With midsummer fairly past, and a week of July gone, we must look for a lessening supply of milk and its manipulated products. The glut is now safely over, and every effort will be required to maintain the stipulated weekly output for the dairyman. Succession cows will soon be needed, and these, in spite of bad times generally for keep, will be hard to buy. Every effort must be made to increase or, at least, maintain the measure of the existing herd supply, leaving the purchase of cows to a later period, when they will continue to influence the filling of the churns till the early winter months come.

The next few months promise to be of more than ordinary interest to all cattle-breeders. The show season is busier than ever for another two months, and, what is not usually the case, there are a great number of sales of pedigree stock advertised. Sussex cattle appear to have several notices of sales to take place. Red Polls also, and Jerseys, are still continuing to come before the public in considerable numbers. A sale of the famous and valuable old Longhorn cattle is also advertised to take place at Atherstone, on the L. and N. Western main line 100 miles from London. So far as export is concerned, Shorthorns appear to be most popular, and Herefords next in order.

It is scarcely likely, all things considered, that we shall have great outcry for store cattle this autumn, so that the American or, rather, Canadian cry for relief from the embargo will probably wax cold, as well as the cry from the handful of Scotch and Norfolk feeders who would fain see our ports once more opened. All parties may rely upon it that, as long as the present Government continue in office, there will be no relaxation of restrictions. This our worthy Minister of Agriculture expressed with no wavering when questioned as to the removal of the existing conditions. It is much easier to remove restrictions and to open the door for foreign importations than to rid the country of disease, which would be certain to make its appearance sooner or later.

By-the-by, that low lived complaint, to use the farm labourer's expression, hoose or husk in calves and young cattle, has made its appearance much earlier than usual this year, and, in some cases, with great virulence. The poor little sufferers lose flesh, and growth, and strength, in a deplorable manner. The cause of this hoose or cough is a fine, thread-like worm in the wind-pipe, which becomes very much inflamed, and if not checked at its commencement, both the inflammation and the cause of it find their way to the lungs, and the poor things end their life in the most pitiable manner. A good supply of fine, spring water is one of the best preventives, and a supply of best brand linseed cake, if the animals can eat it, will do much to keep up their strength and combat the disease.

Sale of the Riby Shorthorns and Lincoln Rams.

The first of the two great Lincolnshire sales took place last Thursday at the well-known Riby farm, when Messrs. Thornton and Co., in conjunction with Messrs. Calthrop and Briggs, sold by auction a portion of the herd of Shorthorn cattle and a number of Lincoln long wooled rams, the property of Mr. Henry Dudding.

The stock needs little description, for both the herd and flock have a great reputation, and, as the sale list shows, many of them were purchased for South America at high prices; 200 gs. being given by Mr. E. N. Casares for Waterloo Princess 22nd, winner of first prizes at several shows last year, as well as 155 gs. for the bull Royal Emperor Waterloo 10th.

Good prices were also paid for the best of the rams, 500 gs. and 420 gs. being given for the second prize and the reserve number sheep at the late Park Royal Show by Mr. Miller and Mr. Casares respectively. The cattle averaged £53 13s. 7d., and the Lincolns £89.

We give below a sale list, with purchasers' names and prices:—

COWS AND HEIFERS.

	Gs.
Red B.C. (out of Riby Marigold), c. October 2, 1904; s. Haycroft 3rd 83691 ..... Mr. E. N. Casares	21

The Bearwood Devons and Shires

The exceptionally wet morning deterred all but the most businesslike buyers from attending the sale at Bearwood on the last day of June. Though the company was small the prices were good, mainly by reason of a contingent of Devon cattle breeders from Somerset, who secured the majority of the best animals. The Hon. E. W. B. Portman, Hestercombe, Taunton, made a selection of thirteen for his recently re-established herd. Mr. B. C. Shepherd also purchased freely for his farm near Bridgwater. There were not quite so many purchasers for the Shire horses. The pigs did not realise such large prices as they might, owing to the greater portion of the company having to leave early to catch the train. The

Sale of the Buckhold Jerseys.

A number of Jersey cattle were offered for sale by auction on Tuesday last by Messrs. John Thornton and Co., at Buckhold, near Pangbourne, Berks.

They belonged to Dr. Watney, who has for many years been most successful in the butter tests held at the principal shows.

The cattle were brought out in beautiful condition, nearly all of them being out of cows that had won honours in the tests, and, as will be seen by the sale list, below, made good prices. The three-months-old bull calf by Sultan, dam Violette, winner of two gold medals, made 71 gs. (J. Carson), to go into Essex. An average of £25 6s. 10d. was obtained for the twenty-two head offered. Some cross-bred Exmoor ponies were also sold, and these made up to 17 gs.

We append a sale list:—

COWS AND HEIFERS.

Wild Thorn 3rd, whole colour, c. Nov. 22, 1898; s., Lord of the Western Isles 5869 ..... Mr. G. P. Mead — Gs. 25

The Buckhold ponies made up to 17 guineas.

Sale of Mr. W. Hazell's Shorthorns

The sale of Shorthorn cattle comprising nearly the entire herd belonging to W. Hazell, Esq., of Walton Grange, Aylesbury, attracted a good company, but the animals, which were brought out in ordinary condition, were not in such ready demand as might have been expected from their high-class breeding. A number of the cows were getting well into years, and many of the lots were quite small calves, so that the low average of £21 cannot be taken as a fair guide. Dr. Vaughan Harley bought the fine red cow Musical 91st at 32 gs., and her bull calf at 34 gs. The Hon. C. B. Portman made several nice purchases for his herd in Hampshire, as did Mr. Beamish for Ireland, and Mr. Savage for South America. The best price was for a Marigold heifer by Sultan; after sharp competition she fell to Mr. Fairfax Rhodes' bid at 61 gs.

The stock bull, Aldsworth Pioneer, bred by Mr. W. T. Garne, by that good sire Bapton Crown, was reserved at 200 gs.; but Mr. Savage got a very good pair of roan bulls in Royal Prince 2nd and Walton Prince, both sons of Royal Prince, for South America, at 27 gs. and 32 gs. respectively.

Messrs. Thornton and Co. were the auctioneers, and the following is a list of the prices and buyers of the best lots:—

COWS AND HEIFERS.

Musical 91st, red, c. Jan. 14, 1895; s., Royal Nottingham 10th 63279 ..... Dr. V. Harley — Gs. 32

Tunbridge Wells Farmers' Club.

At the annual meeting of the Tunbridge Wells Farmers' Club, Mr. E. Le May (retiring president), presiding over a good attendance, the receipts were reported to have been £121, and the expenditure £97, leaving a substantial balance in hand. Mr. Le May, having given a review of the year's work, proposed Mr. F. Walters, of Mark Cross, as the new president of the club, and this was unanimously agreed to. Mr. W. Troy was elected senior vice-president. The committee were re-elected, as were also the joint hon. secretaries (Messrs. Durrant and A. H. Tester), and the hon. treasurer (Mr. H. Paine). Votes of thanks were accorded the retiring president and other officers for their services.

Horse Notes.

"He doth nothing but talk of his horse."
— Merchant of Venice.

We might well take a lesson in horse breeding from the Arabs. There is, I think, no one who will gainsay the fact that the Arab is the purest bred horse in the world, and in the best Arab strains those which their owners designate as the "sons of mares," as distinguished from "the sons of horses"—there is not the least alloy, or has not been from time immemorial. The title "sons of mares" is synonymous with thoroughbred with Arabs, and it is significant of the way in which they have founded their best families, viz., in tail female, instead of, as our experimental breeders are trying to do, in tail male. There is, as Sir Richard Burton pointed out, not the slightest difficulty in buying stallions of the very best strains save the trifling one of price, for your Arab knows the value of his wares. But with a mare it is different. Mares are often the property of more than one owner, and the Arab objects strongly to parting with one of the best strains. Wiser than we are, he knows that in his mares lies his fortune.

The bluest of blue blood in the Arabian horse is Kohlání-al-Ajúz, or Kohlání (Kohl-eyed, so called from the darkness of the skin round the orbits, a sure sign of good breeding) of the old woman, the origin of which is accounted for by a curious legend. An Arab mare, when in flight, dropped a filly foal. Her rider was obliged to ride her on, for his enemies were hard at his heels, and on his arrival at his own camp he was surprised to see the foal arrive shortly after him. The foal was given to an old woman to rear, hence the name. The Arabs, it should be added, have always bred scientifically and with an eye to the remote future; hence their wonderful success in breeding to type. We, on the contrary, have not, as a rule, looked much farther forward than to the next cross or two. We argue, if we mate such a horse with such a mare we shall get a certain class of animal; that again crossed with another horse of quality will breed something like what we want; then we will begin to cross horses so bred and establish a breed. And so we can—on paper; and when we find that the breed, as it exists in the concrete, is very different from what we had theorised about, we begin to talk about the lottery of breeding. We begin at the wrong end, that is all. The Arab knows what he is about when he will not sell his mares, and when he establishes his families of horses in tail female.

"We confess we are not in the habit of paying much attention to the full pedigrees of half-bred stock." So wrote the Editor of the *Sporting Review* exactly sixty years ago. I fancy, if he had lived till now and had had the benefit of other sixty years' experience, he would have said something of the same sort, though there would have been less justification for it than there was when he wrote. But the fact undoubtedly remains that, notwithstanding the care with which some breeders take in preserving their pedigrees, and the useful work done by the Editing Committees of the various breed societies since the Clydesdale and Shire Horse societies were established some twenty-seven years ago, there have been, and are, a great many spurious pedigrees put forward by unscrupulous persons, and it would almost appear from what one knows of certain occurrences, as if they could carry out their fraudulent policy with impunity. The fact is the crime, for it is nothing less, has come to be looked upon as a venial one. When found out, or when a suspicious pedigree comes before a committee, it is rejected. Not much inquiry is made as to how it came about that a false pedigree was put forward for acceptance, and if an inquiry is made a more or less lame excuse passes muster, and nothing more is heard of the occurrence. Perhaps two or three people, talking it over, some one will say: "I did not think So-and-so would have done such a thing"; and if an opinion is ventured that there ought to have been a prosecution, immediately some one will reply: "But look at his family, if he is convicted it means imprisonment." And so the thing goes by without any serious notice being taken of it, and the delinquent laughs in his

sleeve and—concocts his next batch of false pedigrees more cleverly.

Things do not go quite on these lines in Bonnie Scotland. The Clydesdale Horse Society has always been very sharp in its action with the makers of pedigrees. There was a long and searching investigation into a lot of pedigrees early in the history of the Society, and the result of that investigation was published in a pamphlet which showed plainly enough the care which was exercised in keeping the early volumes of the Clydesdale Stud Book clear of false pedigrees. And recently the Society has prosecuted a horse dealer named Weir for uttering forged pedigrees. There was a long trial, and there was not the slightest doubt that the signature of a Mr. Miller had been added as the breeder, so that an export certificate might be granted, and a certain animal with an uncertain pedigree sent abroad. The jury found the prisoner guilty though they were not unanimous. Still there was a substantial majority of seven. And then, curiously enough, the jury recommended the delinquent to mercy. Why they did so it is difficult to understand. The sheriff sentenced him to a month's imprisonment, which certainly does not seem a heavy sentence. But in all probability it is severe enough, and will teach him not to tamper with pedigrees in the future.

That foreign trade in some breeds has been seriously damaged by the export of horses with false pedigrees there can be no doubt. There are some men who think that if only they get a horse out of their hands and get the money, the incident is ended. But this is not the case, and when men sell underbred and halfbred brutes with a good pedigree, and as pure bred horses, they do an injury to the trade in that breed which it takes a generation to undo. Nor have exporters been always to blame. I have met in my time with importers who were quite as blameworthy as exporters—who when the boom was on would take anything that was likely looking, and work their very hardest at pedigree-making for the sake of the profit at the far side. Like the husbandman in the fable, they killed the goose with the golden egg.

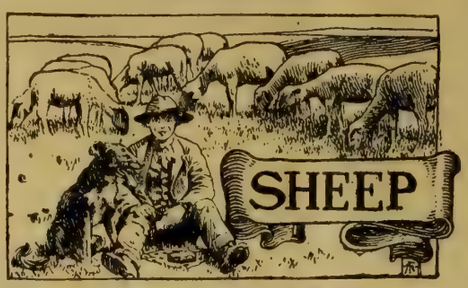
Great credit is due to the Clydesdale Horse Society for the action it has taken in this case. It cannot be too strongly impressed upon the purchasing public that the Breed Societies will leave no stone unturned to guard their interests. It is also of considerable importance to show gentlemen who look upon the manufacture of pedigrees as a harmless amusement, that it is a crime which will lead him who indulges in it to prison—and probably the next man convicted will get considerably longer than thirty days to reflect upon his wrongdoing.

It was from an article on the Norfolk Cob that I took the quotation about halfbred pedigrees. There is no mistake about the pedigree of the Norfolk Cob, who was one of the first Hackney stallions that was exported. This was not the original Norfolk Cob whose name was changed by his owner, Mr. Theobalds, of Stockwell, to Norfolk Phenomenon, but a son of his. He was bred by Mr. James Kendle, of Weasenham, near Swaffham, and in the Hackney Stud Book his dam is given as by Fireaway, but with no identifying number. The *Sporting Review* gives his dam's pedigree as by West's Fireaway, grandam by Jenkinson's Fireaway, which will be Fireaway 204 and Fireaway 201. There were, it should be added, three Fireaways owned by a West, but Fireaway 204 seems the most probable, as well on account of his colour—bright bay with black points—as that the date fits in well. Norfolk Cob was a brown bay, standing a little over 15 hands. His portrait shows him to have had a small, lean, blood-like herd, and to have had a very masculine appearance. His shoulders were long and well placed, his back short, and his ribs well sprung, and his quarters muscular and nicely turned. He had evidently been docked, but not so short as is now the prevailing fashion, and his tail, moreover, was not squared. He stood for fifteen seasons in one neighbourhood; then he was bought by Mr. Hewlett, veterinary surgeon, and stood at Bath a couple of seasons. Sir William Codrington purchased him from Mr. Hewlett and sent him to Jamaica when he was twenty years old. It would be interesting to know whether the old horse arrived safely in the West Indies, and whether his stock turned out well.

THE LOOKER ON.

Sale at Carlisle.

Messrs. Harrison held a special sale of sea-soned horses of all classes at their Carlisle mart on Thursday, 160 animals being forward. Buyers attended in large numbers, and trade for the best sorts ruled brisk. Prize-winners and the chief prices:—Cart Horses: 1, Mr. Beatty, Carleton, 45gs.; 2, Mr. Rush Carlisle; others from Messrs. Graham, Appleby, to 40gs. Saddle and Harness Horses—1, Mr. Dawson, Stainton, Penrith; 2, Mr. Dawson; others, from Mr. McKie, The Red House, to 48gs. Cobs not exceeding 15.1—1, Mr. Dawson, Stainton; 2, Mr. Keiller, Beechwood House, 31gs.; others, from Mr. Tuer, Bowscar, 25gs. Ponies not exceeding 14.2—1, Mr. Davidson, Schoolcroft, Ecclefechan, 28gs.; 2, Mr. Wills, Greenspot, Kirkbride; others from Mrs. Irving, Scotby, 25½gs.



Notes and Jottings.

From every point of view the poor attendance at this year's Royal is a matter of extreme regret. It may be it is a blessing in disguise, because the point has now been settled without question—namely, that the attendance of the general public from London cannot be obtained. It therefore means that the Royal Show will have to be run without this attendance—and that it could be there is no question, provided proper and businesslike management be adopted. From whatever point of view the exhibition in the sheep section at the late show be viewed the result is the same—namely, one of the most satisfactory exhibitions we have seen for several years. The reception of the two new classes added to this year's schedule shows how thorough the support given by the flockmaster is, and proves that what he requires is but to be given the opportunity to exhibit and it will be accepted. It may be urged that this only refers to certain breeds, but be this so or not, it is hardly fair or just to say any particular breed would not do as well were opportunity given it until such has been afforded.

Looking through the different sections we find that out of forty-five entries made in the Oxford class forty-one were present; in the Shropshire classes seventy-nine entries were made and seventy-three were present. The Southdown breed secured an entry of 104 and ninety-two were present. Fifty-nine entries of the Hampshires were made and fifty-five were present; thirty-one entries of Suffolks were made and twenty-nine were present. The Lincoln breeders sent in forty-six entries, of which forty-one were present. The Leicester breed gave good support, twenty-two of the twenty-three entries facing the judges. A dozen entries of Cotswolds were made, all being present. The Border Leicesters had ten out of thirteen entries present. The Kent or Romney Marsh breed's entry was the largest since Maidstone Show, only one pen out of fifty-two entries being vacant. The Wensleydales, like the Cotswolds, sent forward all the entries made—namely, twenty one. Nineteen out of the twenty-six entries of Dorset Horns were present; eight of the Devon Long Wool entries were present out of the nine made. The Dartmoors and the Exmoors each made six entries, all being present. The Cheviots made ten entries, and the Blackfaced Mountains eight, all of which were present. Four entries of the Lonk breed were all present, as were all the seven in the Herdwick classes. The Welsh Mountain breeds sent forward ten out of its eleven entries, and the Ryelands had the whole of their seventeen entries present. Such, then, is the record of the entries of the different breeds present at the Royal Show of 1905, from which there is full evidence of the excellent support afforded by the flockmasters. That these efforts, made with their full quota of recognition and reward, the brief summary of the many sales, etc., given last week is ample evidence. Further, it is evident that without such an opportunity being afforded them, more than one of the flockmasters, who made excellent sales last week, would not have done so. Another great point well worthy of attention is the opportunity for comparison that the large and varied entry which the Royal Show affords, both to the home or export buyer. This is one of the most valuable points in connection with the Royal Show, and many, indeed, have been the sales that this opportunity between the different breeds has brought about.

The greater attention being paid to wool at the present time was clearly seen by the larger entries at the Royal, and when at the East Kent Show last week we were struck to find there not only a large entry for competition, but a full attendance of breeders to inspect it. The awards, however, were not the same as at the Royal Show, and hence it is evident there is need of instruction amongst wool buyers as to what should constitute the best quality of fleece wool.

Mr. C. File has every reason to be satisfied with the result of his exhibition of wool at the Royal Show, for it brought him a buyer for his yearling ewes that grew it. This sale of Romney ewes to go to the Argentine is worthy of note from the fact that hitherto, except in rare instances, the sales of stud sheep to that country have been of rams only. Mr. C. File's sale not to be recorded, consists of six ewes, three of which produced the winning fleeces at the Royal, and the other three those from which the winning three were selected, and five yearling lambs, including the Royal first-prize yearling ram. Mr. A. Amos has also sold this week, for export to the Argentine, ten real good, typical Kent or Romney Marsh rams of excellent merit.

Lord Verulam sold his pen of winning ewe lambs at the Royal Show, together with two others of the same age, which are accompanied by five choicely-bred yearling rams; these were also sold for export to the Argentine.

The market value of wool is most satisfactory, and those flockmasters who have sold up to now have full reason to be satisfied with the price they have made. When there is a ready sale and good demand for any article, it is surprising how much more interest is taken in it. Possibly it is only natural, but to those who have urged all through the period of depression in wool prices, the greater attention now being given to the fleece gives satisfaction, because it proves up to the hilt the need of that greater attention.

Four years, and even three years, ago it was no uncommon thing to hear: "Don't talk to me about the fleece, wool is worth next to nothing and all sells at the same price." This is not the case now, for in more than one instance this season have judges, who were very indifferent to the evenness of the fleece at the period named, actually passed over good sheep for this very reason. This is commendable. What, however, is just as necessary now as when wool was low, is for the ordinary flock-master to be convined of the necessity of improvement. The discrimination between the different qualities of fleeces is not nearly so defined in the market quotations as it ought to be; nor do we think, under the more common practice of selling the wool privately, does the careful breeder secure so good a price for his wool as would be the case at auction sales. At these fixtures it is sold on its merits, and makes its market price; but at home it is sold, more often than not, a halfpenny per lb. more than the neighbour gets, on condition that no mention is made of this extra halfpenny—a similar condition being made, if an inquiry be instituted, with probably a larger proportion of the vendors to that particular wool-buyer. No objection can be taken to the condition, which is quite fair from the purchaser's point of view, save that it just shows the rottenness of a system that might have been all very well when it was started, but which is clearly out of date now a days, with all the facilities for cheap and rapid travel and transit.

Blandford Prize Sheep Sale.

Messrs. T. Ensor and Son, of Dorchester and Wimborne, held their great prize sheep sale at Blandford on Thursday week, when they submitted a total entry of over 5,000 sheep. The auctioneers gave the usual prizes for competition, and for the best hundred draft Down ewes sold the first prize was won with a pen of ewes from the noted breeding flock of Mr. Percy Cave Tory, Shapwick; reserve, Mr. E. W. Cave, Shapwick. There was a large company present, and a very steady trade ruled throughout, which may be quoted at from 1s. to 1s. 6d. ahead in advance of last year; but buyers did not seem to want to give more than the ruling price which seemed to govern the whole fair—namely, 48s. to 52s.

A Dorset Down Dispersal.

Messrs. Duke and Son's on Monday sold the well known flock of Dorset Downs, the property of Mr. T. Spiller, of Burton. There was a large and representative gathering of Dorset Down flockmasters at the auction, the result of which may be judged from the following exceptional prices: Six-teeth ewes, 56s. 6d., 55s., 54s., 51s. 6d., and 50s., average 52s. 9d.; four teeth ewes, 73s., 64s. 5d., 60s., 58s., 56s., average 60s. 8d.; two-teeth ewes, 70s., 65s., 59s. 6d., 57s.; 56s. 6d., 56s., and 54s. 6d., average 58s 6d.; ewe lambs, 53s. 6d. to 57s., average 55s. 6d.; wether lambs, to 37s. 6d.

Sheep Fairs and Sales.

Burgess Hill.

This fair, on Wednesday, opened the Sussex lamb selling season. There was a good attendance. The number of lambs penned was 3,185, and tegs 144, a total of 3,329, or a shortage of about 700. This is accounted for by the lambing season, and the abundance of feed, which induced several large flockmasters to keep their lambs at home to grow and make more money at later fairs. Trade was brisk, and prices ruled firm. The lambs were quite up to the average size and condition, the bulk changing hands at from 20s. to 25s. per head. The best specimens went higher, and the leading price was 31s. 6d.

Chichester.

This fair was held on Wednesday, when Messrs. Stride and Son held their first great special sale of the season of about 2,500 Southdown and other lambs from the local flockmasters. The lambs generally were shown in good condition. There was a good company of local farmers and buyers present, as well as several gentlemen from distant counties, and with the favourable outlook for roots a good selling trade resulted, and a clearance was effected, prices in most cases being 1s. to 1s. 6d. in advance of last year's rates.

Dorchester.

An exceptionally large number of sheep and lambs—some 12,000 or 13,000 altogether—were penned and a good business for all classes of sheep ruled throughout. The demand for young Dorset horn ewes was very keen at an improvement of 1s. to 1s. 6d. a head over last year's rates, the best making 48s. to 55s. apiece, and older ewes from 45s. to 52s.; horn couples, 56s. to 62s.; horn wethers, for which there was a very ready sale, from 48s. to 50s. 6d.; horn wether lambs, 28s. to 36s. 6d. In Down sheep the trade was equally brisk, ewes bringing 46s. to 51s. 6d. Wether lambs, which were very dear, sold from 30s. to 37s.; chilver lambs, 28s. to 34s. 6d.; mixed lambs, 26s. to 29s.; cross-bred lambs, 32s. to 38s. A better trade has not been experienced for years, every lot being cleared early in the day.

Harling.

On Thursday some 18,000 sheep and lambs were disposed of at East Harling by Messrs. Salter, Simpson, and Sons. Buyers came from such distant parts of the country as Notts, Herts, and Leicestershire, and many would-be purchasers who attended from the immediate neighbourhood found trade so fast, even as compared with that at Diss a week earlier, that they held their hands for somewhat easier rates, if such are forthcoming at the later dispersals. Second-draft lambs sold for their part equally as dear as the head lambs, and prices must be written as fully 3s. a head up on the year, with, perhaps, a margin beyond that. The highest price of the day (given by Lord Cranworth) was 47s. for Suffolk ear-marked lambs from Mr. Champion's registered flock, whilst two leading pens of first-cross from Lord Iveagh and Mr. L. R. Nottidge tied at the unusually high figure of 46s.

Wool Fairs and Sales.

Andover.

At Andover Wool Fair on Monday over 50,000 fleeces from the leading Hampshire Down flockmasters were pitched, and there was a representative attendance of buyers from the manufacturing centres, whilst a brisk trade prevailed. The bulk of the wool was sent in unwashed, and the top price realised was 11¾d. per lb., but general values were 10d. down to 9½d. per lb.. Washed wool fetched 13¾d. down to 13¼d. per lb. The prices are considerably in advance of last year's.

Alton.

On Tuesday, at Alton (Hants) wool fair about 15,000 fleeces were offered. The highest price was 13¾d.; average washed, 12½d.; and unwashed, 9¼d. per lb.

Basingstoke.

On Tuesday, July 4, Messrs. Raynbird and Sons held their twenty-eighth annual wool sale at the Auction Mart, Basingstoke, when there was a large and representative attendance of buyers from centres of the wool industry, including Halifax, Bradford, Winchester, Reading, Kidderminster, Athlone, Cork, and Scotland. It is satisfactory to report a better trade with an advance upon last year's prices, unwashed wool realising 8¾d. to 10d. per lb. and for washed wool 12d. to 13¾d. per lb.; Down lambs 8¾d. to 9¼d. per lb.; Scotch wool 8d. to 11¼d. per lb.

Blandford.

This important Dorset fair was held on Saturday, when staplers were present in strong force from all parts of the country, but flockmasters were not so largely represented as usual, many being detained in the hayfields. About 100,000 fleeces were on offer at sales conducted by Messrs. Ensor and Son (Dorchester), Duke and Son (Dorchester), and Senior, Godwin, and Young (Sturminster), for which there was a good, steady trade at very firm prices; greasy wools, for a very unusual thing, being almost as much in request as the better-class wools, being wanted for American purposes. The whole of the offer was quickly caught up at prices generally showing a rise of 2d. per lb. all round, the trade ruling very firm throughout. The best washed Down fleeces made from 13½d. to 14½d., Lord Wolverton, Lord Alington, Viscount Portman, and others realising this price; unwashed lots made 8½d. to 9½d.; washed lamb made 10¾d. to 12½d. These prices apply exclusively to Downs, a few lots of horns selling from 13½d. to 13¾d. for the best grades. There was very keen competition for some of the best-known wools, three or four merchants frequently bidding the same price. This will give some idea of the run of the trade, although by some considered not to be fast.

Chichester.

There was a good attendance at the wool sale on Tuesday, when bidding was brisk for 40,000 fleeces from representative Southdown, Sussex, and Hampshire flocks. Prices: Washed Southdown ewes, 12d. to 15½d., tegs, 12d. to 14d.; unwashed Southdown ewes, 9½d. to 10½d., tegs 8d. to 10½d.; West Country, 9d. to 10d.

Hemel Hempstead.

Increased interest was taken in this ancient fair, held on June 30, despite the wet weather, and about 4,000 fleeces were disposed of. Prices ranged from 21s. to 27s. 9d. per tod for washed and 17s. to 20s. 6d. for unwashed.

Huntingdon.

There was a good attendance of buyers, chiefly from Bradford, at this fair. Trade was slow from the buyers' standpoint, farmers holding out for higher prices. The pitch was 5,578 fleeces, weighing 1,279 tods 15 lb., slightly less than last year. Prices ruled from 28s. to 31s. per ton, the top figure last year being 26s. per tod. All the wool pitched got sold.

Malton.

Messrs. Boulton and Cooper, auctioneers, of Malton, opened a new wool market here. There were 10,000 fleeces pitched, and prices ranged from 7d. per lb. for locks and cots and to 1s. 0½d. per lb. for Lincoln and Leicester hogg wools.

Newport, Isle of Wight.

Forty thousand fleeces were pitched on Thursday. Bidding was keen. Prices for washed fleeces ranged from 12d. to 14d. per lb., and lamb's wool from 9¼d. to 13¼d., averaging about 2d. per lb. in advance of last year.

Reading.

Reading wool fair was held on July 1, when 15,000 fleeces were pitched. The wool was of good quality generally. A large number of buyers bidded briskly for the lots, and good prices were realised. Washed wool made 13¾d. with three exceptions, which fetched 8¼d., while unwashed made from 6½d. to 10¾d.

Stratford-on-Avon.

At this sale on Friday about 19,000 fleeces were pitched from many of the leading flocks in the neighbourhood. There was a good attendance of buyers, and prices ranged from 1s. to 1s. 2d., and greasy up to 10d. and 10½d.

Teesdale.

Owing to hot weather and sheep shearing, an enormous quantity of wool was marketed, all in first-class condition. Although moor sheep have not yet been collected for shearing, inland farmers have finished clipping, and the sheets to hand are of capital staple, clean, and of good weight. Quotations: Good bred Leicester hoggs ranged from 13s. to 13s. 6d. per stone, and half-bred wool from 12s. to 12s. 6d. Scotch wool made 6d. per lb., which is highly favourable, in a comparative sense, to heath flockmasters.

Swindon.

The wool fair was held on Thursday, about 20,000 fleeces being pitched. The wool was generally of good quality, and very satisfactory prices were realised. Washed made 1s. to 13½d., and unwashed 9¾d. downwards. The principal buyers were:—Messrs. Beaven, Holt, and Haddon, Bradford; Crow, Marlborough; Willey, Bradford; Walton, Halifax; Mahoney Cork; and Ballantyne, Walterburn.

York.

Although this season market nominally opened two or three weeks ago, little or no wool was sent until Thursday, and even then the number of new sheets pitched was only about 45. The wool shown was of various sorts, and was in very good condition, the clipping season having been an exceptionally favourable one in this district. Trade ruled firm, and there appeared to be a disposition on the part of the farmers to hold their wool in anticipation of a further advance on the present enhanced rates. The following were the quotations:—Best bred hogg, 14s. to 14s. 6d.; best bred ewe, 13s.; cross-bred hogg, 12s. 6d.; cross-bred ewe, 12s. per stone of 14¼ lb.

Eye Show.

Eye Colt Show was held on Monday and, as usual, brought some strong horse classes. The Suffolks had precedence in the catalogue. The colt foals formed a fairly good collection, Mr. James Rose, Laxfield, showing a nice Dennington Cupbearer foal, and Mr. Henry Turner one by Goldfinder. Of filly foals, however, there was a bigger entry, and the exhibits on the whole were of better quality. Mr. W. J. Packard had a specially choice Border Minstrel filly, which turned out to be the champion. Mr. Packard's exhibit carried off the 10-guinea challenge cup presented by Mr. S. Hill-Wood as the best Suffolk foal in the yard, the silver medal presented by the Suffolk Horse Society for the best animal in the first five classes eligible for registration in the Suffolk Stud Book, and Mr. Edward Peck's special for the best Suffolk foal in the yard.

The Shires and cross-breds made a good display. Mr. W. Dennis Wilson had three entries in the class for Shire foal, colt, or filly, one being a colt by Phenomenon, one a filly by Honest Regent, and the third a filly by Cretingham Harold. The colt, a very promising youngster, was not only first in the class, but carried off the 10-guinea challenge silver cup presented by the Hon. Charles Bateman Hanbury for the best cart foal other than Suffolk. The collection of Shire mares with foal at foot was only a small one. Mr. W. Dennis Wilson sent Cretingham Fuchsia, an extraordinary mare, by Blythwood Conquerer. She was, of course, first in her class, and in addition she was awarded the 10-guinea challenge silver cup, for the best Shire or cross-bred mare and foal, the silver medal offered by the Shire Horse Society.

About half a dozen good Hackneys with foal at foot, put in an appearance, the judges fixing their choice upon Celeda, by Blue Peter III., belonging to Mr. Chas. Devereux. There was a very good class of Hackney foals.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending July 1, 1905:—

NOTE.—The figures for the current year are approximate only.

Peterborough Show.

The annual summer show of this energetic and prosperous, as well as useful, society, was held on Tuesday, Wednesday, and Thursday of last week, the weather proving exceptionally favourable, and an excellent show resulted in every way. Shire horses, which are always a strong feature at these shows, were again very good indeed. Hunters were also a very creditable show, more particularly as regards quality. Hackneys and driving horses were most conspicuous in the driving competitions. Cattle were a good entry, and all the breeds (Shorthorns, Lincoln Reds, Angus, and Red Polls) represented gave a very satisfactory account of themselves. Sheep and pigs were a small entry, these sections seldom being very well filled at the shows of this society.

Hunters.

The catalogue commences with the hunters, of which, as stated, there were a number of horses, both adults and young stock, of very high cast. The first class was for weight-carrying brood mares up to fourteen stone, of which nine were entered, including several well-known winners. Mr. A. Sowler won the first prize with Victoria, by Meseaville, out of a Pathfinder mare. She had something to beat, however, in Mr. Carter's Countess, by May Boy, who stood second—an altogether admirable class of mare to breed either hunters or high-class carriage horses, according to the sire used. Sir Walter Gilbey's The Witch and Mr. Hayr's Mrs. O'Shea, third and reserve, are also well known, and first-rate brood mares. The best foals out of these mares were Mr. Sowler's, by Synadron Leader (second), Mr. Hayr's, by Barbarian (first), and Mr. Carter's, by Wise Ruler (third). In lightweight brood mares, Mr. Wilkinson's Glasspore, of quality and correct type for breeding, was first, Mr. A. J. Brown's Rosalinda, by Discord, second, and Mr. Robinson's Golden Leaf third. The best foals in this class were Mr. Mullen's, sired by Chevele d'Or, Mr. Burrell's, by Burgomaster, and Mr. Swallow's, by Wales. Mr. Carter and Mr. Rowell owned the best tenant farmers' mares, and the gold medal of the Hunters' Improvement Society was awarded to Glasspore. Amongst the young stock other than foals, the best were Mr. Nickisson's Success (first in the yearling class), Mr. F. B. Wilkinson's Destruction, by Harre (first in the two-year-olds), and Mr. Wilkinson's Jupiter and The Duchess (first-prize three-year-old colt and filly) as named. Mr. Wilkinson had also one or two other winners in these classes and other exhibitors showing first-class stock, and in the honour list were Messrs. Addington and Temple, Mr. Granger, Mr. Boddington, Mr. Rickaby, and Mr. A. J. Brown, Messrs. Cheney being very successful in the tenant farmers' class with a couple of wonderfully good three-year-old geldings by Autocrat. In weight-carrying hunters, Mr. Drage's Mercedes, Mr. Gale's Rightaway, and Mr. Stokes's Ronald, all well known and high-quality horses, were amongst the best. Whiskey, who has been so prominent lately, and championed the Richmond show, also took another first for Mr. Drage; he is up to a good weight. Amongst lighter weights and four-year-olds, Mr. A. J. Brown, Mr. Drage, Mr. Gale, and the Messrs. Cheney carried off most of the money. There was rather a strong entry of hacks of the hunter type, Mrs. Nutt taking first with a very smart riding mare by Ringoal. Mr. Stokes and Mr. Palethorpe also contributed capital hacks for the second and third places.

Hackneys.

The classes for these did not fill very well at Peterborough, indeed the show of them was very small in the breeding classes, but a number of purely bred hackneys were entered in the harness classes, where they are the most impressive. Two-year-old stallions were pretty well represented. Mr. A. A. Haley's Hiawatha, a smart and level goer, by Rosador, who carries himself well, too, was given the premier position, Sir Walter Gilbey's Dashing Duke, a son of Bonny Danegelt, coming in second, and Mr Lewis's Beacham Mashker was third. The first colt also carried off the Hackney Shire Society's medal, and the second one was reserved. The mare and foal class was one of the best as regards the winning animals, for Mr. W. B. Tubbs' Rosadora, just the type of Hackney to breed harness horses, was first, Messrs. Cockayne's Paddock Queen, a very sharp and level mover, second, and Mr. John Rowell's Bury Duchess third. Mr. J. Rowell and Mr. A. J. Rowell had the best foals in this section, both the get of Rosador, and these exhibitors also had the best of things in the tenant farmers' classes. Two-year-old fillies mustered seven entries. Mr. R. P. Evans' Pollinaris, who has made ag reat name recently at the Royal and elsewhere, and is a stylish good filly by Polonius, was the best of these. Mr. W. B. Tubb's Dashing Girl, who represents her sire, Royal Danegelt, properly, was the winner of the second prize. Sir Walter Gilbey's Dashing Princess was another filly well worthy of notice, and was reserve. Yearlings were a small class. Mr. W. Flanders, Mr. R. P. Evans, and Mr. A Lewis were at the front in the order named with these.

The largest entry in the hackney classes was that for mares or geldings shown in saddle, a condition that does not suit the exceptionally high-stepping portion of the Hackney world. There were some very good and well-known hackneys in this class of fourteen entries, Mr. W. B. Tubbs' Morning Glory and Mr. W. S. Cunard's Wild Lucy, two stylish movers, and grand in harness, were the best of them, such celebrities as Knowle Halma, Hopwood Spark, and Mermon Royal Dane were also in the money or honour list. The Hackney Society's medal for best mare or filly was awarded Messrs. Cockayne's Paddock Queen. The harness and pony classes were well filled with many of the leading animals of the day, but as the awards of these classes takes place each day of the show, they were not available at the time of writing.

Shires.

These classes may in all justice be called the chief feature of the Peterborough Society's Shows, for though the classes are a great portion of them open to the United Kingdom, the Peterborough district itself is quite sufficiently rich in Shires to make up an excellent show of this breed, a show that would stand second but to very few others..

The first class of this breed was that for stallions foaled in 1903, of which there were eleven entries, and the whole of the awards settled down eventually in the same order upon the same animals that were decorated at Park Royal last week. Lord Rothschild's Childwick Champion and Mr. J. Gould's Lymm Champion being first and second. These colts are of considerable difference in type, hence each has his admirers, so that upon the present occasion the services of an umpire were necessary before the awards were finally settled. Sir P. A. Muntz followed for third and reserve with a couple of Dunsmore Jameson colts, and Messrs. Forshaw and Son had also a very good colt in the class h.c. Two or three gelding classes followed. In the A.H. class, Lady Wantage, Mr. Freckleton, and Mr. J. Park being the chief performers, and some capital colts and horses were shown. At the same time it is really difficult to understand why these classes are not much stronger, seeing the great number of Shire colts that are bred every year. Probably the great demand for them for working purposes prevents their exhibition, which is sometimes a costly business. There was a large entry of twenty entire yearling colts, Mr. J. Measures leading with a splendid class of colt, Dray King, by Drayman 23rd, a properly balanced and correct-limbed colt with quality and bone. Mr. J. Gould's Catterall Black Prince, placed second, is another yearling of the right stamp, and very promising colts were also shown by Mr. Morley, Sir W. H. Cooke, Lord Rothschild, Sir P. A. Muntz, etc. Tenant farmers' colts were also a very useful class, the winner in the open was also winner with three other colts with build and character about them, and in the honours list were shown by Mr. F. W. Griffin, Mr. John Rowell, and Mr. R. Crawford. The open class of yearling fillies was quite the best that has been seen since the Islington Show last February, the winner at that show still holding her position, and having grown and furnished well. This was Lord Egerton's Tatton May Queen. Mr. John Bradley, Messrs. Thompson, and H.M. the King followed in the order named with extra choice fillies, in which the famous Dunsmore and Calthorpe sires, Dunsmore Jameson and Lockinge Forest King, stood out very prominently as sires. H.M. the King's filly, Lady Constant, is a daughter of Calwick Blen. Several fillies lower down the class were nine prominent in the tenant farmers' class that followed. These were Mr. J. Bradley's, Messrs. Fletcher and Andrew's, Hurman's, and Mr. F. W. Honell's fillies, any of which, with their weight, build and quality would have been able to head the open class a few years ago.

Two-year-old fillies also made a fine display, the London champion again heading the list for Sir Albert Muntz. This is an all-round slashing filly, big and full of substance and quality, a real Shire, and very pleasing in her limbs and feet. She, we may remind readers, is a daughter of Dunsmore Jameson. Mr. T. Simpson Joy, a comparatively new exhibitor, and who evidently intends to make his way in the Shire world, carried off the second and third prizes with fillies that show good judgment and management in their selection and bringing out, and one hard to beat. H.M. the King, Lord Rothschild, and one or two other exhibitors had also fine fillies just outside the money. The tenant-farmers' class of this age was also a fine class, seven out of eleven being noticed by the judges, and very weighty high-class fillies shown by Mr. R. Crawford, Mr. A. Smith's Trustees, Mr. Dewhurst, Mr. Frier, etc. At the head of the three-year-old class stood three or four remarkable fillies, Lord Rothschild's Helker Rachel, full of style and quality, being on the top, beating Mr. Bradley's famous Halstead Duchess 3rd, a short-legged grand type to breed from, and an all-round good filly; and Messrs. Forshaw and Son had also a capital filly third. Mr. Bradley's filly naturally was the best in the tenant-farmers' class; Mr. Crawford, Mr. Lee, and Mr. F. W. Griffin following with first-class fillies.

Mares, with foal at foot, turned out to the number of twenty-five entries in the open classes, and Mr. Hamer Towgood's Rolleston Fuchsia made an excellent first; her quality and splendid style are well known. Mr. R. W. Hudson's grand roomy and quality mare, Tatton Tapestry followed for second, and Lord Egerton's Mayflower third—these two having changed places from the Royal. Mr. E. R. Russell, Mr. Crawford, and Mr. F. W. Griffin had also grand mares in the class, which stood at the top of the local class, following in the order written. Earl Egerton, Sir P. A. Muntz, Mr. W. Jackson, and the Hon. N. C. Rothschild had the best foals as named, sired by Tatton Friar, Dunsmore Jameson, Knottingley Regent, and Birdsall Menestel respectively.

The interesting class for best pair of mares was headed by Mr. Towgood's Rolleston Fuchsia and Eastern Daisy; Mr. R. W. Hudson's Tatton Tapestry and Blythwood Laurel being second, and Earl Egerton's Rocks Madam and Mayflower third. Sir P. A. Muntz's Dunsmore Fuchsia was the best single animal and also champion of the show, Lord Rothschild's Rickford Farewell being second and also taking the Shire Horse Society's gold medal; whilst the subscription Challenge Cup for best mare or filly (tenant farmers' local) was awarded to Mr. F. Caswell's Lady Grey, Mr. Crawford's Fomesby Graceful being second.

CATTLE.

Shorthorns.

This section of the show commenced with the Shorthorns, of which there was a very satisfactory display. Messrs. Dean and Sons carried off first prize for bulls over two years old with Imperial Favourite, who vanquished H.M. the King's Royal Carlisle. Captain J. S. Reeve had a good bull in the third place. In the younger class were such good bulls as Hon. L. de Rothschild's Dinglass Marksman, Lord Calthorpe's Elvetham Monarch, and Mr. Steward's Ascott Star, placed as named, the latter bull heading the tenant farmers' class. Mr. Rowland Wood's Red Flag was also a good second in that class. Bull calves were a very good class in every way. Lord Powis' Handicap, and Mr. T. Stokes' Royal Sovereign, capital coated calves were the best of these. Imperial Favourite was the champion bull.

Cows made a very good show also, the Earl of Powis' Lady Signal, the Hon. L. de Rothschild's Grove Ursula, in good form for their age, were first and second; Mr. Steward's Scotch Maid 2nd, and the Earl of Powis' Welsh Maid were the best of the heifers under head. Heifers in milk were more of the beef than the milk type; Mr. Bell's Ratclough Witch and Sir Oswald Mosley's Duchess of Rolleston won first and second in these. Sir Oswald Mosley and Mr. F. Platt were first and second in a former class of heifers calves, and Ratclough Witch carried off the champion female prize. There was a very big class of large Shorthorns. Mr. Stanhope's roan cow being first, several of these showed excellent bags, and were quite of the dual purpose type.

Lincoln Red Cattle.

Mr. J. Frier and Mr. S. Crawley had the only two good bulls of this breed, both level and good quality ones. Messrs. Chatterton and Mr. A. Smith's trustees were most successful in the younger class, and Mr. Cartwright and Mr. John Evans and Mr. Frier owned the best cows, these classes were not very strong numeri-

Aberdeen-Angus.

This breed was capitally represented, Mr. R. W. Hudson's Danesfield Jester repeated his Royal victory as best bull, and Mr. J. R. Johnson's Jim Crow of Preston were the best in the younger class. Those beautiful cows Mr. Greenfield's Darling of Haynes 2nd and Mr. J. J. Cudlow's Mabel 8th of Knoppense carried off

first and second in this class, whilst in a good class of heifers Mr. G. A. Cooper and Messrs. Casswell were placed first and second as named.

Red Polled.

There were classes this year for this breed, and they were very satisfactorily supported in the district. Mr. J. Hammond's Dayson 244th was awarded first prize in the aged bull class, and the younger class of bulls, with seven entries, had some excellent stock in it; Mr. R. P. Cooper, Lord Amherst of Hackney, and the Right Hon. A. E. Fellowes were the chief exhibitors, the latter gentleman also headed a very good class of cows with Alba, Lord Amherst of Hackney's Popsey 6th taking second; and with a very good class of heifers (yearlings and two-year-olds) the Right Hon. Ailwyn Fellowes carried off both first and second prizes.

Sheep.

These classes were not at all well filled numerically, Mr. F. Ward and Messrs. Dean and Sons were the only exhibitors of Longwools, and Sir W. J. Pearce and Mr. T. F. Buxton in Hampshire Downs. In both breeds the prizes were pretty equally divided.

Pigs.

The pig classes, both Whites and Blacks were very creditable; indeed, the show of pigs must be considered very satisfactory indeed. Mr. R. M. Knowles, Messrs. Duckering and Son, Sir Gilbert Greenall, and Mr. T. Henson were all exceptionally well represented with some Large Whites. Mr. P. L. Mills, Mr. Measures, Mr. Daybell, and Mr. Neaverson doing well in the younger classes, and in Berkshires Mr. Jefferson, Lord Calthorpe, Mr. R. W. Hudson, Mr. A. D. Acland, with the Duchess of Devonshire, were the principal winners. Sir G. Greenall carried off the champion prize for best sow with Walton Lady Jane, and Mr. Knowles' Vanguard was accounted the best boar.

Speech by the Minister of Agriculture.

The President of the Peterborough Agricultural Society this year is the Right Hon. A. E. Fellowes, M.P., Minister of Agriculture, and he presided over luncheon in the show ground. Replying to the toast of his health, proposed by Sir Albert Muntz, M.P., Mr. Fellowes said that the House of Commons was an extraordinary place at times, and no one never knew quite what was going to happen in that great assembly. He had often thought that the country would soon demand that Parliament should be more master of its own proceedings, and that there should be less waste of time and less talking (applause).

The agricultural interest suffered most, because there was no doubt that since 1885 agriculturists had not got anything like the power which they used to have in Parliament. He most heartily agreed with the remarks of Sir Albert Muntz that the agricultural industry was still—and he hoped to Heaven it always would be—the greatest in the country. He was afraid they must look more after themselves than they had done in the past. He sympathised with Sir Albert Muntz in saying that there must be more co-operation and unanimity among them all. A great body like the agriculturists of this country could, if they chose, make their voices much more heard in the House of Commons—as much heard as were the voices of the borough members.

Referring to his visit to Park Royal last week, Mr. Fellowes remarked that the Royal Show was a great failure in many respects, but a great success in others. It was a great failure in that the attendance was of the scantiest; and it was a very extraordinary thing that such a fine exhibition was seen by so few English agriculturists. He supposed the old saying was very true that when a show was held near London there were many attractions which prevented people from attending. He trusted that the new Council of the Royal which would be appointed on August 1 would be able to raise that great national Society to its proper level, and that it would have, as in years gone by, that great success which it richly deserved (applause). The recent show had been a great success first, in the quality of the stock, and then in the enormous prices that were obtained for some of the animals. There were more foreigners than our own countrymen at Park Royal, the foreigners gave very large prices for what they bought, and knowing the value of live stock to this country, he thought they would agree it was the bounden duty of the Board of Agriculture to see that we did not run the slightest risk of them importing any disease from abroad. Where would English agriculture have been during the last 25 years if it had not been for live stock, and the prices paid by foreigners for export purposes? No Government, no President of the Board of Agriculture, would be rash enough to give any encouragement to the importation of animals from a country where there was the slightest danger of any disease. The question of glanders was one which demanded earnest alteration, and he had approached the Treasury to help the Board of Agriculture to find money so that they might tackle glanders in the same way, as they had other diseases (applause).

East Kent Agricultural Show.

Ramsgate was chosen for the location of the tenth annual exhibition of this society, and the ground selected was thoroughly suitable and convenient of access. The arrangements made were well thought out, and carried out in a most satisfactory manner from start to finish.

Cattle.

The cattle section, to which we first give our attention, was a good one all through, of good merit, but not quite so large in point of numbers as we have seen at some former shows. Mr. F. H. Padwick judged the Jerseys. Here some notably fine animals were found, particularly those with which Mr. J. C. Drew won first prize in each of the three classes. For bulls he won with the well-known Black Pearl, a bull of the choicest merit; Mr. Cousins's winner was Wadhurst May Flower, whose herd mate Clarionette took r.n., and for heifers his winner was Little Queen, a heifer of high merit. Col. W. A. Huntley took second honours.

The Shorthorns, judged by Mr. Arthur Hiscock, jun., were of a very superior quality all through. In the bull class Mr. J. Colman's Millhills Favourite was correctly put to the fore; here we found superior quality and excellent flesh; next came another roan bull of fine type, owned by the Marquis Camden, Farrics Chieftain. With that fine cow Ardflet Belle, Mr. J. Colman went again to the front; this is a nice even flesh cow with good milking properties. Mr. F. W. Monckton, with Frost 92nd, one of Mr. D. Arkell's breeding came in second. The heifer class was one in which there was keen competition, Mr. R. J. Balston with a beautiful heifer of choice pedigree, bred by Mr. H. L. C. Brassey, took leading honours.

The competition in the Sussex classes, judged by Mr. H. Rigden, was a limited one, although it is satisfactory to note that the merit was of a superior character. The Hon. R. P. Nevill won for bulls with Bonfire Prince 2nd, a real good type of a Sussex bull; in Mr. W. F. Winch's Lord Crumple was also found both merit and real good flesh. The last named exhibitor won in the cow class with that beautiful cow Warden Lady, fresh from the third success at the Royal Show. The competition in the heifer class was an excellent one. The Hon. R. P. Nevill won here with Birling Eleanor, and was c. for Birling Madge; Lt.-Col. Hammond and Messrs. W. F. Winch, with Mr. A. J. Horsman were the other successful competitors.

The other pure breed classes, also adjudicated upon by Mr. H. Rigden, were practically all Aberdeen Angus, and the entries from Mr. G. Drummond's grand herd at Swaylands took all the leading awards.

Horses.

The Shire horses were represented by a very first-class entry indeed. These were judged by Mr. T. B. Freshney. The winners in the stallion class were two very first-class stud horses of high merit and character. Mr. Walpole Greenwell with Marden Harold won first honours. The brood mare class was a superior one all through; the winner here was Rednall Lass, by Regent, owned by the Marquis Camden, a wide and deep mare with first-class feet. Mr. W. Greenwell took second honours with another high-class brood mare, Hendre Beryl. The foal class was well contested, the filly from the Marquis Camden's mare Rednall Lass, by WestleyRegent, taking first place by a narrow margin over Lord Hothfield's colt foal by Hutton Victor Chief out of Zoe. In the three-year-old class Mr. Walpole Greenwell's two specially fine fillies Marden Pride and Marden Queen were first and second, the former by Codnor Harold and the latter by Dunsmore Jameson. Mr. F. de B. Collard was third with Thanet Rosebud and Mr. E. Neve r.n. with Amberfield Rosamund. In the two-year-old class Lord Hothfield, with Empress, a very fine well-grown filly with real good bone and quality took first honours, Mr. E. Neve taking second honours with a taking black filly.

The competition in the tenant farmers' classes were a pleasing feature of the show, particularly on account of the excellent quality and keen competition found all through them.

The Hunter section was not a large one, but its competitors were of nice merit, most of them being bred locally. The same remarks are also applicable to the three classes for riding backs, whilst in the classes for driving, tradesmen's turnouts, and jumping, the entry was of good merit and interest very keen indeed

Sheep.

The Kent or Romney Marsh breed, in which the judges were Messrs. J. Finn Kelsey and J. H. Harvey, made an entry that will be remembered as being one of very special merit and superior quality. The yearling ram class had an entry of twenty-four, and but few of these were other than of high merit. Mr. C. File, with Elham No. 58 of 1905, took first honour; this is a very lengthy and level ram of nice type. The second entry from this flock, Elham No. 90 of 1904, first at the Royal and Royal Counties, was hardly at his best, and he came in for second honours. These are two real good rams. Next there came two from Mr. M. Millin's flock, sheep of very high merit and grand type, Snydale No. 40 of 1904 that went third is a ram with a skin much sought for, while its flock-mate, Snydale No. 99 of 1904 has fine scale, excellent substance, and notable quality. Mr. H. Rigden took an h.c. with r.n. and a.c. for two particularly even and good woolled rams. And Mr. C. File's third entry a ram of real merit with splendid flesh, came in for an h.c. The two Shear Ram class was one of superior merit, and also one in which the competition was a thoroughly keen one. Here first honours went to Mr. H. Rigden for a beautiful type of its breed, true in conformation and masculine in character, its flock-mate, an almost equally good ram, went third, and between them was placed a ram from Mr. F. Neame's flock that showed very true type and a splendid fleece of wool. Mr. G. Farmer's r.n. ram was one of good substance with plenty of bone and fully masculine in character; the h.c. that Mr. H. Waters won for a ram bred by Mr. A. Conor was equally well deserved, and the c. that Mr. C. File took for his very blocky deep-carcase sheep was hardly sufficient to fully recognise the special merit of this first class ram.

In the class for rams over three years of age, Mr. C. File won with a beautiful ram of rare good type and substance, his second entry here came in for the r.n.; and Mr. H. Rigden was commended. The champion prize offered by the Kent or Romney Marsh Sheep Breeders' Association went to the winner in the Older Ram class, and the r.n. to Mr. C. File's yearling ram, which was the get of the champion ram at this show.

In that notably strong class of yearling ewes Mr. C. File again, as all through the season has been the case, went to the first place with that pen of ewes the like of which is seldom seen for either merit or quality, the second entry from the same flock were made third winners, and a real good pen they were. Mr. F. Neame took second honours with a pen that are decidedly in the improvement, they handle better than they did, and have very excellent fleeces. Mr. W. Millin came in for the r.n. honour with a pen of rare good type and merit, good in the fleece, and very even in conformation. Mr. F. Neame was h.c., and Mr. G. Farmer c. for two very well brought out pens, the latter one showing plenty of substance and good type. With an entry of eighteen the ram lamb class was of very special merit indeed. F. Neame won with a very first class pen indeed, level in size and equally good in their fleece. Mr. H. Rigden was a good second, beaten by but the narrowest of margins, these three lambs were of excellent type and good fleeces. Third honours went to Mr. C. File, whose pen were masculine in appearance, good in their flesh, and well matched. Mr. J. E. Qusted was r.n. with a pen of well grown lambs, evidently selected with care and even in their type. Mr. W. Millin's h.c. pen was another of high merit, excellent heads, and very even fleeces were noticeable points in connection with this pen of high class lambs. The Earl of Verulam was v.h.c. and Mr. C. Prescott-Westcar took a deserved commendation for a well bred and matched pen of lambs. The Ewe Lamb class was an excellent one, but the order of merit as decided by the judges is somewhat open to question. Mr. J. E. Quested won first, followed by Mr. C. File, whose pen lacked that uniformity of size generally expected in a pen of lambs, but whose individual merit was first class; then came a pen of very even type, grand fleeces, and nice quality that might have taken first honours for Mr. F. Neame. Mr. H. Rigden was r.n. with a choicely bred pen; Mr. E. Acherson, h.c.; and Mr. P. Hillman, c.

The Southdown entry, judged by Mr. H. F. Padwick, was noticeable for its number and quality. Mr. E. Ellis secured a notable success, none of his entries being defeated. In the Yearling Ram class first, second, and champion honours were won with two particularly fine and well brought out rams that came to the hand in excellent form; and in the old ram class first and second honours again went to Mr. Ellis. The Ram Lamb class was a good one all through, here Mr. E. Ellis won with a rare good pen full of quality and good flesh. Lieut.-Colonel Hammond's entry ran them close, came in the second

place; these were three grand lambs with good scale and fine quality. The contest in the Ewe Lamb class was another very keen one indeed, Mr. E. Ellis won with perfect ease, his pen being a very superior one indeed; Mr. J. Colman ran in the second place with an even and good flesh pen of typical lambs; whilst the third winners from Lieut. Colonel Hammond's flock were of great scale and superior merit. Mr .T. Miles again had to be content with r.n. In the Flock Ewe class the competition was somewhat smaller than last year, but the merit was very good indeed. Lieut. Colonel W. W. Hammond won with an excellent pen.

Pigs.

The pig classes, judged by Mr. A. Hiscock, jun., were not large, but the merit all through was good. The Duchess of Devonshire, with some very typical pigs, won all through the Berkshire classes; and in the Large White and Middle White classes Messrs. R. A. Ayre, P. Miles, the South-Eastern Agricultural College, and J. D. Maxted were the leading winners.

Produce.

The wool classes secured an excellent entry of very high merit indeed, Mr. F. de B. Collard, Messrs. Kelsey, and Mr. F. Neame were the leading winners in the three classes for Kent wool; and in the corresponding classes for South Down wool Messrs. W. Dockeray, R. W. Wood, and H. Fitzwalter Plumptre were the leading winners.

The competition for Hops, Butter, etc., was very good indeed, and the show taken as a whole was one of the best, so far as regards merit, the Society has ever held.

Highland Show.

The seventy-eighth show of the Highland and Agricultural Society, which marks the first visit of this body to the permanent showground of the Glasgow Agricultural Society, opened on Tuesday, and continued over the three following days. The show, taking it generally, is a good fair average of Highland and Agricultural Society exhibitions. There have been years when the cattle classes were better filled as regards numbers, and when there were a greater number of notable exhibits put before the judges, but of all the breeds there is an exceedingly interesting display, and in certain individual sections—the yearling Aberdeen-Angus heifer class, for example—quite a high standard is touched. Of horses, too, there is a very excellent show, as one might reasonably expect to see in the west of Scotland, where so many Clydesdales are bred.

The following were the entries compared with those at Perth last year, and at the preceding Glasgow Show in 1897:—

	Glasgow. 1905.	Perth. 1904.	Glasgow. 1897.
Cattle	3 1	848	317
Horses	470	315	250
Sheep	291	283	245
Swine	61	35	30
Poultry	531	413	275
Dairy produce	70	46	126

Cattle.

Shorthorns were fewer in numbers, the deficiency being principally traceable to lack of English support. In a good class of eight aged bulls the judges had no difficulty in awarding the first ticket to Mr. Marshall, Stranraer, for Roan Conqueror. Second place was secured by Captain C. Home Graham Stirling, of Strowan, with Strowan Champion, a roan bred by the exhibitor, by Northern Chief, and Mr. Marshall took third position with Primrose Knight. The fourth award fell to Mr. Laurence Johnston, of Sands, with Meridian, by Scottish Warrior. Among two-year-old bulls premier honours were awarded to Meteor, the white bull belonging to Mr. R. P. Cooper, Lady Cathcart, Cluny Castle, came into second place with Edgar of Cluny, and Mr. George Harrison, Darlington, stepped into third place with Pioneer. Royal Eclipse, an Uppermill-bred bull, belonging to Mr. Duncan Stewart, Millhills, received a very highly commended ticket. In a large class of yearling bulls the first prize went to Mr. J. Deane Willis for Orphan's Chief. In the second place was put the Dublin first prize and the Royal third-prize winner Fascination, belonging to Mr. A. T. Gordon, Combe Causeway, Insch. In a small class of aged cows, first place went to White Heather, Mr. Deane Willis's seven-year-old. Mr. George Harrison came second with Ursula Raglan, and third place was awarded to Sir John Gilmour, of Montrave, with his five-year-old Annie Wenlock. Of the three two-year-old heifers exhibited, Mr. James M'William won comfortably with Hilda 2nd, a roan bred by the exhibitor, by Bright Stone. Mr. Cameron, Balnakyle came second with Butterfly 39th, and Mr. W. T. Malcolm third. In an exceedingly interesting yearling heifer class, Mr Alfred Haley, with Marchioness 24th, took first place. The second was Eastthorpe Gem, shown by Mr. T. J. Sowerby, and third place went to Lord Lovat for his promising roan, Lady Teazle.

There was a keen competition for the champion medal for the best shorthorn. The judges failed to agree between Mr. Marshall's Roan Conqueror and Mr. Haley's Bright Jewel VI., and it was only after calling in the assistance of Mr. John Cran, Bunchrew, as umpire that Mr. Marshall received the award. The Tweeddale gold medal for the best shorthorn bull, the £25 prize given by the Shorthorn Society for the best shorthorn bull in the show entered or eligible for entry in Coates's herd-book, and the silver medal for the breeder of the best bull of any age in Classes 1, 2, and 3 all going to Mr. Marshall for Roan Conqueror.

Aberdeen Angus cattle were very short in numbers, being only half of those last year at Perth. In a fair class of aged bulls, Mr. White, with Jim of Delvin, showed the champion of the yard. The second in the class, Khartoum of Ballindalloch, was exhibited by Mr. Macpherson, but some around the ring would have preferred the third prize-winner, Jeshurun, shown by Mr. Cran. In the two-year-old class, Mr. M'Laren, Auchnaguie, led with Erello, where the second was Mr. J. E. Kerr's Parsee of Harviestoun, a bull of greater substance. The third winner, Perfection of Sands, was shown by Mr. Charles Calder, Ponteland. In the yearling class there was strong competition between Sir George Macpherson Grant and Mr. Calder, of Ardargie for leading place, and ultimately the winner was found in the former's England. In an average class of cows, Mr. R. Wylie Hill, Balthayock, led with Bartonia of Glamis. Second place was allotted to Mr. J. R. Findlay, of Aberlour, with Pride of Honour, and Mr. George Willsher was third. In a good class of two-year-olds, Mr. J. E. Kerr, Harviestoun Castle, was first with Juana Erica. The yearling heifers was one of the best classes in the show. In this class the judges disagreed, and Mr. Grant, Bunchrew, was called in to give the award. The decision, which was in favour of the King's Abergeldie Mains-bred Gwytch, was a popular one. The second prize went to Mr. Kerr, with Princess Kobe. The championship went to Mr. Whyte's aged bull, with Mr. R. Wylie Hill's cow, Bartonia of Glamis, reserve, the latter carrying off the Ballindalloch Challenge Cup for the best cow. Galloways are a fair display. In the first class Mr. A. H. Fox-Brockbank easily headed the group of seven with Defiance. The second award fell to Mr. John M'Cormick for Othello. The third-prize winner was found in a bull shown and bred by Mr. James Wilson, Tundergarth. There was a good, all-round class of younger bulls, the winner being found in Mr. Dudgeon's Chief III. The second place was filled by Marchfield Stanley, shown by Mr. Thomas Graham. The yearling bulls were not specially strong in numbers of merit. Mr. Robert Graham, Auchengassel, led with his Black Pearl. There were four entries of cows, two of them being animals of exceptional quality. The first is Mr. A. B. Matthews's Knockstocks, and the other cow of outstanding merit, which occupied second place, was the Castlemilk Alice II. The two-year-old heifers were not quite up to the mark of previous shows, but the yearling heifer class was more meritorious, seven being forward out of nine entered. There was an interesting competition for the championship of the breed, the preference being Mr. Matthew's splendid cow. The silver medal to the breeder of the best bull fell to Mr. Graham. Highland cattle were a more than useful lot. In a very fine class of aged bulls the Duke of Atholl led with Fear-a-Bhata. Following him came Mr. D. A. Stewart's four-year-old, Morair-nan-Eilean. In a good class of two-year-old bulls, Bullough's trustees won with the brindled Lord Clyde. He was followed by Mr. Allan Gilmour Thom's Waverley, and the third ticket was awarded to the Countess-Dowager of Seafield's King Malcolm. Yearling bulls made a very fine show, and the premier award was given to the Earl of Southesk's Saladin. Cows in milk, any age, were led by the Duke of Atholl's Te Riabhach V., while Mr. Thomas V. Smith, of Ardtornish, was second. An outstanding first was found amongst the three-year-olds in Mr. D. A. Stewart's Laochag. Two-year-old heifers made a strong muster, and a leader was found in the Earl of Southesk's Princess Almira. The best bull was judged to be Lord Clyde. The contest for the breed championship lay between Mr. Sopper's bull and the Ensay three-year-old heifer, and the judges failing to agree, Mr. James Cameron was called in, and the award was given in favour of the heifer.

Ayrshires were a large show, and in the old bull class quite a number of old opponents met, and a surprise was in store for everyone when Mr. Kennedy's "Safeguard of Glenshamrock" was placed in front of Mr. James Howie's "Wynflette." Two-year-olds were a smaller class, and the judges had less trouble in placing them. Mr. Barr's "Zomo-sal" secured the red card. The male championship was allotted to the aged bull "Safeguard of Glenshamrock," with "Zomo-sal" as reserve. Among the cows the best was "Harvey 6th of Manswrae," bred and owned by Mr. Robert Wilson. The winner was very closely followed by a pretty white cow shown by Dr. Douglas, M.P. There was keen competition in the class for cows in milk, calved after January 1. Mr. James Neill, Barleith, had the honour of carrying off the first and fourth tickets. The first was the home-bred "Topsy 2nd of Barleith." Second prize fell to "Old Graitney Sonsie," owned and bred by Messrs. Kerr. The third ticket went to Mr. Robert M'Allister. For cows of any age in calf, first prize was taken by Mr. Alexander Cross's "Lady Jane." The female championship was awarded to Mr. Robert Wilson's aged cow in milk, with Mr. Neill's three-year-old heifer as reserve, while the president's medal for the best animal also went to Mr. Wilson's aged cow.

Horses.

Light horses make a much finer show at Glasgow than they do when the show is further north. The 95 hunters that are distributed over ten classes include a number of winners at Park Royal. Mr. J. H. Stokes, of Market Harborough, a leading winner at the Royal, is well represented here, and as there is not so much competition to face he is a great deal more successful than a week ago. His four-year-old bay Artist, for instance, which had to be content with third place at the Royal, now comes right to the front. Another class of four-year-old hunters—that for light weights—is also led by a representative of Mr. Stokes' stud. This is the chestnut gelding Kitchener, by Khartoum, who stood second at the Royal. He is of fine quality and fair strength. The two best aged hunters to carry over 15 stone likewise came all the way from Market Harborough, and the same stud sends all three prize-winners in the class for lighter weight hunters. The six-year-old chestnut Gold Reef, who was first, and Lady Emily, who was second, are both well known winners. The first-named, whose pedigree is unknown, is a grand horse, and if the mare has as much quality she is just a little slack in her loin. Although there was apparently nothing to choose between them when they galloped, the gelding had the best of it when the saddles were removed. It is a tribute to the uniform standard of merit that guides judges in the north as well as in the south that these two hunters have been placed in precisely the same order at Glasgow as at the Royal. Mr. Alex. Cross, of Renfrewshire, was fourth with Feeding Box, a very nice horse, shorter coupled than the three who beat him and with less quality, but still a hunter all over to look at. The Hunters Improvement Society's medal goes to Scotch March, a nice two-year-old belonging to Mr. Saunders, of Longtown, and the reserve ticket is given to Mr. J. C. Martin, of Dumfries. The animal with which Mr. Stokes carries off the championship was bred by Mr. Coates, of Pickering.

The best of the Hackneys is Crayke Czarina, shown by Mr. Stephen Cliff, of Easingwold. This mare was among the winners at the Hackney show, and at the Bath and West at Nottingham, as well as at a great number of local shows. To-day she practically carried everything before her, being not only at the head of her class, but also securing the Hackney Horse Society's gold medal as well as the championship. The reserve for the championship is Mr. Rennie's well-known stallion The Autocrat, bred by Mr. Mitchelson, of Pickering, and sired by Garton Duke of Connaught. It is gratifying to find that the two exhibits reserved for the gold medal were also bred in the home of the hackney, although they have now found their way to North Britain. A nice trio of fillies is led by Copmanthorpe Duchess, a daughter of Garton Duke of Connaught, the property of Mr. Hall, of Copmanthorpe Grange, York; and the three-year-old stallion Dumbarton, with which Mr. Haley, of Malton, took second honours at Birkenhead, repeats his success on the Clyde.

Ponies of all kinds—polo, Highland, and Shetland—are numerous, and many of the awards go to exhibitors from around the district in which the show is held.

Clydesdales

Clydesdales make an excellent show, the number of entries being close upon 200. Among aged stallions first honours went to Mr. W. S. Park, Hatton, for the five-year-old "Royal Chattan." The next three stallions are all sons of "Baron's Pride." Mr. Wm. Dunlop's five-year-old

THE TENS OF THOUSANDS of users of MOLASSINE MEAL should see that their stock have a portion in every feed all the year round, not simply as a condiment when an animal is out of condition, or occasionally as a fillip. MOLASSINE MEAL is the most valuable and economical food, displacing all condiments, and should be given in place of the same weight of oats, beans, grain, cake, or other feeding stuffs. Sold by all corn merchants and the MOLASSINE CO., Ltd., 36, Mark Lane, London, E.C. —[ADVT.]

"Baron of Buchlyvie," bred by Mr. M'Keich, Carse of Trowan, being second. The three-year-old colt class is large in numbers, there being twenty-two entries. Mr. James Kilpatrick was first with "Perpetual Motion," a bay "Hiawatha" colt. Messrs. A. and W. Montgomery were second with "Silver Crest." A class of twenty-seven two-year-old colts was headed by Messrs. A. and W. Montgomery's "Baron Fyvie," a son of "Baron's Pride." Mr. William Clark was second with "Dunnydeer," a colt bred by Sir Frederick Dunbar; and Mr. George Ferguson third with "Allandale." There are twenty entries of yearling colts, but as regards quality they are scarcely up to the standard of the two-year-olds. Messrs. A. and W. Montgomery were first with an outstanding youngster by "Baron's Pride," which moves with great style, and is full of promise. Mr. James Kilpatrick was second with a "Baronson" colt, and the third ticket was given to Mr. James Dunlop, Barassie, for "Baron's Conqueror." In the competition for the championship in the male section all the three judges officiated, and the contest lay between Mr. Walter Park's aged stallion and Messrs. A. and W. Montgomery's two-year old. After a considerable scrutiny the palm was awarded to "Royal Chattan," the reserve ticket being given to "Baron Fyvie." Brood mares are an exceptionally fine lot, and of the fourteen animals entered, eight were deemed worthy of a ticket. Mr. James Boyd had an outstanding winner in the seven-year-old "Topsy Pride," There was a fairly good class of a dozen yeld mares, and here Mr. J. Ernest Kerr, of Harviestoun Castle, was first with "Pyrene." There was an interesting competition for the female championship, which was decided by the three judges. Mr. William Park's two-year-old filly, "Rosadora," and Mr. J. Ernest Kerr's yeld mare, "Pyrene," were drawn out from the first prize-takers in the different classes, and in the end the Brunstane exhibit prevailed.

Sheep.

Blackfaced sheep commence the catalogue. The first place in the aged tup class was taken by a two-shear sheep belonging to Mr. J. Archibald, Overshiels. In a large class of thirty-two shearlings, the judging of which took a considerable time, Mr. James Clark was placed first with Heather Bell. The president's medal, and Mr. Howatson of Glenbuck's prize, also fell to him. Mr. Sinclair Scott's challenge trophy for the best group was won by Mr. James Clark's lot.

Among Cheviots the aged sheep were headed by the two-shear sheep of Mr. John Robson, which was selected for the president's champion medal and the challenge cup for the best sheep in the Cheviot classes.

Border Leicesters made a most meritorious display, the entries being large. In a large class of thirty-eight shearlings Mr. David Hume, Barrelwell, secured first honours with a ram sired by "Prime Favourite," one of the Oldhamstocks flock. This tup carried off the president's medal and the breed prize.

The display of Shropshires is small, and Mr. R. P. Cooper, Shenstone Court, Lichfield, earned the distinction of capturing the first prizes in all four classes. Mr. James T. Hobbs, Maisey Hampton, Fairford, Gloucester, secured all the prizes in the two classes for Oxford Downs, and Mr. Alexander Anderson, Berryhills, Dundee, with two exceptions, did the same thing in the classes for Suffolks.

Judges.

Shorthorns.—Messrs. James Rodger, Keir Mains, Dunblane; and R. Stratton, The Duffryn, Newport. Aberdeen-Angus.—Messrs. Henry Lindsay, Home Farm, Glamis; and John Murray, Munnieston, Kippen Station. Galloways.—Messrs. William Barbour, Cuil Park, Castle-Douglas; and William McConchie, Mains of Penninghame, Newton Stewart. Highland. Messrs. Robert Macdiarmid, Castles, Lochawe, Argyllshire; and John McPhail, Ardura, Craignure, Isle of Mull. Ayrshires.—Messrs. A. Y. Allan, Bedholm, Woodfield Road, Newton, Ayr; and William Howie, Finnochbog, Inverkip.

Clydesdale Females.—Messrs. George Anderson, West Fingask, Old Meldrum; James M'Clean, Auchneel, Stranraer; and Alexander M'Robbie, Sunnyside, Aberdeen. Clydesdale Males.—Messrs. William Neilson, Haining Valley, Linlithgow; William Taylor, Park Mains; and James Weir, Sandilands—the last mentioned in each class being the umpire in the case of a difference of opinion between the other two judges. Hunters.—Mr. R. A. Barkley, Palgrave, Priory, Diss, Norfolk; and Lord Rathdonnell, Lismavagh, Rathvilly, Co. Carlow. Hackneys and Harness Classes.—Messrs. C. E. E. Cooke, Bygrave House, Baldock, Herts; and A. W. Hickling, Adbolton, Nottingham. Polo and Riding Ponies.—Mr. T. H. Hutchinson, Manor House, Catterick. Highland Ponies.—Mr. William Logan, Inverness. Shetland Ponies.—Mr. James Duncan, Fern Villa, Inverness.

Blackfaced.—Messrs. William M. Clark, Blackhope, Heriot, and James Murray, Low Ploughland, Strathaven. Cheviot.—Messrs. David Hall, Larriston, Newcastleton, and Michael Johnstone, Alton, Moffat. Border Leicester.—Messrs. Donald Fergusson, jun., Dalcapon, Ballinluig; and James Niabet, Lambden, Greenlaw. Half-bred. Messrs. William Ballantyne, Wormiston, Eddleston; and Andrew T. Elliott, Newhall, Galashiels. Shropshire and Oxford Downs.—Mr C. Coxon, Elford Park, Tamworth, Staffs. Suffolk.—Mr. J. W. Eagle, The Hall, Walton-on-Naze, Essex.

Swine.—Mr. James Weir, Woodielea Asylum, Lenzie. Poultry.—Messrs. D. Bragg, Aikton, Wigton, Cumberland; and John Cran, Keith. Dairy Produce.—Professor J. Drummond, Dairy School, Kilmarnock.

The Royal Agricultural Society.

The New Council.

Sir John Thorold, the President of the Royal Agricultural Society, has prepared a statement showing the preparations up-to-date for the election of the new council of that body:—

Unopposed Returns.

In the following thirty divisions the undermentioned candidates have been duly nominated for election as Ordinary Members of the Council in accordance with By-Law 83, and in the absence of other nominations, such candidates are, under By-Law 84, deemed duly elected:—

1. Bedfordshire.—John Howard Howard, St. Mary's House, Bedford (nominated by H. Trethewy and H. Trustram Eve).

2. Berkshire.—George Adams, Royal Prize Farm, Faringdon (nominated by J. Herbert Benyon and Professor John Percival).

3. Buckinghamshire.—Ernest Mathews, Little Shardeloes, Amersham (nominated by Tonman Mosley and Captain J. W. Smith-Neill).

5. Cheshire.—Sir Gilbert Greenall, Bart., Walton Hall, Warrington (nominated by Earl Egerton of Tatton, the Hon. Cecil T. Parker, William H. Cooke, and S. H. Moorhouse.)

7. Cumberland.—Joseph Harris, Brackenbrough Tower, Carlisle (nominated by Thomas Hartley and R. Heywood Thompson).

9. Derbyshire.—John T. C. Eadie, The Knowle, Hazelwood, Derby (nominated by Colonel Reginald Chandos-Pole and W. Cecil Salt).

11. Durham.—Christopher Middleton, Vane Terrace, Darlington (nominated by P. B. Kent and C. H. Backhouse).

14. Hampshire.—The Earl of Northbrook, Stratton Park, Micheldever (nominated by the Right Hon. A. F. Jeffreys, M.P., and J. Stratton).

15. Herefordshire.—A. P. Turner, The Leen Pembridge (nominated by Sir John Cotterell, Bart., and John W. Smith).

17. Huntingdonshire.—John Rowell, Manor Farm, Bury, near Huntingdon (nominated by R. Goodliff and George J. Rust).

20. Leicestershire.—J. P. Cross, Catthorpe Towers, Rugby (nominated by W. Thompson, Captain J. Burns Hartopp, R. H. P. Hutchinson, and E. P. Headly).

21. Lincolnshire.—William Frankish, Bracebridge, Lincoln (nominated by C. W. Tindall and W. Taylor Sharpe).

23. Middlesex (two).—Ernest W. Shackle, Redleaf, Hayes, Middlesex (nominated by Geo. H. Sanday and Montagu Sharpe. George Taylor, Cranford, Middlesex (nominated by Daniel M. Grimsdale and Jason Wilshin).

24. Monmouthshire.—Richard Stratton, The Duffryn, near Newport, Mon. (nominated by Lord Tredegar and Sir H. M. Mather-Jackson, Bart.).

25. Norfolk.—Herbert Tallent, Westacre, Swaffham (nominated by the Right Hon. Ailwyn Fellowes, M.P., Garrett Taylor, Davis Brown, and W. H. Salter).

26. Northamptonshire.—Sir Charles V. Knightley, Bart., Fawsley, Daventry (nominated by Albert Pell and John Gee).

27. Northumberland. — George Gray Rea, Middleton, Wooler (nominated by Anthony Fred Nichol and William Elder).

28. Nottinghamshire.—Claude M. S. Pilkington, Wollaton, Nottingham (nominated by Philo L. Mills and C. W. Lister-Kaye).

30. Rutland.—S. N. Bankart, Hallaton Hall, Uppingham (nominated by Sir Arthur J. Fludyer, Bart., and Hubert Eaton).

31. Shropshire.—Thomas Stephen Minton, Montford, near Shrewsbury (nominated by J. Bowen-Jones and William Nunnerley).

34. Suffolk.—Alfred J. Smith, Rendlesham, Woodbridge (nominated by the Marquis of Bristol and Herman Biddell).

39. Wiltshire.—Henry Herbert Smith, Bowood, Calne (nominated by G. R Kendle and M. T. Baines).

40. Worcester.—E. Vincent V. Wheeler, Newnham Court, Tenbury (nominated by the Earl of Coventry and T. W. Parkes).

41. Yorkshire (East Riding).—Frederick Reynard, Sunderlandwick, Driffield (nominated by Robert Fisher and S. Copeland).

42. Yorkshire (West Riding).—E. W. Stanyforth, Kirk Hammerton Hall, York (nominated by G. Barnardiston, C. E. Cass, W. G. McLaughlin, and O. H. Wade).

43. Yorkshire (North Riding).—William Scoby, Hobground House, Sinnington, York (nominated by the Earl of Feversham and J. M. Strickland).

44. Glamorganshire.—Robert Forrest, St. Fagan's, Cardiff (nominated by Godfrey L. Clark, D. T. Alexander, Major-General T. B. Tyler, C.S.I., and D. Spencer).

45. North Wales.—R. M. Greaves, Wern, Portmadoc (nominated by Lord Harlech, Alfred Ashworth, George Bovill, J. Marshall Dugdale, Edward Green, and Colonel Henry Platt, C.B.).

47. Scotland.—Sir John Gilmour, Bart., Montrave, Leven, Fife (nominated by A. M. Gordon and the Right Rev. John Gillespie, LL.D.)

48. Ireland.—Richard George Carden, Fishmoyne, Templemore, Tipperary (nominated by the Duke of Abercorn, K.G., and Colonel N. T. Everard).

Contested Elections.

For the following fifteen divisions the number of nominations exceeds the number of Ordinary Members of Council to be elected by such division, and elections will therefore take place, in accordance with By Law 85, by voting papers to be issued on Saturday, July 15, and to be returnable by Saturday July 22: Cambridgeshire, Cornwall, Devonshire, Gloucestershire, Hertfordshire, Kent (two seats), Lancashire (two seats), London (three seats), Oxfordshire, Somersetshire, Staffordshire, Surrey, Sussex (two seats), Warwickshire, Westmoreland.

No Nominations.

For the divisions of Dorset, Essex, and South Wales no nomination has been received, and the vacancies in these divisions will therefore fall to be filled up by the new Council under By-Law 90.

Press Opinions on the Royal Show Failure.

Diverse Views.

Under the circumstances, the question is asked whether the State should not lend a hand, and apply a small amount of public money in assisting an institution which has for so long a period discharged unaided what is really national and public work. The suggestion has also been made that the shows should be held alternately in the provinces and at Park Royal, or two years in the country and the third year in London. With reference to this suggestion, one objection is that the gate-money would again have to be relied upon, and its uncertainty has already been conclusively proved; while, if the exhibition were curtailed sufficiently to be profitably held in close proximity to the large towns, it would lose its national character, which the society has so far successfully preserved, although at a heavy financial loss. All these views will doubtless be fully discussed by the new council, and it is to be hoped that the result of their deliberations will be to devise a scheme by which the Royal Shows may be continued as national exhibitions to the immense benefit, as in the past, of British agriculture.—*Daily Telegraph.*

Does not Appeal to Londoners.

It is to be feared that there is nothing for it but to frankly admit that the show does not appeal to the London public. It is said that the show is insufficiently advertised, but we submit that those who tender this alleged explanation of the failure, or advance it as an excuse for the apathy of the Metropolitan public, do not fully realise what advertising on the scale they suggest would mean to the exchequer of the society. To stir London to enthusiasm over an event of the kind it would probably be necessary to post placards on every hoarding and available space in the Metropolis, and to carry out so gigantic a scheme would entail an outlay which the aggregate amount received at the turnstiles would be totally inadequate to meet. But we are not so sure that the failure is wholly or even mainly due to inadequate advertising. For instance, every other person one meets in the City complains of the paucity of information concerning the duration and attractive features of the meeting and are prompt to blame the council for their lack of enterprise, yet the very nature of their criticisms indicates that they are better informed about the particulars of the exhibition than they openly admit, and even when they are verbally made acquainted with the attractions of Park Royal and the other necessary details they seldom manifest any desire to pay it a visit. On the whole many who are well able to form an opinion are disposed to attribute the failure of Park Royal less to the want of advertising than to unwillingness on the part of the London public to appreciate the attractive capabilities of the exhibition.—*Morning Post.*

Some Alternatives.

In view of the fact that the determination of future policy rests with the Council now in course of election on a more representative basis, officials with whom I had conversations to-day, while naturally deploring the failure of the latest effort, refrained from predicting what decision

the new body is likely to come to. But without anticipating the action of the Council, it may be stated that two or three alternatives will doubtless come up for discussion. It will be open to them, of course, to try to raise another guarantee fund of, say, £10,000, and hold another show at Park Royal next year. They may also consider the expediency of reverting to the itinerary plan. Or they may entertain the suggestion of a modified form of that system—a suggestion that has found favour in some quarters, that is to say, that the country should be divided into three or four districts, with London as the centre of one of the districts, and that the show should be held in turn in these districts, so that once every three or four years the show would take place at Park Royal, and in the intervening two or three years in the provinces. Some would incline to the idea of acquiring a settled showground in each centre, utilising it to the best advantage by letting it when it is not wanted for the show; others would prefer to hold the provincial meetings in different populous centres of the particular district. Again, the Council might, if so minded, decide to drop the show at any rate for next year, if not abandon it altogether, and leave the society to devote itself to other branches of its work. It has been suggested that if the Society had 30,000 paying members—which would mean a permanent income of £30,000 a year—it might, whilst always welcoming outside support, be independent of the public, and yet carry on a successful system of shows.—*Yorkshire Post.*

Sir Walter Gilbey's Views.

Sir Walter Gilbey takes a very despondent view of the future of the Royal Agricultural Society's Shows. "Unless something unforeseen occurs," he told a *Morning Leader* representative, "we cannot count on another show. If the necessary funds are not forthcoming the society will have to be wound up. That would be nothing short of a national calamity—I think any sensible person will admit that. The Royal Agricultural Society's Show is a national show, and the only national one held in the United Kingdom." As to the failure of last week's show at Park Royal, Sir Walter said it was certain that the London public could never be interested in anything connected with agriculture. They had had three shows at Park Royal to test it. It was true that as many as 15,000 persons paid a shilling each of an evening to visit the Smithfield Show at the Agricultural Hall. But the Park Royal Show was not so well known as the Agricultural Hall exhibition. It was difficult and enormously expensive to advertise a show which only lasted four days. What they had spent in this connection could be imagined when he mentioned the fact that in 1903 the cost of advertising worked out to 10d. for each person who paid to enter the show ground. With reference to the future, Sir Walter held that the Royal Agricultural Society should be put in a position—he would not say how, whether by grant from the Department of Agriculture or otherwise—to run the show independently of gate-money. There never had been a show in England, that he knew of, either a royal or other, which had paid. They were always subsidised, either by local subscriptions, gifts of special prizes, and the like. If the unforeseen happened, and the Royal Agricultural Society were in a position to promote another show, he thought the railway companies might do themselves and agriculture good by issuing cheap tickets on their ordinary trains to bring up more people from the country districts. He would like to see it taken up as a national question by the Press.

Gloomy Portents.

After the present year's experience agriculturists will probably come to the conclusion that Park Royal is useless as a permanent home for their show. Beautiful weather prevailed on the two opening days—with Royal visitors on each—and yet the attendances were very disappointing. Personally, I am not surprised at this result. For some reason or other the management seems indifferent to popular comforts. At noon, on Wednesday, there was not a solitary chair for weary people to rest upon, and not a strain of music to be heard anywhere about the grounds. Even later, when matters improved, we had some long intervals between the harmony, as well as a deplorable lack of diversion in the ring. Towards three o'clock the stands began to fill up in readiness for the King and Queen, and horses of various breeds were paraded, but although everybody wanted to see the leaping, not a solitary steed was asked to negotiate either fence, wall, or water. For fully two hours the waiting people were kept in a state of deadly dulness, with little to see and nothing to hear. This strain proved too much for their patience, and led to a stamping of feet that must have been sadly disconcerting to the officials. Delays of this kind simply spell disaster as far as Londoners are concerned, because no mere excellence of stock can compensate for hours of boredom. Under these circumstances the Royal will have to resume its peregrinations round the country if it desires to avoid a complete collapse.—The London Correspondent of the *Newcastle Daily Chronicle.*

The Produce Classes at Park Royal.

Cheese.

The cheese classes compared more than favourably with those at Nottingham as regards quality and numbers, but it was a pity that more suitable arrangements had not been made for keeping them cool, as many of the cheese were oversweated and others opened in the texture by the heat of the Monday and Tuesday. The Cheddar cheese class was one of the finest ever seen at the Royal when away from the Western shires. There were twenty-two entries, most of them of superb quality, inasmuch so that seventeen lots received special notice from the judge. The lead was taken by Mrs. C. Candy, Shepton Mallet, with not over large cheese, but of good general appearance, tasting not being allowed. Second went to that progressive maker, Mr. Frank Portch, Cucklington, Wincanton; Mr. Harry Francis Sutton, Ditcheat, Bath, being third; the fourth just going over the borderline of Somerset to Mr. Francis Osborne, Sandford Orcas, Sherborne, Dorset, but the reserve went back to Somerset with Mr. W. C. Spencer, North Perrott, Crewkerne. The Scotch exhibitors, however, did not get further up the list than commended, their long-keeping cheese being scarcely in condition as yet.

The Cheshire class must have been good in the interior, as was evidenced by the freedom with which the judge made his awards. The first prize went to Mr. Thomas Nunnerley, Whitchurch, Salop.

The Stiltons were not quite so fully represented as they might have been as regards numbers, but they were of very excellent quality. Mr. John Smith was first with a nice exhibit made at Gaddesby; the Belvoir Vale Dairy Company, Melton Mowbray, being second. The Wensleydales only made a class of five, but the heat was evidently too much for them, as some of them wept freely. Mr. William Mason sent a very nice exhibit that was placed to the fore. The double Gloucesters certainly showed variety in their five entries as regards flavour, appearance, and colouring, and neither of the makers resided in the cricket county. Messrs. Hiscock and Co., Stourton Farm, Bath, were first with a good-looking lot; the second going to Mr. C. T. Parrett, Shipston-on-Stour. The Wiltshires were even weaker than the Gloucesters, only three lots putting in an appearance. Except for colouring these exhibits would have passed for Cheddar truckles, had they been pressed in smaller vats; the old flat shape is being evidently abandoned. The Cheddar truckle class is fast gaining in popularity, as this smaller make of cheese suits many households, and when cut does not dry like pieces from a larger cheese. Nearly all the Cheddar makers were in this class, which placed Mr. W. C. Spencer to the fore; his was a nice, very shapely cheese, and evidently a good cutter, the skin being kindly.

Cider.

Despite its non-application of up-to-date principles, the Royal gets a large entry of ciders. Cider being usually kept in fairly cool cellars cannot stand being exposed to a rather high temperature without inducing a secondary ferment or the development of acidity, as compared with the usually pleasant taste. Thus the samplers might have had quite a different cider to that which the judge a few days previous had either passed over or else given recognition to. But, as sampling was allowed, a goodly assemblage of cider makers availed themselves of this privilege on all three days, and a most valuable interchange of information ensued. The cask class, as a whole, was not a good one, there being several ciders. The first prize went to Mr. Herbert J. Davis, Sutton Montis, Somerset, for a very rich, full cider that needed more age; it was made from Royal, Chisel, and White Jersey apples and Cap of Liberty; the latter apple was scarcely pronounced enough. Second went to Messrs. Tilley, whose cider was of the usual rich Somerset character, but the heat had taken the character out of it. Third went to a Worcester exhibitor, Mr. John Bazley, a clean, nice, bright cider, but just a trifle acid. Only a couple of minor notices were given in this class. The class for cider in bottles, made in the autumn of 1904, was a very full one. Here it was noticed that some bottles had been rewired, but they did not get a prize. Messrs. Tilley Brothers, Shepton Mallet, secured all the prizes. The first was a heavily filtered cider made from New Cadbury, White Jersey, and Lady's Heart; perhaps it was the crushing of this that so appealed to the judge. The second was made from Horner, Royal Jersey, and Gin apples; whilst the third sample was made from Kingston Black, Red Jersey, and Cadbury. The general preference was for the second prize cider.

Mr. John Bazley suffered hard luck, as the exhibit from the same bin with which he took first prize at the Herefordshire Show and the championship of the Bath and West, was passed over unnoticed; whereas an exhibit unnoticed at either of these was now given a highly commended mention.

The old cider class brought out some very fine ciders indeed, but none so good as Mr. John Bazley's three-year-old Foxwhelp; it was a grand cider, brisk, clean on the tongue, and pleasantly stimulating.

Perry.

The Perry class was very fine, but opinion differed very much as to the placed and unplaced exhibits. It was evident that the judge liked an Oldfield perry, and, though it was not quite as bright as some of the others, the first prize went to Mr. George Ballard for his Oldfield exhibit; the second went to Messrs. Ridler for a rather hard perry, but bright, made from Holmer pears.

The Milk Tests.

In the Shorthorn section there were nineteen entries, and the prizes were won by Mr. George Taylor, of Cranford, Middlesex, with Melody, first; Mr. James T. Hobbs, of Fairford, Gloucester, with Orange Blossom 13th, which was second; and Mr. Charles A. Scott Murray, of Henley-on-Thames, who was third with Lady Millicent Waterloo. Both first and second prizes for Lincolnshire red Shorthorns were won by Mr. John Evans, of Burton, near Lincoln. The butter tests excited keen competition. There were two classes, according to live weight. Most of the entries were Jerseys, and in both classes the prizes went to animals of that breed.

Sale of Pigs.

The demand for these, which were sold by Mansell and Co., was a very uneven one, some making full value, and others going very cheaply. We follow the order of the classification in the catalogue. The first lot sold were two out of the second pen of Large White boar pigs, property of Mr. T. S. Jay. These made, respectively, 5 gs. and 4 gs., and were purchased by Mr. Bishop. The remainder of the white pigs were passed. The first lot in the Berkshire section was Mr. A. T. Acklands boar, which went to Mr. N. Benjafield at 5½ gs. Mr. Winterton gave 10 gs. for Mr. R. P. Cooper's boar of the same age. The r.n. boar in this class, Mr. J. A. Fricker's, went to the Hon. C. B. Portman at 25 gs. Mr. Rooth, from the Isle of Man, took five of the six young boars exhibited by Mr. A. D. Ackland at 4 gs., 3 gs., and 2 gs. each for three. He also took one from Mr. Cooper's pen at the latter price. From Mr. J. A. Fricker's first-prize pen the demand was very good. The first selection from this pen went to Mr. Noel at 30 gs., the top price realised in the pig sale. M. Cottard gave 12 gs. for another, and the third one made 11 gs. to Mr. Goodall. The Hon. A. H. Holland-Hibbert's pen went at 6½ gs. to Mr. McMonies, at 5 gs. to Mr. Booth, and 2½ gs. to Mr. Denyer. Mr. R. W. Hudson's pen went to Messrs. R. Miller (Canada) at 7½ gs., E. D. Harley at 5½ gs., and Rooth at 7 gs. The second-prize pen in this class, from Mr. G. Talfourd Inman, sold well. Sir T. Gooch took one at 10 gs., the Earl of Macclesfield one at 7 gs., and Mr. Rooth one at 7½ gs. Mr. J. W. Kimber's pen went at low prices. Two were purchased for the Middlesex County Asylum at 4½ gs. and 3½ gs., and the other one by Mr. Ashby at 2½ gs., this purchaser taking Mr. C. C. Smith's Kingstone Robena at 8½ gs.

Four of the six sow pigs exhibited by Mr. A. D. Ackland were sold at from 3 to 2 gs. each. Mr. J. A. Fricker's first-prize pen of sow pigs were in request: two were sold, one at 10 gs. to Mr. A. D. Ackland, and the other at 7 gs. to Mr. R. Miller, Canada. The second-prize pen in this class, which came from Mr. G. T. Inman, were all sold, Mr. Rooth paying 6 gs., Mr. R. P. Cooper 5 gs., and Mr. Fenwick 3 gs.

The demand for the Tamworths was very uneven, but some good prices were realised. For the third-prize boar, from Mr. R. Ibbotson, Mr. Michisson, of Rugby, gave 10 gs. Two of the first prize pen of young boars from the same herd were sold, Mr. C. Bathurst giving 10 gs. for the first one, and the Danish Bacon Agency 8 gs. for the other. Two of the r.n. pen that came from Mr. D. W. Phillips went at 6 gs. and 5 gs. respectively to Mr. H. C. Stephens and Major Sykes. One out of the second prize pen of Mr. H. C. Stephens was sold to Mr. Gibbin at 4 gs.

The champion sow of this breed, from Mr. E. J. Morant, went to Mr. Noel at 16 gs., and Mr. D. W. Philip's highly commended sow went to Mr. C. Bathurst at 20 gs. The three sow pigs from Sir. O. Mosley's herd sold badly, Mr. D. W. Philip taking one for 5 gs., and Mr. Michisson two at 2 gs. each.

The Large Black breed met with a fair demand for those that were sold. The second-prize old boar went to Mr. J. Jefferson at 5 gs. Mr. E. Gimblett's single boar pig went to Mr. Dixon at 4½ gs. Two of the same age, from Mr. H. J. Kingwell, sold as follows: 16 gs. to Mr. Robinson for the second-prize pig, and 7½ gs. to Mr. Bridgman for its mate. The third-prize pig, from Mr. A. S. Mann, made 12 gs. to Mr. Harrison. Mr. Oscar Muntz gave 5½ gs. for one of Mr. R. S. Olver's breeding. Mr. Booth took three others at 5 gs. each, bred by Messrs. R. R. Rothwell, K. M. Clarke, and E. Gimblett, and a second one from this breeder at 3 gs. Two sow pigs from Mr. R. S. Olver were sold at 4½ gs. and 5 gs. to Messrs. Oscar Muntz, and Sewell.

Winterton.

The thirty-third show of the Winterton Agricultural Society was held on Friday in the park, and notwithstanding dull weather, was well attended. Considerable interest was manifested in the classes for horses the entries being largely in excess of previous years.

HORSES.—Cart colt or filly foal, foaled before May 1: 1 and special, R. E. Knapton, Coleby, Doncaster; 2, W. F. Glasier, Winterton. Cart colt or filly foal, foaled on or after May 1: 1, G. Waterhouse, Wildsworth, Gainsborough; 2, R. I. Swaby, Counthorpe. Silver Challenge cup for carting colt or filly foal: R. E. Knapton. Mr. R. N. Sutton-Nelthorpe's prize: 1, R. E. Knapton; 2, R. I. Swaby. Roadster foal: 1, A. H. Cooke, Marr, Doncaster; 2, W. F. Glasier. Mr. J. Heppleston's prize: 1, H. Halkon, Moorends, Thorne, Doncaster; 2, W. W. Sutton, Winteringham, Doncaster. Yearling cart gelding or filly: 1 and 2, C. R. Dook, Whitton Grange, Doncaster. Yearling or two-year-old readster gelding or filly: R. Humphrey, Morton, Gainsborough. Two-year-old cart gelding or filly: 1, A. Sheardown, Normanby Lodge, Doncaster; 2, A. Thompson, Old Brumby, Doncaster. Cart gelding or mare: 1, W. F. Glasier; 2, W. Brown, West Halton. Cart gelding or mare (open): 1, A. Thompson; 2, W F. Glasier. Silver bowl for carting mare, filly, or filly foal: Won outright by Mr. A. Thompson. Shire Horse Society's Medal: W. F. Glasier. Hackney Society's Medal: W. E. Inman, Huddersfield. Gelding or mare, driven in harness (open): 1, W. E. Inman, Fenay Bridge, Huddersfield; 2, J. R. Fox, Morton, Gainsborough. Gelding or mare, not exceeding 15 hands, driven in harness (open): 1, J. R. Fox, Morton, Gainsborough; 2, Rev. J. H. Rees, Helpringham. Pony, not exceeding 14 hands, driven in harness (open): 1, G. E. Franklin, The Field, Derby; 2, W. Revill, Conisborough. Gentleman's hack, to be ridden in the ring (open): 1, Rev. J. H. Rees, Helpringham; 2, J. Needham, Grimsby. Lady's hack (open): 1, U. R. Burke, Normanby, Doncaster; 2, J. W. Cook, Kirton Lindsey. Hurdle jumping by horses: 1, W. Favell, Sheffield; 2, Wellburn Bros., Huddleston Hall, South Milford. Gelding or mare, driven in harness, the bona-fide property of a tenant farmer or tradesman, residing and located within a twenty-miles' radius of Winterton (limited to Lincolnshire), and must have been in his or her possession and located in the district two months prior to the show: 1, J. Needham, Great Coates; 2, W. W. Sutton, Winteringham. Pony, not exceeding 14 hands (open): 1, G. E. Franklin, Derby; 2, W. Revill, Conisborough. Hurdle jumping by horses: 1, Wellburn Bros., Huddleston Hall; 2 and special, F. Hookham, Ulceby.

SHEEP.—Three Lincoln ewes, in milk: 1, W. F. Glasier, Winterton, Doncaster; 2, W. Blanchard, Whitton, Doncaster. Three Lincoln shearling gimmers: 1, W. F. Glasier; 2, W. H. Godfrey, Thealby, Doncaster. Three Lincoln lambs: 1, S. Tock, Highfield, Winterton; 2, W. Waddingham, Winterton. Three cross bred lambs: 1, W. H. Godfrey; 2, C. Skelton, Winterton.

Market Weighton.

The thirty-seventh annual Market Weighton Horse Show was held on Thursday. Hackneys were exceptionally strong. In a class of thirteen very promising fillies the four selected by the judges were all sired by Rosador, as was also the winner in the colt class. The last-mentioned was a chestnut belonging to Mr. J. Beal, of North Dalton This was its first appearance in competition, but the animal is a beautiful type of hackney, and the judges had no hesitation in awarding it the championship for foals. A colt by Polonius was placed second. Two handsome fillies were shown by Mr. F. W. Buttle, of Driffield—both the offspring of Rosador—and one of these, a three months old chestnut, came out at the head of a very strong class. Eight yearlings were entered, a distinct advance on last year, and the chief award was given to Messrs. Webster, of Brompton, in respect of a brown filly by Conquest II. First among two-year-olds was a Rosador filly owned by Mr. Buttle, and sister of District Maid, which won the championship at the Hackney Show this year. Roadster brood mares and stallions made a good muster. Though only five of the former appeared in the ring they were of the best type, and included Mr. H. Watson's grey mare, Queen of Newton Kyme, which is one of the offspring of Royal Danegelt, and has a good record. A Rosador stallion was placed first in the two-year-old class, and in the any age class the contest lay in the main between two sons of Garton Duke of Connaught, the palm being eventually awarded to Mr. M. Wray's Winchester, which was defeated last year by Mattine, a Leeds horse, but has been successful many times before and since. It is a capital mover, and showed rather more character than its nearest rival.

Hunters accounted for three interesting classes. The brood mares were led by a chestnut sired by Cedric, and exhibited by Mr. W. H. Winters, of Skipwith; and a ten year old bay, by Marmaduke Soult, was placed next. Mr. T. Wickham Boynton won in the three year old class, and Mr. J. Hadland, of Beverley, took both first and second in the class limited to tenant farmers and subscribers to the Holderness Hunt.

British Dairy Farmers.

A meeting of the Council of the British Dairy Farmers' Association, held at 12, Hanover Square, London, W., on June 28, Sir Edward Strachey, Bart., M.P. (Vice-President), in the chair, when two new members were elected.

The Selection Committee submitted their further proposals with regard to the judging and stewarding arrangements at the Dairy Show on October 3 and three following days, and brief reports were received from the Show Committee and the Poultry and Pigeon Committee relative to various matters.

A letter was received from Mr. J. B. Ellis resigning his seat on the Council, and the resignation was accepted with expressions of regret.

A communication was received from the Prime Minister stating that he is fully alive to the importance which the association and other bodies attach to the early passage of the Sale of Butter Bill, and suggesting that the Society's request, as regards a deputation, should be addressed to the Board of Agriculture, he being the member of the Government in charge of the measure. The Council accordingly resolved to communicate with Mr. Fellowes on the subject.

A letter was read from the Board of Agriculture as to the suggestion of the Council that the importation of milk powder into the United Kingdom should be recorded in the monthly returns issued by the Customs authorities. The Board stated that, having regard to the small importations of this article, and to the labour which would necessarily be involved in the preparation of a monthly statement for such small items, the Board did not feel that they could press the matter officially on the Customs.

The Council had before them the question of the International Congress on Dairying to be held at Paris next October. It was considered desirable that this country should be represented at the Congress, and the Secretary was instructed to communicate with the Board of Agriculture on the subject.

The next meeting of the Council was fixed to be held on Wednesday, August 2.

AN ALFA-LAVAL CREAM SEPARATOR

means far more Butter and better quality than is obtainable by any other process.

If you haven't seen an ALFA-LAVAL Catalogue, get one—It costs you nothing and may save you a good deal.

AUCTION SALES.

MONDAY, JULY 24th, 1905.
THE WATERS' PLACE HAMPSHIRE DOWN FLOCK,
the property of Mr. T. Fowel Buxton.
Registered in the Hampshire Down Flock Book.
NOTICE OF THE ANNUAL SALE AND LETTING OF
90 RAM LAMBS AND RAMS,
together with
115 DRAFT EWES IN AGES,
and which
(in conjunction with Messrs. Jackson & Son)

MESSRS. WATERS & RAWLENCE are instructed to LET and SELL by AUCTION, at Waters' Place Farm, two miles from Ware (Hertford Branch), and three miles from Roydon (Cambridge line) Stations, G.E.R., on MONDAY, JULY 24th, 1905.

For many seasons the Sale and Letting of the Ram Lambs, Rams, and Ewes at Waters' Place has formed one of the most important annual fixtures in the Hampshire Down world, and as this breed of Sheep is yearly increasing in popularity both at home and abroad, the Auctioneers feel every confidence that they will again—as in previous years—be supported by admirers of Hampshire Downs anxious to secure sires from the celebrated Waters' Place Flock.

Conveyances will meet the trains at the above stations.

Luncheon at 12.30 and Sale after.

Catalogues of Mr. J. H HURFORD, Waters' Place Farm, Ware; of Messrs. G. JACKSON & SON, Auctioneers, Hitchin; or of WATERS & RAWLENCE, Canal, Salisbury.

COCUM FARM,
Six miles from Micheldever Station, two from Sutton Scotney Station, and seven from Winchester.
ANNUAL SALE OF HAMPSHIRE DOWN RAM LAMBS AND EWES.

MESSRS JAMES HARRIS & SON have been favoured with instructions from Mr. George Judd to LET and SELL by AUCTION, on the premises as above, on Thursday, August 3rd, 1905:—
100 RAM LAMBS,
6 SHEARLING RAMS,
and
100 Regular DRAFT EWES,
from his well-bred Cocum Flock, entered in Vol. I. of Flock Book.

Conveyances will meet the principal Trains at Micheldever and Sutton Scotney Stations, and a brake will leave Winchester Station at 12 o'clock, and Andover at same time, on day of sale.

Luncheon will be provided at one o'clock, and sale commence immediately after.

Mr. Judd will be pleased to show his Flock of Breeding Ewes, Ram Lambs, &c., to his friends or intending Purchasers at any time previous to sale.

Catalogues may be obtained of the Auctioneers, Winchester.

Preliminary.

THE 20TH ANNUAL SALE AND LETTING
of
80 GRAND PURE-BRED HAMPSHIRE DOWN RAMS AND RAM LAMBS,
from
MR. LAMBERT'S OLD-ESTABLISHED REGISTERED FLOCK,
will take place at
CAMBRIDGE,
On THURSDAY, AUGUST 3rd, 1905.
MESSRS. CHALK, Auctioneers.
11, Alexandra Street, Cambridge and Linton.

WHIMPLE HOUSE, WHIMPLE, EXETER, close to Whimple Station on L. & S.W.R.

IMPORTANT SALE OF DEVON CATTLE, HUNTER AND SHIRE HORSES.

MESSRS. JOHN RISDON & SON are instructed by Mr. T. S. Morgan to SELL by AUCTION, at Whimple House, on THURSDAY, JULY 20th, 1905, at 1.30 p.m., the valuable DEVON CATTLE, HUNTER AND SHIRE HORSES, viz.,
35 PEDIGREE DEVON CATTLE.
30 FAT DEVON STEERS & HEIFERS.
8 HUNTER and SHIRE HORSES and COLTS.

Full particulars, with pedigrees and prize-winnings, are given in Catalogues, which may be obtained of Mr. MORGAN; at the place of Sale; or of the Auctioneers, at Williton and Wiveliscombe, Somerset.

Dated July 5th, 1905.

AUCTION SALES.

CHICHESTER.
GREAT ANNUAL SALE AND LETTING of SOUTHDOWN RAMS TUESDAY JULY 25th, 1905, and of SOUTHDOWN RAMS, EWES, and EWE & WETHER LAMBS on the following day WEDNESDAY JULY 26th.

The above Sale will be held by

HOBGEN BROS., at their Repository in the Chichester Cattle Market (quarter of a mile from Chichester Railway Station) commencing each day at one o'clock precisely, when a Grand Selection of Sheep will be offered from the well-known and celebrated SOUTHDOWN FLOCKS of:—

His Grace The Duke of Richmond & Gordon, His Grace The Duke of Devonshire, K.G., His Grace The Duke of Northumberland, K.G., Edwin Henty, Esq., Jeremiah Colman, D.L., J.P., Edwin Ellis, Esq., H. Cosmo Bonsor, Esq, A. Heasman, Esq., J. Edward Allen, Esq., Herbert Padwick, Esq., The Pagham Harbour Co., Messrs. F. N. & E. Hobgen, and others.

Refreshments will be obtainable in the Hall.

Catalogues may be had of HOBGEN BROS., East Street, Chichester, who will execute commissions.

HAMPSHIRE DOWNS.

TRING PARK FLOCK.

SALE DAY, FRIDAY, JULY 21st.

70 GRAND RAM LAMBS.

120 EWES AND EWE LAMBS.

This year's selection from the Right Hon. Lord Rothschild's Flock of Registered Sheep will be found one of the best yet offered. The continual selection of the best Lambs procurable from other leading breeders has so stamped the Flock that the Sale now presents one of the best opportunities to secure a perfect combination of the improved Hampshire Down Sheep.

Arrangements made for Foreign buyers accommodation.

For further particulars apply to Mr. RICHARDSON CARR, Tring, Herts (L. & N. W. R., 30 miles from Euston), who will show the whole Flock, or to Messrs.

W. BROWN & CO.,
Auctioneers, Tring.

IMPORTANT SALES OF PURE BRED STOCK.

JOHN THORNTON & CO. will SELL by AUCTION as follows:—

WEDNESDAY, JULY 26.—Fifty SHORTHORNS belonging to Mr. F. J. Steward, at White Hall Farm, Brigstock, Thrapston.

FOR FINE HEALTHY CALVES USE
VESTA CREAM MEAL

This, our latest Calf Meal, has been specially made for use with either Skim or Separated Milk, and after the first few days can be used alone.

It is very nutritious, easily digested, prevents scour, and imparts a beautiful sleek skin.

It is one of the richest milk substitutes obtainable, and fine healthy thriving calves are reared on it by the leading breeders of cattle.

It is therefore a *perfect milk substitute*.

T. GITTINS, Esq., Wrentnall Farm, Shrewsbury, says
"I am more than pleased with your Calf Meal, I consider it excellent in every way"

15s. per cwt. Carriage Paid to Nearest Station.

LIVERPOOL VESTA CAKE CO.
Blackstock Street, LIVERPOOL

THREE
UNRIVALLED
CALF MEALS

THE
LANCASTER
CALF FOOD
13/- per cwt., or in 4 cwt. lots 12/6 per cwt.

This Meal does not swell out so far as the "Milk Equivalent," but is much easier to prepare, and is recommended to those who do not personally see to proper preparation.

BIBBY'S
MILK
EQUIVALENT
12/6 per cwt., or in 5 cwt. lots 12/- per cwt.

This Meal swells out splendidly, but needs careful preparation. It is, however, a first-class Meal, and probably the most economic in use of all the Calf Meals in the Market.

BIBBY'S
CREAM
EQUIVALENT
The most popular Calf Food ever produced, 15/- per cwt.

Is the latest and most popular of our foods; **we believe it is the nearest approach to the ideal that has yet been reached in preparations of this kind.**

CARRIAGE PAID to BUYER'S NEAREST STATION.

AN EMINENT AGRICULTURIST.

The duty of chronicling the ravages of death is always a sad and distasteful one; but it become still more distressing when as this week we have to record the demise of such an eminent agriculturist as Sir Jacob Wilson. English agriculture and stockbreeding is a by-word all the world over, and we can truthfully say that wherever English agriculture is held in high esteem, there also is the name of Sir Jacob Wilson an honoured one. Sir Jacob's life-work has been done in many places and phases; but if one, perhaps, will remain more enduring than another, it will be the great things he has accomplished in connection with the Royal Agricultural Society of England.

Our national society has lately fallen upon bad times, and the result of the last show must have been a terrible blow to Sir Jacob. We came into contact with him before and during the recent show, and he expressed himself most hopeful of eventual success, so the crushing failure at Park Royal last June much have been a great disappointment. Sir Jacob's work, however, was well done.

"'Tis not in mortals to command success,
But we'll do more . . . we'll deserve it."

And if ever a show did deserve a change of fortune it was the last Park Royal exhibition. We remarked at the time that the showyard was the most perfect that we had ever visited, and it certainly was a tribute to Sir Jacob's talent and energy, and a crowning success in a direction in which he had already made his mark. The death of Sir Jacob Wilson is a great loss to English agricultural and to our national society; and those who had the pleasure of meeting him at the last Royal Show little thought that his end was so near. His career has been a brilliant one, and his name will be an honoured one as long the annals of agriculture exist. May the turf lie lightly upon him.

THE AMERICAN NEW CROPS.

The Russian, Argentine, and Roumanian wheat crops are of great importance to the British markets, but the reports which reach us are meagre and almost wholly lacking in detail. It is not until the result of the entire national production is officially set forth in some Blue Book that we can say with any safety what quantities of corn we shall have to deal with. The American crops, which concern us most of all are, on the contrary, the subject of reports so full, so elaborate, and so multiform, that it is literally a case of not being able to see the wood for the trees. Let us try with all possible brevity to tell the reader of some not unimportant changes which are taking place in the United States. The leading event, perhaps, is a steady increase in the area under wheat. In the past ten years the average price of wheat on the farm in America has been only 21s. 8d. per qr., yet the area devoted to wheat culture has risen by eight million acres. This American wheat can be put on Mark Lane at 7s. per qr. charges on the farm price in the States, and it is worth as much per qr. as English wheat; sometimes, especially when the home weather has been wet, it is worth more. Thus English wheat is brought by American competition to a 28s. 8d. average, and it is only in periods of reduced American competition that a thirty shilling average can be hoped for. The short crop of America in 1904 was an exceptional experience. It is doubtful if seventy million quarters were actually harvested. This year it is not improbable that eighty-eight millions will be secured.

The next most important event is the change in the State areas, and consequently in the types of wheat grown. While the areas which produce strong spring wheat, rich in gluten, are being extended, those which grow weaker wheat of a fine white or pale yellow colour and of soft milling character, are being reduced. We must expect in the forthcoming twelve-month of American shipments— the American shipping year begins August 1—a decided increase in supplies of wheat from Kansas, Oklahoma, Missouri, Ohio, Michigan, and Indiana, and no less decided reduction in supplies from California, Oregon, the Walla Walla district, and the regions lying high on the western and eastern slopes of the Rocky Mountains. It is clear that these tendencies are of considerable interest to the British wheat grower, as they indicate where competition, and consequent price depression, are likely to be respectively most and least.

The third point of prominent interest relates especially to this year's promise of the fine spring wheat from which the famous mills of Minneapolis, Duluth, and Chicago make the flour which all the world bids for. The wheat of this region looks like being rather short in supply. Minnesota looks 7 per cent. less than last year, Iowa to 1 per cent. less, Dakota to 2 per cent. less. On the other hand, the rising new State of Washington, on the Pacific seaboard, has a bumper crop, by far the best on record, in a country where it has to be remembered no crop records go back into the nineteenth century. The Government report issued on 12th inst. contains, it must also be noted, no reference to the spring wheat crops of Nebraska, Colorado, Idaho, Wyoming, and Utah, and these States may send us no inconsiderable quantity of very serviceable and, indeed, fine, spring wheat.

The maize crop is the subject of an elaborate first report, but until August is over this October crop is not sufficiently advanced in growth for comment to be really valuable. Of oats, the news is more important, for the crop is ripening fast, and should be a very large one. In all some 120 million quarters are promised, and this is twenty millions above the estimated maximum home wants. If America has twenty million quarters of oats to put on Old World markets, the price of oats is likely to be extremely low for all but the heavy types, of which England, Scotland, and New Zealand are practically the sole producers, though the Canadian North-west ought also to be able to grow them.

American barley is still a comparative novelty, and when a country of two thousand million acres only devotes seven million acres to a cereal, it may almost be said to ignore it. The demand for brewing barley is increasing despite "the wave of sobriety" which has broken with such devastating effects upon the Returns of Customs and Excise. Germany and France are entering the field as buyers, and there is no fear that prices will be depressed by the American consignments. What, however, cannot be ignored is the fact that America has not as yet entered the arena as a serious grower of barley for exportation. Should she do so under stimulus of good prices the whole position of the home barley trade might undergo grave modification.

Seasonable Topics.

It is quite evident that, whatever is done in the future to ensure gates at Royal shows (if they continue to exist), it is not much good depending on the man in the street, and the great effort must be to get the farmers and people who are practically interested in agriculture. The Royal show this year was held just when the hay harvest was getting into full swing, and one of our correspondents recently pointed out that this doubtless had the effect of keeping a good many people at home. We do not wish to suggest for a moment that the time of holding the show was responsible for the financial failure and the small crowd of visitors, but it was probably a contributory cause. When haymaking is about, the place for the average farmer is at home, and naturally other members of his family remain at home as well. Do not think that the farmer is averse to a little holiday now and then, for, on the other hand, he enjoys it and deserves it, but it is absurd to talk of holidays while haymaking is about, and had the Royal show been held at a time of more convenience to the farming fraternity, it is very probable that it would have been attended by a larger number of agriculturists. There may, of course, be other and good reasons why the Royal Show was held during haytime, but the fact that it failed is sufficient excuse for bringing forward any argument which may help to avoid similar disaster in the future.

Farmers and the Royal Agricultural Show.

* * *

Our correspondent who discusses hops week by week in this journal recently informed his readers that his visit to the Royal Show, looking for the usual hop exhibits, was disappointing, because there were none on view. He failed to ascertain the cause of their absence, and, considering the importance of the hop-growing industry, it is curious that it was not represented. Were Kentish growers too busy with cultural matters to think about the exhibition side, and what was Wye College doing? This collegiate establishment is situated in the centre of the industry, and hops are grown here somewhat extensively. In fact, a good deal has been done at Wye by experiments and conferences to further the interests of hop culture, and, this being the case, it would probably be disappointing to many from the southern county, and also Worcester, that there was nothing referring to hops even in the educational department, which, in many respects, was one of the main features of the show.

No Hops at the Royal.

* * *

It has been said that it is quite impossible to make a good gardener out of a farmer, and whether this is so or not, we have observed that, as a rule, farmers do not take kindly to horticulture. We are inclined to think, on the whole, that this is a loss to the farmer, because in many cases, if he gave the same attention to detail as is necessary in the case of the gardener, he would get better results. The amount of interest which the farmer takes in horticulture, however, can be gauged by the condition of the garden surrounding the homestead, and we confess to admiration for a man who likes to keep his place neat and tidy. A little patch of lawn in front of a farmhouse may be a convenient place for rearing young ducks and chickens on, and there would be an excuse for it if there was not another inch of ground available, but in the circumstances there is no real reason why the grass plot should not be kept for the purpose for which it was intended. A well-kept garden beautifies a farmstead just as it does any other habitation, but when the enclosure intended for fruit, flowers, and vegetables is given over to poultry, and ill weeds are allowed to flourish at will, then an air of slipshod untidiness prevails, which is offensive to the eye of any lover of neatness and order. Fortunately, all farmers are not careless gardeners, because in passing along the King's highway one is frequently attracted by farmhouses having neat, well kept gardens about them, which give to the whole place an air of comfort and contentment.

Farmers as Gardeners.

* * *

This worthy individual is safe from extinction, and the march of modern progress, because Longfellow thought well to immortalise him in his well-known poem, bearing the above title. Apart from Longfellow and his poem, however, we do not think that the blacksmith will be likely to drop out, because he is much too useful a man, and quite indispensable in rural districts. We fail to see what the farmer would do without the man of iron, who shoes his horses for him, repairs his machines, makes hangings for his gates, and, at a pinch, solders his milk-churns. In fact, the country blacksmith is a general factotum, who is expected to be able to turn his hand to anything connected with iron. If a farmer buys a patent implement of some new and intricate make, and it happens to get out of order, he promptly sends it to the smithy, and naturally expects the presiding genius thereof to know all about it. Even the motorist who has a breakdown five miles from anywhere stakes his last card on the blacksmith being able to help him out, and expresses himself in tones of disgust if the man confesses to an ignorance of motor-cars. As it happens, however, the blacksmith is the last man in the world to confess to ignorance. If he did that his occupation would be gone at once, considering the many different jobs he has to do, so he just puckers his brow, sets his wits to work, and generally manages to pull through somehow. It is no uncommon sight at this time of the year to see mowing machines and other haymaking implements drawn up before the village smithy awaiting the attention of the blacksmith, and one wonders what would be done at times of emergency without this worthy man. The implement-maker can turn out brand new machines fast enough, but he cannot insure them against damage and breakages, and when accidents of this kind happen, repairs must be done, and done quickly. The handy man for the job is the village blacksmith, and consequently he is indispensable.

The Village Blacksmith.

* * *

Through the combined forces of soaking rains and warm sunshine, mushrooms are now growing freely in favoured fields, from which places they find their way into the markets, and finally on to the tables of those people who have a taste for this edible fungi. At a retail price of sixpence a pound, we have bought mushrooms of late, and though the picker did not get quite so much, one would think it would be worth the while of farmers to preserve their mushrooms and collect them for the market. We are acquainted with some who do this, and, though it has been proved in courts of law that mushrooms may be treated as a crop, certain members of the British public hold views of their own on the matter, and never hesitate to trespass on other people's land in search of the fungi. It may be a relic of an old custom that mushrooms, watercress, blackberries, bilberries, and the like should be treated as public property, but there are lots of people who would never dream of asking a farmer's permission to walk over his ground in search of mushrooms, though they would not think of doing it under any other circumstances. Some years ago we knew a farmer who dressed his ground with proper material to encourage the growth of mushrooms with a view to making money out of them. Such a thing as being prevented from picking mushrooms anywhere and everywhere had never been heard of in the district before, and the local rustics imagined that their rights were being interfered with. To such an extent did they resent the action of the farmer that they stole his mushrooms from under his very nose, and defied him to stop them. It was not till after several summonses had been issued and fines were inflicted at the police court that the local mushroomers realised that the farmer could consider mushrooms as his private property.

Mushrooms.

* * *

In connection with different agricultural societies in the country, we frequently read and hear of awards being given to farm servants, both male and female, for long service in the employ of the same family. Not long ago we were chatting with a man who had worked for sixty years on the same farm. Sixty years; just think of it, working day after day on the same holding! We question whether there will be many in the future who are able to boast of such a record. It was interesting to chat with the old veteran, who had never rolled, but had never gathered much moss. On the farm where he still potters about he swung a sickle in the days when corn was grown, and before the reaper and binder was thought of. The women and children used to glean then, and, with a twinkle in his eye, the old man tells of how the reapers used to leave a bit for them. The veteran can talk of the days when the tithe was paid in kind, and the tenth shock of corn was moved away to the tithe barn. For weeks at a stretch he swung a flail in the barn before the days of the threshing machine, and an exciting moment of his life was when he spent threepence on a box of lucifer matches and struck them all one after another just for the sake of seeing this novel way of producing fire. Peculiar are the ideas of some of these old stagers, but, nevertheless, something may be learnt from the experience of a man who has spent half a century or more on the same farm.

Long Service.

* * *

From the report of the Board of Agriculture under the Diseases of Animals Act, it may be observed that there has been a very satisfactory decrease in this epidemic. In 1894 the veterinary inspectors of the Board confirmed 5,682 outbreaks of swine fever, and 56,296 swine were slaughtered. Ten years later, in 1904, the number of outbreaks confirmed were 1,196, and 5,603 infectious pigs were killed. No one knows better than farmers and dealers how troublesome at times are the swine fever regulations, but the above satisfactory figures offer some compensation for the inconvenience caused.

Swine Fever.

The Royal Agricultural Society.

New Council.

Owing to the withdrawal of other candidates, the following gentlemen are (in addition to the thirty-one members already returned unopposed) deemed duly elected as ordinary members of the new Council of the Royal Agricultural Society:—For Hertfordshire, Mr. Richardson Carr, Estate Office, Tring; for Kent, Mr. T. L. Aveling, Boley Hill House, Rochester, and Mr. F. S. W. Cornwallis, Linton Park, Maidstone; and for Warwickshire, Mr. Howard P. Ryland, Moxhull Park, Erdington, Birmingham. In view of the duties devolving upon him as Chairman of Committees of the House of Lords, the Earl of Onslow finds himself unable to undertake the post of President of the society for the ensuing year.

The New President.

In view of the inability of the Earl of Onslow to undertake the duties of President of the Royal Agricultural Society for the ensuing year, Mr. F. S. W. Cornwallis, of Linton Park, Maidstone, has, at the request of members of the Committee of Selection of the Society, consented to allow himself to be placed in nomination for election as President of the Society for 1905-6 at the Annual General Meeting of Governors and Members to be held at 13, Hanover Square, on Tuesday, August 1st.

Small Holdings Committee.

The Departmental Committee appointed by the President of the Board of Agriculture and Fisheries to enquire into the subject of small holdings, held a meeting on the 13th inst.

The following members were present: — The Right Hon. The Earl of Onslow, G.C.M.G. (Chairman); The Right Hon. The Earl Carrington, G.C.M.G.; The Right Hon. Jesse Collings, M.P.; Sir Ralph Anstruther, Bart.; Major P. G. Craigie, C.B.; Mr. C. Bidwell; Mr. F. A. Channing, M.P.; Mr. James Long; Mr. J. W. Willis-Bund; Mr. R. A. Yerburgh, M.P., and the Secretary (Mr. T. H. Sutton).

Evidence was given by the Right Hon. The Earl of Harrowby, Sandon Hall, Stafford, and Mr. J. H. Diggle, Moulton, Spalding.

Railway Rates.—Mr. T. Waghorn, barrister-at-law, gave evidence recently before Lord Jersey's Committee on behalf of the Central and Associated Chambers of Agriculture on the alleged preferential treatment of foreign produce over home produce and the remedial measures which the chambers consider necessary. Sir Herbert Jekyll explained that preferential treatment was a breach of the law, and could only be dealt with by a court of law; and the Board of Trade could only act as conciliators when points of law were not involved. The Witness said that his objection to the Railway Commission dealing with cases of agricultural preference was its great cost; it might be anything from £25 to £10,000. His principal remedy was to transfer agricultural matters from the Board of Trade to the Board of Agriculture, who would know the requirements of the agriculturists and be able to suggest some means of meeting the railway companies, such as co-operation among the farmers, and giving full truck loads. Then if these powers were not given the chambers of agriculture pressed very strongly, as an alternative, that the Board of Agriculture, on behalf of agriculturists, should have power to get a legal decision where a general principle was involved. They suggested for this reason that if, for example, the Act were construed to say that sea competition was a justification for giving preferential rates to the foreigner, then it would be open to the Board of Agriculture to ask for an amendment of the law.

By a Lobbyist.

The significance of the new redistribution proposals—and I am assuming that they will be adopted by the Legislature—lies in the evidence that they provide of what I regard as the ungenerous attitude which British statecraft has invariably adopted towards rural representation. To me there is something grotesquely anomalous in the fact that whilst centres at present represented in the House which can boast of a population of 18,500 will retain their distinction, no less than fifty thousand electors in Norfolk will be deprived of the same distinctive privilege, and be merged into neighbouring constituencies. Of course, that redstribution is necessary is undeniable. This has been rendered so, not merely by the fact that the population has largely shifted its home, but by the fact that the last Redistribution Act perpetuated many anomalies, and by the further fact that the boundary areas in the counties resolved upon by the Boundary Commissioners could only have been accepted in a mood of caprice or a spirit of jaunty indifference. Still, I doubt that these new proposals will do more than unsettle, that they will achieve aught more than to induce a spirit of resentment in the eight counties and the six boroughs to be deprived of a member. Of course, I comprehend that the same basis of population cannot be accepted for town and country alike; but the disparity between 18,500 and 65,000 does seem to me to be too great—too generous to the towns, too ungenerous to the villages.

• • •

One distinct result of the proposals will be to give a more definitely urban character to the House of Commons. There are to be sixteen new English constituencies and one new Welsh constituency. Not only are these new constituencies to be carved entirely out of the towns, but two seats which will under the plan be deducted from the present electoral scheme for the counties will be appropriated by urban centres. I am not anticipating any revival of the old town-and-county antagonism—indeed, the portents point to its absolute disappearance; but the fact remains that with any deliberate issue presented to Parliament which antagonised the great urban centres from the country, this would mean thirty-eight votes. This would have meant a serious matter in the days when the original Agricultural Rates Bill was being bitterly debated, and passions were being evoked by the lurid pictures of a wicked landlordism deliberately filching from the exchequer of the municipalities. It may, too, be a serious matter when the question of the general reform of taxation is considered. Remember that even certain Tory municipalities are in favour of the taxation of land values—a project which smells rank in the nostrils of rural Toryism. It may be that East Ham, Walthamstow, Hornsey, and Tottenham—four of the new boroughs—will each send a Conservative to the House; but I wean that you will find the municipalities in each of these centres in favour of this drastic Radical principle. Yes, the net result of the Redistribution proposals will be the modification of the rural influence in the House of Commons. It is, I fear me, another step in the elimination of the country-squire and landlord element from our politics and statecraft. The astonishing thing is that this should have been done under the ægis of a Tory Government.

• • •

Of course, in another sense, agriculture must distinctly benefit. By the reduction of the number of those political Ishmaelites, the Irish Nationalists, we shall have the prospect of at least added opportunities of dealing with agricultural questions. This reduction of numbers will, it is to be assumed, be accompanied by a moderation of that vivacious activity and restless zeal which have almost usurped every hour of time which the Government could spare the House for business outside its own intentions. In their fevered pursuit of their own ambitions, the Irish Nationalists are indifferent to every interest but their own Not once or thrice have they thwarted and baffled the designs of men anxious to secure some advantage for agriculture. The clipping of the wings of Ishmaelitism is a good thing. The pity on't is that it should have associated with it the punishment of rural representation.

• • •

So we are not only to have the encouraged competition of one Canada in the halcyon day when the policy of Colonial preference has been carried into effect. We are to have the encouraged competition of a second Canada. Australia supplies England at the present time with more wheat than Canada. And Western Australia believes that she possesses a fertility greater than the fertility of Canada. Believing this, Western Australia is preparing herself for the part she is convinced she is destined to play in the economic destiny of the Empire. She is beseeching the would-be emigrant who is likely to make a good colonist to resort to this cereal-Bonanza—to this paradise where wheat may be garnered almost ere the seed has made acquaintance with the soil. Here is the bait offered to him:—A passage for £12; a sojourn at the State farms in order to learn the Australian method of farming, at a cost to himself of 10s a week; a free grant of a hundred and sixty acres, or, if he prefer superior land, he can purchase at 10s. an acre, and have the repayment spread over a period of twenty years. I see that Lord Ridley has just recalled to us the fact that Lord Rosebery, as far back as December of 1903, declared that "the sole effect as regards British agriculture of this new policy will have been to stimulate wheat-growing and agriculture in the colonies to an almost unlimited degree. The 2s. duty would be inadequate to benefit the British farmer directly, and would only stimulate an illimitable area of competition." What has Mr. Chamberlain to offer in view of the many definite efforts now being made by the colonies to realise this prophecy?

• • •

"He cannot," said Mr. Chamberlain, speaking of the ordinary Tory candidate, "go to the country and say that he is for Preference with the colonies and yet is not prepared to pay the price." What is to compensate the British farmer, out of whose purse the real price of this policy will have to come—the farmer, who will be the real and probably the only victim of the scheme? Why do not Mr. Chamberlain and his ancients and lieutenants direct their attention to the readjustment of the balance of responsibility? Is the Statesman in favour of a direct bounty to the wheat-growing English farmer? To again quote Mr. Chamberlain: "No Tory candidate will do any good to himself and his party by ignoring this question and putting it behind him." And yet Mr. Chamberlain is guilty of an evasion of this grave issue which is almost disciplined in its completeness. He had a great opportunity of relieving our anxiety at the Albert Hall—and he was content with a mere platitude and an empty generalisation.

• • •

Mr. Rider Haggard is quite right in emphatically protesting against the idea that in his colonisation scheme he desired to rob England of her sons and daughters. If I have personally in my comments conveyed this idea I am sincerely sorry; it was not my intention. All the same, however, I am so insular in my prejudices and anxieties that I would infinitely rather the organising ability and patience which Mr. Rider Haggard suggests were devoted to the establishment of colonies for Englishmen and Englishwomen in Canada were directed to a similar home-front. As a fact, Mr. Haggard himself would prefer this. Indeed, he made this much definitely clear in the sagacious speech which he delivered to the Garden City Association on Thursday. Garden cities will serve a wise purpose. They will help to modify the economic conditions which demoralise life and weaken humanity in the great urban congeries of our civilisation. But garden cities will not alone solve the grave problems born of the segregation of the populace in the large towns. Beneficent in itself, the Garden Cities' idea has not associated with it that authority which Mr. Haggard desires for his purpose. If we should ever reproduce these agricultural and industrial settlements in this country there must be always behind the project something more than the desire to offer a new life and prospect to the derelicts of our towns, to men who are the victims of the competitive system, to the unfortunate conscripts of the great jostling centres. There must be associated with it the desire to make these colonies nurseries of labour for the country-side. The very system of training as the very character of the daily round should be such as to fit a man for the labour of the fields, and to render him content with an atmosphere of pure air and somnolent quietude. We have to seek to transfer the men who fail to find work in the towns to the land thirsting for labour—to the land parched by its absence. This is so monumental a duty that the State and municipalities might well undertake it. To retain in our midst fellows in whom the possibilities of a decent citizenship still lingers is a wiser policy than exporting them to Canada.

• • •

The Land Law Reform Association—a body which I have more than once described as "Mr. Channing's organisation," because the legislative ambitions of the Member for the Kettering division may be said to epitomise its purpose—is continuing the propaganda whose object is to disciplinise rural opinion in favour of its projects. I learn that two other conferences have been arranged, the first at Lincoln and the other at one of the Kentish centres, at which the programme of the Association will be debated, and sympathetic resolutions passed. I am in a large measure in harmony with many of the purposes of the Association; but I rather regret that these gatherings are given so distinctively a partisan character. Compensation for improvements, compensation for disturbance, the prevention of capricious eviction, the attempt to recall the yeoman to the land by enabling him to purchase his holding by means of a State-advanced loan, and the extension of the Small Holdings Act, were not of necessity partisan-ambitions. I would that the society would seek to gather into association with it that non-political sympathy with rural reform which now agitates the minds of men of all creeds and faiths. We are all reformers now. Of course, the retort will be made that the Association would willingly welcome these men into its ranks. You cannot, however, expect an eager adherence from Conservative reformers when they see the oratorical platform of the Association usually occupied by Liberals.

• • •

Mr. Balfour may be as denunciatory of the Liberal tactics as he will, he may make the most picturesque of epistolary accusations, he may indulge in the most turgid of affected tempers. Still, the fact remains that his abandonment of the Butter Bill—and abandonment we must take his attitude to be—will inevitably recall Professor James Long's accusation: "Mr. Balfour would rather cut off his head than do anything for agriculture." After all, the duration of a season is not fixed by an inflexible and invincible law. If he choose, he could extend it to September, rather than restrict it to the early half of August. And the Butter Bill is so largely non-contentious that there would have been little difficulty in securing its passage. True, a few interested persons might have been garrulous; but a sense of the sentiment of the House would have put some curb on their wagging tongues. A necessary piece of legislation has been relinquished and sacrificed, a piece of legislation which a sympathetic disposition would have ere this made the law of the land. Mr. Balfour is the master of many Parliamentary legions, and in

this case he would have actually been reinforced from the cohorts of his enemy. I wonder what Mr. Ailwyn Fellowes thought when the fact of the Premier's intention was communicated to him, and he was made aware of his resolve to throw all the blame—he, the Leader of the House, and the man who regards the closure as a heaven-designed instrument for his benefit—for his resolution on the Radicals. His face must have been a revelation of chagrin and amazement. The Minister for Agriculture has at least been whole-heartedly sincere over the business.

NORTHERN NOTES.

A week ago it was predicted in this column that the caterpillars of the diamond back moth would now be doing an immense amount of injury to the turnip crop, and more particularly to swedes. To-day these pests are strongly in evidence near the coast, and the nearer the crop is to the sea the more plentiful are the caterpillars. Fortunately, showers of rain have fallen in many places, but in some districts there has been no rain since the middle of May, and there the outlook is extremely bad. However, upon the whole, the caterpillars have thus far done less harm than was anticipated, but the crisis is close at hand, and only rain can avert it.

Everywhere wheat looks well, and if only the time for "filling" continues hot—and at present there is no ground for complaint on this score—the crop will be a bumper. According to the *Times* reports, taking an average crop at 100, the present condition of the wheat crop is 97.5, but this estimate is, so far as the Northern counties are concerned, too low. Here, the crop, so far as its present condition is concerned, is decidedly above the average, and might be returned at least as 102.5 or even higher. The position of the barley crop, there stated as 89, is probably applicable here, but the outcrop of the North hardly warrants the figures 84, low as these are. The *Times* estimates of beans and potatoes may also be accepted for the North, but the estimate of roots is far too high. If 100 be taken as the standard of the average crops of mangolds and turnips, the number 83 may fairly represent the condition of mangolds, but the turnip crop falls far below eight-tenths of an average.

The Border lamb sales are now beginning, but lambs are being held back as long as possible on account of the paucity of sheep keep. It is said that these lambs are no better than they were last year, but prices higher by from 1s. to 3s. per head were secured. The numbers penned at these sales were so small that no great reliance can be placed upon the results obtained.

The scarcity of pasturage is now a common complaint, perhaps more particularly evident in the clover pastures. These are very bare and brown, but it is surprising how well ewes and lambs will thrive in a bad pasture in a hot, dry season if only water is supplied *ad libitum*. The cost of the cartage of water is a very serious matter on many farms where every drop required for every purpose has to be drawn from a distance of two or three miles. One sometimes hears of graziers who think themselves hardly dealt with if they have to cart water from one field to an adjoining one, but what they would say if they had to cart from a well two or three miles from their farms all the water required by a flock of 700 or 1,000 sheep and lambs, thirty or forty horses, and perhaps sixty or seventy cattle, besides every drop required for household purposes, goodness only knows! Oilcakes continue comparatively high in price, but, all the same, a moderate expenditure in cake is a judicious outlay at present, as it helps to make the scanty herbage go further than it would otherwise do, and prevents stock from losing condition.

The harvest bug, or harvest spider—perhaps a variety of the "Red Spider" which is so troublesome to the inhabitants of the chalk districts just when the grain crops are approaching maturity, is often a source of considerable injury to sheep in these localities. These insects seem to collect more particularly towards the heads of the animals, which rub and frantically scratch their necks with their fore feet in their vain endeavours to obtain relief. Sometimes the wool growing round the neck will assume the appearance of a collar through the scratching while blood will be actually drawn from the jaws and throat. The remedy is to dip the flock without delay, and fortunately any kind of dip—poisonous or non-poisonous—will give the desired relief, and the solution need not be very strong if the animals are but kept a minute in the bath and care is taken to souse them overhead once or twice. In some seasons it is surprising how severely sheep grazing in clover pastures on chalk lands will suffer from the bites of these "harvest bugs," and it is an act of gross cruelty to refrain from dipping—or re-dipping—when their presence in the flock has become manifest.

There seems a decided slackness in the home-grown wool market—perhaps it may be only momentary, but the probability is that prices have reached their highest point; at any rate, for some little time to come. There has been little demand for the home trade, the increase in price is entirely due to American activity. One very significant feature of recent seasons is the decreasing number of spinners and manufacturers who by themselves, or through agents, buy direct from the farmer. Almost all the northern lustre wools find their way into the hands of two or three factors or merchants, who buy to sell again to the manufacturer. In some quarters there is a great cry against the middleman; whether it is possible to dispense with this individual in ordinary matters is a very vexed question, but one thing is certain as regards the wool trade, and that is this: there is only the middleman who will buy wool from the farmer who grows it.

M. Y.

July 15, 1905.

An Echo of the Potato Boom.

At the Lincolnshire Assizes, at Lincoln, on Saturday week, Mr. Justice Lawrance resumed the hearing of the action brought by Mr. Thomas J. Blaydes, farmer, of Epworth, to recover £333 2s. 6d. from Messrs. J. H. and T. Bletcher, farmers, Owston Ferry, Worlaby, for potatoes sold and delivered.

Mr. Hugo Young, K.C., for the plaintiff, stated that in March last year, plaintiff sold defendants a quantity of King Edward VII. seed potatoes at £9 a ton. In June plaintiff hear a rumour that the potatoes were a failure. In August defendants wrote him that the potatoes were nothing but rubbish, and that not half of them had grown. Plaintiff maintained that the potatoes were sold without a guarantee, and that the failure of the crop was owing to the condition of the land and severe cutting of the potatoes.

For the defence, Mr. Stanger, K.C., contended that the seed did not answer the description given of it by Mr. Blaydes, and that the potatoes had lost their germinating power.

The jury found for the plaintiff, and by agreement judgment was entered for plaintiff for £158 2s. 6d., in addition to the amount paid into Court, and judgment for the defendant for £46 15s. on a counter-claim.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended July 8, 1905, together with the quantities imported in the corresponding week of the previous year:—

	1904.	1905.		1904.	1905.
	No.	No.		Cwt.	Cwt.

EAST ANGLIAN NOTES.

Since the last "Notes" were written by this pen nearly the whole of East Anglia has been visited by most heavy thunderstorms, the lightning of which, besides the rain, made havoc far and wide. Farmsteads, houses, and cottages have not only suffered from the violence of the downpour of rain and strong wind, but many places have been damaged by lightning, as well as trees, farm buildings, and live stock—such as cattle, sheep, pigs, and horses—while in some cases human lives have been lost. Essex and Suffolk shares in the heavy thunderstorms on Sunday were nothing when compared with the damage done to the counties east of the East Anglian boundary. Still, the writer had hard and dangerous work to make his journey across country, as the by-roads and lanes had their metal surface completely destroyed by the rush of water that turned them into rough river beds. The stones and gullies being most trying for a bicyclist, while the mud washed into the main roads from the fields made them almost impassable in some places.

However, it was a pleasant sight to see that although in some instances—such as in the Bishop Stortford district, Thorley, Waltham, Wormley, Dunmow, Saffron Walden, Newmarket, and Ely—many fields of corn were badly laid, the damage done to the cereals was not so extensive as might have been expected, the ears being still light, as the grain was only then a third part developed.

The rain, however, and the fierce heat that has since prevailed, have rapidly swelled the grain, while in many cases the laid corn has been drawn to an upright position. So rapid has been the advancement due to the heat that at the corn market held at Yarmouth on Wednesday the theme of discussion was not only the harvest prospects, but the likelihood of oats being cut within a fortnight. On this occasion the writer was told that oats in Norfolk were a thin crop, but wheat was doing well, and there was every promise of a good crop. Barley prospects were, however, not quite so encouraging.

The gathering in of the hay is going on apac and as field by field is finished, the close-cut grass reveals the land full of young partridges. A journey in partridge-land to-day is excited by many sudden surprises and scares as the agitated parents explode with flurry and clatter, calling upon their little ones—balls of spotted fluff—to lie still in the grass, and on finding you are simply a traveller the parent partridges change their note to a summons to follow them into the still standing crops. True, the land this year is full of life!

Whilst being driven across the railway line at Kiln Lane level crossing, about one mile from Ely Station, four valuable young horses out of a batch of twelve, belonging to Mr. W. E. Stockdale, of Tower Farm, Downham, Ely, were killed by a York special express train. It appears that the train rapidly overhauled them, and so confused and terrified the poor creatures that the four killed attempted to double back, and so were literally cut to pieces before the train could be stopped, and then it was found that their remains blocked the engine gear to such an extent that a fresh engine had to be obtained from Ely.

At the Lincolnshire Agricultural Society's show at Grantham, on Wednesday, a very pleasing episode occurred when a prize was awarded to Luke Roberts, of Newstead Priory, Brigg, for having been fifty-seven years continuously employed by the family of the late Mr. J. Hill. The second best man had a record of fifty-four years service, while the third party had been fifty-one years and a half in the same family. Truly all good records!

A committee meeting of the Waveney Valley Agricultural Association was held at Harleston on Wednesday, when the question of altering the date of their show was discussed, inasmuch as the date previously fixed—September 14—had also been chosen by the Mutford and Lothingland Association for their exhibition. And it was thought that both shows, if held on the same date, would each be injuriously affected, and exhibitors inconvenienced and prejudiced. It was therefore decided to alter the date of the Harleston Show to Tuesday, September 12. The Secretary reported an offer by the Master of the Norwich Staghounds of a prize of £5 for the best hunter, four years old and upwards, in an open class, and it was resolved to accept same and to add to it a second prize of £2.

The East Anglian farmers that attended the market at Stowmarket on Thursday resented, not by reason of their opinion of the Butter Bill, the want of consideration that the present Parliament has given to agriculture during its existence.

July 15, 1905.

OBITUARY.

Sir Jacob Wilson, K.C.V.O.

It is with sincere regret that we record the death of Sir Jacob Wilson, which took place on Tuesday night at Chillingham Barns, Belford, Northumberland, owing to heart failure. The deceased gentleman had only been ill a few days, and it is thought that he over-exerted himself in connection with the past Royal show in London. Sir Jacob was a well-known personality in agricultural circles, and he will be missed by many who last had the opportunity of shaking him by the hand at Park Royal last month.

Sir Jacob Wilson was born at Crackenthorpe Hall on November 16, 1836. He was thus sixty-nine years of age. He received his early education near Appleby, and afterwards London. His father was the late Mr. Joseph Wilson, who was tenant of the large farm of Woodhorn Manor, near Newbiggin-by-the-Sea, in Northumberland. He was entered, at the age of eighteen, a student of the Royal Agricultural College, Cirencester. Eighteen months later he had taken his diploma and become curator of the veterinary department, and he had barely attained his majority when he received his first important commission, to go to Switzerland and superintend the laying-out of an estate on the English plan. This early and rapid development manifested itself in several directions. Joining his father, he was quick to apply new methods for dealing with the produce of the soil, and in 1858, at the age of twenty-two, he won the first prize at a county trial of harvesters.

About the same time, too, he won the first agricultural diploma given at Edinburgh, where he had gone to further enlarge his ideas concerning the farming science. Nor was this the only honour Scotland awarded him. In 1863 a report he prepared on the subject of reaping by machinery gained him the prize of the Highland Society. He was early practically interested in steam cultivation, having secured the second pair of ten-horse engines for the purpose sold by the manufacturers, and in 1863 acted with Mr. Clare Sewell Read as judge of steam cultivation at the Worcester meeting of the Royal Agricultural Society. As tenant of Woodhorn Manor Farm, near Morpeth, as well as agent for several large Northumberland estates, and as responsible for the education of agricultural pupils, both in farming and land agency, his hands were full. He was also secretary of the county agricultural society. He frequently acted as judge of live stock, and was a juror at the Paris Exhibition in 1878. As agent for the Earl of Tankerville, he took much interest in the Chillingham herd of wild white cattle.

In 1865 Sir Jacob was elected on the council of the Royal Agricultural Society, and filled the office of steward of live stock at four successive meetings. On the retirement of Sir Brandreth Gibbs from the office of honorary director, he was elected to the position. This was in 1875, and he continued to discharge the onerous duties until 1892. He was also chairman of the Showyard Works Committee, from 1877 to 1881, and from 1887 for a long period. He was chairman of the Stock Prizes Committee from 1883 to 1884, and from 1886 to 1888. As the Duke of Richmond remarked when making the presentation to him in 1892, the services which Sir Jacob Wilson had rendered, not only to the society, but to the public at large, on every occasion when they had to consult him as honorary director of the country meetings, had been invaluable. "His courtesy and urbanity, under all circumstances, were familiar to all, and his good humour had never been known to fail. Whether under the burning sun of the Windsor meeting, or among the swamps of the disastrous show at Kilburn—when they walked about the showyard on planks—Sir Jacob Wilson never once lost his temper or relaxed his exertions." On his resignation of the office of honorary director, the council placed on record their high appreciation of his conspicuous services, which had signally conduced to the welfare and advantage of the society.

One of the subjects which commanded the attention and strenuous exertions of Mr. Wilson was the outbreak of the cattle plague which, in the early seventies, caused such havoc among the flocks and herds of this country. It was owing to his evidence, and the testimony which he received from others that agriculturists first became alive to the fact that the main cause of that dire visitation was the importation of diseased cattle from abroad. In conjunction with the late Mr. T. Booth, Mr. Wilson laboured most indefatigably in bringing about the passing of the Contagious Diseases (Animals) Act. The chief object then was to insist that all animals coming from foreign ports should be slain at the port of debarkation; and so thoroughly did Mr. Wilson see the importance of this course of procedure that he once said he did not care one whit for the amendments that were under consideration, provided he could only secure that "no animal should leave the port alive." The Act was regarded as a great step in advance, and, for a time, it worked very satisfactorily, but experience demonstrated that the restrictions imposed by the measure were not sufficient to prevent the introduction and spread of foot-and-mouth disease in the country; and in the supplementary Act, which was passed by Parliament in the session of 1884, valuable assistance was again rendered by Sir Jacob Wilson. Many other questions affecting the interests of the ancient industry were indebted for elucidation and solution to the same skilful knowledge and mind, the most notable being the work of the Royal Commission on Agricultural Depression, presided over by the Duke of Richmond. It was generally admitted that that inquiry was the most exhaustive that had ever been held in connection with agriculture, and the report was as comprehensive as the inquiry was exhaustive.

The great services which Sir Jacob Wilson rendered to agriculture were on two occasions recognised in a tangible form by landowners and farmers; in 1884, when, on behalf of a large number of subscribers, the late Duke of Richmond presented him with a cheque for 3,000 guineas, and in 1892, when on his resignation of the position of honorary director of the Royal Agricultural Society's shows, the late Duke of Westminster presented him with a piece of plate given by the society, and announced his election as a life governor. It was but a few years after this interesting incident that Sir Jacob entered upon his duties as an official of the Board of Agriculture, a position which he resigned at the close of 1901.

The honour of knighthood was conferred upon him in connection with the Jubilee show of the Royal Agricultural Society, held in Windsor Great Park in 1889, under the presidency of the late Queen Victoria. At the council meeting a few days after the Windsor show, the following autograph letter from the Queen was read:—"Windsor Castle, July 2, 1889.—To the Council of the Royal Agricultural Society of England.—It gave me very great pleasure to visit the show of the Agricultural Society, of which I am this year the president, and I can assure you I was extremely gratified with this magnificent exhibition. I must thank the council for the care and attention they have devoted to this work, which has been so successful, and I am especially anxious to convey my acknowledgments to Sir Jacob Wilson and Mr. Ernest Clarke for their exertions in organising this show.—(Signed) Victoria, R.I." According to the unanimous desire of his colleagues on the council, Sir Jacob undertook the duties of honorary director of the show this year, and with the president of the society and members of the council received the King and Queen and the Prince of Wales on the occasion of their visit. The honour of Knight Commander of the Victorian Order was conferred upon him by the King a fortnight ago.

Sir Jacob was married, in 1874, to a daughter of the late Mr. Hedley, J.P., and his widow, as well as a son and a daughter, survive him.

The funeral took place on Friday at Chillingham, when the chief mourners were Lady Wilson, widow; Miss Wilson, daughter; Mr. Gordon Wilson, son; Mr. and Mrs. J. E. Fenwick, of Berryhill, son-in-law and daughter; the Rev. J. Wilson, brother. There were also present Sir Thomas Elliott, Secretary of the Board of Agriculture; Mr. Compton Bracebridge, representing the Royal Agricultural Society; Sir Francis Walker, agent to the Duke of Northumberland; the Earl and Countess of Tankerville; Mr. John Maughan, secretary of Yorkshire Agricultural Society; Mr. Thomas McCrow, secretary of the Agricultural Hall; Colonel Mitford, Otterburn; Mr. Noel Villiers, agent to Lord Tankerville.

At the memorial service for the late Sir Jacob Wilson, K.C.V.O., held on Friday at St. George's, Hanover Square, H.M. the King was represented by Colonel Sir Nigel Kingscote, and H.R.H. the Prince of Wales by Colonel the Hon. Sir William Carrington; while Prince Christian attended personally. There were also present the Earl of Onslow, the past President of the Board of Agriculture, and Mr. Ailwyn Fellowes, the present President, together with the heads of the staff of the Board, including Major Craigie, C.B., Mr. Arthur W. Anstruther, Mr. Somerville, Mr. James William Clark, K.C., the legal adviser, Mr. A. C. Cope, the late chief veterinary officer, Mr. F. A. Fulford.

The Royal Agricultural Society was represented by the following members of the Council and Executive:—Sir John H. Thorold, Bart. (President), Lord Middleton (ex-President), the Earl of Coventry, Sir Walter Gilbey, Bart., Mr. J. Bowen-Jones, Mr. Percy Crutchley, the Right Hon. Ailwyn E. Fellowes, M.P., and the Earl of Feversham (Vice-Presidents), Mr. F. S. W. Cornwallis, Lieutenant-Colonel J. F. Curtis-Hayward, Sir John Gilmour, Bart., Mr. John Howard Howard, Mr. Ernest Mathews, Mr. Ernest W. Shackle, Mr. Garrett Taylor, Sir Ernest Clarke (Secretary), and Mr. George Taylor and all the members of the Society's official staff. Several past members of the Council and ex officials of the Society were also present, together with members of the governing bodies and executive of the numerous other agricultural organisations with which Sir Jacob was associated.

The following members of the Council, who sent letters expressing regret that they were unavoidably prevented from being present, Lord Moreton (Trustee), Mr. Victor C. W. Cavendish, M.P., Mr. J. Marshall Dugdale (Vice-President), Sir P. Albert Muntz, Bart., Mr. J. P. [illegible], Mr. S. P. Foster, Mr. E. V. V. Wheeler, Dr. J. Augustus Voelcker (Consulting Chemist), and Mr. W. H. Hogg (Farm Manager).

The Duke of Portland (President of the Royal Commission on Horse Breeding, of which Sir Jacob was a member) wrote that, to his very sincere regret, he had an important and pressing engagement elsewhere which he was unable to postpone. The other Commissioners present were the Earl of Coventry, Lord Middleton, Sir John Gilmour, Bart., and Mr. Bowen-Jones.

Mr. J. Herbert Taylor attended as representative of the Royal Commission on Horse Breeding; Mr. E. J. Powell as secretary of the Smithfield Club and the Shorthorn Society; Mr. John Sloughgrove, the Secretary of the Shire Horse Society; Mr. A. B. Charlton, secretary of the Hunters' Improvement Society; and Mr. F. Beck, manager of the King's Sandringham estate. Among other representative men, nearly all old friends of the deceased, were Sir John Rolleston, M.P., General Sir Dighton Probyn, Mr. Minto Wilson, Mr. J. Darby, Dr. W. Y. Davies, Mr. J. Wilson, Sir J. Heron Maxwell, Mr. A. Goddard (secretary of the Surveyors' Institution), Mr. R. S. Burgess, Mr. Frederick Challoner, Mr. G. F. Sandy, Mr. E. J. Powell, and Mr. Walter Webb (many years manager for Sir Jacob, and now superintendent surveyor to the Board of Agriculture).

THE DAIRY.

Municipal Milk.

Dr. A. W. Harris, Medical Officer of Health for the borough of Lewisham, in his annual report, while expressing the opinion that the complete control of municipalities over the milk supply of London is impossible, states that there is certainly urgent need for better control than exists at present. He therefore suggests the establishment by municipalities of a model farm and dairy to produce milk under scientific conditions and to supply carefully prepared modified milk for infants for whom breast feeding is impossible. Such a farm, he thinks, could easily be established at Lewisham, and would be a financial success if supported by public institutions; it would be a great benefit to the poorer classes, who at present suffer from the nefarious practices of the itinerant milk-seller and the polluted milk obtained from small shopkeepers.

Whitchurch Cheese Fair.

There was a moderate pitch of 57 tons at this fair on Wednesday, and quality was fuliy up to the average. Buyers were numerous, and fully prepared to give slightly higher prices for best qualities, business being quickly done at fairly satisfactory prices. Higher grades 48s. to 53s. per cwt., medium and lower grades 40s. to 47s.

The Sale of Butter Bill.

In a letter to the Hon. Ailwyn Fellowes, M.P., concerning the prospects of the Sale of Butter Bill, Mr. Balfour writes:—"I am as anxious as you to see this measure become law, and I greatly regret the impediments which obstruct the passage of this modest contribution to the general interests of the agricultural community. But your long familiarity with the difficulties attending this class of Bill at a period of the session when controversy proves absolutely fatal to any progress, enables you to appreciate the practical impossibility of finding the time necessary for its discussion before the date at which the session naturally terminates. For this state of things the Government are really not responsible, least of all you, who have so constantly pressed the claims of the Bill upon my attention, and who have done, I know, your very best to compose the differences which prevail in connection with this Bill. You have suggested that I should receive a deputation from those who are deeply concerned in securing its enactment; but, in view of the circumstances which I have mentioned, no useful purpose would be served by acquiescing in this proposal, since you are as competent as I am to point out to those who form the deputation the actual state of affairs. I have only to add that I heartily sympathise with you in the disappointment of your hopes to achieve the passing of a Bill which is so desirable in the interests of those whose welfare is your special care."

"BE WISE IN TIME."

FARMERS should take care (especially in view of the comparatively low rates of premium) to insure against loss through **STORMS** and **FIRE.**
The **HOMESTEAD, FURNITURE, OUTBUILDINGS, LIVE STOCK, IMPLEMENTS, STACKS, AND GROWING CROPS** all represent property which can by the present modern system of **INSURANCE** be covered at a trifling annual outlay.
INSURANCE against death or injury through accidents should not be neglected.

Subscribed Capital, ONE MILLION Sterling.
Head Office: 5, Lothbury, London.
With Branch Offices throughout the country.
Undertakes AGRICULTURE PRODUCE and FARMING STOCK (Live & Dead) INSURANCES at current rates.

Gloucester (North Cotswold).

SIR,—Since the very welcome rains of June 30 and July 1, things agricultural have much improved. Wheat looks well, barley fair. Winter oats good—winter beans also. Spring beans better than for several years. Spring oats, where planted late, very bad indeed—the worst crop of the season. Hay, short cut; clover, ditto; mangolds, very patchy, some few good pieces. Swedes and turnips going along well now—early sown much poisoned with the fly, very little fruit.

July 15, 1905. H. DEE.

A Dry Season in East Yorkshire.

SIR,—The prospect of the farmers is not very encouraging, partly owing to the exceptionally dry season, as everything is practically burnt up. Hay is very light, except some clover crops that got a good cover before the hot weather. Corn crops will be short, except wheat, which is good; and in some cases barley is a good crop. Potatoes are looking very well, but short of top; in fact, they do not show the robustness they generally do. Turnips are very scarce except where sown soon and on a fine tilth; in fact, I know of several good farmers who have sown them three times and have no prospect of turnips yet.

The price of stock is only poor. Grazing cattle have been a complete drug; sheep sold well during the early spring, but have dropped very much in price. Beef is only a poor price; in fact there is nothing making a very satisfactory price to the farmer except wool.

Good Prospects in South Nottinghamshire.

SIR,—The promising account I wrote you in the spring has been to a great extent realised. Wheat on almost all sorts of land is far beyond the average in appearance, and should be ready to cut by August 14. Barley was stayed in its growth, by the drought early in June. The big rain did not reach us till June 17. It was most beneficial, and gave the barley renewed vigour, and before the storm of July 9, knocked the crops flat. They had well-developed ears unusually full of corn.

Beans are an excellent crop, likewise peas. Early market peas have been in great request, one grower making at the rate of £28 per acre. Potatoes are very healthy. Those from seed imported direct from Scotland showing vastly stronger than crops from home-grown sets. Mangels and Kohl Rabi forge ahead. Swedes now are making growth, but those sown before the rains were afflicted with the fly, and progressed very badly.

Common turnips sown in July have come freely the rain came too late to make an average hay crop, but the meadows are green with eddish before there is time to cart the hay, though that in most cases has been quickly performed.

Sheep breeders are jubilant with the price of wool, more especially those who during the day of affliction stuck to their long-woolled flocks. Lambs are doing well, after a trying time in the spring, when ewes in many cases had a bad supply of milk.

July 13.

Favourable Season in Brecon.

SIR,—The weather is very favourable for farming purposes, but continues dry, and on shallow land the grass is very short; the hay and corn is also very light on highland farms, and the turnip crop is almost a failure, in most cases the crops have been resown and unless we get a good fall of rain the prospects of the late crops are not anything better than the early ones.

The season has been very favourable for shearing operations on the mountains, and the price of wool is very gratifying to the farmers, being about 3d. per lb. above last year's rates.

Smut in Brome Grass.

SIR,—I enclose a sample of mowing grass which appears to be affected with smut. Can you give me any information as to the cause? and can you say whether the hay will be detrimental to milch cows?—E. C. S.

[*.* The specimens sent are brome grasses (*Bromus arvensis*), and are certainly smutted. Probably the smut is *Ustilago bromivora*, very nearly akin to that found in barley and oats, and also in wheat, but a form more particularly prone to brome grass. This is a fungus, and has probably been present in the crop for a year or two, but in such small quantity as to be unnoticed. The spores (which may be roughly defined as the seeds of the fungus) would fall to the ground and remain dormant until opportunity arose for their growth. In the first instance a few spores may have been carried into the field by wind—or in some other way which cannot now be traced—but each year will see the fungus present in greater quantity. If the hay is badly smutted, it will be detrimental to all kinds of stock. It tends to cause paralysis of the throat, and it affects the spinal cord, and swallowing becomes difficult; there is a constant flow of saliva from the mouth, the jaws are continually in motion, and the animals are lame and stagger. If the herbage is only partially smutted, probably no bad effects will be noticeable, and it is doubtful whether the milk of cows will be in any way prejudiced. If much herbage is smutted, the hay should be given in small quantities, and to old and healthy stock. This fungus affects brome grasses only, and these are practically worthless under any circumstances. So if the herbage is mainly composed of brome grasses, the best course will be to plough up the field, and in about four years' time lay it down again; but care must be taken to sow a mixture of seeds in which there are no brome grasses. If, however, the brome grasses are not much in evidence, or if only a small proportion are smutted, the herbage should be cut early next year before the grasses seed, and the produce should be burnt, thus destroying the spores.—M. Y.

Harvest Prospects in Scotland.

Reports from the different districts in Scotland as to the harvest prospects are published to-day, and they are generally of a favourable character. Harvest operations for grain are expected, with favourable weather conditions, about the middle of August, or a fortnight earlier than last year. On all hands there are complaints of the prolonged drought, which has affected all the cereals, and these crops will in consequence be light in the straw, unless rain comes speedily.

The winter was a very open one, but the spring has been backward. Over the greater part of the country there has been a protracted period of dry weather, which has greatly reduced the hay crop, and made the turnips somewhat doubtful as to results, while the oat and barley crops have also been very seriously affected as regards the straw, which will be short. In some parts of the country, however, there has been within the last few weeks a fairly satisfactory rainfall, but it has been very partial.

The south-west of Scotland has been particularly favoured in this respect, and the crop prospects in Galloway are, on the whole, very good; while more recently, in Perthshire, part of Fife, Forfarshire, and Aberdeenshire things are looking pretty well. The soil was worked in good condition, and the seed bed was all that could be desired. There will not only be an early, but, so far as can be seen at the present time, a fruitful harvest, the cutting of grain being likely to begin about the middle of August, while it will be general before the end of next month.

Wheat will be the crop of the season, the yield all over being probably a quarter more than last year. Barley is looking fairly well, but it will probably be light in bulk as compared with last year. Oats are looking very thin and stunted, and the straw will certainly be short. Hay has suffered from the dry weather, but it is being secured in good condition.

Potatoes have been growing very well, and in the principal counties where they are raised the reports are of the most encouraging nature, and make no mention of disease. The one disquieting feature of the situation is the precarious condition of the turnip crop, which is the staple root for winter feeding. In a good many cases resowing was necessary, owing to the drought, but the plants are now coming away very well. Pastures are bare, and as a result the prices of store cattle and lambs have fallen considerably.—*Scotsman.*

European Crop Prospects.

FRANCE.—There can be no doubt that the wheat, and to some extent the barley crops, must have suffered damage from the violent storms and drenching rains of the past fortnight, but as the injury would have more effect upon quality than quantity, the influence upon trade opinion in the provinces was not sufficiently strong to do more than make holders rather reserved, and to keep prices firm. The weather since Tuesday has been fine, and less complaint is heard as to damage. Harvest is finished in the South and Centre, with about average results. Straw is short. The North and North-East districts suffered most from the cyclones. Barley and oats in general appear to have derived benefit from the rain.

HOLLAND AND BELGIUM.—In bright, hot weather the crops are recovering from the effects of excessive rain, and many of the laid fields are again in normal position. Generally speaking, the harvest outlook is satisfactory.

GERMANY.—During the past ten days there is a marked improvement in the aspect of the crops, and good-average wheat results are looked for with confidence.

ITALY.—Weather is now all right for harvesting. Wheat cutting is general, and a fairly abundant yield is expected. The maize crop is in good condition.

SPAIN.—Harvest work is hindered in the neighbourhood of Saragossa, Huesca, and Lerida, but the general crop shortage will be met by the large wheat imports already to hand and on the way.

HUNGARY.—According to the report issued by the Ministry of Agriculture on the 1st inst. the approximate yield of the harvest is as follows:—Wheat 42 million metercenters (as against 37.3 million last year); rye 13.75 million (11.89 million), barley 12.75 million (10.87 million), oats 11.75 million (9.11 million). Rape is scarcely an average; maize large results are expected; potatoes promise a rich crop; beans and pulse are satisfactory; hops and tobacco are good. The condition of hemp and linseed is satisfactory, generally good for sugar and feeding beet, and satisfactory for artificial forage, meadows, and pasture lands.

RUSSIA.—While complaints are rife as to the unsatisfactory state of the crops in Central and Northern Governments, the news from the Southern half of the Empire is just the reverse. In the regions round about Odessa, in the Crimea and parts of Caucasia large yields of wheat, rye, and barley are practically assured, one correspondent averring that this year's harvest in these districts is leaving behind all the crops of the past 15 years—these be brave words and their fulfilment is "devoutly to be wished." Railway waggons continue very scarce, and there is no probability that this impediment in the way of moving produce will be rectified for many a long day. In the meantime shipments of old grain are maintained at full measure.—*Dornbusch.*

The old established flock of pure-bred Southdown sheep, bred at Buckland, Faringdon, Berkshire, will be sold on Friday, August 18, 1905. The history of the Buckland flock would virtually form a brief history of Southdown sheep, for the flock has been in existence since about the year 1800, when Sir John Throckmorton, Bart., purchased ewes direct from the Sussex Downs, the home of the breed; also from the famous flocks kept by Francis, Fifth Duke of Bedford, at Woburn, and from Mr. Williams, grandfather of the present agent at Buckland, who kept a flock at Ashtree Farm, Buckland, and who, in the year 1850, exhibited three twenty months old Southdown wethers at the Smithfield Show, taking the first prize of £20 and the gold and silver medals.

Harvest Weather.

The "Mark Lane Express" Special Three-Day Forecast.

1. Essex Street, Strand, 12 Noon, Monday, July 17th, 1905.

GENERAL PREDICTION.

The general distribution of atmospheric pressure is normal for a seasonable and mostly fair July type, with some showery spells. There is a persistent area of high barometer over the Bay of Biscay, and shallow cyclonic areas of low barometer are now travelling freely Eastwards across North Scotland and Scandinavia. The weather will be fair, with frequent cloud and some occasional showery spells or local showers. The winds will be Westerly to South-Westerly, and North-Westerly, moderate or fresh. The temperature mild to warmer, and then cooler. The general sequence will be at first mostly fair or cloudy and mild. Later, mostly fair and warm in the East and South, cloudy to showery in the West and North. Finally fairer in the latter, and some showers in the former districts.

LOCAL PREDICTIONS.

No 1.—Scotland:—Begins cloudy to fair and mild; some local showers, chiefly in the North, fair in S.E. Later fair to cloudy, some occasional showers. Finally fairer with some passing showers in the N. and E.

„ 2.—England (N.E.) and part of Scotland:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire, (N. & E. Ridings).—**At first and later, mostly fair to cloudy and rising temperature. Finally some local or passing showers and cooler.**

„ 3—England (East):—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.—**The same as No. 2, only beginning fair or fine.**

„ 4—Midland Counties:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford-Rutland, Shropshire, Stafford, Warwick, Worcestershire, York, shire (West Riding).—**Fair with some clouds; local showers in the north and mild to warm. Later fair to cloudy; some showers and cooler. Finally fairer again.**

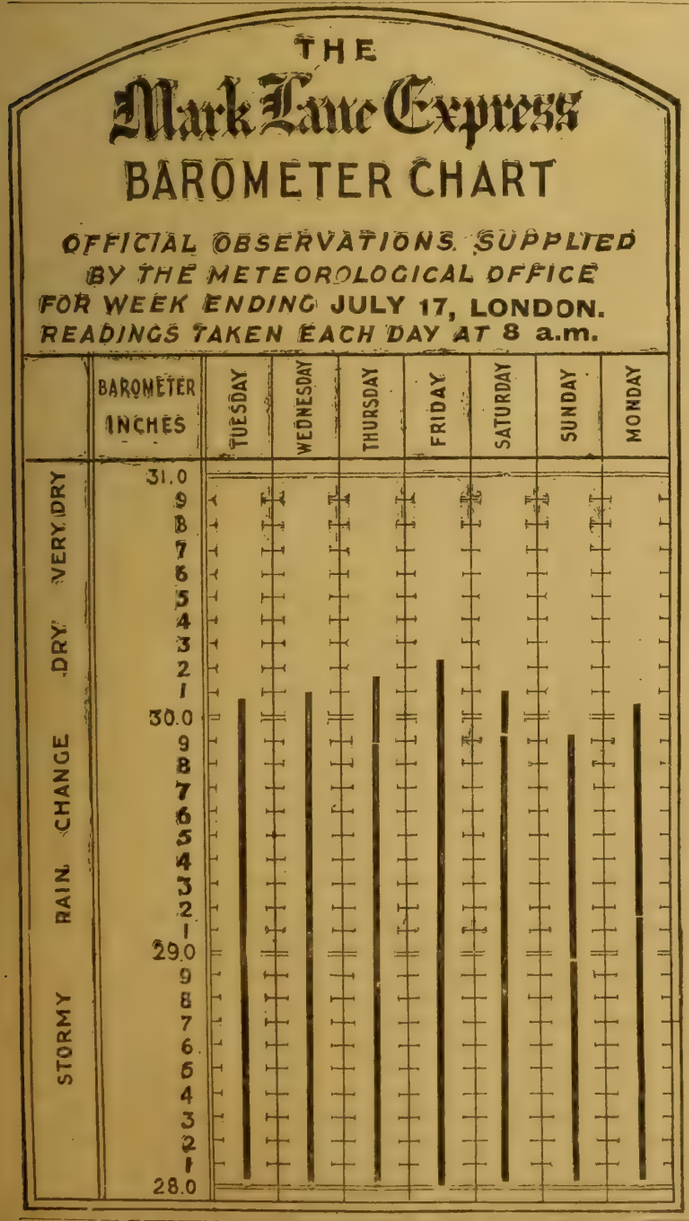
No. 5.—England (South):—Middlesex, Berkshire, Kent, Surrey, Sussex, Wiltshire, Channel Islands, Hampshire.—**At first, fair, with some cloud, and normally mild to warm. Later, fair to cloudy and some showers. Finally, some passing showers to fairer and cooler.**

„ 6.—Ireland.—At first, fair to cloudy in East, some showers in the West and North. Later, some passing showers to fairer. Finally, fair to cloudy.

„ 7.—England (North-West) and North Wales. Cheshire, Lancashire, Westmoreland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.—**At first, fair to cloudy, some occasional showers, and normally mild. Later, fair to cloudy, with some showery spells. Finally, fairer and cooler.**

„ 8.—England (South-West) and South Wales:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.—**At first, fair to cloudy, and mild to warm. Later, some passing showers. Finally, fairer and cooler.**

The directions and rotation sequences of the wind, W. to S.W. and N.W. to W., will be generally similar in all the districts. They will be everywhere fresher in force than of late.



Map of the British Isles showing groups of Counties representing the above Meteorological Districts.

THE SUN AND MOON.

Sun Rises	...	4.4 a.m.
„ Sets...	..	8.8 p.m.
Moon Rises	...	8 32 p.m.
„ Sets	...	4 57 a.m.

Age of Moon—Sixteen days.

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Monday, July 17th.

GENERAL INFERENCE.—The barometer is now rising at all our Western stations, and fair, rather warm weather seems likely to continue over the greater part of the country. Disturbances passing along the Northern Atlantic will probably cause some showers in our Northern and North Western districts.

SCOTLAND, N.—Moderate or fresh Westerly winds; changeable, some showers.

SCOTLAND, E., and ENGLAND, N.E.—Moderate or light Westerly winds; fair on the whole, occasional showers locally.

ENGLAND, E., MIDLAND COUNTIES, and ENGLAND, S (London and Channel).—Light, Westerly breezes; fair or fine; rather warm.

SCOTLAND, W.—Same as Scotland N.

ENGLAND, N.W. (and N. Wales).—Moderate or fresh Westerly winds; fair generally, occasional local showers.

ENGLAND, S.W. (and S. Wales).—Same as England, E., Midland Counties, and England, S.

IRELAND, N. and S.—Same as Scotland, N.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat: English steady, quiet, at unchanged prices. Foreign sellers ask late rates, but buyers are indifferent. South Russians quoted at 32s 6d to 36s 6d; Plata, 32s 6d to 34s; No. 2 Club Calcutta, 32s 3d to 32s 6d; No. 1 Northern Manitoba, at 35s 6d. Flour quiet, unchanged prices. Hungarians quoted at 31s; Iron Dukes, ex quay, at 21s 3d, and ex ship, to arrive, at 20s 9d. Maize steady, quiet. Mixed American, landed, quoted at 24s 6d; La Plata, ex quay, at 24s 9d. Barley quiet, unchanged. Odessa-Nico.-Kherson, landed, quoted at 20s 9d. Oats slow, unchanged. Common sort quoted at 14s 9d to 15s 6d.

Mark Lane, Friday.—Wheat: English steady, quiet; very limited supplies. Foreign dull, and 3d to 6d lower on the week. South Russians quoted at 32s to 35s. Red Karachi at 30s 3d, No. 1 Northern Manitoba at 36s 3d. Flour quiet, unchanged prices. Hungarians quoted at 31s, Pilsbury's Best at 30s 9d, Gilt Edge at 20s 3d, Iron Dukes at 21s 3d. Maize: Limited business passing at about unchanged prices. Mixed American, landed, quoted at 24s 6d, and River Plata, ex ship, at 24s. Barley dull and 3d easier. Odessa, Nico, Kherson, ex ship, quoted at 20s 3d to 20s 6d. Oats slow, unchanged; common sorts quoted at 14s 6d to 15s. Arrivals, July 8-13: Foreign wheat, 53,900 quarters; oats, 75,040 quarters; maize, 35,310 quarters; flour, 33,060 sacks.

COUNTRY.

Ashford, Tuesday.—Not much business doing, but prices remain firm for English wheats, which are very scarce. Quotations:—Wheat, 33s to 36s; English barley, 27s to 29s; foreign grinding barley, 21s; Mazagan beans, 30s to 32s; tick beans, 33s to 35s; new flat maize, 27s; round maize, 27s to 28s; black oats, 20s to 23s; white ditto, 22s to 24s per qr; flour, whites, 31s; seconds, 28s; sealing, 26s per sack.

Banbury, Thursday.—Wheat, red, 32s to 34s; barley, 26s to 30s; beans (new), 30s to 33s; oats, 20s to 24s; peas, 30s to 34s per qr.

Berwick, Saturday.—Few of any samples of grain on offer, with prices unaltered all round.

Birmingham, Thursday. — Scarcely any business doing here, the attendance being small. Foreign wheats occasionally 3d cheaper, but met with a very poor inquiry. Grinding barley advanced 3d to 20s 9d per 400lb at Sharpness. Plate maize unchanged at 24s per 480lb at Sharpness. Flat maize 5s 2d per cental at Liverpool. No English wheat on market. Beans and oats very firm.

Brighton, Thursday.—Barley, 28s to 33s; grinding ditto, 22s to 24s; English oats, 20s to 22s; peas, 29s to 30s; beans, 31s to 32s. Small attendance and quiet trade at last week's prices. Nothing doing in wheat.

Bury St. Edmunds, Wednesday.—We had a poorly attended market, and the business done was of a retail character. Wheat in small supply, only sufficient for the local millers, who were free buyers at last week's prices of 33s to 32s 6d per qr. Oats, grinding barleys, maize, and other feeding corns firm, at last week's full prices. Feeding stuffs firm.

Cambridge, Saturday.—During the week the wheat trade has been unchanged, and the weather has been very forcing. Winter oats will be cut early next week. At this market on Saturday there was a sample or two of wheat on offer, which made the extreme price of last week (32s to 34s per 504lb.). Beans and oats quite as dear.

Canterbury, Saturday.—The near approach of harvest tends to make buyers indifferent, although prices are firmly maintained. English oats range from 20s to 22s; grey peas, 32s to 33s; maize, 26s to 28s per quarter. The strong sun of last week has ripened the corn considerably.

Carlisle, Saturday.—Very small supply of oats shown in our market to-day. Slow sale at last week's prices; 22s 6d to 23s per 336lb.—THOMAS ROBINSON.

Chester, Saturday. The market was very sparsely attended, farmers being busily engaged in the harvest field. There are no changes to note in the prices of feeding stuff since last week, but the market both for English and foreign produce is very firm, with an upward tendency. Quotations: New white and red wheat, 4s 7d to 4s 9d per 75lb.; new grinding barley, 3s 3d to 3s 6d per 64lb.; old beans, 5s 9d to 6s per 80lb.; Egyptian beans, 33s 6d to 34s per 480lb.; new oats, 3s 2d to 3s 4d; old ditto 2s 9d to 2s 11d per 46lb.; Indian corn, old, 13s 6d to 13s 9d; new ditto, 13s 3d to 13s 6d per 240lb.

Chichester, Wednesday.—White wheat, 34s to 34s 6d; red ditto, 34s to 34s 6d; grinding barley, 20s to 23s; English oats, 18s to 23s; maize, 25s to 26s; flour, 27s to 29s. A small attendance, and very little business doing.

Colchester, Saturday. — There was nothing offering from farmers to day; prices were weak and the tendency lower for wheat and oats. The forcing weather of the past week is bringing on harvest very quickly, and several pieces of winter oats are cut already.—JOSEPH WILES AND SON, LTD.

Coventry, Friday. — Trade slow. Farmers showed scarcely a single sample, and prices were to be quoted as follows: Wheat, 12s to 13s per 196lb; barley, 29s to 33s per 448lb; oats, 23s to 25s per 304lb; beans, 12s 6d to 13s per bag (1½bu); peas, 11s 6d to 14s per 196lb.

Derby, Friday. There was scarcely any wheat offering, and prices continued nominal. Extreme rates were claimed for spring corn, which was firm. Quotations: White wheat, 34s to 35s; red, 33s to 34s; malting barley, 23s to 24s; beans, 32s to 33s; oats, 20s to 21s.

Devizes, Thursday. English corn of all descriptions still very scarce. New wheat, 16s 6d to 17s 6d; secondary, 15s to 16s; best barley, 26s to 27s; secondary, 20s to 24s; rye, 22s to 24s; old black oats, 19s to 21s; white ditto, 19s to 22s; malting barley, 26s to 32s; beans, 16s to 18s.

Doncaster, Saturday. Very small supplies of grain and a quiet market all round. English wheat made last week's prices, and foreign was a trifle easier. Indian was 6d, and red wheat 3d per qr lower. Oats and beans were steady at late rates, and flat maize and seed 6d per qr cheaper on the week.

Dorchester, Saturday. The attendance to-day was again small, and quite in accord with the limited supplies. A grain wheat being again the most conspicuous feature in the absence. Prices generally ruled slack all through, and buyers were able to make their own terms for most sorts, despite the fact of there being very little remaining of home produce to offer.

Dublin, Friday. Wheat 1s to 2s; grinding barley 2s to 3s, malting ditto, 3s 6d to 4s; oats, 1s to 3s; oatmeal very profined, 19s 6d to 20s; flour 19s to 20s 6d; pollard and bran, 6s to 6s 6d.

Glasgow, Wednesday.—There was the usual attendance to-day at our corn exchange. The exchange will be closed on Friday and Monday owing to the Glasgow Fair holidays. Wheat and flour steady and unchanged, with moderate business passing. Maize 3d cheaper owing to arrivals. Indian corn 1½d dearer. Canadian pease 3d dearer. Other articles of the trade unaltered.—GIBSON AND CLARK.

Grantham, Saturday.—The attendance was meagre, and very little corn was offered, quotations being as last week.

Hereford, Wednesday.—The market was very small. English wheats were firm at late prices; oats very steady. Wholesale quotations: Wheat, 3s 10d to 4s per 62lb; barley, 2s 9d to 4s per 56lb; oats, 2s 3d to 2s 9d per 40lb.; beans, 3s 6d to 3s 8d per 65½lb.; vetches, 4s to 6s 6d per 65½lb.

Ipswich, Tuesday.—Wheat: The supply was small, but slightly larger than last week's. Demand quiet at 33s 6d to 34s 6d delivered at Ipswich, and worth about the same for delivery on the line inland, millers being short of stock. Feeding corns firm all round; oats at 20s 6d to 22s, maize at 25s per qr.; grinding barley at 25s to 27s, and other feeding corns at fully last week's prices.

Leeds, Tuesday.—The weather continues favourable for the crops. The wheat trade has not undergone any marked change during the week and maintains a firm attitude without any alteration in values, millers still confining purchases to their immediate requirements. English wheats are now extremely scarce, and fetch long prices. Maize 9d to 1s dearer. Beans scarce and firm. Oats steady.—DUNNS AND CO.

Leeds, Friday.—English wheat firmly held at Tuesday's full prices, and all kinds of foreign the turn easier. Malting barley at late rates, feeding in sellers' favour. Beans, peas, oats, maize, and flour without change.

Leicester, Saturday.—Fair attendance, with moderate supplies of home-grown wheats. Trade quiet. Red wheats, 32s to 34s; white wheats, 33s to 35s per 36 stones; grinding barley in slow demand; beans steady; fine oats, 22s to 24s per 26 stones.

Lincoln, Friday.—Very small attendance, and trade of a languishing description. Farmers' stocks of English wheat are apparently exhausted, and the few samples of foreign on offer realised unaltered rates. Feeding stuffs unchanged, except maize, which was firm and slightly dearer.

Liverpool, Friday.—Wheat: The market was thinly attended; wheat a very quiet trade at generally 2d per cental decline from last market day. Flour: A very small trade at about late rates for both foreign and home-made brands. Maize very quiet; mixed American the turn lower, other qualities unaltered; demand slow. Barley neglected for brewing, firm for grinding; demand small. Beans very scarce, and again 3d to 6d dearer. Peas firmly held at full rates, but slow to move. Oats in quiet demand, and prices nominally unaltered. Oatmeal firmly held at recent prices, but in slow demand. Oilcake: A quiet trade, without change in values. — SEGAR AND TUNNICLIFFE.

Maidstone, Thursday. In consequence of the local exhibition of agriculture and machinery the Corn Exchange was not well filled. Display of wheat samples quite enough for millers, and the cost of it no change from last Thursday's market. Other grain almost entirely without alteration.

Malton, Saturday.—The grain trade is practically nil, and the attendance of farmers is so small that offers are almost unquotable. There will be but little doing in the local markets until the new crop is ready. Prices for wheat and oats remain unchanged.

Newcastle-on-Tyne, Saturday. At our to-day's market a very quiet demand prevailed for wheat at prices below last week's quotations. Maize still reamins firm, though scarce. A steady demand for oats at unaltered prices. Barley in buyers' favour. Beans advanced another 6d on the week. Peas firm at late rates.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—In consequence of hay harvesting, there was a very small attendance, and very small supplies on offer. Prices were firmer. Wheat, 32s to 34s; barley, 24s to 32s; oats, 20s to 23s; peas, 28s, to 33s; flour, 24s to 29s.

Norwich, Saturday.—Wheat still in small supply, with prices the same as last week. Fine weather has prevailed all the week, with high temperature; some rain would be very acceptable. Wheat, red, 33s 6d to 34s per quarter, weight 63lb per bushel imperial. Corn inspector's return for the week ending July 10, 1905:—Wheat, 142 quarters, 31s 6d.—J. A. MILLS.

Nottingham, Saturday.—The little English wheat left held for fancy prices. Grinding barley steady. Poor show of oats, and make full rates. Beans: But few offering, and held for 6d advance.—ROBT. HUBBLE.

Peterborough, Saturday.—Only a lot or two of wheat at market, and not many buyers. Prices about the same as last week. Spring corn steady in value, with a quiet demand. Weather all the week hot and forcing.—THOMAS HILL AND SON.

Plymouth, Friday.—There was a good attendance on our market. Wheat was quiet; maize and barley 3d dearer; oats unaltered.—ORLANDO DAVIS AND CO.

Reading, Saturday. A small attendance, with corn scarce. Wheat made from 33s to 36s; grinding barley, 23s to 26s; oats, 20s to 23s; beans, 28s to 36s; peas, 28s to 32s; flour, 25s to 28s.

Retford, Saturday.—The scarcity of English wheat was again the dominant feature of this market. There was not a sample to be seen; it was reported to be worth quite 6d more money, and would have made 32s 6d to 33s 6d, but was not to be had. Food stuffs were also considerably dearer. Round maize was quoted at 28s, and flat at 27s, delivered here; good white oats were easily worth 21s to 22s, and black ditto 19s to 20s per 24 stones; English beans, 32s per 36 stones.

Ripon, Thursday. Business is being transacted at late rates, with the exception of round maize, which is 1s per qr dearer. English wheat, 33s to 33s 6d; foreign wheat, 32s to 36s; barley, grinding, 23s to 24s; oats, 20s to 21s; maize, round, 28s to 29s; maize, flat, 27s to 27s 6d per qr.

Shrewsbury, Saturday. Quotations: Wheat, 14s to 14s 6d per 336lb; oats, old white, 16s to 17s; new white, 14s to 14s 6d; peas, 11s 6d to 12s 6d; beans, 15s to 16s per 240lb.

Stamford, Friday. The Lincolnshire Show had an adverse effect upon the attendance. Very little grain was offered and business was transacted at last week's prices. Wheat, 34s to 35s; oats, 21s to 24s; beans, 32s to 33s per quarter.

Sunderland, Saturday.—Brilliant weather, small attendance. Farmers are busy with hay, and nothing showing to best places. Arrivals: Coastwise, Wheat, 550 quarters; barley, 640 quarters; oats, 190 quarters; beans, 100 quarters; maize, 100 quarters. Foreign nil. E. AND T. RICHARDSON.

Tunbridge Wells, Friday. White wheat, 34s 6d to 35s 6d; red ditto, 33s 6d to 34s 6d; barley, 27s to 32s; grinding ditto, 19s to 25s; oats, English, 19s to 21s; rye, 23s to 24s; peas, 31s to 36s; beans, 32s to 36s; tares, 48s to 56s; maize, 24s to 28s.

Warwick, Saturday.—There was a very poor attendance at this market. Scarcely any samples of English grain on offer; only one farmer's sample of wheat, which went away unsold. Feeding stuffs were in fair demand at slightly lower prices.

Wisbech, Saturday.—Very small market. Odd samples of red wheat sell at about 34s to local millers. No change in other articles.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a small attendance, and very little business was transacted. Quotations: Wheat, 13s to 14s per 216lb; English beans, 13s 6d per 196lb; oats, 13s 6d per 196lb.

Worksop, Wednesday.—Very small attendance. White wheat, 32s to 33s; red ditto, 31s to 32s; barley, 26s to 28s; grinding barley, 24s to 26s; white oats, 21s to 22s; black oats, 20s to 21s; flat maize, 27s to 28s; round maize, 27s to 28s per qr.

Yeovil, Friday.—Market quiet and trade dull, with prices favouring buyers. Wheat quoted 32s to 33s 6d per qr. for best samples; secondary, 30s to 31s; foreign wheat, 33s to 34s; best barley, 27s 6d to 30s; secondary, 22s to 25s; foreign grinding, 20s 6d; maize, round, 24s 6d to 25s; ditto flat, 23s to 24s; oats, white, 16s to 21s 9d; black ditto, 17s 6d to 20s 6d; Irish black, 17s 9d to 18s 3d; rye, 22s 6d to 23s 6d; beans, 32s 6d to 36s 6d; tares, winter, 47s 6d to 51s 6d; spring ditto, 39s 6d to 43s 6d. Quiet consumptive demand for flour, superfine selling at from 26s 6d to 28s; fine, 23s 6d to 26s. Milling by-products and meal a fair trade at unchanged rates.

York, Saturday.—Most of the farmers are busy getting in the remainder of the hay harvest, and there was only a small attendance at the market. A small show of grain. Wheat made 32s to 33s per qr. of 36 stones; oats scarce and dear at 10s 6d to 20s per qr. of 24 stones. No barley on offer. Beans, peas, and maize dearer.

FOREIGN

Hamburg, Saturday.—The weather remains all that can be desired, and we are looking for a large and fine crop all over Germany, provided, of course, that the weather remains favourable; also from Austria and Hungary the reports are very satisfactory; in Hungary cutting of barley has commenced early this month, and harvest is in full swing; different samples are shown and indicate good corn of a rather mellow colour, whilst prices are hardly fixed yet.

Hamburg, Saturday.—During the latter part of the week we had rainy weather, a continuance of which may interfere with the harvesting of rye, cutting of which has just commenced. In general, harvest prospects continue satisfactory in consequence of which the demand for grain has slackened, and last week's prices are barely supported. The imports since July 1 till July 12 amounted to 19,837 tons wheat; 6,523 tons rye; 20,515 tons barley; 12,010 tons maize; 6,815 tons bran. Fine red Mecklenburg and Saale wheat is held at 32s 6 to 33s 6d per 504lb. f.o.b.; American red winter No. 2 July-August, 29s 9d; hard winter No. 2 August-September 30s 6d; 80 Ko River Plate, 30s 9d per 480lb. c.i.f. Hamburg. South Russian rye in better supply; 9 15-20 Odessa and Taganrog is selling at 24s 6d to 29s 9d per 480lb. ex ship Hamburg. The growing crop of barley in Germany is making satisfactory progress towards maturity; while from Hungary there are complaints of excessive heat having impaired the quality and quantity of the crop. Feeding barley quiet at unaltered prices. 60-61 Ko South Russian near at hand, 18s 6d; August, 17s 3d; September-October, 16s 9d to 17s per 400lb. c.i.f. Hamburg; 70-71 Ko Danubian prompt shipment is selling at 19s 6d per 400lb. c.i.f. Spot maize continues scarce; mixed American and River Plate is selling at 23s 6d to 24s; River Plate August-September, 22s 6d to 22s 9d per 480lb. c.i.f. Hamburg.—JOHN TATLOCK.

Paris, Tuesday. — Flour has advanced from 20s. to 45c., the rise in wheat varying from 10c. to 60c., according to dates of delivery, near positions showing the most advance. Rye is lifeless, but prices are well held. The demand for oats is small; the tendency is calmer and prices have fallen from 10c. to 20c.

THE BALTIC.

The market for wheat cargoes has lost in energy since Russian home affairs quieted down a bit. Russia offers plenty of fine winter wheat at 35s. per 492 lb., of fair spring wheat at 33s. per 492 lb., and of hard Tanganrog at 31s. to 31s. 6d. per 492 lb. Australian cargoes are down to 31s. 6d. per 480 lb.; it is to be feared that early spring buyers of these long-distance cargoes are now losing money. Other sales have included Barletta at 31s. per 504 lb., Rosario at 29s. 9d. per 480 lb., and No. 3 Northern Manitoba at 31s. 3d per 480 lb.

Argentine maize cargoes at 23s. 9d. per 480 lb. are hard to place, but American for September shipment at 22s. 6d. are in fair request. A cargo of Californian barley for September shipment made 23s. 9d. per 448 lb. on Saturday, and a cargo of Reval 504 lb. oats made 15s for prompt shipment. Beans are firm, and a cargo on passage from Sidon has made 34s. per 480 lb.

The London Corn Trade Association c. f. and i. quotations for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian Wheat Contracts are as follows:—No. 2 Club Calcutta 32s., Soft Red Calcutta 31s., Bombay Soft White Delhi 32s., Soft White Karachi 30s. 9d., Choice White Karachi 31s. 3d., Soft Red Karachi 30s. 3d.; all per 492 lb. These prices will govern arrivals until a fresh list is issued.

The arrivals of grain and seed laden vessels at ports of call for the week were 10 wheat (1 Adelaide, 2 B. Blanca, 2 Melbourne, 1 Port Germein, 1 Port Pirie, 2 Rosario, and 1 Sydney), 3 linseed (1 Buenos Aires, 1 Concepcion, and 1 Rosario).—Total 13.

The sailings of grain and seed laden vessels from ports of call for the week were 7 wheat (2 Birken

head, 1 Cork, 1 Dublin, 1 Fleetwood, 1 Gloucester, 1 Leith), 2 linseed (1 Antwerp, 1 Greenock).—Total 9.

Since January 1, 1905, the total arrivals have been 227 wheat, 2 flour, 2 wheat and oats, 1 wheat and linseed, 1 flour and wheat, 13 barley and wheat, 8 barley, 5 maize, 1 beans, 4 locust beans, and 32 linseed.—Total 296.

Last year during the same time the arrivals were 114 wheat, 1 wheat and maize, 30 barley and wheat, 14 barley, 4 maize, 3 beans, 4 locust beans, 1 rye, 15 linseed, and 1 canaryseed.—Total 187.

CHEESE.

Glasgow. Wednesday.—There were larger arrivals of cheese. Owing to the excessive heat there was only a limited inquiry, trade being very sparing. The quality is now improving. There are a few grass cheese forward, which commanded 1s above top quotations. Cheddars, 40s to 51s; Dunlops, 44s to 50s per cwt.

Newport. Wednesday. — Quotations:—Caerphillies, 56s to 58s per cwt.; fancy dairies, 52s to 56s; ordinaries, 48s to 50s; doubles, 46s to 48s. Derbies, 58s to 60s. A supply of twelve tons was pitched. A good attendance and a good demand.

WOOL

Canterbury. Saturday.—The market [illegible] Kent remains very firm, the [illegible] maintained with a brisk trade. [illegible] Kent fleeces and [illegible] are quoted at 1s. [illegible] Downs [illegible]

London. Saturday.—English per [illegible] Fleeces S. Du. Hogs, [illegible] to £15 10s; wethers £[illegible] to £15 15s; Lambs [illegible] per lb. Victoria super [illegible] good, [illegible] greasy average [illegible] 1s 1d; super [illegible] greasy average [illegible] 1s 1d; super [illegible] 1s 1d; greasy average [illegible] 1s 1d; super [illegible] 1s 1d; greasy average [illegible] 1s 1d; super [illegible] 1s 1d;

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The wheat crop of the present year is regarded as almost 10 per cent. above the promise of the past quarter of a century. The yield is likely to resemble that of 1902 in quantity, that of 1898 in character. The area under cultivation being larger than in 1904 makes the favourable promise of the yield per acre an especial matter for rejoicing. Rye is ripe in a few Sussex fields, and where it is grown is over an average yield. There is also fine tall straw. Barley is improving in aspect, but is still irregular, and the reports from the chief malting counties leave a good deal to be desired. Oats are a good promise north of the Humber, but will probably be under an average in all the counties south of it. In parts of the South-West the disappointment will be serious. Round London some good oat fields are to be seen, but the chilly April appears to have injured the start of growth, and May was not a favourable month. Beans have improved very noticeably since July came in. The hay crop is not up to the yield of last year, but as the hay harvest is still in progress it is difficult to say more at present.

The Bureau Report of the American Government, dated July 11, and published here on Wednesday last, gives the wheat yield as follows:—

	Bushels.
Winter wheat	413,150,000
Spring wheat	292,376,000
Total	705,526,000

The crop of oats is put at 949,698,000 bushels, and that of barley at 141,262,000 bushels. These estimates thus compare with ascertained yields, the figures in each case representing millions of bushels:—

	Wheat.	Barley.	Oats.
1905 (est.)	705	141	949
1904 (ret.)	552	139	894
1903 (ret.)	637	131	784
1902 (ret.)	670	134	987
1901 (ret.)	748	—	736
1900 (ret.)	522	—	809
1899 (ret.)	547	—	796
1898 (ret.)	675	—	730
1897 (ret.)	530	—	698
1896 (ret.)	427	—	707
1895 (ret.)	467	—	824

We have no quantitative returns of barley prior to 1902. The area under the cereal is still small, but a certain increase occurs from year to year.

An increase of 2,081,000 in the American maize acreage is officially reported, the States where this increase has occurred being Oklahama, Texas, Georgia, the Cardenas, Alabama, and Missouri. A decrease is reported from Michigan, Ohio, Wisconsin, and Minnesota, but this is more than wiped out by the increase in the States named, which gives the net increase of 2,081,000 acres for the entire Union.

The rye crop of America is much better than that of last year, but we lack particulars of the area under cultivation. As compared with 1904, the cereals show the following changes:—

Winter wheat, 4 per cent. improvement.
Spring wheat, 2.7 per cent. depreciation.
Barley, 7 per cent. improvement.
Oats, 2.3 per cent. improvement.
Rye, 9 per cent. improvement.
Maize, 1 per cent. improvement.

The maize is as yet in so early a stage that crop estimates have a minimum of value, but on all the other staples, except spring wheat, the above amounts to a harvest report. The spring wheat is inferior in Minnesota and Dacota, but the best promise on record in Washington. Iowa expects 17.65 bushels to the acre. The winter wheat is much above the average in Illinois, Missouri, Kansas, Oklahama, and Kentucky.

Gramary took at the United Kingdom are thus estimated:—

	1 July.	1 April.	1 January.
Wheat (qrs.)	1,475,000	1,750,000	2,193,000
Barley (qrs.)	747,000	750,000	913,000
Oats (qrs.)	521,000	570,000	634,000
Maize (qrs.)	350,000	430,000	535,000
Beans (qrs.)	77,000	144,000	724,000

In 1904 wheat holdings ranged between 1,204,000 qr. and 1,850,000 qr. in 1903 between 1,456,000 qr. and 1,565,000 qr., in 1902 between 782,000 qr. and 1,234,000 qr., and in 1901 between 1,057,000 qr. and 1,450,000 qr. Barley holdings reached a maximum of 915,000 qr. this January; only 270,000 qr. in hand on April 1, 1904, were then the largest dock supply; and maize reached a high figure with 927,000 qr. at the beginning of last year. Of flour 1,170,000 sacks were in dock on July 1, 1901.

The following returns for the mid-month show [illegible] present expectations of breadstuffs, though [illegible] are by no means exclusive:—

WHEAT ON PASSAGE JULY 15
(including flour as wheat).

	Qrs.
1905	2,945,000
1904	3,385,000
1903	2,326,000
1902	2,456,000
1901	2,326,000
1900	2,402,000
1899	2,743,000
1898	2,202,000
1897	934,000
1896	1,800,000
1895	3,478,000

The extremely small expectations on the July 15, 1897, sent up wheat prices from 27s. 9d. to 30s. 4d. per qr., a rise of 2s. 7d. on the month, but the very large anticipations of July 15, 1895, only reduced prices from 24s. 9d. to 24s. 3d. per qr. That prices should have been no higher than 30s. 4d. in August, 1897, is the chief surprise.

Of spring corn, expectations are thus returned:—

	Barley. Qrs.	Maize. Qrs.
July 15, 1905	110,000	925,000
1904	425,000	980,000
1903	309,000	1,100,000
1902	136,000	900,000
1901	110,000	810,000
1900	185,000	784,000
1899	115,000	700,000
1898	148,000	587,000
1897	251,000	660,000
1896	274,000	710,000
1895	278,000	692,000

Of oats 300,000 qr., a fairly large supply, is on passage to this country. We have no returns for years before 1901, and the statistics of the oat trade still leave a good deal to be desired.

The wheat on passage includes 900,000 qr. of Indian, 670,000 qr. of Argentine, and 745,000 qr. of Australian. There are no cargoes of wheat on passage from California, an event without parallel for many years.

Expectations of minor staples are as follows:—Linseed 236,000 qr., rice 32,000 tons, and beans 4,000 qr.

The imports of the United Kingdom last week were as follows:—

Wheat, 552,000 qrs.; a very large supply.
Flour, 38,000 sacks; a very small supply.
Barley, 44,000 qrs.; a very small supply.
Oats, 278,000 qrs.; colossal arrivals.
Maize, 224,000 qrs.; large arrivals.

The sales of British produce at the statute markets since harvest have been as follows:—

Wheat, 1,594,000 qrs., at 30s. 7d. per qr.
Barley, 3,132,000 qrs., at 24s. 9d. per qr.
Oats, 1,123,000 qrs., at 17s. per qr.

Last season returns for the same 45 completed weeks of the cereal year were:—

Wheat, 1,988,000 qrs., at 27s. 1d. per qr.
Barley, 2,772,000 qrs., at 22s. 2d per qr.
Oats, 1,049,000 qrs., at 16s. 3d. per qr.

The shipments from America last week were moderate. They included 43,000 qr. of wheat, 9,000 qr. of barley, 11,000 qr. of oats, 93,000 qr. of maize, and 61,000 sacks of flour. Liberal exports from Argentina included 372,000 qr. of wheat, 366,000 qr. of maize, and 35,000 qr. of linseed. Russia shipped enormous quantities of wheat and oats, but only moderate quantities of barley. Returns were:—Wheat 510,000 qr., barley 126,000 qr., oats 417,000 qr., and maize 20,000 qr. Roumania shipped 130,000 qr. of wheat. India shipped 225,000 qr. of wheat and 69,500 qr. of linseed. Finally, 40,000 qr. of wheat were exported from New Zealand

SEEDS.

London, Monday. The marvellous fine weather we are experiencing with the good general reports of new seeds prospects is checking any speculation. Beyond a small demand for mustard and rape the trade is lifeless. There is an abundant crop of fine English trifolium coming out; with patience this should be bought reasonably, as a large autumn demand is not anticipated.—JOHN PICARD AND CO.

HOPS

London, Monday. W. H. and H. L. May, 67, Borough, London, report:—There has been considerable inquiry for hops during the past week. The low prices now ruling, tempting brewers to cover requirements

TO-DAY'S MARKETS.

MARK LANE, MONDAY, July 17.

[FIRST REPORT.]

The London market to-day was not at all well-attended,, part of it is still in the hands of the decorators, and, pending first arrivals of new home crops, there is an almost complete truce to trade in British grain. English wheat to-day was dearer than ever. English barley was hardly quoted. Foreign wheat declined for Indian and Russian types. The good wages paid by the shipping firms at Russian ports have preserved that great industry from strikes and disturbance. Russian barley to-day lost 6d. of its recent 1s. advance, and oats also went back in price. Maize was 1s. cheaper for round, and 6d. for both flat and yellow corn. These tendencies were implicit in the market of Friday, but it was not till to-day that prices were actually lowered. Beans show a slight advance, especially for Smyrna, Alexandria, and Sidonian. Dari seems scarce this season, and prices were 1s. up.

CLOSE OF THE MARKET.

THE MARKET WAS VERY DULL AT THE CLOSE, PRICES GENERALLY TENDING IN BUYERS' FAVOUR.

THE FLOUR TRADE.

MARK LANE, MONDAY, July 17.

Town Whites and Town Households were steady at the slight concession made on the 10th inst. Foreign flour was a weak trade, for the stocks, though not large, are in excess of what had been imagined. Although American sorts cannot be quoted lower, there were scarcely any buyers within a shilling of the prices asked. Hungarian, also, had a downward tendency. Some fine flour from Manitoba made 28s. 6d. for cash. No changes occurred in French or Australian sorts. Argentine flour was quite steady, and is undeniably good value for the money. Bran, pollard, and middlings were dull at the prices of the 10th inst. Cottonseed cake was held for 2s. 6d. per ton advance, but linseed and rapeseed cakes were obtainable at the currencies of a week ago.

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club, St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Saturday at the close of the week's trade were :—

WHEAT (per cental).

Argentine	6s. 6d.	July delivery.
No. 2 American Red	6s. 10d.	,,
,, ,,	6s. 9d. Sept.	,,
,, ,,	6s. 8d. Dec.	,,
,, ,,	6s. 7d. Jan.	,,

MAIZE (per cental).

American	4s. 11d.	July delivery.
,,	4s. 10d. Aug.	,,
,,	4s. 9d. Sept.	,,
,,	4s. 8d. Oct.	,,

These are not official prices, but will, we believe, be found practically correct. Official quotations, we hear, are likely to be resumed very shortly.

There is very little speculation to-day in either wheat or maize for future delivery. American Red Wheat at 6s. 8d. per cental, and American flat maize at 4s. 10d., both for September delivery, are the only sales recorded.

GRAIN AND FLOUR FACTORS REPORT.

Flour is firm with more business passing, town millers being especially busy. Grain. Indian corn dearer at 14s. 3d. per 280 lb. Oats are in large supply, and prices are easier. Barley and pease firm. Beans in retail demand at unchanged prices. Mill Stuffs.—There is no change in bran, but thirds, especially fine, are in active demand. Saturday and Monday are close holidays here.—MCKINNON AND MCDONALD (Glasgow).

Flour.—There is no new feature to report; demand continues moderate at late rates. GREENHILL BROS. (Belfast).

Offals. Trade for bran continues quiet; prices practically unchanged.—GREENHILL BROS. (Belfast).

Flour.—Trade to-day has been very quiet, and prices are about 3d. lower on the week.—T. S. MEDILL AND SONS, LTD.

Milling Offals.—All offals are unchanged in value, with a slow trade for middlings and pollard.—JOHN BAWCOMB AND CO.

Arrivals of wheat are moderate. Market quiet, and prices are 3d. and 6d. lower. Flour sells slowly at late rates. Maize dull. Barley and oats 3d. and 8d. lower.—COVENTRY AND CO.

FEEDING STUFFS.

London, Monday.—Linseed cake: London made are dearer and there is rather a better demand. Undecorticated cotton cake: This meets with hardly any inquiry, but prices remain unchanged owing to light stocks on hand. Decorticated cotton cake and meal: The market has again advanced 2s 6d per ton, and with no prospects of large arrivals for some time the demand is very good. Linseed: As usual at this time of year, trade for feeding linseed is quiet, but shipments being light there is no indication of prices weakening.

ROBERT AND JOHN HEWETSON.

THE BALTIC, 1 p.m.

STATE OF TRADE.

Maize, barley, and seed oil cargoes have opened rather cheaper from Saturday, and oats are tending in the same direction. Cargoes of wheat and oilseeds are held for former prices, while those of beans, peas, and dari rather favour holders.

BUSINESS DONE.

WHEAT.—White Kurrachee, 31s per 492lb. prompt shipment, Red Kurrachee, 30s per 492lb., prompt shipment; White Calcutta, 31s 6d per 492lb., prompt shipment; Bahia Blanca, 30s 6d per 480lb., prompt shipment; Bessarabian, 31s 6d per 492lb., September shipment; Roumanian, 29s 6d per 492lb., October shipment; Odessa Ghirka, 32s 9d per 492lb., prompt shipment.

MAIZE.—American, 23s 3d per 480lb., prompt shipment; Argentine, 23s 6d per 480lb., arrived; Argentine, 23s per 485lb., August shipment.

BARLEY.—Odessa, 19s 6d per 400lb. on passage; Odessa, 18s 9d per 500lb., August shipment; Odessa, 17s 6d per 400lb., October shipment.

OATS.—Roumanian, 13s 9d per 304lb., September shipment; Volegda, 14s 9d per 312lb., prompt shipment.

BEANS.—Smyrna, 30s per 480lb., September shipment.

PEAS.—White Calcutta, 28s 3d per 504lb., July shipment.

LINSEED.—Calcutta, 40s 6d per 410lb., July shipment.

RAPESEED.—Roumanian, 34s 6d per 424lb., August shipment.

COTTONSEED.—Egyptian, 6s per 112lb., New Crop November shipment.

PROVISIONS.

London, Monday.—Bacon: The arrivals of bacon last week were: From Ireland, 1,622 bales; and from foreign ports, 12,750 bales. There was a great recovery in the bacon market, and, with an improved demand, prices were dearer on the week. Irish, 56s to 68s up to 71s; Danish, 52s to 65s up to 69s; Canadian, 59s to 54s up to 58s. Butter: The butter market was firm for all sorts, prices ranging: French, 94s to 104s; Danish, 116s to 112s; Russian, 90s to 100s; Irish, 96s to 106s; Canadian, 88s to 104s; Colonials, 92s to 102s. Lard: The lard market was steady: Irish, 41s to 50s; Danish, 46s to 48s; American, 35s to 36s 3d.

CATTLE.

Metropolitan Market, Islington.

	Monday, July 17, 1905. British.	Total, July 18, 1904.	Monday.
Beasts	484	480	1,499
Sheep and Lambs	7,850	7,850	7,210
Calves	10	10	—
Milch Cows	10	10	90

Quotations per 8 lbs. (sinking the offal).

ENGLISH.

	Inferior.	Second.	First.
Beasts	3s 0d to 3s 4d	3s 8d to 4s 0d	4s 2d
Sheep	3s 8d to 3s 8d	3s 8d to 4s 2d	4s 4d
Lambs	5s 2d to 6s 0d	6s 0d to 6s 4d	6s 6d
Calves	3s 8d to 4s 0d	4s 6d to 4s 8d	5s 0d

Milch cows, per head, £16 10s to £22 10s.

British arrivals include as follows: Scotland, nil; Eastern Counties, 134; Midland, Home, and Western Counties, 729; Devon, 20; Ireland, 67.

We note to-day a increase of 120 head in the number of sheep and lambs penned, the supply as usual at this season of the year consisted principally of grass fed Herefords and Runts from the Midland Counties. Trade for both prime and second quality fat beasts was of a dull and heavy nature at a decline of 4d. per 8 lbs., in value. The Irish consignments were smaller and consisted of 75 Dublins (19 of which were choice Black Polled Dublins and 24 Waterfords. Trade ruled slow but late currencies were maintained for this class of cattle. Fat butchering cows met with a steady demand by both town and country buyers, consequently late values were maintained, on the other hand bulls met with less enquiry, rates showing a downward tendency.

The following are top quotations per 8 lbs. (sinking the offal):—

	To-day.	Monday, July 18, 1904.
Black Polled Dublins	4s 4d to 4s 6d	—
Devons	4s 4d to 4s 6d	—
Herefords	4s 4d to 4s 6d	4s 8d ex 4s 10d
Norfolks	4s 2d to 4s 4d	4s 6d ex 4s 8d
Runts	4s 2d to 4s 4d	4s 4d to 4s 6d
Lincolns	3s 10d to 4s 0d	4s 2d to 4s 4d
Irish	4s 0d to 4s 3d	4s 0d to 4s 2d
Fat Cows	3s 6d to 3s 8d	3s 6d to 3s 8d

There was an increase of 970 in the number of sheep and lambs penned compared with Monday last. Trade for both wethers and ewes was of a dull and heavy nature, only small choice quality sheep being able to maintain late values, heavy weights were quite unsaleable. Yorkshire sheep shared in the general depression. On the other hand both Scotch and Irish descriptions met with a very fair trade at currencies. Lambs were slightly in excess of the demand consequently trade ruled lower, in some cases 2d. per 8lbs. less money having to be accepted to effect sales. The supply included 500 Scotch, 980 Irish, 600 Yorks, and 1,339 from the Eastern Counties.

Undermentioned quotations are at per 8 lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	Monday, July 18, 1904.
8 st Scotch	5s 8d to 5s 10d	5s 6d to 5s 8d
7½ to 8 st Downs	5s 6d to 5s 8d	5s 4d to 5s 6d
9 st Downs	5s 4d to 5s 6d	5s 2d to 5s 4d
10 st Half-breds	5s 2d to 5s 4d	5s 0d to 5s 2d
10 st Yorkshires	4s 4d to 4s 6d	—
12 st Lincolns	4s 4d ex 4s 6d	4s 6d to 4s 8d
10 st Irish	5s 0d to 5s 2d	5s 2d to 5s 4d
10 st Down Ewes	4s 0d to 4s 2d	4s 0d to 4s 2d
11 st Half-bred ditto	3s 10d to 4s 0d	3s 10d to 4s 0d
5 st Down Lambs	6s 2d to 6s 4d	6s 0d to 6s 2d
6 st Half-bred Lambs	5s 10d to 6s 0d	6s 0d to 6s 2d

Calves met with a slow trade, the best making from 4s. 10d. to 5s. per 8lbs (offal given in).

No pigs on the market.

London (Central), Monday.—Fair supplies, moderate demand. Beef: Scotch: 3s 10d to 4s 2d; English: 3s 9d to 3s 10d; American: 3s 6d to 3s 9d. Mutton: Scotch wether: 4s 4d to 5s 4d; ewes: 3s 0d to 3s 8d; English wethers: 4s 4d; ewes, 3s 6d to 3s 8d; New Zealand, 2s 5d to 3s. Lamb: English, 5s to 6s 4d; New Zealand, 3s 6d to 3s 10d. Veal, 3s to 4s 4d. Pork, 2s 8d to 4s.

FOREIGN.

Deptford, Monday.—Beasts 1,391. To-day's supply compared with Monday last showed an increase of 344 head, and consisted of 1,255 from the United States and 185 from Canada. Trade was of a slow nature, States cattle barely making last Saturday's quotations, whilst Canadians were quoted 1d per 8 lbs. lower. The best States on offer were quoted at from 3s 10d to 4s, ex. 4s 1d. Canadians 3s 8d to 3s 10d; seconds 3s 6d per 8 lbs. (sinking the offal). On Saturday 1,256 States and 432 Canadian beasts were offered for sale. Trade was of a slow nature at a decline of 1d per 8 lbs in value. Besides the above, 1,170 States and 780 Canadians were held back for Monday.

Liverpool, Monday. Larger supply of stock in market to-day, demand for fat cattle, best prices hardly so good as last week. The sheep and lamb trade was of dragging character, and to effect sales sellers had to accept reduction on late rates. Beef, 9d to 5d; mutton, 8d to 6d; lamb, 8½d to 7d per lb. At market—882 cattle and 11,793 sheep and lambs.

BUTTER

Saturday Appleby, 9s to 1s. Berwick: 11d to 1s. Bridgnorth: 1s 1d to 1s 2d. Carlisle: 10d to 1s. Doncaster: 11d. Grantham: 1s to 1s 2d. Howden: 1s to 11d. Ipswich: 1s to 1s 3d. Malton: 10d to 1s. Pontefract: 1s. Retford: 1s 3d to 1s 5d. Richmond (Yorks): 11d to 1s. Shrewsbury: 1s. Skipton: 1s to 1s. Stokesley: 10d to 11d. Whitby: 9d to 11d. Wirksworth: 10d to 1s. 2d. York: 1s 2d to 1s 3d.

Hops—Belgium.

The plantation reports continue to be generally favourable, the growth progressing rapidly, and the indication of a good healthy crop being manifest. There are at present no signs of vermin, which have been cleared off by the copious sunshine. The markets are consequently quiet, with a slight tendency towards lower values. The stocks presently available are, however, so much reduced, that quotations for Alosts still hang about 135 to 140 francs, and for Pops 125 francs. The prices for October-November delivery are slightly easier.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

At the Islington Cattle Market during the week there was a decrease in the number of beasts offered for sale. Trade for fat cattle of both prime and second quality, which consisted chiefly of Midlands and Irish (these latter comprising Dunon Shorthorns and Waterfords) was of a firm and steady nature, last week's currencies being well maintained, both descriptions of Irish beasts cleared early in the day to good advantage. Only ten Scotch beasts were offered for sale; these were quickly disposed of at late values. On Thursday a small number of Norfolks found buyers at Monday's money, fat butchering cows and bulls met a slow trade with a downward tendency in value, though hardly sufficient to quote any lower rates, whilst on Monday there was a good inquiry by both town and country buyers.

At Deptford trade was slow throughout the week, at a decline in value. The total number of beasts on offer at both markets was 4,249, as against 4,301 during the preceding week, consisting of 880 British (decrease 220) and 3,369 foreign, increase 168, comprising 2,772 from the United States and 597 from Canada. The following were the top rates obtained per 8 lb. (sinking the offal):—80 to 90 st. Scotch, 4s. 8d. to 4s. 10d.; 90 to 95 st. Herefords, 4s. 6d. to 4s. 8d; 95 st. Runts, 4s.4 d. to 4s. 6d.; 90 st. Norfolks, 4s. 4d. to 4s. 6d.; 100 st Shorthorns, 3s. 10d. to 4s.; 110 st. ditto, 3s. 8d.; 95 st. Irish 4s. to 4s. 3d.; 90 st. States, 4s. to 4s 2d.; 90 st. Canadians, 3s. 10d. to 4s.; 90 st. fat cows, 3s. 6d. to 3s. 8d.

The sheep trade at Islington, with a considerable decrease in the supply, was of a firm and steady nature on the first market day of the week. We noticed last Monday the practical opening of the Irish season; the supplies consisted of sheep and lambs, the latter predominating. Trade was firm, an early clearance being effected. Scotch and Yorkshire sheep were in shorter numbers, and shared in the generally better trade experienced. English lambs, on the other hand, were in full supply, and met with a limited inquiry, rates favouring the buyer to the extent of 2d. per 8 lb. on the previous week's values. No sheep or lambs were offered for sale at Deptford. The total number penned was 3,710, as against 5,670 during the previous week, consisting entirely of British consignments. Best pens made per 8 lb. as follows (sinking the offal):—7½ to 8 st. Downs, 5s. 8d. to 5s. 10d.; 8 st. Scotch, 5s. 8d. to 5s. 10d.; 9 st. Downs, 5s. 4d. to 5s. 6d.; 9 st. Irish 5s. 2d. to 5s. 4d.; 10 st. Downs, 5s. 4d.; 10 st. halfbreds, 5s. 2d. to 5s. 4d.; 10 st. ewes, 4s. 2d. to 4s. 4d.; 12 st. Lincoln halfbreds, 5s. 4d.; 9 st. Yorkshires, 4s. 6d. to 4s. 8d.; 5 st. fat Down lambs, 6s. 6d.; 6 st. halfbred ditto, 6s. to 6s. 2d.; 5½ to 6 st. Irish lambs, 6s.

Calves were in full supply on the second market day of the week, and met with little inquiry at a decline of from 2d. to 4d. in value, the best being quoted at 5s. per 8 lb. The supply during the week numbered 100.

Trade in Scotland.

The number of fat cattle on offer this week has been seasonably large. Owing to the excessively warm weather heavy-weighted cattle were without change in price, but for good-quality medium weights a slightly better trade was experienced. Fat cows a small show, and they made satisfactory prices. Sheep in average numbers. These have met a good inquiry, and for all kinds prices have ruled firm. There was a smaller supply of fat lambs, and they met an exceedingly good market at from 1s. to 2s. a head advance. A very large and good show of calves, which had to be sold at lower prices. Pigs in small supply and slightly dearer. As is usual at this time of the year there was only a very limited number of store cattle. There was a little more inquiry for them, and a nearly total clearance was effected. A very small show of store sheep at prices the turn lower, and a few were left unsold. Rather more milch cows on offer, which met a good inquiry at prices the turn higher. Quotations: Top price of cattle per live cwt., 32s. 6d.; current from 27s. 6d. to 31s. Mutton to fully 8½d. per lb. John Sawers and Sons, Ltd.

Trade in Ireland.

With an increase of 597 cattle and 665 sheep in Dublin Market on Thursday last, even with a good attendance of shippers and buyers from the London markets, trade was rather slow and dull. The cattle offered for sale were, however, not up to the usual quality, presumably owing to the pastures being short from the long drought. The tendency was all in favour of buyers, and only the very choice descriptions of bullocks and heifers made the last week's live-weight rates. There was a large supply of cow beef, and this was bought up to supply contracts, leaving business for the secondary quality of beasts very slack. Prime ox and heifer beef sold at from 52s. to 56s., and for very choice up to 58s. per cwt.; good second-class beef from 46s. to 50s., and inferior ditto from 44s. to 45s. per cwt. The number of beasts in the market was 2,315, as against 2,412 in the corresponding week of 1904. In the sheep department trade was also slow, the warm weather being against any business being done in heavy mutton, the demand being solely for light-weight tidy sheep. Lambs sold at satisfactory rates. Hoggets, value for from 42s. to 45s. each, were bought extensively for the export trade. Choice wether mutton sold at from 7d. to 7¼d., and in a few cases up to 7½d. per lb.; while ewe mutton was difficult to place at from 6d. to 7d. per lb. A good number of heavy sheep were left over unsold.

Lambs were in large supply, and good business was done in fat, well-meated sorts at from 32s. to 40s. each; thin, inferior lambs were not wanted, but good mediums sold at from 25s. to 30s. each. Veal was a quiet trade, prime making from 7d. to 7½d. per lb; other sorts from 5d. upwards. There was an improved demand for dairy cows of the right sort at better prices. Choice springers sold at from £18 to £21 each; and inferior cows from £9 up to £16, and £17 for good cows.

There was a very quiet business done in store cattle, and only calves and young animals were inquired for. Mr. Gavin Low had a sale of over 600 beasts drawn from the herds of leading Irish breeders. There was a fair attendance of buyers, but none seemed too anxious to restock their scanty pastures; while many graziers still have their early spring purchases yet on hand. The best live-weight figures which Mr. Low was able to extract ranged from 27s. to 30s. per cwt., but at these prices a fair clearance was made. There was a smaller supply of pigs, and a better attendance of buyers, but trade was dull at first, till it was found that sellers were determined to hold out, when a good clearance was accomplished and last week's decline recovered. Choice light-weight pigs made from 50s. to 52s. per cwt., inferior selling from 34s. per cwt. upwards.

Trade in the West.

We are glad to be able to report a slightly improved trade again for milch beasts, which, with a much better demand, are gradually approximating their old values, £24 having been realised for an exceptionally good heifer which came under our notice, though from £17 to £21 is a more average run for reliable milchers. For the plainer grades of both heifers and cows there is still a quiet sale, buyers showing little inclination to do business in anything but the more reliable sorts. With the rain which set in on Monday, after a somewhat long spell of dry, hot weather, a better feeling is showing itself in regard to barreners, anything of early promise being much more readily caught up at enhanced values than has been the case of late, especially during the advent of the dry weather, some of the more forward drafts bringing £24, up to as much as £33 10s.; the latter figure being realised at Dorchester for a good-class bullock, which will require but little attention to convert into first-class beef. The more ordinary grades are much less sought after at widely varying prices, ranging from £22 down to as low as £14 or £15 for aged beasts or poor-quality cows.

The markets for fat stock are showing no great variation at present. All the bettermost grades in steers, as well as heifers, are commanding close attention on the part of buyers, and, though there is no disposition to give anything approaching fancy prices, still, they are prepared to pay, and are paying, up to 12s. per score for really ripe Devons or Shorthorns, ranging down to 11s. where the quality is not quite so pronounced; but the secondary grades are slower of sale at 10s. to 10s. 6d., whilst fat cows are making 9s. to 9s. 6d. or 9s. 9d. for the best, and bulls from 8s. to 8s. 9d., with by no means an active inquiry at the price—the hot weather telling more against these heavy weights than almost any other classes of stock. Well finished calves of medium weight make up to 8½d., but bigger calves are not so saleable at 7½d. to 7¾d. Mutton is picking up a little in price, both wethers and ewes; but the improvement is more marked in the case of wethers than in that of ewes, though in both instances an advance of 2d. per 8 lb. may be fairly quoted—some of the best wethers again selling up to 5s. per 8 lb. and over, though from 3s. 4d. to 4s. may be quoted as the range for the best ewes now on the market. Lamb is meeting no great inquiry again, and prices have once more suffered a check; 4s. 10d. to 6s. is the present range, but the last-mentioned price is only realised in exceptional cases. Small pork is still holding its own, 9s. 6d. to 10s. being obtainable from neat handling porkers.

LONDON.

Islington, Thursday. — Beast supply, compared with Thursday last, showed a slight decrease, and included a short consignment of prime quality beasts; Norfolks, which met a fairly steady trade at last Monday's money; fat butchering cows and bulls met very slow trade, with a downward tendency in value, though not quotably so. Top prices, per 8lb.:—Norfolk, 4s 4d to 4s 6d; fat cows, 3s 6d, extreme 3s 8d; fat bulls, 3s to 3s 3d. Increase of 770 in number penned in sheep market compared with Thursday last, supply consisting chiefly of Downs and half-breds; trade for both wethers and ewes was very sluggish, rates ruling 2d per 8lb lower. Lambs were in excess of demand, and sold at a reduction of fully 2d per 8lb. Best pens made, per 8lb, as follows:—7½ st to 8 st Down sheep, 5s 6d to 5s 8d, exceptional; 9 st ditto, 5s 4d; 10 st ditto, 5s 2d; 10 st half-breds, 5s to 5s 2d; 10 st ewes, 4s to 4s 2d; 12 st Lincolns, 4s 6d; 5 st fat Down lambs, 6s 4d; 6 st half-bred ditto, 6s. Calves met a limited demand. Quotations, per 8lb, sinking the offal:—Beasts, 3s to 4s 6d; sheep, 3s 8d to 5s 8d; calves, 3s 10d to 5s; lambs, 4s 8d to 6s 4d.

London (Central), Friday.—A large quantity was received on Friday morning, and evidenced better support at firm values. Beef arrivals included 80 tons Scottish, 450 Liverpool sides, 2,500 hindquarters, and 1,850 forequarters American refrigerated; also 450 Argentine chilled hindquarters and forequarters. Quotations:—Beef: Scotch short sides, 4s 4d to 4s 6d; long sides, 3s 10d to 4s; English, 3s 9d to 3s 10d; American Deptford-killed, 3s 6d to 3s 9d; Liverpool sides, 3s 6d to 3s 9d; American refrigerated hindquarters (best), 3s 10d to 4s; forequarters, 2s 2d to 2s 4d; New Zealand hindquarters, 2s 3d to 2s 5d; forequarters, 1s 7d to 1s 8d; River Plate hindquarters, frozen, 2s 2d to 2s 6d; forequarters, 1s 6d to 1s 7d; Argentine chilled hindquarters, 2s 10d to 3s; forequarters, 1s 10d. Mutton: Scotch ranges from 4s 4d up to 5s; ewes, 3s 6d to 3s 8d; English wethers, 4s 4d to 5s; ewes, 3s 4d to 3s 8d; New Zealand, 2s 5d to 3s; River Plate, frozen, 2s to 2s 2d; Dutch wethers, 4s 4d to 4s 10d; ewes, 3s to 3s 2d. Lamb: English ranges from 5s up to 6s 4d; New Zealand, 3s 6d to 3s 10d; Dutch, 4s 8d to 5s. Veal: English, 3s 4d to 4s 4d; Dutch, 3s to 4s. Pork: Town-killed, 3s 8d to 4s; country and Dutch, 2s 10d to 3s 2d per 8lb.

COUNTRY.

Ashford, Tuesday.—Owing to the heat, butchers restricted their purchasers to immediate requirements, and trade, though firm, was slow. Best beef, 4s 6d to 4s 10d; cows, 3s 10d to 4s 2d; Down wethers mutton, 5s 4d to 5s 10d; small Kent ditto, 4s 8d to 5s 2d; veal, 4s 6d to 5s; pork very cheap, roasters, 3s 4d to 3s 8d; large hogs, about the same.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a fair attendance of buyers to meet a supply of 29 fat beasts, 53 calves, 604 fat sheep and lambs, 95 pigs, and 99 head of dairy and store cattle, for which the following prices were realised:—Fat Shorthorn steers made up to £21 15s; heifers, £19; cows, £15; Devon steers, £20 10s; West Highland oxen, £20 to £22 15s; fat calves, 70s to £5 15s; small, 20s to 55s; fat porkers, 26s to 57s 6d; store pigs, 10s to 13s; dairy cows, £11 10s to £20 15s; fat Down wethers made from 50s to 54s; small, 44s to 48s; old Down ewes, 32s to 40s; Dorset, 28s 6d; six-months-old Down lambs, 40s to 47s; small, 30s to 38s; three-months-old sucking lambs, Down, 30s to 36s; crossbreds, 32s to 35s 6d; Southdowns, 26s to 30s. For fat beasts of prime quality there was a good demand and prices well maintained; anything below the best met a slow trade, and lower prices had to be taken to clear. A good entry of fat sheep and lambs attracted the attention of a number of buyers; a clearance made of the show of lambs and choice small sheep, with an advance on last week's prices. A bad trade for ewes and heavy overfed wethers, and prices were lower. Milch cows of good quality met a brisk trade, and high prices were realised. Store cattle continues a slow trade. Fat calves were cleared at late prices. Fat porkers a short entry and with a better demand made more money. Store pigs continued a fair trade. Ruling values:—Best fat beasts, 6¾d to 7½; second ditto, 6d to 6¼d; bulls, cows, and inferior, 5d to 5¼d per lb.; best fat sheep and big lambs, 8d to 8¾d; second ditto, 7d to 7¾d; old ewes and inferior sheep, 5¾d to 6d per lb.; choice fat sucking lambs, 9d to 10d per lb.; fat calves, 7d to 8d per lb.; fat porkers, 8s to 9s 6d per score.

Berwick, Saturday.—Small market, only 98 head of cattle being penned, as against 165 the previous Saturday. The attendance of farmers and buyers was very small, quality of stock fair, and trade bad. Calves, £6 to £7 15s; heifers, £8 10s to £9; stirks, £8 to £10 10s; two-year-olds, £13 10s; shorthorn bulls, £12.

Birmingham, Thursday.—Small supply. Trade fair for beasts and sheep. Trade slow for pigs. Beef, 5¾d to 6¾d per lb; few Herefords, 7d per lb; mutton, 6¾d to 8¼d per lb; lamb, 8¼d to 9d per lb; bacon pigs, 9s 8d to 9s 9d per score; cutting pigs, 9s 6d to 9s 9d per score; sows, 7s 2d to 7s 3d per score.

Bristol, Thursday.—Demand was quiet, and only average business was done. There was less beef than usual, and prices advanced slightly, best qualities making 60s to 62s, whilst secondary realised 57s. Mutton was in moderate supply, and values were slightly in buyers' favour, though lamb continued firm. Pigs were not numerous, and prices remained unchanged.

Calne, Friday. Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of Back.	Price per Sc. s. d.
6sc. 10 lb. to 9 sc. 10 lb.	2½ in. and under	9 3
Under 10 sc.	Not exceeding 2¾ in.	9 3
Under 11 sc. 10 lb.	2¾ in.	8 9
Under 12 sc.	3 in.	8 3

C. and T. Harris and Co., Ltd.

Canterbury, Saturday.—There was very little doing at this market. No sheep on offer. Store beasts ranged from £7 to £9, and between £9 and £10 rough cows and calves were offered, for which there was little demand. Prices averaged from £15 to £16 each.

Carlisle, Saturday.—The supplies of Irish cattle on the Sands continue small, only about 300 head being forward. There were generally of a useful stamp, and sold at £8 10s to £11 10s. Trade ruled quiet.

Colchester, Saturday.—There was practically no market. What little there was offering sold at the following prices:—Beef, 4s 4d to 4s 6d; mutton, 5s 4d to 5s 8d; lamb, 6s; pork, 9s to 9s 6d per score.

Doncaster, Saturday.—Poor supplies in all departments. Rather better supply than at recent markets, and prices from £15 to £23 bullocks, £12 to £17 heifers, drapes £10 to £15, stirks 6 to £8, and young stock £4 to £6; sheep, 38s to 46s each.

Dorchester, Wednesday.—Good average supplies and a steady trade in most departments at to-day's market. Best wether mutton sold at 7½d to 8d per lb; young medium-sized ewes, 7d to 7¼d; and heavy coarse sheep, 6d to 6½d. Choice lambs up to 10d, and secondary sorts 8d. Calves made 9½d per lb for the best; heavier animals, 7½d to 8d. Small weight pigs, baconers, or porkers sold freely at 9s to 9s 6d per score.

Dorchester, Saturday. — Good average deliveries came to hand at to-day's market, and trade showed decided signs of revival as regards stores, the late rains having proved very beneficial to both the roots and the pastures. Milch beasts made higher rates, and there was also a much better sale for grazing cattle; the former ranged from £14 10s to £21 10s as a general run, and barrenors from £18 to £29 per pair. Fat bullocks (good grass-fed beasts) sold at very satisfactory rates, 11s to 11s 6d per score, but cows were slower at 9s 6d to 10s 3d, owing to the hot weather; small neat wethers sold at full values; but ewes were rather a dragging trade; lambs in steady request.

Dublin, Thursday.—Numbers in market: Beasts, 2,315, increase 597; sheep, 10,833 increase 665; calves, 48, increase 21. The market opened with a good demand for choice bullocks and heifers of handy weights, but a quieter trade soon supervened, and those who refused morning prices had to accept less later on. Rough and inferior sorts harder to sell at lower rates. Suitable light sheep for home and export trade made late rates; heavy sorts not so easily placed owing to unfavourable weather. Lambs, though in fair request, the very best made last figures. Cattle: Live weight (best), 30s to 33s per cwt; secondary and inferior grades, 26s to 29s per cwt. Mutton: Dead weight, 5½d to 7½d per lb. GANLY, SONS, AND CO.

Edinburgh, Wednesday.—Owing to the holiday season the market was small, and there was only a moderate inquiry. Forward lots of half-bred sheep sold at 40s; horned cattle, £8 to £10; polled, £11 11s to £12 12s; Shorthorn cows, £20 to £25 10s; Ayrshires, £15 to £19, and crosses £16 to £23 per head.

Glasgow, Wednesday.—There was a good demand for sheep and lambs. Cattle in steady request, and values firm. Best lambs, 9d to 10d; secondary, 8¾d; best hoggs, 8¼d; secondary, 7¾d per lb.; top Scotch cattle, 63s to 64s per cwt. Demand moderate for dead meat, and prices firm; best States, 5¾d; best Canadian, 5¾d per lb. At market:—Cattle, 616; sheep and lambs, 4,923.

Gloucester, Saturday.—Messrs. Bruton, Knowles, and Co., report their sales as follows:—A very short supply of cows and calves, and store cattle, with trade about the same.

Hereford, Wednesday.—There was no alteration in the beef trade from last week, best heifer and bullock beef being 6½d per lb. Cow beef was a very slow trade, not making 5d per lb. The supply was moderate. Calves were also much about the same in demand as last week, veal only being 7d per lb. Sheep were a short supply, with a slightly improved trade, wether mutton realising 7½d to 8d per lb, and ewe mutton 6d per lb. Lambs were a firm trade, some lambs selling very well at 8½d per lb. The pig trade was slow, and the supply small. Porks d.d not fetch 5d per lb. In store cattle there was little or no trade.

Leicester, Saturday.—The transactions at the previous day's fair had practically met all immediate requirements of graziers. The supplies were limited, but they were of excellent quality. Trade sluggish at 20s to 30s per head below last week's rates. Milch cows, £14 to £16; choice Irish bullocks, £19 to £20; good lots, £14 to £15; yearlings, £5 to £7; and calves, 15s to 30s each.

Lincoln, Friday.—Small display of horned stock, and trade was bad. Cows, £18; young beasts, £8 to £9.

Lynn, Tuesday.—Average show of fat beasts, trade slow, 7s to 7s 6d per stone. Very few store beasts, not much trade. £6 to £11 each. Average show of fat sheep, trade slow, 8s 9d to 9s per stone. Average show of store sheep, 40s to 46s. Store lambs, 25s to 35s, fat 25s to 40s each.

Malton, Saturday.—A very small show of grazing stock, but the quality was very fair. Young bullocks made £8 to £10, choice heifers £8 15s, and young £9 to £10 per head. Some good calving cows were offered, the best making £18 to £20, secondary £15 to £17, and drape cows from £17 each. Calving heifers were cheaper, the best offered ruling to £14. In the pig market there was a very small show, and trade was dull. Middle stores made to 45s, strong to 52s, small stores 25s, young pigs 12s, and gilts in pig £3 17s each.

Preston, Wednesday.—Good attendance, and fairly full supplies of cattle and sheep. Trade was rather slow all round. Quotations:—Heifers, 6½d to 6¾d; small heifers, 7d; cows and bulls, 5¼d to 5¾d; hogg sheep, 8¼d to 8¾d; ewes, 6d to 7d; tup, 5d to 5½d; lambs, 9d to 9½d; calves, 6d to 7d per lb.

Norwich, Saturday.—Trade fairly good for fat beasts at 7s 6d per 14lb.; 8s being realised for small box beasts. Exceedingly short supply of stores, which, with the exception of one lot, were Irish; trade dull, prices ranging from £5 to £17 per head. Lambs, offered in smaller numbers, met with a dragging trade at 22s to 32s per head; fat sheep sold readily at 8s 6d to 9s 6d per stone. Fat pigs, penned in larger numbers, sold at reduced prices, in some instances 6d per stone lower, values averaging 5s 6d to 6s per stone; store pigs met with a ready sale.

Nottingham, Saturday.—Small show of milch beasts, with a rather better trade. Best milch cows, £17 to £21; in-calf heifers, £14 to £19. Small show of store beasts, with rather a dragging trade. Strong heifers and steers, £10 to £13, and younger beasts £6 to £9; calves, 25s to 50s.

Retford, Saturday.—Thin attendance of farmers and dealers, and a limited supply of stock. Milch cows of good quality were saleable at £17 to £20; inferior, £14 to £16; two-year-old steers and heifers, £10 to £13; yearlings, £6 to £8; and calves, 40s to 50s per head.

Romford, Wednesday.—Fat beasts in average supply; trade slow. Best animals, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves in fair supply; trade slow, at 4s 10d to 5s per stone. Average supply of lambs; trade fair, at 6s 2d to 6s 6d per stone. Short supply of sheep, trade about the same. Best sheep, 5s 4d to 5s 6d; middlings, 5s to 5s 2d; ewes, 4s 2d to 4s 4d per stone. No store beasts on offer. Pig trade slow.

Thame, Tuesday. — There was altogether a larger supply of stock than there has been for many weeks past. Buyers attended from Aylesbury, Oxford, High Wycombe, Missenden, Newbury, Abingdon, Maidenhead, Wheatley, and all the principal villages around; in fact, it was one of the best attendances this season. There was a selling trade throughout of all descriptions of stock, and Messrs. Bond and Burrows had a practical clearance. Beef shows no alteration in late prices. Mutton and lamb were perhaps a shade dearer; ewes in better demand. Large supplies of prime veal found customers. Bacon and pork continue to sell well. Messrs. Bond and Burrows' sale comprised 95 fat beasts, 517 fat and store sheep, 95 fat and weaning calves, and 59 pigs. Fat oxen made from £16 to £21 15s, fat heifers, £15 to £19 2s 6d; fat wethers, 48s to 52s 6d; fat ewes, 40s to 55s; fat lambs, 34s to 37s 6d; fat calves, £5 to £4 7s; weaning cow calves, 30s to 58s; bull calves, 10s to 50s; bacon hogs, £5 5s to £4 10s; porkets, 25s to 35s. Store pigs, 10s to 18s.

Truro, Wednesday. Fat bullocks, 56s to 60s per cwt.; barreners and store bullocks, 40s to 45s; cows and calves, £11 to £15 each; rearing calves, 20s to 40s; wethers, 7½d per lb.; ewes, 5½d; lambs, 7½d; large and small pigs and suckers, 11s 9d to 33s 6d each; beef, 6d to 8d per lb.; mutton, 6d to 8d; lamb, 8d to 9d; veal, 6d to 8d; pork, 8d to 9d; bacon (uncured), 6d to 7½d; ditto (cured), 7d to 9d; pork (carcases), 4½d to 5½d. Number in cattle market:—Bullocks, 392; calves, 92; sheep, 540; pigs, 250; horses, 5. Business fairly brisk; attendance very good.

Wolverhampton, Wednesday. Fair supply; slow trade all round. Beef, 5d to 7d per lb; mutton, 6½d to 8½d per lb; lamb, 8½d to 9d per lb; veal, 6d to 7d per lb.

Worksop, Wednesday.—A small show of stock with trade good for mutton. Best beef, 7s to 7s 6d; secondary, 6s 3d to 7s per stone; best Southdown wethers and crossbreds, 8d to 8½d; ewes, 6½d to 7½d; lamb, 10d per lb.

MANURES.

Liverpool, Friday. The trade in fertilisers and feeding stuffs, as is usual at this period of the year, is dormant. Values, however, are firm and as per subscribed:—Nitrate of soda, best quality, i.e., guaranteed 95 per cent. pure, in bags, £10 7s 6d to £10 10s; East India bone meal, in bags, £5 7s 6d to £5 10s; kainit, prime 23 per cent. sulphate of potash, in bags, £2 2s 6d to £2 5s; palm nut cake, prime, in bags, £5 15s to £6; linseed cake, American thin oblong, prime, in bags, £7 10s to £7 12s 6d; ditto English, prime, in bulk, £7 17s 6d to £8 7s 6d; ditto foreign round, prime, in bags, £7 17s 6d to £8; cottonseed cake, N.A. decorticated, prime, new, in bags, £5 17s 6d to £7 2s 6d; ditto English decorticated, prime, new, soft, in bags, £7 5s to £7 7s 6d; ditto English undecorticated, prime, in bulk, £4 7s 6d to £4 12s 6d; cottonseed, crushed, 20 to 25 per cent. oil guaranteed, prime, in bags, £6 17s 6d to £7; maize germ meal, prime, in bags, £5 12s 6d to £5 15s; corn oil cake, prime, in bags, £5 17s 6d to £6; rice meal, Rangoon, as imported, in bags, £4 17s 6d to £5; Indian meal, coarse to fine grinding, prime, in bulk, 13s per 240lb.; linseed, fine bold feeding, in bags, £2 7s 6d to £2 9s 6d per qr. 416lb.; cod liver oil, cattle feeding, prime, in casks, 4s 6d per gallon; treacle, feeding, prime, in barrels, 4s 4½d to 4s 6d per cwt.; D.N.S. brand superphosphate of lime, guaranteed 25 to 27 sol., in bags; ditto ditto guaranteed 30 to 31 sol., in bags; ditto ditto guaranteed 35 to 36 sol., in bags; basic slag, prime quality, guaranteed 30 to 35 per cent. phos., in bags; ditto prime quality, guaranteed 38 to 45 per cent. phos., in bags; finest quality, guaranteed 42 to 50 per cent. phos., in bags nominal.

HAY AND STRAW.

Manchester, Friday.—Old hay, 5½d to 5¾d; old clover, 5¾d to 6d; new clover, 4¾d to 5¼d; wheat straw, 4½d; oat straw, 3½d to 4d per stone.

Whitechapel, Saturday.—Arrivals were on a small scale, and a fair demand was experienced at previous quotations: Best clover, 75s to 82s 6d; inferior ditto, 60s to 70s; specially-picked hay, 80s; good ditto, 65s to 75s; inferior ditto, 45s to 60s; mixture and sainfoin, 67s to 75s; straw, 30s to 42s per load.

POTATOES.

Borough, Saturday.—A good quantity was offered, for which a fair inquiry prevailed. English, 4s to 5s; Jersey, 4s 6d; St. Malo, 4s to 4s 6d; Teneriffe, 7s to 8s per cwt.; Dutch, 3s 6d per bag.

Goole, Wednesday.—Small attendance, and nothing doing in potatoes. In the retail market new potatoes are making 1s to 1s 4d per stone, or 1d per lb.

Spitalfields, Saturday. — Supplies are on a liberal scale, and the demand is of a quiet character. English, 4s to 5s; Jersey, 4s; St. Malo, 4s to 4s 3d; Canary, 8s; and Dutch, 3s per cwt.

York, Saturday.—For the present old potatoes are a drug in the market, and unquotable. New home-grown sorts made from 3s to 4s per 80lb. The supplies are coming to hand in good condition, but could do with a good, steady rain to help them.

GAME AND POULTRY.

Smithfield, Saturday. — Supplies were moderate, and met an improved demand. Quotations:—Fowls: Yorkshire, 2s 6d to 3s; Essex, 2s 6d to 3s; Boston, 2s to 2s 6d; Surrey, 3s 6d to 4s 6d; Sussex, 3s 3d to 4s; Welsh, 2s 3d to 2s 6d; Irish, 1s 9d to 2s 6d; geese, 4s to 5s; Aylesbury ducks, 2s 6d to 3s; country, 2s to 2s 6d; quail, 1s to 1s 3d; Boredaux pigeons, 10d to 1s.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter: Considering the continuous rise in price of Canadian butter, the demand has been as good as could be reasonably expected. The quality as a whole shows a distinct improvement on former years. The arrivals are weekly increasing, although from May 1 to July 8 they are not quite as much as last year, being 28,897 cwts. against 29,756 twelve months since. The Copenhagen official quotation remains unchanged, although markets in the north of England, if not showing signs of losing strength, are certainly not gaining. Prices, however, remain virtually unchanged on the week. "Choicest" Danish is making 110s to 112s. Siberian 98s to 100s, Argentine 98s to 100s, French 98s to 100s, and Dutch 102s to 104s. These prices are about 12s to 15s per cwt. above the value at this date in 1904. Cheese: There is a good hand-to-mouth demand for Canadian cheese, but buyers everywhere doubt the continuance of present values. Yet there are no signs of any considerable decline across the Atlantic. There can be no doubt, however, that on this side the wish for such decline is everywhere father to the thought.

WOOL.

Halifax, Saturday. While the tendency of prices is still to firmness, a check has been put to the upward movement for raw material. Merino wools, imported Greasy, are quoted slightly below London rates. Tops, however, are very firm at late quotations. Merinoes are rather quiet, but steady, and cross-breds, both fine and strong, meet with fair business. Not much change in home-grown wools.

FEEDING STUFFS.

Hull, Tuesday. Linseed. The arrivals are 2,[illegible] from Bombay, 2,375 qrs. Buenos Ayres, 1,[illegible] 695 qrs. St. Petersburg, and 2[illegible] qrs. Libau. Linseed proved firm but has again turned quiet and prices are 3d to 6d lower than the week. Rape. [illegible] offered at 36s. June/July 40s 9d, July/August 41s. August/September 42s 3d, September/October 42s 9d. Business has been a good deal restricted by the holidays, only [illegible] of business transacted, spot at 5[illegible] 9d, and afloat at 5[illegible] 6d, but business done on [illegible] changed hands at £5 16s, £5 15s, and £5 14s. Cakes at £6 and £5 2s 6d. The last day of two the tone is weaker again at £5 17s 6d spot, £5 16s 3d accepted July/August, and sellers the next month at £5 [illegible] January done again £5 [illegible] £4 19s 6d July/August and August/September £5 [illegible] and £4 19s 6d July/August and August/September £5 [illegible] 6d December/January. [illegible] Oilseed cakes: Linseed cakes firm, and [illegible] cakes are 1s 3d to 2s 6d per ton dearer with [illegible] KELLOCK MAXSTED AND CO.

Mark Lane, Monday.—Linseed cakes: With a [illegible] any demand the trade rules dull and [illegible] small stocks and a firmer attitude in [illegible] values are well supported. Rapeseed [illegible] tion, being relatively cheaply offered. Amer[illegible] India seed cakes are unchanged, but prices are beyond buyers' views. London made met a poor inquiry, but crushers still ask full prices. Cotton [illegible] Egyptian are now getting into a small [illegible] practically no fresh arrivals, the tone of the market has slightly improved, although prices are not quotably dearer. Decorticated: A fair business is passing in [illegible] at £6 15s to £6 17s 6d, and specially [illegible] £6 5s, while American "Open Hand" [illegible] £6 11s 3d, and meal at £6 13s. Rape [illegible] A steamer shipment of kibbled Calcutta in bags is to be had at the low figure of £4 15s per ton. Maize germ meal landed lots of white American have now [illegible] and for the moment nothing offers for [illegible] makes are still available at an advance [illegible] week's price. Maize gluten meal is [illegible] £5 10s per ton. Rice meal: Parcels of Rangoon in warehouse are fully as dear as £4 7s 6d to £4 [illegible] also the price asked for shipment. Broken [illegible] offered at £4 15s per ton in bags. Nitrate of soda is without change. Locust beans are not [illegible] present delivery at £5 for whole and £5 10s for kibbled, although a considerable advance is pointed for [illegible] ment.

MOLASSINE FEEDING MEAL, packed in bags of 1 cwt. each. Price per ton, £6 15s., in ton lots and upwards. £7 10s. per ton in less than ton lots. Free on rail, Liverpool or London. Uniform delivered price for small quantities, 10s. per bag of 1 cwt.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Good supplies offered were in fair request. English grapes, 1s [illegible] Channel Islands, 9d to 1s; Belgian, 8d to 9d per lb; Australian apples, 10s to 15s per case; cherries, 5s to 10s; gooseberries, 2s to 3s; red currants, 4s to 5s; black, 5s to 6s per half sieve; strawberries, 2s 6d to 3s 6d; [illegible] 3s 6d per pack; Canary bananas, 6s to 10s; Jamaica, 3s to 6s per bunch; pineapples, 2s 6d to 5s each; English tomatoes, 3s to 4s per dozen lb.

HOPS.

Canterbury, Saturday.—After the fine weather of the past week the appearance of the plants is highly satisfactory.

London, Monday.—The Belgian market has become easier within the last day or two, Brussels quotations now being 134 francs for Aloists 1904, and 132 francs [illegible] lots.

Worcester, Saturday.—We have little change to report either as to the growing [illegible] business passing on the market. Stocks on offer are limited, but buyers only operate [illegible] present requirements. —CHARLES FARAM AND CO.

Messrs. Robert Bond and Sons, on Friday, [illegible] a continuance of very hot, dry weather, carried out their 26th Sutton lamb [illegible] and six thousand lambs being [illegible] ing fourteen flocks of the registered Suffolk breed. Trade proved very animated, [illegible] prices prevalent at the great Bentley sale on the preceding day. Mr. Alfred Smith made 60s. for his top Suffolk ewe lambs, 3s. more than last year, and there was an even greater increase on his succeeding pens, his average for [illegible] 37s. Mr. C. F. Marriner, who has recently bought Thorpe Hall, Hasketon, where he has resided for a considerable period, came second for Suffolk ewe lambs at 46s., at [illegible] 42s. 6d. His average for the fall of 138 lambs was the exceptionally good one of 39s. 5d.

AGRICULTURAL SHOWS IN AUGUST.

AUGUST 1.—Chepstow Agricultural Society, at Chepstow. Entries close about July 16. Secretaries, Clay and Thomas, Chepstow.

AUGUST 1 (not 3). Penrith Agricultural Society, at Penrith. Entries close July 18. Secretary, J. Thornborrow, F.A.I., St. Andrew's Churchyard, Penrith.

Sale of Jersey Cattle.

On Friday last, at Woodlands, Northaw, Hertfordshire, Messrs. Thornton and Co. offered for sale by auction drafts from the herds of Jerseys the property of Mr. C. W. Armitage and Mr. A. Miller Hallett, of Goddington, Chelsfield, Kent. Both herds are widely and popularly known, not only for their especial merit and great dairy properties of the animals, but for their continuous distinguished successes at the Royal and County Shows. Several prize animals were included in the sale, among them being a fine old cow, Farmeuse 3rd, which made 21 gs. to Mr. Thompson; Mignonne's Lily, the first prize cow at the Bath and West Show at Nottingham last month, which went to Mr. Cooper of Whittlebury at 37 gs.; also Jolly Peter, the winner of five first, four second, and two third prizes. He was bought for Lady Linlithgow at 46 gs. The following were the best prices, with buyers' names:—

Marriage of Mr. J. R. Coultas.—On the 5th inst., at St. George's Church, Bloomsbury, Mr. James Riley Coultas, only son of Mr. J. P. Coultas, of the Perseverance Ironworks, Grantham, and Miss Margaret Pitchford, second daughter of Mr. Pitchford, of Glentholme, Mornington, Victoria, Australia, were united in matrimony. The bridesmaids were Miss Coultas (sister of the bridegroom), Miss Watson (Darlington), four little girls, and a young page, all charmingly attired. The bride was given away by her aunt, Mrs. Oliver, of Perth, Australia. Mr. C. Folcke, of Birmingham, acted as best man, the officiating clergy being the Rev. R. B. Tollington, Vicar, assisted by the Rev. C. Ellesmere, Vicar of Spittlegate. Before the ceremony the organist played the "Bridal March" from "Lohengrin," and the hymns were "O Father, all-creating," "O Perfect Love," and "Now Thank we all our God." The Vicar of St. John's, Bloomsbury, delivered an admirable little address to the bride and bridegroom, who left the church to the triumphant strains of Mendelssohn's "Wedding March." Subsequently, a reception was held at the Hotel Russell, where the many handsome presents were viewed with much interest by the numerous guests. Mr. Coultas was the recipient of a salad-bowl with servers, in glass and silver, of very elegant design, subscribed for by the employees at Perseverance Ironworks. It was supplied by Mr. Osborne, jeweller, etc., of Westgate. In celebration of the wedding, the employees at Perseverance Ironworks were entertained to supper at the Red Lion Hotel, Grantham.

Live Stock Record.

SHEPHERDING IN JULY.

Those farmers who take delight in their flocks and are good keepers as well as seekers after every means to improve them, find it to be one of their greatest pastimes at the present period of the year to wander among their sheep and inspect their individual merits. The tupping season will soon arrive, when a selection must be made of those ewes best to breed from for next year's lamb crop. Indifferent flock owners make hardly any selection. Most of the ewe-tegs are adopted, and an equal number of the oldest ewes turned out for sale to the tegs brought in. But the careful, improving owner will be much more particular. If he discovers any of his ewes, whatever may be their age, which are unthrifty or ill-shaped or devoid of the quality he desires, he will mark them to be discarded, and he will be likely to cull his tegs severely, also preferring to keep some of the best of the old ewes which have arrived at the age when they are usually sold, rather than admit in their stead animals not up to his standard of merit.

While wandering among his ewes at this period, one particularly absorbing thought will be sure to rise uppermost, as to the sort of ram or rams he should buy or hire at the approaching sales. He may have been breeding in the past two or three years for quality or size, or for bigger fleeces or finer wool, and this old aim having been accomplished, he will now endeavour to promote improvement in a different direction. Whilst some always know exactly what they want, and have eyes to perceive the right sire at a glance when he appears, others, from not having the gift, never know the sort of animal they should buy. A flockmaster who is duly sensible that he is not possessed of the faculty should endeavour to get a shepherd who, in addition to being faithful to duty, is a good judge of stock.

There are not so many arable crops available for sheep-feed as there were in May and June. Vetches and summer cabbage are now the chief of them, with sainfoin where the soil is well suited for that crop to be grown. Arthur Young wrote that the farmers of a great many Wold districts would not be able to pay their rents but for sainfoin, which is just as true to-day as it was in his time. Their biggest hay-ricks are from the crop, and there is no healthier feed for lambs either at the present period or later in autumn than a sainfoin layer. The male lambs, whether rams or wethers, naturally are allowed to have the best green food—cabbages, if there are any; or the front fold for first pick in feeding off vetches or anything else. Alternations of diet and frequent changes from fold to pasture have frequently to be carried out. The owner's eye as well as that of the shepherd has to be active to readily detect the green crop which agrees best with the portion of the flock being fed highly for sale, and their auxiliary food should be put into their troughs regularly, and not more than they are found to clear up well at one time.

The flies which spit the spawn of maggots are always exceedingly active in sultry, showery weather at the present period of the year. The shepherd has to be very attentive to discover fly attacks, as soon as possible after they are made, or great mischief is sure to result even in a few hours. The faithful shepherd will also take care to remove with his shears every clot of dung adhering to the tails of the sheep or lambs under his care, that being another, and, in general, the worst, harbour of maggot-generating flies. Many flock owners dip their sheep at the present period both as a preventive of this troublesome, loathsome pest, and to kill ticks or any parasitic insects harboured in the wool. This having now grown from half an inch to about an inch since clipping, is of a nice stage of growth to be acted on most effectively, and sheep if dipped now would suffer no chill or shock to the system therefrom, as might be the case later in autumn, with a colder temperature; yet they would still be likely to be free of parasites the entire winter.

Prominent British Breeders.

MR. C. T. PULLEY,
Lower Eaton, Hereford.
BREEDER OF HEREFORD CATTLE.

STOCK AND SHOW NOTES.

By Herdsman.

The entries for all departments of the Tunbridge Wells and South-Eastern Counties Agricultural Society, except poultry and rabbits, for the annual show on the 27th and 28th inst., have now closed, and it is gratifying to find that a large and excellent show is assured. The cattle section will again be very strong, the entries in the various bovine classes totalling about 350. As usual, the Shorthorn, Sussex, Jersey, and Guernsey breeds predominate, Jerseys being most numerous of all. The entries of horses are also very satisfactory. There are some eighty cart horses, and the lighter breeds will be forward in fully average numbers. Some strong classes of hunters will be seen in the ring, and hackneys may be expected to come up to the usual high standard always found at this show, both as to number and quality; while the harness classes include some of the most famous show animals in the country at the present time. A number of eminent breeders will be among the competitors for the Hackney prizes with the animals that took honours at the recent Park Royal Show; indeed, in nearly all departments Park Royal winners will be found. The sheep classes are well filled, particularly the Romney Marsh breed, which has been immensely improved in recent years; and goats, of which a good number have been entered, may be expected to form an interesting collection. There will be the usual driving and jumping competitions, in which the general public always manifest keen interest; and all present indications point to a generally successful show. The entries in the implement and miscellaneous department have for some years been increasing.

At a Council meeting of the Hereford Herd Book Society, Sir John Cotterill, the Lord-Lieutenant of Herefordshire was re-elected President. Mr. A. P. Turner was re-elected Vice-President, and congratulated on his election to the Council of the Royal Agricultural Society.

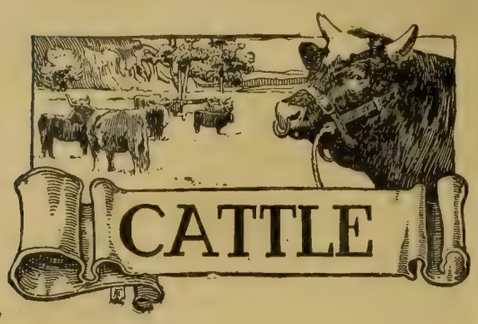
The Council of the Peterborough Agricultural Society have fixed Tuesday, Wednesday, and Tursday, July 10, 11, and 12, 1906, as the date of the Society's exhibition for next year. Secretaries will please note.

A number of choice Guernsey cattle were shipped last week to the United States by the s.s. "Isidare" (Johnstone Line).

They had all been selected on the Island of Guernsey, and formed an attractive shipment. Some Dorset sheep were also on board.

Before the Huntingdonshire magistrates at Norman Cross, last week, a gamekeeper named Albert Smith, on the Holme Estates, was charged with placing poison near certain famous covers in the Fitzwilliam Hunt country with the object of destroying life. Evidence was given that foxes, dogs, and cats had been destroyed by strychnine on defendant's beat. He strenuously denied the use of poison, but was fined £10 and £20 11s. costs.

Strange Death of a Labourer.—The death of Thomas Westwood, farm labourer, was reported recently to the North Worcestershire coroner as having occurred at Halesowen under singular circumstances. He was overcome by the heat when working in a hayfield, and fell off a wagon and injured his neck. While he lay in bed a thunderstorm occurred. The lightning coming through the bedroom window, it was said, startled him, and in turning over his neck was heard to crack, and he died immediately.



Notes and Jottings.

To the cattle breeder or owner, whether he be a breeder simply of young stock to be sold whilst in their growing state, to mature either for the dairy or the block in other hands, whether he breeds and finishes them on his farms, the month of July is one that on the average gives less satisfaction than any other month of the year. Generally speaking, July is a month in which vegetation is either rampant and outgrowing all needs, or otherwise the land is dry and parched, feed scarce, flies terribly troublesome, and your feeders and milkers losing flesh and milk before your eyes in a very rapid fashion. Young stock, too, in a time of short feed, lose badly, and increase in legginess, and often give a good deal of trouble one way or another.

This year, over a very large portion of England, also Ireland and Wales, the latter condition as regards feed prevails this year. Grass is very short in most cases, the weather is excessively hot, and flies have seldom been more troublesome than at the present time, and, travelling through the country, one sees at the railway side many hundreds of cattle of all classes that are suffering loss from the above causes. A week of July weather of the kind now prevailing makes an immense difference to stock. When writing a week ago many districts had been visited by showers or thunderstorms that refreshed the pastures temporarily, and cooled the air, giving very general relief and help to the trying conditions named. To-day heat and drought, as well as flies, are far too much in evidence.

It is at such a time as this that a good supply of green food is a real God-send to the stock-breeder and feeder, as well as the dairy farmer. A large milk-selling farmer said to me this week, "I wish I had a good green crop of some kind to cut at now; my cows are falling off terribly in the milk yield." Last spring it was pointed out in these notes how valuable a green crop is at such a time, and the practice followed by the late Mr. McCombie, of Tillyfour, of sowing a breadth of oats and peas in mixture for the purpose was recommended. In the course of a long journey through the Midlands this week, I passed a field of this mixture just in season, and the bulk of food provided, as well as its nutritive properties, can scarcely be imagined.

Black oats and white peas, I believe, are found to provide the best food; some growers, I think, put in a small proportion of tares also. When the oats are just losing or passing the milky stage, and the other subjects are green in the pod, the feeding value is very high. For milking cattle, cutting it a little younger is of advantage. The time of sowing would vary according to the locality and the season, but July is a good time to provide for its use. Should the season then be plentiful of grass, the green pod makes excellent dry fodder or ensilage, but even in good years of grass, July is a month when a little help is very useful. It assists with the growth in young stock, with the increase or holding together of the milk supply, and also of beef, until the time that aftermaths come in.

It is not often that sufficient attention is paid to the feeding and management of cattle, except in a few really first-class breeding and show herds, where no stone is left unturned in order that the animals may always be found in a condition for inspection by any intending purchaser. Owners and managers of such herds know full well that the high breeding would lose much of its value were they to neglect the providing of a succession—an ample succession of catch or green crops to assist in maintaining steady growth and condition. It is not intended by this to convey the meaning in the slightest degree that "breed goes in at the mouth," but simply to impress upon careless managers the fact that a well bred animal is worth caring for, and that, if neglected, often makes but a poor return.

In support of this statement, many breeders have had cause to regret having sold a highly bred bull or heifer to a careless, negligent, and in some cases, it is to be feared, ignorant manager may be added. The bull that in ordinary good hands would have proved an advertisement of the best possible kind to its breeder would, under the circumstances, mentioned, give quite a bad impression to any strangers who might see it without taking to heart, it may be, the fact of the beast having come from good feeding and careful attention to little better than half rations, and in others to taking care of itself. Such instances are very common, so much so that many intelligent breeders will not sell to customers of this kind, and wisely so.

So much lies in the management of stock that it is often seen that a moderately bred animal, possessing the farlings that often accompany such stock, will, under careful management and proper bringing out, if we may use the expression, make more money than a first-class bred and shapely show bull that has been in bad hands. There is a good deal of truth in the old proverb that fat like charity covers a multitude of faults, and though the best animal may be very nearly faultless, unless he is brought out in fine condition, his beauty and symmetry are not sufficiently emphasised to make him as attractive as he should be, therefore, when an inspection of the herd by any intending purchaser, or interested person, takes place, condition plays a very important part.

The results of the Shorthorn sales in the well known herds of Mr. Henry Dudding and Mr. Jonas Webb, in Lincolnshire, must be very satisfactory to breeders of the red, white, and roan. An average of over £50 per head for such drafts, which include calves, is an average that means leaving the banker's balance on the right side of the ledger, and that such draft sales can take place periodically at brief intervals, points to careful management, and to a healthy and fruitful condition of the animals of both sexes. Purchasers should look well to this point. To buy from a healthy, regular breeding herd is of vast importance, success invariably following; whilst to purchase from a herd where regular breeding is not prominent, sterility or abortion being prevalent, is invariably followed by disappointment.

The judging of the Shorthorns at the Lincolnshire show last week was attended by a circumstance causing considerable excitement in the award of the championship for the best bull. Coates's herd book Shorthorns and Lincoln Red Shorthorns being the only breeds, and the contest lying between the best bull of each of these breeds. The cattle judges each held to their own breed; the sheep judges were then called in, and, singular to relate, these gentlemen also divided evenly, so that an independent umpire in the shape of the famous Norfolk feeder, Mr. Learner, had to be requisitioned ere the final decision could be arrived at, when the honour was accorded to the Lincoln red bull. This, it is believed, is the first occasion upon which a Lincoln Red has succeeded in vanquishing the Durham representative champion.

The two bulls in question were Mr. P. L. Mills's well known King Christian of Denmark, who was champion of the Bath and West show at Nottingham, as well as occupying the highest position in his class at many leading shows of the breed, and no one can deny one of the most stylish bulls of his breed, full of quality, well grown, and very perfect in his symmetry and most valuable points; and Mr. T. B. Freshney's Saltfleet Bonus, a three-year-old, bred by Mr. Riggall, and a very massive short-legged even specimen, grandly filled on his top and in his thighs, and with a wealth of flesh of the kind that the butchers like, a stylish, pleasing stamp of bull in general appearance, too. Such a victory, no doubt, will prove a great lever to the Lincoln Red breed.

The recent sale of a draft of Jerseys from Dr. Watney's famous butter test herd was, on the whole, satisfactory, though the price averaged (only half that of the Shorthorn sales named) was not high, not sufficiently so to leave much margin for profit, and the number sold, only 22, was very small and including only a few select animals. The very high price obtained the other day in the United States for a Jersey (£2,000) was probably not without some effect on the demand at the Pangbourne sale. It should be satisfactory to the owner of these Jerseys that the present sale realised three pounds per head higher than the sale of two years ago, though the number on that occasion was greater.

THE TENS OF THOUSANDS of users of MOLASSINE MEAL should see that their stock have a portion in every feed all the year round, not simply as a condiment when an animal is out of condition, or occasionally as a fillip. MOLASSINE MEAL is the most valuable and economical food, displacing all condiments, and should be given in place of the same weight of oats, beans, grain, cake, or other feeding stuffs. Sold by all corn merchants and the MOLASSINE CO., Ltd., 36, Mark Lane, London, E.C. —[ADVT.]

Amongst the many sales of cattle advertised to take place shortly is one of 45 Dutch cattle of a very superior class, that takes place by Messrs. Bond and Sons, at the Ipswich Cattle Market, on the 18th inst. It is a long time since a good collection of Dutch stock has been before the public in England, and though these cattle, in a general way, are not noted for the richness of their produce, the quantity yielded is enormous, and they form a very useful mixture with the Channel Island breed. As nurses their milk is very useful, the heavy yield going a long way, and when given to Channel Island calves whole it suits them admirably, or when mixed with the Channel Island milk, a very heavy yield of butter follows. The two qualities assisting each other.

Sale of Dexters and Kerries at Park Royal.

A sale of Kerry and Dexter cattle the property of Messrs. Robertson and Son, of La Mancha, was held on Tuesday last at the Dairy Buildings in the Park Royal showground, Messrs. Thornton and Co. being the auctioneers.

There was only a small attendance, but some good prices were made for these choice little black cattle, Mr. B. de Bertodano giving 47 gs. for La Mancha Darling and Mr. Martin J. Sutton 33 gs. for Tess. The bull Little Jim, that won first prize at Belfast this season went for 65 gs. to Mr. Ramsey to go into Scotland. The forty-three head sold averaged £14 11s. We give below a sale list:—

COWS AND HEIFERS.

Sale of Dutch Cattle at Ipswich.

THE TENS OF THOUSANDS of users of MOLASSINE MEAL should see that their stock have a portion in every feed all the year round, not simply as a condiment when an animal is out of condition, or occasionally as a fillip. MOLASSINE MEAL is the most valuable and economical food, displacing all condiments, and should be given in place of the same weight of oats, beans, grain, cake, or other feeding stuffs. Sold by all corn merchants and the MOLASSINE CO., Ltd., 36, Mark Lane, London, E.C. —[ADVT.]

Sale of Lord Rothschild's Jerseys.

A portion of Lord Rothschild's celebrated herd of Jersey cattle was submitted for sale by auction on Thursday last at Tring Park, Hertfordshire, Messrs. Thornton and Co. being the auctioneers. The herd has become very distinguished both by the long list of prizes won in recent years and by the heavy milking records which are published annually. The animals offered were all young and of first-rate quality and descent. They were mostly by those celebrated sires Oxford Duke, Oxford Brigadier, and Tudor Boy, all prize winners or from prize parents. Capital prices were obtained, the highest being for Garantie 13th, a two year-old daughter of Golden Lad of Oaklands, which went to the Earl of Cadogan at 70 gs., her recently-born bull calf going to Mr. E. Colston at 5½ gs. One of the best animals was undoubtedly the young cow Snawfell, descended from the old Dauncey strain, and after good bidding, she was bought by the Bishop of Ipswich at 67 gs., her heifer calf again being taken by Mr. Colston at 7½ gs. The bulls made very even prices, the highest being 32 gs. paid by Mr. James for Northern Star, a first prize winner at the Oxfordshire and Bath and West shows this year. Priority, first at Bournemouth and second at Nottingham, made two guineas less to Mr. W. C. Cooper, of Whittlebury. The following were the chief prices and buyers:—

COWS AND HEIFERS.

Sale of Red Polls at Flaxmoor, Norfolk.

A number of Red Polled cattle belonging to Mr. A. G. Scorer and Mr. F. J. Mann, of Shrapham, were sold by auction on Thursday by Messrs. Thornton and Co. The cattle were in natural condition, but although there was a fair company, only ordinary prices were realised, the majority being purchased locally. We give below a sale list of the lots that realised over 12 gs.:—

Horse Notes.

"He doth nothing but talk of his horse."
—Merchant of Venice.

I went so fully into the question of bearing reins some time ago that I would merely point out on this occasion that though, as a rule, the bearing rein is entirely unnecessary, there are horses which go very much better in one, and which do their work with much more ease to themselves, a fact which the members of the Anti Bearing Rein Society, which has done so much excellent work, do not seem to recognise. A horse with a heavy head and neck—a horse that is necessarily heavy in hand is all the better for a properly adjusted bearing rein, as anyone who has driven such horses long distances will recognise. The horse goes better and easier both for himself and for his driver. But, as I have pointed out before, a tight bearing rein is at all times an objection, and if a horse has a light forehand a bearing rein is entirely unnecessary.

Manners in harness are of the greatest importance, and one would naturally think would have considerable weight with the judges when harness classes come before them. I have watched the judging of harness classes this season, and, so far as I have been able to follow it, it has appeared as if action was the great, if not the only consideration. Now action is a very important thing indeed, and a harness horse without action is like mustard without beef. But action is not everything. In some instances—a few only—I have seen the judges recognise this fact and put a popular favourite back on account of some minor defect in joint or limb—for being worn in fact. But I have never seen manners much a prominent qualification for a showyard horse.

Yet a horse cannot be a high class harness horse without manners, indeed manners are essential in every horse, except a racehorse, before he is entitled to rank in the first class. I am speaking of course of the finished article which the show harness horse is supposed to be. And, again, no one will buy a harness horse for private use unless he has manners. It is necessary for a harness horse to stand perfectly still without anyone having hold of, or standing at his head. He should start at a walk, not a fidgetty amble and when put into a trot should go at the pace his driver wants—slackening or sharpening his speed without being hauled at by the reins on hit with the whip. How many horses do we see in the show ring that answer this description? What we see is a big class of horses driven round the ring as hard as ever they can go without losing their action. Then, when they are drawn up, a man immediately goes to the head of most of the horses; occasionally we see a horse rear or make a bolt or even kick, and I have seen horses that have reared, or kicked, or shied awarded a prize.

There are, of course, allowances to be made when anything of this sort happens. There may be circumstances which go towards excusing a horse for such "little slips." But they should certainly count against him in most cases. There is no doubt that if manners were more taken into consideration, some popular favourites would be displaced and some nasty things would, probably, be said by unthinking people. But if manners are necessary in a hunter, they are still more necessary in a harness horse. To a hunter that can gallop and jump, and go on galloping and jumping, much may be forgiven; a harness horse should do his work, which in these days is comparatively light, easily, in good style, and with perfect manners.

The question of measurement is frequently cropping up at shows, and disqualifications on account of over height or under height seem to cause more heart burning than any other. Nor is this, perhaps, to be wondered at. At many shows there is no adequate provision made for measuring. If a standard is provided there is no level platform on which to stand the horse or pony that is to be measured. And if there is, how frequently do we find there is a dispute about measurements, and a horse will be measured at one height one day, and at another the

next, with the result that there is disqualification and disappointment.

In the old days of the Give-and-Take Plates, when horses carried weight for inches, there was never any trouble about measuring. Every horse had to go under the standard, and he was measured on a measuring stone which had two parallel lines chiselled on it. These lines were 5 ft. apart, and beyond these lines no horse was allowed to stretch himself. It would be undoubtedly a good thing, and save a considerable amount of trouble, if some such plan were adopted with respect to measurements for the showyard. If owners knew exactly how their horses would be measured there would be fewer disqualifications, for naturally a man would not take a horse to a show when he knew that an objection would bring about certain disqualification. The 5 ft. limit above mentioned might perhaps be too little for horses over 15 hands or 15 hands 1 inch, but a scale might readily be adopted by skilled measurers, of whom there are any number in the veterinary colleges. In the old days, when the measuring-stone was used, the height ranged from 13 to 15 hands. It may be interesting to know that the only measuring-stone that is known to be in existence is in front of the grand stand on Knavesmire. The establishment of a standard rule for measuring is much needed, and the sooner one is established the better.

At many shows the height conditions are so framed that it is only a wonder that there are not more objections and disqualifications than there are. I know of many places where, according to the conditions as expressed in the prize schedule, a pony under 14 hands or under 13 hands could compete in the class for 15 hands 2 in. harness horses if they were literally interpreted. This is not intended, and it is seldom that it takes place. Indeed, I do not remember an instance at the present moment. But that does not do away with the possibility of the occurrence. Again, there are conditions which say, for instance, that a horse shall be 14 hands 2 inches, and not exceeding 15 hands 2 inches. It seems to me that the proper place for the 14 hands 2 inches horse is the smaller one. The conditions as laid down in the Hackney Horse Society's prize schedule are explicit enough, and do not lay the road open to objections. In such a class as I have referred to, the conditions in the schedule would read:—For geldings or mares above 14 hands 2 inches and not exceeding 15 hands 2 in. A much clearer classification than that which usually prevails.

The Highland and Agricultural Society's show at Glasgow was a great success, and was distinguished by a remarkable activity in the Clydesdale horse market. At one time the hiring of stallions by Horse Societies was mainly done at the Glasgow Stallion Show in February. But now, so great is the rivalry amongst breeders that time is taken by the forelock, and at Glasgow several important purchases and hirings were made. Amongst the sales, one of the most important—perhaps the most important, was that of Baron Fyvie, Messrs. A. and W. Montgomery's two-year-old colt. Baron Fyvie is by Baron's Pride 9122, dam Fyvie Bell 15795, by Prince Thomas 10262, and was bred by Mr. John P. Sleigh, St. John's Wells, Fyvie. Last year he was second at Ayr, first at Edinburgh, and fifth at the Highland, and this year he has never been beaten in his class. He was first at Castle Douglas and Kilmarnock, first and champion at Ayr, and first and Champion at the Royal. He was reserve to Mr. Park's Royal Chaltan for the championship at Glasgow. Baron Fyvie will find a new home in New Zealand, having been purchased for Mr. R. Irving, jun., Clinton, Otago.

There has also been a notable sale of a two-year-old Shire stallion, who, though he has never been seen in the showyard, is one of the right sort, wide and weighty, with good flinty bone and standing correctly on the best of feet. This is Mr. A. Grandage's Bramhope Archduke, who has been sold to M. Ricardo Jiminez for the Spanish Government. Bramhope Archduke is by Bramhope Archdeacon, a good horse, that has got in front in good company, from Bramhope Rustic Beauty by Seldom Seen, a horse of very massive character, that won at the Shire Horse Show some years ago when Mr. Grandage purchased him. Bramhope Archduke was a very late foal, hence he was not shown. I hear the price is a very satisfactory one, and I may add that there seems to be an increasing demand for the best breeding animals of all breeds for the foreign market. Is it necessary to utter a warning word to stick to the mare?

THE LOOKER-ON

Horse Supply in Time of War.

Mr W. Pridgeon Williams, whose earnest and persistent efforts in connection with the Brood Mare Society are so well known to breeders and others who recognise that the constant depletion of our stock of breeding mares is a serious menace to the horse industry in this country and a source of grave danger to our cavalry in the emergency of a great war, had the benefit of the platform of the Army League at the Hotel Cecil on Thursday afternoon to deliver a lecture on "The Supply of Horses in War Time." Introduced by the chairman, Sir Archer Croft, he gave an encouraging review of the work done by his society since its establishment, and entered a vigorous protest against so great and essential an endeavour as the retention of brood mares being left unaided by the Government. The 700 horse shows held annually were very well in their way, but they resulted in distant markets being found for the best mares, and except for the Brood Mare Society no effort was made to retain them, the result being that in some districts the supply had gone down 90 per cent., and those who might be our enemies were strengthening their remount provisions in a way which might be disastrous to us. There was urgent need that national interest should be stimulated by the holding of meetings in all important centres, and that the various societies should combine to prevent the wholesale exportation which was now going on. He bespoke the hearty co-operation of the Army League in the matter.

Major Roper-Caldbeck said that the problem of which the lecturer had treated was one of the most practical and urgent which could be considered in connection with military organisation, but we were now in just the same state of unpreparedness as we were before the South African War. There seemed to be no glimmering of an idea that there was any need for expansion with regard to our remount system, though we were within measurable distance of the abolition of our omnibus horses, acknowledged to have been the best sent out to South Africa.

Colonel F. N. Maude, R.E., moved, Colonel H. H. A. Stewart seconded, and it was resolved: "That the breeding and preservation of horses suitable for use in the Army is a question of national importance, and requires the serious consideration of the Government and the country at large."

Major-General Sir Alfred Turner, in moving a vote of thanks to the chairman, said that if they could get meetings throughout the country the taxpayer might be shown that to him the matter was one of supreme importance.

Chester Fair.—There was an average show of stock and a fair demand. Good lots readily found purchasers, and altogether a better clearance was made, both of store and dairy cattle. Sheep were more inquired for, and an improved business was done at good prices. Quotations:—Milch cows, £15 to £21; calvers, £14 to £19; barrens, £10 to £13; heifers, £9 to £14; stirks, £6 to £10; sheep, 18s. to 35s. The horse fair was not so large as usual for the July fair. Some good lots were shown, and met a fair demand. Inferior horses were not much wanted, and for these prices were irregular. Cart horses, £30 to £75; trap horses, £15 to £32.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending July 8, 1905:

Period.				Week ended July 8, 1905	Corresponding week in	1904 1903 1902	Total for 27 weeks in 1905	Corresponding period in	1904 1903 1902

NOTE.—The figures for the current year are approximate only.

Notes and Jottings.

The export returns of sheep for June last, given in the recently-issued Trade and Navigation Returns, show that during the past month 248 head were exported. This number is, with the exception of that for June, 1902—when but 211 head were exported—the lowest total of sheep exported in this month since June, 1896.

Another reference to the same source of information shows the average declared value for these to have been £9 2s. 5d. each. This average is one which cannot hardly be accepted as indicative of the actual value, bearing in mind the high prices that have been publicly given for stud rams. We may also remark that the average for the past month—£9 2s. 5d.—is £1 1s. 7d. per head less than the same item for the corresponding period of 1904.

The results of the export demand for the first six months of this year compares favourably with the same period of 1904, the number exported having been 1,624 head, or 3.57 per cent. more. The higher averages of the first five months of the year enable that for the whole of the six months to work out at £12 4s. 8d., which is the highest average but one for the period of the year under review since the year 1897.

The figures quoted above indicate clearly how valuable the export demand for sheep is, and also show what a certain source of income it provides those flock-owners who have flocks from which such selections are made. Were the true value of these exported sheep possible to ascertain, we are convinced that the averages given in the official figures would be found very materially below that price. For instance, there will be exported in July and August no less than twenty-seven of the Riby Grove rams; twenty-six of these averaged fully £90 each. There will also be shipped by Mr. F. Miller, in July, one ram purchased at 1,000 gs. from Messrs. R. and W. Wright, five others from the same breeders that cost 300 gs. each, one from Mr. H. Dudding which cost 500 gs., or seven rams that cost 3,000 gs., which shows an average of 450 gs. each.

Many other rams purchased at high prices will also be going. Hence, if the actual cost prices were given, how very much more important would this portion of our export trade be considered by the general public! We have not full information of all the notable sales that took place in Lincoln sheep at the Royal, and during the subsequent fortnight, but so far as we can gather the demand for Lincoln rams has been much in excess of any year since 1898. Amongst the sales we have heard of are 100 selected rams from Mr. H. Dudding to Mr. F. Miller, sixty-five from Messrs. Wright to the same purchaser, who also took thirty head from Mr. C. E. Howard. Mr. Tom Casswell, who sold the champion ram (Lincoln) at the Royal Show to Mr. E. N. Casares, has, we understand, sold practically all the rams he has at home for export to the Argentine, and Mr. R. Fisher, of Leconfield, has been likewise as fortunate.

The home sales are the best any breeder can make because the price paid is net, and there are no expenses to decrease the amount receivable. Twenty-one export certificates have been issued by the Kent or Romney Marsh Sheep Society for yearling rams, including the first prize winner at the Royal, yearling ewes, and ewe lambs to Mr. H. T. Harding for sheep he has purchased from the Earl of Verulam and Mr. C. File for export to the Argentine. From the Gorhambury flock five ewe lambs of excellent type and character have been taken, these include the third prize pen at the Royal. Four yearling rams also go from that flock, and two of these were in the second prize pen of ram lambs at the Royal in 1904. It has probably never occurred before at this period of the year for so large and valuable a shipment of this breed to be sent away.

Amongst the other exports recently shipped are five Southdown ewes and a two-shear ram from Mr. E. Ellis's well-known Summersbury flock. These go to Australia, and include that

particularly typical pen that were second at the recent Royal show.

We have been dealing this week so far with the export side of the sheep industry. There is, however, the other side of the question to consider, and lucky it is we have this to do, because where it is not so, it is certain the former part of our notes could not have been written. The purchasers of our stud sheep have two objects before them—to improve their sheep, and at the same time increase them and the supplies of mutton for our market, in which there is always a sure and safe sale for it. It may be that the large supplies of imported mutton to some extent affect the price of the home-grown and fed article, but if a balance be struck, there is no doubt but that, after taking into consideration the amount received for stud sheep on one hand, and the reduction in the market value of the home-grown mutton caused by the imported supplies on the other hand, that the balance would be in favour of the English flock master.

So far as regards the imports of live sheep during the past six months, we find the total was 130,331 head, or 33.97 per cent. less than in the same period of the preceding year. This total is the lowest that has been recorded during the past eleven years. These sheep all come from two sources of supply—namely, the United States, which sent 117,620 head, or 33.87 per cent. more than in the first half-year of 1904, and Canada, that sent 12,711 head, or 9.95 per cent. less than during the corresponding period of 1904.

From this information we gather that during the past six months the British public have consumed 130,331 of imported sheep under the delusion they have been eating English mutton. This fact shows clearly how unfairly the home producer is treated under the present practice, which allows the vendor of meat to sell that article under whatever designation he may desire, and, further, the manner in which the consuming public is defrauded of their just privilege—namely, the supply of cheap food. These large importations of live sheep are admitted free to this country for the benefit of all and not for the benefit only of the middleman. This matter, which, of course, applies with equal force to live cattle, also needs the attention of all who are interested in agriculture. The mutton supplies for the past six months were 2,035,288 cwts., 10.14 per cent. more than during the same period of 1904. The Australasian supplies were 294,000 cwts., the New Zealand 887,750 cwts., the Argentine 716,484 cwts.—the largest quantity ever sent us from this country during the past six months of the year, and 6.07 per cent. in excess of the quantity sent during the year 1894—and from Holland 78,545 cwts.

Mr. C. E. Howard, who was first for a pen of five Lincoln rams at the Lincoln show and h.c. for another in the yearling class at that show, reports the sale of these six specially fine rams at a very high price to Mr. E. N. Casares, who, as our readers are aware, has purchased so very many of the leading Lincoln rams this season for export to the Argentine.

Sheep Sales.

Bentley.

This sale was held on Thursday by Messrs. Sexton and Grimwade, for the thirty-fifth year, and resulted in a good trade, and an advance of 3s. to 4s. a head on the year being experienced for a considerable proportion of the consignments, which included the falls from fourteen registered black-faced flocks. The top price again fell to Mr. John Eagle's well-known flock, his best twenty-five ewe lambs realising 55s., as against 52. 6d. last year; but for wether lambs, Mr. John Salmon was, as last year, to the fore, his leading pen realising 50s., as compared with 46s. 6d. a year ago.

Birmingham.

At the annual wool sale conducted by Messrs. Lythall and Walters, on Tuesday, at the Wool Warehouses, New Canal Street, there was a good attendance of buyers. Prices were quite up to the excellent figures that have been ruling this season. Washed wool sold up to 1s. 2½d. per lb., unwashed up to 10d., and lambs' wool up to 11d.

Haverhill.

This important annual dispersal was held on Monday. There was an advance in price as regards lambs (compared with Stowmarket sale on Friday) of well on for 2s. a head, and it appears to be highly probable that the rise in their value, which commenced a fortnight ago, will be maintained until the close of the lamb sale season in this district. Suffolk shearling ewes made as high as 66s. (given by Mr. J. C. Dawson, of Nacton, for a score selected from the consignment of Mr. A. W. Ruggles-Brise, of Finchingfield); and the leading score of eartmarked Suffolk lambs made 47s., from the flock of the Hon. W. F. D. Smith, M.P., which, it will be remembered, was awarded a silver medal and reserve for the challenge cup flock competition (District B) last autumn.

Wool Sales.

Devizes.

There was a large attendance of the leading flock masters of the district at the annual wool sale at Devizes on Tuesday. There was an all-round rise of about 2d. per lb. on last year. The highest price reached last year for washed wool was 11¾d., but upon this occasion five lots reached the top price of 14d. The top price for unwashed was 10½d., as against 8½d. last year. Mr. George T. Smith first occupied the rostrum, and offered about seventy lots. The highest price reached was 13¾d. for washed and 10½d. for unwashed wool. Most of the washed lots went at 13½d., and the unwashed at 9¾d., 9½d., and 9¼d. per lb. Mr. T. Lavington offered some 35,000 fleeces, and he reached 14d. five times.

Didcot.

At this wool fair 14,000 fleeces were on offer, and all sold at prices which showed ½d. per lb. reduction on recent rates realised in the district. Washed wool made from 11½d. to 1s. 0½d. per lb., and unwashed 7¾d. to 9½d.

Findon.

At Findon on Wednesday there was a good company present, and a number of farmers and breeders penned lambs, but there was a shortage of about a thousand as compared with last year, there being some 3,000 entered. Lambs, indeed, appear very scarce. Moreover, there is plenty of feed, and sellers generally had matters their own way. During the morning Mr. Henry Jas. Burt, of Steyning, conducted a successful sale. Wethers averaged over 31s. Mr. T. Peacock, of Angmering, obtaining top price, 34s., which was given by Mr. Candy, from the same locality. Mixed lambs averaged just over 27s. 6d., 32s. apiece, given by Mr. Wenham Drewitt (Dorking), for eighty of Mr. G. Goatcher's (Steyning), being the best figure. A few ewes sold at 24s. 6d.

Leighton Buzzard.

The number of fleeces pitched was about 15,000, the supply being about the same as last year. Trade is considered fairly good, the highest price being 32s. 9d. per tod, and the general average 30s. 6d. per tod. The buyers are Ellis and Sons, of Leicester; Paine, of Bedford; Pearce, of Thame; Franklin, of Hitchin; Cook and Son, of Newport Pagnell; and Pashley and Cheney, of Thrapston.

Leith.

At Messrs. J. and W. Greig's auction sale of wool on Tuesday there was a numerous attendance of buyers, and a good clearance was effected. Half-bred wools sold at an advance of ¼d. to ½d. from June rates. Crosses were also fully ¼d. dearer. A good competition for Cheviot wools, which were well cleared out at corresponding advances. Black-faced experienced a fair demand, but prices are little altered.

Perth.

Messrs. Macdonald, Fraser, and Co., Ltd., held the first of their annual series of sales of wool and skins on Thursday. The show was one of the largest the salesmen have yet offered at their opening sale, the turnout comprising over 2,500 bales of cross, half-bred, Cheviot, and blackfaced wools. There was a very large attendance of manufacturers, staplers, and brokers from all the principal centres of the industry in England, and also a large attendance of buyers from the manufacturing districts in Scotland, and over all classes an animated demand was experienced. For all white wools a decided rise in price over last year's quotations was obtained. Ewes and half-bred were making an advance of from ¼d. to 1½d. per lb., and Cheviot was making a rise of as much as 1¾d. to 2½d. per lb. Blackfaced wool was also meeting a better demand, and prices were from ¼d. to ¾d. per lb. higher than the extreme rates which were obtained for this class last year. Blackfaced ewe was making from 7d. to 7¾d. per lb.; wedder, 7½d. to 8d.; hogg, 7¼d.; to 7¾d.; cross, 9d. to 9¼d.; cross hogg, 9¾d. to 10½d.; half-bred 10½d. to 10¾d.; Cheviot, 10½d. to 11½d.; Cheviot wedder, 11d.; Cheviot hogg, 10¾d. to 11¾d.; Shropshire, 10¾d.; South Down, 11d.; and Dorset, 10½d.

Salisbury.

At this wool fair 120,000 fleeces were pitched. The top price of washed was 14d.—last year 1s.; top price unwashed, 11d.—last year 9d. Washed wools ranged from 12½d. to 14d., unwashed 8¾d. to 11d., lambs' wool 8¾d. to 10½d. Trade was well up to the average of recent sales. There was a large attendance of buyers and keen competition.

Lincoln Show.

The annual three days' show of the Lincoln Agricultural Society was opened at Grantham on Wednesday. The sum offered in prizes reached close upon £1,500, and is distributed as follows:—Servants and labourers, £81; cattle, £204; sheep, £177; wool, £6; pigs, £86; horses, £618; Grantham and district and other special prizes, harness and jumping prizes, £32; butter, eggs, table poultry, etc., £18; poultry, £61; honey, hives, etc., £28; total £1,498, including £1,117 society's prizes and £381 specials. The entries, although in some instances below those of last year's show at Grimsby, were satisfactory, and altogether a splendid exhibition has been produced. Cattle numbered 141, as compared with 51 when the society last met at Grantham in 1895; the sheep 81, against 68 ten years ago; pigs 79, against 50; while the horse section also made a good show, the entries being slightly less than last year. There is a smaller show of poultry than usual, and a falling-off in the exhibits of butter and eggs.

Light Horses.

Hunters were first in the catalogue and they were allotted fifteen classes. The three winning brood mares were the same as at Peterborough, but their relative positions were changed, for Mr. A. J. Brown's Rosalinda, by Discord, came before Mr. F. B. Wilkinson's Glasspore. Mr. W. B. Swallow's (Ulceby) Tugela occupied her third Peterborough position. The foal prizes went to Messrs. Swallow, Brown, and Wilkinson in the order named. A double triumph was won by Mr. Swallow in the yearling class with Vigo and Red Morn. The winner made a good show in the ring, but, perhaps, the chestnut had more of the hunting character about him. Messrs. Adlington and Temple, of Sutton Manor, Retford, furnished the third prize-taker in Matchless, and Mr. Brown received the reserve ticket for Lady Vitèz, bred by Mr. R. Henston. Mr. Wilkinson's Destruction was a clear leader among the two-year-olds, beating an unnamed chestnut colt sent by Mr. James Rudkin, of Hanby, and Mr. Brown's Tipperary, a bay by The Wraith. The three-year-olds particularly excelled. Mr. Wilkinson's The Duchess, by Florismart, was first in a filly class at Islington, and second at the Royal, and it was expected that she would now be assigned one of those positions, but the judges ruled otherwise. Some authorities might have put Mr. J. H. Stokes's Henniker in the very forefront, instead of Mr. Brown's nice-looking First Whip, another bay of Mr. Henston's breeding. The Leicestershire chestnut stood second, with The Duchess third, and Messrs. W. and J. A. Cheney's Monarch reserve.

There were some grand movers in the saddle classes. The pick of the light weights turned up in Mr. Stokes's Knick Nack, a stylish chestnut by Knockabout; Messrs. Cheney's Money Spinner, a beautiful bay and a fine galloper; and Mr. Brown's chestnut, Loo, which was bred in Ireland. In the class for four-year-olds, up to 14 stones, Messrs. Cheney's Casual was an easy winner, and among the rest of the smart animals present were Mr. Stokes's Ebony and Mr. W. Gale's brown, second and third respectively.

Hackneys were a disappointing lot and few in number. Only seven stallions turned up. The county class supplied as the leader Mr. R. Sutcliffe's Beckingham Squire, which was recommended at Islington in the Spring. Garton Coin, an old winner, the property of Mr. J. Morton, of Downham Market, was second, third honours going to Mr. S. B. Carnley, of Alford. The couple of two-year-old stallions present were Mr. Alfred A. Haley's Hirwaun, by Rosador, and Sir Walter Gilbey's Dashing Duke, which won in the order named. The Peterborough judgment on the brood mares was confirmed, so far as it related to Rosadora, and Messrs. Cockayne's Paddock Queen. Third prize was rightly bestowed upon Berkeley Lady Helmsley, which hails from Gainsborough. Sir Walter Gilbey, Mr. Sutcliffe, and Messrs. Cockayne are the owners of the winning foals. In two and three-year-old fillies Sir Walter Gilbey was again to the fore, coming first with The Royal Favourite Mitre, by His Majesty, and Mr. Cattley's second with Norbury Psyche. Peaches in third Mr. G. E. Franklin's Grand Duchess Gobang. Mr. J. Round's Berkeley Claudius, and Mr. W. Foster's Mel Valley's Treasure.

Shire horses made a fair collection, and there

were several good classes. Aged stallions, as the result of a hard struggle, were headed by Mr. A. H. Clark, of Moulton Eaugate, Spalding, with Lockinge Harold, beating Mr. T. Harrison's Colour Sergeant. Two-year-old stallions suffered in comparison with the preceding class. The winner, Mr. J. W. Whitehurst's Special Brand, was, in some respects, disappointing. Sir Albert Muntz, M.P., was second with Dunsmore Albert Victor, which scored at the Bath and West Show, and Messrs Forshaw third with the big, slashing colt, Albion Magnate. For brood mares, Mr. Philo L. Mills, of Ruddington Hall, carried off the leading award with Hargate Bounce, which is of the real breeding type, Mr. W. Jackson, of Knottingley, being second with Enfield Poppy, which has perhaps better action than the Nottingham representative. The filly foal of Hargate Bounce repeated her Newark victory for Mr. Mills. Enfield Poppy's good-looking filly, by Knottingley Regent, which won at Doncaster, was second, and Messrs. Forshaw and Sons were third with their black colt by Lincoln Lion. Sir W. Cooke, of Wheatley Park, Doncaster, was represented in the two-year-old filly class by Folville Model, and this hard-legged and useful animal beat Mr. Jackson's Underwood Barbara. The three-year-old fillies included Messrs. Forshaw's Willow Holt Pansy, which, besides topping her class, won the Shire Horse Society's gold medal and the challenge cup.

Judges.

Shorthorn Cattle—Messrs. W. T. Garne, Aldsworth, Northleach, Gloucester; and J. Patton, Alnwick. Lincolnshire Red Shorthorn Cattle—Messrs. R. J. Epton, Northolme, Wainfleet; and John Goodale, Peakirk, Peterborough.

Sheep—Messrs. Robert Fisher, Leconfield, Beverley; and J. Brocklebank, Carlton-le-Moorland, Newark.

Pigs—Messrs. Tom Cartwright, Riseholme, Lincoln; and C. E. Duckering, Kirton-in-Lindsey.

Hunters—Messrs. Thomas Wickham Boynton, Burton Agnes Hall, Driffield; and James Hutchinson, Manthorpe Lodge, Grantham. Hackneys—Sir Gilbert Greenall, Walton Hall, Warrington; and Mr. James Hornsby, Laxton Park, Stamford.

Shires—Messrs. James Gould, Model Farm, Lymm; and Joseph Topham, Thorney, Peterborough.

Cattle.

There was a good muster in the cattle classes, though smaller than last year. Among Shorthorn bulls two years old or upwards the judges had to deal with a capital entry of ten exhibits, the class being headed by Mr. P. L. Mills's King Christian of Denmark, champion at the Bath and West of England show. The second, shown by Mr. Cooper, Lichfield, is a good bull with short legs and plenty of flesh. The third, Messrs. Dean's Imperial Favourite, was champion at the Peterborough show last week, but was outclassed here. Lord Calthorpe's Elvetham Monarch won first honours in the class for bulls over one and under two years old, and was placed second at Peterborough. The second, Mr. Steward's Ascott Star, showed good lines top and bottom. The third, Mr. Dudding's Royal Marksman, appeared to disadvantage, having been lamed in the journey. Lord Powis came to the front in the class for bull calves with a beautifully balanced young bull of true Shorthorn character and outline. In the county class Mr. Dudding won the Shorthorn Society's prize with a young bull from a famous sire which promises quality and substance.

Lord Powis again found favour with his Lady Sybil, where she was awarded a championship, and Mr. Dudding's Waterloo Princess 3rd was deservedly adjudged the leading winner in the class for two or three-year-old heifers, in milk or in calf, and in the succeeding class Mr. Haley, of Malton, Yorks, captured the two best prizes with a pair of choice little heifers in the pink of condition. Seven heifer calves under one year old entered the ring, and the first, Mr. F. Platt's Barnby Lady Venus showed up well after her Peterborough success.

Lincolnshire Red Shorthorns were well represented, Mr Freshney's Saltfleet Bonus, a bull of large scale and deep in colour, coming out at the top in the class for two year-olds or upwards, another good type bull, Weston Monarch, exhibited by Mr. S. Crawley, Hemington, Oundle, being second. Mr. Cartwright's Stenigot Bloom Boy was awarded the third prize, though some around the ring thought it deserving of a better position. There was a larger class of bulls, over one year and under two, a Royal winner, Messrs. Chatterton's Stenigot Gwynne, a very rich red, evenly fleshed, winning the first honours, while the same exhibitors were third with a second prize winner at the Park Royal. The entry of bull calves is small, but the exhibits are very promising. The female class, in milk or in calf, brought thirteen into the ring, and the lead was taken by Mr. E. H. Cartwright, of Louth, with Keddington Pearl, a cow of great scale, wide over the back, and with excellent coat. Captain E. M. Grantham, West Keal, with Keal Nancy, was an easy winner in the class for heifers over one and under two years, and the second, Mr. W. J. Atkinson's Ruby 14th, beat Mr. J. Todd's Kirby Nonpariel, a Royal winner. Mr. Atkinson followed up this success with a first with Stenigot Daisy XIV., a nice heifer of excellent quality. The class shown by occupiers not exceeding 500 acres made a very commendable collection, and the dairy cows also came out well, Mr. John Evens, of Burton, securing the three money prizes with grand reds, evidently great users.

The competition for the challenge cup for the best bull of any age caused no little difficulty, no less than seven judges being called into the ring before the decision was given. The last was Mr. Learner, whose vote was in favour of Mr. Freshney's bull, causing some disappointment to those who supported the entry of Mr. Mills.

Sheep.

An entry larger than last year represents the truly popular breed of Lincoln sheep, and here again exhibits which figured prominently at the Royal have captured some of the best awards. The classes were well filled all through, and the quality was of exceptional merit. In the shearling ram class this feature was particularly noticeable, and besides the prize-winners there were several very fine sheep, which with a few exceptions, were in wonderful condition. The ram lambs were of a superior stamp, displaying grand frames and giving promise of fine lustrous wool. In the class for shearling ewes the order of things seen at the Royal has been repeated, and Messrs. R. and W. Wright secured the champion cup, Messrs. Dean being placed reserve.

The wool section has brought out a larger entry than usual, but once more Mr. Dudding's excellent fleeces predominate.

Pigs.

The exhibits in this department came principally from the most prominent breeders in the country. The "Whites" were perhaps of the best merit, the judges speaking in high terms of the quality throughout. The champion prizes were secured by a "second" and a "reserve," other winners having already obtained this honour. The exhibitors included Sir Gilbert Greenall, G. T. Inman, D. R. Daybell, R. Knowles, and J. Jefferson.

Wickhambrook and South Suffolk.

The seventeenth annual show of the Wickhambrook and South Suffolk Association was held at Sudbury on Tuesday. As one of the conditions is that no first prize taken at the Royal or County Show of the year can compete, the "crack" winners elsewhere were of course excluded. The examples of the Shires coming into the ring were on the whole creditable to the district, many of them hailing from the Essex and Cambridgeshire country, Mr. F. W. Cottee, of the Stud Fram, Dedham, being responsible for a large entry in the various Shire classes.

The Suffolks showed up well, though there might, perhaps, have been more of them to advantage. Among a good class of mares with foal at foot, the famous Marguerite, belonging to Sir Cuthbert Quilter, Bart., M.P., won. There were some promising entries amongst the horse and filly foals, the Rev. Hy. Taylor scoring with a youngster by Court Fop, a well-known sire, a nice foal hailing from Bawdsey Manor being second. Mr. Robert Edgar sent a couple of choice yearlings from the noted stud at Cockfield, Cheerful Prince, by Cockfield Prince, second at the Royal, being placed first.

Hunters, if somewhat short in number, were excellent in quality all round, and it was a very good sort of mare indeed with which Mr. J. W. L. Whitehead, of Cambridge, took first prize, and her foal, by the Irish sire Ballymena, also adjudged the best, is a promising youngster.

The sheep classes were not well filled. Mr. Stockburn virtually swept the decks, being first and second for five shearling Suffolk ewes, with like distinctions for pens of five Suffolk ewe lambs, with the silver medal, presented by the Suffolk Sheep Society, and for Suffolk ram lambs, with another silver medal, the lambs being a very useful collection.

FODDER CROPS

ONE SHILLING. By Post, 1s. 1½d.

From the Publishers:

"MARK LANE EXPRESS" Office,

1, Essex Street, Strand, W.C.

The show of cattle was only a small one, though there were some choice cows, both in the horned and polled classes, Mr. W Jennings Mills being the principal exhibitor of the latter.

Northumberland.

The annual show of the Northumberland Agricultural Society was held at Berwick on Thursday. The aggregate entries showed an advance from 671 to 807. In the principal departments the totals were:—Cattle 140, sheep 301, horses 222, driving and leaping 30, dogs 24, poultry 106. The increase is mainly in sheep, other sections remaining at about the normal pitch.

Shorthorns were first in the catalogue and Mr. A. F. Nichol's big white bull, Baron Butterfly, in the class calved in or before 1902, was alone. With Famous Leader, a roan of his own breeding, first honours went to the Duke of Northumberland for bulls in the two-year-old class. The Gainford Hall roan was worthy of his second place. This bull was bred at the Royal Farms at Windsor, and is no doubt a remarkably good animal, though he did not appear to quite fill the eye in the way the Duke's bull did. With a first appearance in the showyard this season, Mr. Cruddas, of Haughton Castle, came third with Tarquin. Out of seven appearances last season, Tarquin had six first tickets. In the yearling class, Lord Polworth was first with a nice dark roan, British Renown, which was first at the Royal this year. Mr. Nichol's Bradford Butterfly, which was third, won the Shorthorn Society's prize for the best bull in the class entered in Coates' Herd Book, and two further specials given by the Duke of Northumberland. In the Shorthorn dairy cow in milk, Mr. C. Marshall won first and special. Ratcheugh Witch, shown by Mr. Bell, the noted Ratcheugh breeder, had a good win of first honours. She is not yet three years old. She was first and champion at Birkenhead this year, second at the Royal, first and champion at Peterborough, and yesterday her trophies included a special of £7 for the best cow or heifer belonging to a tenant farmer in the county of Northumberland. Mr. Harrison's Ursula Raglan, a cow with a great record, was second.

The half-dozen classes for Aberdeen-Angus cattle were distinguished by the presence of the well-known showyard bull, Pundit of Preston, and the heifer which was first and champion at the Royal. Mr. C. E. Hunter had two Royal winners in the female classes—Ruritania, a most successful two-year-old heifer, and Eyelid, which though only fifth at the Highland, was third at Park Royal last month. In the Galloway classes Mr. Robert Graham, of Twynholm, and Mr. Thomas Graham, of Dumfries, swept up all the chief awards.

A good representative lot of sheep were penned — Border Leicesters, Cheviots, black-faced, mountain, half-bred, and Oxford Downs. Mr. Thomas Winter, of Lotherton Park, Aberford, obtained several prizes for Border Leicesters, and Mr. John Robson, of Bellingham, did exceedingly well with Cheviots and the black-faced breed.

Among hunters the winning brood mare was Appletart, by Ascetic, entered by Messrs Mitchell, of Morpeth. Her record is a good one, and she added to it by securing the Hunter Improvement Society's gold medal. The same owners secured the leading trophy with a foal by Glory Smitten, showing some distinctive characteristic of the thoroughbred. Good Friday, another Morpeth horse, the property of Mr J. Angus, headed the three-year-old gelding class. Silver medals given by the Hunter Improvement Society were won by Mr. John Gray, of Warkworth, and Mr. J. R. Marshall of Belford. The winner of the Hackney Society's medal was a three-year-old chestnut filly by Brandling Hero, bred by Mr. Clayton, of Felling-on-Tyne, now owned by Mr. Charles Bulmer, of Beal. She was placed first in her class, with a gray mare by Nugget, entered by Mr. E. J. Brown, making a good second. In the pony section the chief winners were Mr. George Renwick, M.P., Mr. J. M. Clayton, Marton-in-Cleveland, and Mr. Andrew English, of Hexham.

Prominent among heavy horses were representatives of the Seaham Harbour Stud, which gave a very good account of themselves, among them Lady Newton, a brown mare, with a lot of strength and substance and good feet, a nice bay filly by the champion Clydesdale stallion Hiawatha, Silver Princess, which was second at the Royal last year, and Rosebud, a noted brood mare. Of the brood mares with foal at foot, one of the most successful was Lambton Maud, entered by the Earl of Durham. In the three year-old fillies, there was nothing so good as Mr. T. Seymour's Sunderland mare, Lady Gartly, and Messrs. T. Smith and Son, of Gateshead, secured first place among the two-year-olds with a bay son of Sir Royal Champion.

CATTLE.

SHORTHORNS.

Bulls, calved in or before the year 1904.—1 and special, A. F. Nichol, Bradford, Belford (Baron Butterfly).

Bulls, calved in the year 1905.—1, The Duke of Northumberland (Famous Leader); 2, George Harrison (Pioneer);

3, W. D. Cruddas (Tarquin).

Bulls, calved on or after January 1, 1904.—1, Lord Polwarth (British Renown); 2, George Harrison (Royal Ensign); 3 and special, F. Nichol (Bradford Butterfly).

For best Shorthorn dairy cow in milk.—1, C. Marshall, Broomhaugh, Reding Mill (Phantom 15th); 2, the Duke of Northumberland (Hope 4th).

Cows or heifers, calved in or before the year 1902.—1 and special, Wm Bell (Ratchcugh Witch); 2, George Harrison (Ursula Raglan); 3, Wm. Bell (Royal Waterloo Maid 9th).

Heifers, calved in the year 1903.—1, George Harrison (Dalmeny Rosemary); 2, George Harrison (Dalmeny Veronica 3rd); 3, Wm. Bell (Millicent's Pride).

Heifers, calved on or after January 1, 1904.—1, The Duke of Northumberland (Rose of Kent); 2, Wm. Bell (Belle of Alma); 3, the Duke of Northumberland (Lady Jane 20th).

ABERDEEN ANGUS.

Bulls, three years old and upwards.—1 and silver medal, Charles Perkins and Partners, Birtley, Co. Durham (Punch of Preston); 2, T. H. Bainbridge, Eshott Hall, Felton (Grouseycock).

Bulls, two years and under three years old.—1, T. H. Bainbridge (Idelamere); 2, Charles E. Hunter, Selaby, Gainford, Darlington (Velasquez).

Bulls, over one year and under two years old.—1, Seaton Delaval Coal Company, Limited (Wizard of Delaval); 2, G. W. Glahome, Cheswick, Beal, R.S.O. (Plunger of Benton).

Cows, three years and upwards.—1, Charles E. Hunter (Estimation); 2, Charles Perkins and Partners (Martha 2nd of Aldbar).

Heifers, two years and under three years old.—1 and special Charles E. Hunter (Rubitania); 2 Seaton Delaval Coal Company, Limited (Blue Blood of Delaval).

Heifers, under two years old.—1, Charles E. Hunter, Selaby (Eyelid); 2, T. H. Bainbridge (Elvena).

GALLOWAYS.

Bulls, any age.—1, Thomas Graham, Marchfield, Dumfries (Marchfield Stanley); 2, Robert Graham, Auchengassel Twynholm (Defiance).

Cows or heifers.—1, Robert Graham (Violet 3rd of Cally); 2, Thomas Graham (Lady Grace III.).

SHEEP.

BORDER LEICESTERS.

Rams, of any age above one shear.—1, Thomas Winter, Lotherton Park, Aberford, Leeds; 2, C. F. J. Thompson, Downham, Mindrum, S.O (Bowmont Lad); special, The Scremerston Coal Company, Limited, Berwick.

Shearling rams.—1 and champion prize, Thomas Clark, Oldhamstock Mains, Cockburnspath; 2, J. and J. R. C. Smith, Kelso; 3, Thomas Winter.

Pen of two tup lambs.—1, Chas. Scott, East Lilburn, Wooler, R.S.O.; 2, C. F. J. Thompson, Downham, Mindrum, S.O.

Pen of three ewes.—1, Thomas Winter; 2 and special, Chas. Scott.

Pen of three gimmers.—1, Thomas Clark; 2, Thomas Winter.

Pen of three ewe lambs.—1, C. F. J. Thompson; 2, Scremerston Coal Company, Limited.

CHEVIOT SHEEP.

Rams of any age above one shear.—1, Thomas Elliot; 2 and special, John Robson, Newton, Bellingham (Marshal Oyama); 3, J. R. C. Smith, Mowhaugh, Yetholm (Ambush).

Yearling rams.—1, J. R. C. Smith (John Knox); 2, Jacob Robson; 3, John Robson.

Pen of two tup lambs.—1, A. and Jas. K. Smith, Leaston, Upper Keith; 2, Jacob Robson.

Pen of three ewes.—1, A. and Jas. K. Smith; 2, John Robson; 3, Jacob Robson.

Pen of three gimmers.—1, J. R. C. Smith, Mowhaugh, Yetholm; 2, A. and Jas. K. Smith, Leaston, Upper Keith; 3, Jacob Robson, Byrness, Otterburn.

BLACK-FACED MOUNTAIN SHEEP.

Rams of any age above one shear.—1 and special, John Robson, Newton, Bellingham; 2, John Robson, Newton, Bellingham; 3, John Robson, Newton, Bellingham.

Shearling rams.—1, 2, and 3, John Robson.

Pen of two tup lambs.—1 and 2, John Robson.

Pen of three ewes.—1, Addison and Paisley, Tarset Hall, Bellingham; 2, John Robson; 3, Villar and Jackson, Mayshiel, Cranshaws, Duns.

Pen of three gimmers.—1, John Robson; 2, Villar and Jackson; 3, Addison and Paisley.

OXFORD DOWN SHEEP.

Pen of two tup lambs.—1, William Graham, Tughall, Chathill; 2, Anthony Frederick Nichol, Bradford, Belford; 3, George Ord, Field House, Lesbury.

Pen of three ewe lambs.—1, E. E. P. Taylor, Effington, Cornhill-on-Tweed; 2, George Ord, Field House Lesbury.

SWINE.

Sows of any breed.—1, R. and J. Armstrong, Spring Gardens, Berwick.

HORSES.

FOR AGRICULTURAL AND DRAUGHT PURPOSES.

Brood mares with foal at foot.—1, Seaham Harbour Stud, Limited, Seaham Harbour (Lady Newton); 2, the Earl of Durham, Lambton Castle (Lambton Maud); 3, St. Clair Cunningham, Hedderwick Hill, Dunbar (Lady Lochfergus).

Colt foals, the produce of and shown with a mare entered in class 46.—1, St. Clair Cunningham; 2, R. and J. Armstrong.

Filly foals the produce of and shown with a mare entered in class 46.—1, Seaham Harbour, Limited; 2, the Earl of Durham.

Brood mares in foal at the time of show.—1, Seaham Harbour Stud, Limited (Rosebud); 2, Ralph Holmes, Whitburn Moors, Sunderland (Lady Raffan); 3 and second special, W. R. Trotter, North Acomb, Stocksfield (Princess Robertina).

Geldings or mares, four years old and upwards, not exceeding 16.2 hands high, and suitable for agricultural purposes, confined to the County of Northumberland.—1, The Ashington Coal Company, Limited, Colliery Farms, Ashington (Prince); 2, J. G. and W. T. Mitchell, Ulgham Manor, Morpeth.

Geldings or mares, four years old and upwards, and exceeding 16.2 hands high, and suitable for dray purposes, confined to the County of Northumberland.—1, Fenwick Wilson, Marden, Whitley Bay; 2, W. R. Trotter, North Acomb, Stocksfield (Nancy).

Geldings, three years old. Special, Fenwick Wilson, Marden, Whitley Bay; 1, Matthew Templeton, Sandyknowe Kelso; 2, W. C. Bowe, Thorntonloch, Innerwick, East Lothian (Mace).

Fillies three years old.—1, Thomas Seymour, Hylton Castle Farm, Sunderland (Lady Gartly); 2, Seaham Harbour Stud, Limited, Seaham Harbour (Baroness).

Geldings, two years old.—1, Thos. Smith and Sons, Derwent Crook, Gateshead (Harry); 2, Wm. Graham, Tughall, Chathill.

Fillies, two years old.—1, Seaham Harbour Stud, Limited, Seaham Harbour (Silver Princess); 2 and special, Henry B. Howie, Fenwick Steads, Beal.

Colts or geldings, one year old.—1, Lord Polwarth, Mertoun House, St Boswells (Border Scott); 2, Robert Forsyth, Newsmailholm, Kelso.

Fillies, one year old.—1, Francis Elliot, Middlerigs, Duns; 2, St. Clair Cunningham, Hedderwick Hill Dunbar (Minnie WaWa); 3, Ralph Holmes, Whitburn Moors, Sunderland.

HUNTING CLASSES.

Brood mares, for breeding hunters, with foal at foot or in foal at the time of show.—1 and Society's gold medal, J. G. and W. T. Mitchell, Ulgham Manor, Morpeth (Appletart); 2, Jacob W. Annett, Togston, Acklington (Lady Grey); 3, David Deuchar, Low Buston, Warkworth (Laughing Girl).

Colt or filly foals, the produce of and shown with a mate entered in class 58.—1, J. G. and W. T. Mitchell, Ulgham Manor, Morpeth; 2, Andrew Rutherford, Brokenheugh, Haydon Bridge.

Geldings, three years old.—1, John Angus, Whitfield, Morpeth (Good Friday); 2, John P. Rand Westnewton, Alnwick (Snow King).

Fillies, three years old.—1, Thomas Calder, Swinton Hill, Coldstream; 2, Captain J. R. Carr-Ellison, Hedgeley, Alnwick (Hoped for).

Geldings, two years old.—1 and second special, David Deuchar, Low Buston, Warkworth (Gay Lad); 2, J. L. Greig, Eccles, Kelso (Gilrod).

Fillies, two years old.—1, J. R. Marshall, Chatton Park, Belford; 2, Captain J. R. Carr-Ellison, Hedgeley Alnwick (Forester).

Colts or geldings, one year old.—1, first special and silver medal, John Gray, South Side Farm, Warkworth (Sir Roger); 2, David Deuchar, Low Buston, Warkworth.

HUNTERS.

Hunters, mares, or geldings, five years old and under ten years old, equal to carry from 12 to 13½ stones with hounds.—1 and special, Robert Emmerson, Corbridge-on-Tyne (David); 2, Thos. and Hy. Ward, Pinchinthorpe.

Hunters, mares, or geldings, five years old and under ten years old, equal to carry above 13½ stones with hounds.—1, T. and H. Ward, Pinchinthorpe; 2, Saville Clayton, Chesters, Hunshaugh (Cæsar); 3, Saville Clayton, Chesters, Hunshaugh (Top Thorn).

Hunters, mares, or geldings, four years old.—1, T. and H. Ward Pinchinthorpe (Ireland); 2, Robert Henderson, Mount Hooly, Jedburgh (Hermit); 3, W. H. Dodds, Benwell Hill, Newcastle-on-Tyne.

HACKNEYS.

Hackney mares, with foal at foot or in foal.—1, Thomas Boddy, Glenton Hall, West Auckland (Dewdrop); 2, T. W. Elliott, The Cottage, Monkseaton (Lady Spider).

Colt or filly foals the produce of and shown with a mare entered in Class 69.—1 Thomas Boddy, Glenton Hall, West Auckland; 2, T. W. Elliott, The Cottage, Monkseaton.

Hackneys, geldings, or fillies, three years old.—1 and silver medal, Charles Bulmer, Berrington House, Beal (Lady Brandling); 2 Eustace J. Brown, Ancroft, Beal, R.S.O. (Harmony).

Hackneys, geldings, or fillies, two years old.—1, Thomas Boddy, Glenton Hall West Auckland (Whitewall Swell); 2, Eustace J. Brown, Ancroft, Beal, R.S.O.

Hackneys, colts, geldings, or fillies, one year old.—1, Eustace J. Brown, Ancroft, Beal; 2, A. Davidson, Berrington Law, Beal.

Hackneys, mares, or geldings, exceeding 14 hands high and not exceeding 15 hands high.—1, Thomas Boddy, Glenton Hall, West Auckland (Woodhatch Connaught Queen); 2, R. Clayton, Clayton House, Felling-on-Tyne (Carnation Tit).

PONIES.

Ponies, mares, or geldings, exceeding 13 hands high and not exceeding 14 hands high.—1, John M. Clayton, Gunnergate Pony Stud, Martin-in-Cleveland, Middlesbrough (Who's Who); 2, R. T. Murray, 2, Azalea Avenue, Sunderland (Brag).

Ponies, horses, or mares, exceeding 12 hands high and not exceeding 13 hands high.—1, Andrew English, Acomb, Hexham (Little Prim); 2, Mr. George Renwick, M.P., Springhill, Morpeth (Lord Chesham).

Ponies, horses, or mares, not exceeding 12 hands high.—1, John M. Clayton, Gunnergate Pony Stud, Martin-in-Cleveland, Middlesbrough (Gunnergate Cavalier); 2, Mr. George Renwick, M.P., Springhill, Morpeth (Springhill Ladysmith).

HARNESS CLASSES.

Single harness, geldings or mares, over 15 hands high.—1, Charles Bulmer, Berrington House, Beal (Lady Brandling); 2, Andrew Ames, Chatton, Belford (Hector).

Single harness, geldings or mares, 14 hands high and not exceeding 15 hands high.—1, Thomas Boddy, Glenton Hall, West Auckland (Woodhatch Connaught Queen); 2, R. Clayton, Clayton House, Felling-on-Tyne (Carnation Tit).

Single harness, geldings or mares under 14 hands high.—1, John M. Clayton, Gunnergate Pony Stud, Martin-in-Cleveland (Beauty); 2, R. T. Murray, 2, Azalea Avenue, Sunderland (Brag).

The Highland Show.

The financial result of the last show of the Highland and Agricultural Society, held at Glasgow the week before last, compares well with many previous exhibitions.

The following table shows the total drawings at all shows since 1897:—

		Total. £	s.	d.
1897	Glasgow	4,368	14	0
1898	Kelso	2,191	16	8
1899	Edinburgh ...	10,222	11	0
1900	Stirling	4,287	16	9
1901	Inverness	2 472	6	7
1902	Aberdeen	4,413	12	4
1903	Dumfries	2,922	9	7
1904	Perth	4,390	1	8
1905	Glasgow	4,453	18	1

Driffield and East Riding.

The annual show of the Driffield and East Riding Agricultural Society took place on Friday, and was one of the best ever held by this body. The five cattle classes were filled with Shorthorns, mostly of a very nice type. The winning bull calf, a son of Royal Emperor of Oxford 4th, is a really promising youngster, and Mr. E. Jackson's heifer calf, Lady Matilda 5th, sired by Atwick Duke, also made a good show.

In the sheep section Lincolns were more numerous than Leicesters. Mr. J. C. B. Dixon had the larger share of honours in one case, and Mr. E. F. Jordan in the other.

The Horse Classes.

Hunters formed about one-third of the total horses shown, and were of excellent quality. The brood mares were notable in that nearly every animal in the class possessing good points worthy of commendation. The section of Mr. Heal's bay, Faithful, was thus the more to her credit. The yearlings, too, were an exceptionally attractive lot, headed as they were by Mr. William Boynton's chestnut gelding, sired by Not Out, winner also of the Hunters' Improvement Society's silver medal.

With Hackneys, the largest group shown was that of foals, Mr. Buttle's Rosador fillies again coming right to the front. In the yearling class, however, the Pocklington decision was reversed, Mr. W. T. G. Young's colt being in more like form this time. The Hackney Horse Society's silver medal went to Mr. Buttle's two-year-old Boguhan Sunrise.

The agricultural horse classes were rather thinly filled. Messrs. Davison's fine upstanding mare Teemside Mettle carried off the Shire Horse Society's silver medal.

Judges on the Royal Dublin Horse Show.

We would remind intending exhibitors at the above show that the entries for horses close as follows, viz.:—On single fees, Thursday, July 20; and on double fees, Thursday, July 27.

The prize money offered for competition amounts to the sum of £2,369, and is exclusive of cups, special prizes, medals, etc., to the value of £865. The total prizes to be awarded at the show therefore exceed £3,200.

The following have agreed to officiate as judges, viz.:—

THOROUGHBRED STALLIONS.—Major McKie, D.S.O., Ernespie, Castle Douglas, N.B.; J. L. Nickison, Hinton Manor, Swindon.

THOROUGHBRED BROOD MARES, FOALS, AND YEARLINGS. Not yet appointed.

HUNTER BROOD MARES AND FOALS.—J. S. Nickson, Hinton Manor, Swindon.

HUNTERS, AND YOUNG HORSES SUITABLE FOR HUNTERS.—Charles J. Cunningham, Weeden, Ayles, N.B.; George Gordon Wincombe Park, Shaftesbury, Dorset; Gerald H. Hardy, Foston Hall, Derby; Frederick R. Hill, Marsh Brook House, Church Stretton; W. L. Lamb arde, Bradbourne Hall, Sevenoaks; Charles McNeill, Broadway, Worcestershire; Thomas Wickham-Boynton, Burton Agnes Hall, Driffield.

RIDING COBS AND PONIES.—Brigadier General M. F. Rimington, C.B., Curragh Camp.

HARNESS HORSES.—Arthur E. Evans, Bronwylfa, Wrexham; William Foster, Mel Valley, Moseley, Worcestershire.

BORDER LEICESTER SHEEP. — John H. Laurie, Hardens, Duns, N.B.

ROSCOMMON SHEEP.—James McCULLAGH, Glaslough, Co. Monaghan.

LINCOLN SHEEP.—Charles Clarke, Brookside, Scopwick, Lincoln.

BLACKFACED AND CHEVIOTS.—Robert M. Buchanan, Lettre, Killeuon, N.B.

SHROPSHIRES.—Frank Webb, Estate Office, Shenstone, Lichfield.

OXFORD DOWNS, SOUTH DOWNS, AND SUFFOLKS.—George Adams, Wadley House, Faringdon, Berks.

GOATS.—P. Clune, Albert Agricultural College, Glasnevin.

Prize lists, entry forms, etc., will be sent on application to the Agricultural Superintendent, Leinster House, Dublin.

Dairy Classes in East Suffolk.

The first of a series of dairy classes, arranged by the East Suffolk Education Committee, was commenced at the Dairy Farm, Aspal, on Thursday afternoon. This farm is situated in the parishes of Aspal, Thorndon, and Wetheringsett, and is one of those occupied by the Eastern Counties' Dairy Institute, a choice herd of cows being kept there in connection with this business. A spacious barn has been placed at the disposal of the class, and the teacher engaged is Miss Mabel Smith. The class is carried on as an evening school, under the Board of Education Code, otherwise it differed very slightly from those that have been carried on so long by the Dairy Institute.

Mr. W. Short, County Councillor, and a member of the Education Committee, opened the proceedings on Thursday with an appropriate speech and some reminiscences of his dairy experiences many years ago. He also expressed his pleasure at meeting so many students anxious to adopt modern methods.—In thanking Mr. Short for his address, Mr. Smith said it was undoubtedly true that by improved methods elsewhere the industry had been diverted, but with the advent of the new railway and new ideas, the district might again become successful in dairying. He mentioned that one farmer's wife declined to attend the class because she had already received similar instruction several years ago, and was regularly sending her make of 80 lb. of butter per week to London. This was important testimony to the value of the classes already held.—The next class is arranged to be held at Eye, and the entries are already complete.

Agriculture in Holland.

VI.*

Co-operative Creameries in Friesland.

Leeuwarden is the chief town in Friesland, and situated in the most fertile part of this province. In consequence of its central situation at the junction of the principal roads and railways it is the centre for all business in connection with agriculture, cattle breeding, and dairying. This is clearly shown on market days, and more especially at the cattle market. Although the best cattle are sold at the farms, the cattle market can give a fair idea of the importance of cattle breeding in Friesland. The present cattle market was erected in 1874. In 1875 the number of cattle (all included) bought in the market was 104,756, of which 11,404 were milch cows. In 1893 the number of cattle amounted to 154.801, of which 41,368 were milch cows. When in 1894 the import of cattle in Germany was prohibited, the number of milch cows decreased to 28,010, and in 1904 the total number of cattle had again increased to 205,050, with 40,121 milch cows. The pigs and sheep are mostly killed for the London market.

As regards co-operative creameries, the first steam creamery in Friesland was established in the village of Warga. Creameries from that date increased on a large scale. Nearly all co-operative creameries manufacture butter as well as cheese; in a single place only is there a smaller creamery manufacturing butter exclusively. The cow-keepers, whose concern was to keep their co-operative creamery going, have paid attention from the beginning to the improvement of the quality of butter and cheese. The small, unequal lots of butter from the different farms are now replaced by the larger amounts from the creameries. This fact, together with the improved quality, has allowed Dutch butter to regain part of its reputation.

In order to take care of the common interests, and to contend with the common enemy, a society of those interested in the manufacture of butter and cheese on a co-operative basis was established in 1894, the members of which are mainly directors and managers of co-operative creameries. In 1897 it was dissolved, and in its stead was established an "Association of Co-operative Creameries in Friesland." The association started with forty-three members, and has at present sixty five. According to Article I of its by laws, the association has for its purpose the promotion of the interests of co-operative creameries, and the following provisions are made.

(1) Co-operation and mutual advice in all matters able to further an advantageous working of the creameries. (2) To promote the reputation and the sale of dairy produce in the Netherlands and abroad. (3) To regularly test dairy produce. (4) To deposit a trade mark for common use. (5) The purchasing of the materials wanted for the making of butter and cheese. (6) To detect and to contend with adulterations of dairy produce and fraudulent practices in the butter and cheese trade. (7) To further regular and good dispatch-other societies, where beneficial to co-operative ing of dairy produce. (8) To co-operate with dairying. (9) To control the mangement of co-operative creameries. (10) To give the opportunity to get certificates of abilities for the various situations in creameries.

The trade mark "Nedraw" of the above-named society has been transferred to the association. It is now legally protected in the most important countries. As the Government mark on butter has given to all honest butter producers and traders a strong weapon against unfair competition, the association has furthered as much as possible the use of this Government mark. With the exception of two, all the association's creameries are under control, and have the Government mark on the butter. A regulation has been made, according to which, in case the creamery, in consequence of fire, repair, etc., is not in a condition to work the milk, the surrounding creameries have to assist by taking to work the milk, either wholly or partly.

When co-operative creameries are being established, the Federation assists as much as possible by referring to the advantages of co-operative dairying, and mainly to those of large creameries, in order to obviate in this way the establishment of too small creameries. The association has drawn up a model instruction for the staff of the creameries, the stipulations of which have made the condition of the workman very favourable. Before the insurance against accidents was enforced by law, the association had entered into an advantageous contract with an insurance company, by which all the workmen were insured.

At present the workmen are fully insured against accidents during their business hours, and a mutual insurance against accidents when they are not at work has been established. Neither did the association lose sight of the benefits of instruction to the staff. A teacher has now been engaged, who keeps class-lessons in winter concerning the first theoretical principles of the butter and cheese making.

The association has taken to heart the improving of the productions by introducing butter and cheese tests. The first are held twice a year, the sample of the various creameries being tested then by two experts, and the results communicated to all the creameries. After each third test, the butter which has been sent in is exhibited, and the score made is published. At the end of the year, diplomas are awarded to those creameries, the butter of which has excelled by good quality.

Cheese is put to the test twice a year, and these tests are arranged correspondingly; the nature of the products, of course, different arrangements, and, as a rule, the tests of butter and cheese, have exerted a favourable influence on the products. To the efforts of the association it is due that the steamers from Harlingen to England, and the railway carriage to Belgium and France, are supplied in summer with refrigerative accommodation, which guarantees the butter arriving in good condition.

The association experiments on various subjects in order to assist in solving practical questions within the sphere of making butter and cheese. The following may be mentioned here:—Experiments on the intense refrigeration of cream; on the influence of early stabling of the milch cows; on the amount of volatile acids in butter; on the connection between the fat property of the milk and the fat property of the solids in the cheese which has been obtained, and the relation between the amount of fat in the milk and the quantity of butter and cheese which can be made out of it.

The Frisian Co-operative Company for exportation of milk products has for its purpose the sale of products of co-operative creameries which have joined the society, and to improve the quality of these products. In order to attain this end the society commenced by having its trade mark protected in order to supply all its productions with that mark, which could be recognised on the different markets as its production.

To ensure good quality, every week each creamery sends samples, and these are examined by experts, who certify the quality. One sample is examined as to the amount of water, which also influences the price to be paid. The maximum percentage of water allowed is 15 per cent. for salted and 15½ per cent. for unsalted (fresh) butter. The society was established in 1898 with six creameries, while at present 23 large creameries have joined. The sale proportionally increased very much, and amounted during last year, for butter only, to 56,611 cwt.

Only those creameries are allowed to join the society in the Province of Friesland, and having at the same time constructed their creameries so that first-rate products can with certainty be manufactured.

The Frisian Co-operative Company for Export of Milk Products also undertakes the sale of the different species of cheese which are made in the joined creameries, the cheese being tested at regular intervals to promote the uniformity of shape and quality.

The Cattle Market at Leeuwarden.

It will be seen that many of the cows have pieces of canvas or sacks on their backs. This is to protect them from the frost when first turned out in the spring.

Condensed Milk.

The "Hollandia" Anglo-Dutch Milk and Food Company is a limited company, with factories at Vlaardingen, Bolsward, Purmerend, Heenvliet, Beemster, Limmen, and Gorinchem. The head office is at Vlaardingen, and occupies itself with a preparation of milk products and other articles of food. Its specialities are sweetened and unsweetened condensed milk, creamery butter, cheese, sugar of milk, beet sugar, and the refining of that sugar.

In the milk factories at Vlaardingen, Bolsward, and Purmerend it is mostly condensed milk and butter; but Bolsward also makes Gouda and Derby cheese. At Vlaardingen sugar of milk is made from time to time. The factories at Heenvliet, Beemster, and Limmen are in the first place collecting stations for fresh milk—Limmen exclusively—whilst Heenvliet is also creamery, and Beemster cheese factory. In the "Hollandia" milk factories, 39,694,427 litres, equal to 69,884,355 pints, were received in 1904, and worked into marketable articles for the Dutch and English trade, as well as for export.

The sugar factory at Gorinchem, with a capacity of 1,000 tons of beets per day, makes the raw sugar in the autumn—partly for the company's own refinery at Vlaardingen and partly for the general market. The factory alone is, of course, already a large industrial enterprise. In the refinery at Vlaardingen 400 tons of brown, ill-tasting raw sugar are weekly refined into pure, well-flavoured crystal sugar, which is mainly destined to be melted in the milk factories and worked into the sweetened condensed milk. The company works over the whole of Holland, and has its own warehouses of sugar, and own shops for milk products in the principal towns.

In souring the cream pure cultures are largely used. Of course, in the hand-power creameries, it is not possible to work entirely according to the newest methods, and with the most up-to-date machinery. This is only possible where steam power is available, yet there exists a number of such establishments which turn out a very good article. This may be attributed, amongst other causes, to the careful manipulation and to the scrupulous cleanliness which is observed.

It is, indeed, a pleasure, both to the expert and others who may take an interest in this trade, to go the round of many of our steam and also hand power creameries, and to observe everywhere with what painstaking care every article is cleansed and purified, how fresh and pure is the air which blows through the works, and how everything which can be rubbed and polished shines in the old fashion of the Netherlands, showing how well it is understood that to make good butter cleanliness in every way is of the very first importance.

Home Notes.

Our Foreign Trade.

The Board of Trade returns for June show a remarkable falling off in the imports of hops. America has sent us only 458 cwts., and from other countries we have received only 1,063 cwts. during the month. The total is 960 cwts. less than the corresponding month of 1904. The outward movement reported proves the correctness of statements made as to the reshipment of alien produce, as exports of this class in June amount to 1,315 cwts., against 32 cwts. in June last year. We have also exported 534 cwts. of English growth, so that we shipped last month 328 cwts. more than we received. A comparison of the six months ending June 30, 1904 and 1905, also shows very striking results. The first period gives imports 95,776 cwts., exports 10,494 cwts, balance against our market 85,282 cwts. During the past six months the figures are:—Imports 32,286 cwts., exports 10,607 cwts., balance against us only 21,679 cwts., or less than one fourth of the net supply of twelve months ago. The exports of foreign hops for the six months just passed were 6,102 cwts., against 2,660 cwts. in the same period of 1904.

Plantation Reports.

There is no question that the glorious summer we are enjoying may safely be described as "hop growing weather," and this is confirmed by the various details of information received from those who are best fitted to pronounce upon the condition of the bine and the prospects of the crop. There is scarcely an exception to the favourable outlook. The bine has grown vigorously, the laterals are developing with rapidity and strength, and in many places the appearance of burr indicates the probabilty of an exceptionally early crop. The danger of too much luxuriance is, however, detected in the running of mould in some places, necessitating the use of the sulphurator; and there are still, here and there, some fly and lice lingering upon the foliage, sufficient to induce many growers to think that we are not yet "out of the wood." To make room for a free current of air, many grounds are being stripped of the lower leaves mere freely than usual. But while present appearances are generally so promising, it cannot be forgotten that in former years our hopes have been not infrequently disappointed. Hurricanes, hailstorms, and other climatic troubles are not unknown in July and August.

The fateful day of St. James has not yet passed, and the old saying with respect to the hop crop is not absent from our minds, and, if we could look into the inner thoughts of most planters, I think we should find there a lurking desire that the yield may only be moderate in quantity albeit first-class as to quality. The remainder of the season will, however, settle these questions for us, and the settling day is not far off. Meanwhile we must be content to leave the issue in the hands of

all-powerful nature, whose influence is immeasurably greater than all our calculations or desires.

The Borough

occupies the last place in my remarks this week, as it has hardly any position to call its own, being completely under the control of the country reports. But there are more inquiries for hops floating about, and buyers seem not only willing but desirous to operate if (and what force there is in this little word) they can find openings at lower prices. They are bidding less, and, in some few instances, their bids are accepted, but the firmness of the Syndicate prevents any appearance of "slump," and encouraged thereby, most outside holders are still firm in their demands. They are willing to sell, but not willing to sacrifice.

Hop Report.

VALLEY OF THE MEDWAY (July 15).—The bine has grown a good deal lately, but there is still vermin hanging about, and we are not yet sure we shall not have black cones later on. There being so much bine it is difficult to wash them clean. In some of the grounds there is a good deal of mould on the leaf, and should we get a spell of wet weather no one can tell if it will run.

Foreign Notes.

America.

Recent intelligence from the other side generally confirms the tendency of previous reports. A cable message this week states that some of the hops included in the Oregon pool are now being offered at reduced prices, and from a letter, dated June 29, I extract the following:—"The weather in the United States has been ideal for growing crops. Heavy rains in all sections, followed by bright, warm days, have stimulated a remarkable vigorous growth. Every indication points to a record crop this year. The present prospects of a good yield here, together with the excellent reports from abroad, have depressed prices, both for 1904's and 1905's. The market for 1904 hops is flat. There is a lack of demand even at the low prices now practicable. A sale was made yesterday in Oregon of 150 bales of fair quality at 17 cents to holder. We hear that some of the Oregon pool hops are being offered at 19 cents, with no takers. Our personal opinion is that those who have been fighting for the depression of the price of 1904 hops have won their fight." On the other hand, I am aware that some of the largest holders in the pool refuse to acknowledge defeat, and are still confident that a reaction is possible. It is often the case in actual warfare that the final issue turns upon an apparent trifle, and there are many cases in which victory has been snatched at the last moment out of the jaws of a "debacle" by the bravery of a compartively small body of men. Thus it is possible that depression may yet be replaced by elation, and the policy of those who still are hoping and holding is worthy of all praise.

Nuremberg.

The extreme heat (far in excess of recent English experience), although stimulating to the growth of the vine, is now, by reason of its uninterrupted continuance, causing some anxiety to growers, who are wondering whether the soil contains sufficient moisture to enable the plants to mature. Rain is most urgently required, and if it should be withheld, the lively expectations of a full yield will doubtless be disappointed. The risks that are dependent upon the climatic conditions of the next few weeks are evident to all, therefore the market is not depressed, but generally maintains its recent firmness. I hear of a sale of Tettnang hops of moderate quality being

effected this week at 185s., and the general range of quotations are fully equal to those of the previous week. Here and there some smaller lots, pressed for sale by country holders, who are needing money, have changed hands at 5s. to 10s. reduction; but the trade, as a whole, controlled by merchants, has not been effected thereby. Small sample parcels of new crop have arrived and been sold at 2s. 6d. per lb.

Alsace.

A large part of the hop districts has been devastated by a violent hurricane. It is estimated that at least 70,000 hop-poles have been thrown to the ground, and several plantations are irretrievably ruined.

POULTRY.

Present Day Work in the Poultry Yard.

At last the summer has come, and poultry-keepers are busy sorting over their young birds which represent their work during the months which have passed. In many cases the hatching results have been excellent, and the prices realised for the young cockerels which have been culled out and fattened for market have been better than in any preceding year. Poultry-keepers generally report that they have had every reason to be satisfied with their results this year, and the prices for eggs and birds have been better than before. Those who have broods coming on should give them careful attention, in order that they may have every chance. Summer chickens frequently die off for the want of the exercise of care in little details.

The reason why so many die is because they are not sheltered from the sun. If no natural shelter can be found, then artificial shade must be provided. We have in previous numbers referred to this question frequently, but still find it does not receive the necessary attention from poultry-keepers.

It is a mistake to attempt to rear chickens on rough sandy ground in the summer months. This ground can be used in the winter and spring, but when the weather is hot the sand holds the heat, and any chickens placed on it are nearly scorched up, and suffer from the heat and die off.

Numbers of chickens have died from the effects of great ticks which have fastened on their heads or other parts of the body, and drawn all the strength from the birds. The owners have been much puzzled by the deaths of their birds, as the feeding and general management has been just the same as in previous years, but the birds have died off from no apparent cause. Young turkeys have died in the same way.

We consider it absolutely necessary to handle the birds every week, and carefully examine them by looking into the flesh to see if it is perfectly clear of insects and ticks, and if any are found, immediate steps should be taken to get rid of them, as otherwise the birds will not thrive, and the weakest will die off.

Insect powder should be plentifully sprinkled over the birds to kill the insects, and for the nits an ointment should be made of equal parts of lard and precipitate powder, and well rubbed into the parts where the nits are found.

Fresh water, placed in a cool place, should be given to all the birds once a day. In the hot weather, rice is an excellent thing both for the fowls and chickens. It can be boiled one day, and given dry the next, to provide variety. It prevents diarrhœa and the tendency to feverish conditions so prevalent in the hot weather. Maize and barley should not be purchased at all now, wheat being the best grain, varied by feeds of good oats.

As fowls do not care for oats as well as for wheat, it is always well to give the grains separately. Care in feeding is advisable, as many poultry-keepers waste more food than their fowls eat. This is a serious loss, and should be avoided The proper way to feed is to throw only a small quantity of food down at first, and then as soon as it has been eaten a little more, and so on.

When the weather is dry, we always prefer to throw the food on the ground, so that the birds are scattered about the run, and not all close together at one or two troughs. They can then be watched individually, and any bird which does not show the usual appetite can be caught and examined, to ascertain the cause of its loss of desire for food. In the hot weather the birds will not eat nearly as much as at other times, but it is necessary that they should have a sufficient quantity to keep them going on, as there is always a waste in their systems to be made good, as well as a demand from the egg organs for material to keep them going.

An ample supply of green food is necessary in the hot weather. Those who have gardens will have no difficulty in supplying this. It is well, even when there is plenty, to give it to the birds in small quantities, so that it is eaten while crisp and fresh, as when a lot is thrown down at once it soon becomes tough and stringy, and the birds frequently peck at it just for occupation, and a stoppage has frequently been caused in this way. It should be thrown down in the shadiest part of the run, and the supply replenished, removing the stems, etc., as frequently as required. It is important that chickens of different ages be separated, so that they may all have every opportunity given to them of growing as fast as possible.

The fowl-houses should be carefully examined now, as vermin breed quickly in the hot weather, and it is particularly necessary that the nest boxes be looked after, as nothing can be worse for birds than to have to lay in nests which are infested with vermin. They are not only worried in this way, but are injured, and birds which have many insects on them lose strength fast and die. Should an egg be broken in the nest the shell and contents should be removed at once, as nothing causes vermin to collect more quickly than this. When sufficient eggs have been set, the male birds should be removed from the hens, as it is usual to store some eggs for autumn and winter use when they are plentiful, and this cannot be done successfully unless the eggs are unimpregnated.

There is an advantage gained, too, by this plan, as the male birds are found in better condition for killing when it is necessary to do this—as their legs when they are breeding go dark, and make them unsightly.

To store eggs, we have found the shelves with holes bored in them, in which the small ends of the eggs are placed, a great success. The holes should be different sizes to allow for eggs of different dimensions—and the eggs should be placed on the shelves as soon as possible after being laid. If allowed to remain on their sides for some time the experiment will not be a success.

TWO SHILLINGS. By post, 2/3.
From the Publishers,
"FARM FIELD & FIRESIDE,"
1, ESSEX STREET, STRAND, W.C.

Unmated hens and pullets in healthy condition should always be selected for the purpose of laying eggs for storing, as those eggs which have germs in them do not keep nearly as well. A cool cellar is a good place to store eggs in. We have kept eggs for five and six months stored in the manner described, and when they have been used it was not possible to distinguish them from fresh eggs.

Contrary to the other methods adopted, we have never yet heard of anyone who has carried out our advice in this matter being disappointed with the result. We were the first to advocate this plan, and have been well pleased with its success.

The best material for the egg boxes is dry road dust. Finely sifted ashes, or sand, may be substituted if the road dust is unobtainable. Now that the roads are dry, those who live in the country would do well to collect a good supply of road dust, and make a heap of it in some corner or other, so that the covered runs may be replenished in the autumn, this making excellent scratching material for the birds.

Some poultry-keepers use it also in their houses for the summer months, but it is not such a success as the moss peat, which entirely absorbs the excrements, and prevents the possibility of a smell in the houses.

The perches should be movable in all the fowl-houses, just dropped into sockets, and during the summer months the ends require to be dipped in paraffin once a month to prevent any collection of insects in the wood.

Chickens are very fond of dusting themselves. When they are kept on grass runs they are not able to do this, unless some provision is made for them. It is a good plan to cut out a large square of turf, so that they may use the loose earth for this purpose. We are very glad to see that the mustard growers in Lincolnshire have now adopted the plan we have advocated for several years, of using the fowls and chickens to eat the mustard bug, which has proved such a drawback to them, by turning the birds out into the fields.

Agriculture in Brazil.

H.M. Consul-General at Rio de Janeiro (Mr. Rhind) has forwarded to the Commercial Intelligence Branch of the Board of Trade copies of decrees promulgated by the Government of the State of Rio de Janeiro, with the object of encouraging the development of agricultural and dairy industries within that State, and they are as follows:—(1) Providing for the establishment of a Public School of Agriculture, with lands for practical experiments in agriculture and grape-growing. (2) Providing for practical instruction on pupils' own lands, by travelling instructors, in ploughing and the use of agricultural implements, machinery, and instruments of all kinds. (3) Establishing a prize of 2,000 dol. for the ham curers who, during the year following upon June 1, 1905, shall produce a quantity exceeding 3,000 kilos.

On Thursday, John Thomas Scott, farmer, of Cushet Leazes, near Edmondlyers, and Thomas Howdon, Hogg Farm, near Durham, were ordered to pay reduced costs for an offence under the Diseases of Animals Act. Mr. Scott, it was stated, had his sheep dipped in accordance with the Board of Trade regulations, and sold twenty-five blackfaced sheep to Mr. Howdon. Instead of taking them home, Mr. Howdon had the animals sold at the Lanchester Auction Mart. In taking them to the Mart he traversed an infected area, and this constituted the offence. The magistrates imposed the lowest possible punishment, believing that the orders under the Act are not sufficiently published amongst farmers.

RAILWAY ANNOUNCEMENT.

LONDON AND NORTH WESTERN RAILWAY.

ROYAL LANCASHIRE AGRICULTURAL SOCIETY'S SHOW,
LIVERPOOL,
AUGUST 3rd, 4th, 5th and 7th, 1905.

The London and North Western Railway Company has extensive accommodation at Liverpool for dealing with Live Stock, Implements, and Merchandise traffic passing to and from the Royal Lancashire Agricultural Society's Show, to be held at Liverpool 3rd to 7th proximo.

Live Stock will be dealt with at Stanley Station, where the Company has extensive Horse and Carriage Landings, Cattle Docks, and every facility for dealing expeditiously with such traffic.

General exhibits and other merchandise will be unloaded at Rathbone Road Station, but small consignments will be dealt with at Edge Hill Station, where the Company has a large number of carts and every accommodation for quick delivery.

Passenger traffic such as Poultry, Dogs, small parcels, &c., will be dealt with at Waverttree Station, while Carriages and Horses can be unloaded at either Edge Hill or Mossley Hill Stations, according to the requirements of the senders.

All information may be obtained from Chief Goods Manager, Euston Station, London, or from District Goods Manager, Waterloo Station, Liverpool.

The Company will have an office and representative on the Show Ground to give information.

Sefton Park is the nearest Passenger Station to the Show Ground, and a frequent service of trains will be run to meet the requirement of passengers.

Forward Merchandise, Live Stock, &c., to and from the Show by the Company's route, care being taken to clearly consign the exhibits "Per London and North Western Railway."

FREDERICK HARRISON,
General Manager.
General Manager's Office,
Euston Station
London, July, 1905.

EXCEPTIONAL OPPORTUNITY for purchasing the LEASE and GOODWILL of a well-known WHOLESALE and RETAIL SEED BUSINESS, with extensive Home and Foreign connections, the firm having been established for about 150 years.

MESSRS. PROTHEROE AND MORRIS, the persons appointed by the Judge, will SELL by AUCTION on the premises, No. 39, King William Street, London, E.C., on TUESDAY, AUGUST 1st, 1905, at 12 o'clock, the LEASE of the spacious premises comprising the two Shops, Nos. 39 and 39a, King William Street, aforesaid, with Offices and Warehouses in the rear, having separate entrance in Miles Lane.

The Premises occupy several floors, and are particularly adapted for the business, or for any trade requiring extensive accommodation in the city and near the river, held for about five years unexpired at £1,000 per annum. One Shop and Offices over being let off at about £568 per annum. The trade fixtures will be included in the Sale, also the Goodwill of the Business, one of the oldest in the Trade, the books containing the names of several thousand customers. The Premises may be viewed any day prior to the Sale

Particulars and Conditions of Sale may be had on the premises, of Mr. C. T. COURTNEY LEWIS, 3, Adelaide Place, London Bridge, E.C., Solicitor; of Messrs. E. F. & H. LANDON, of 53, New Broad Street, E.C., Solicitors; of the Receiver, Mr. W. McINTOSH WHYTE, of 11, Queen Victoria Street, E.C.; and of the Auctioneers, of 67 and 68, Cheapside, E.C.

Following the Sale of the Lease and Goodwill, the whole of the Stock and Utensils in Trade will be offered in suitable lots. See separate advertisement.

IN THE HIGH COURT OF JUSTICE.

Re JACOB WRENCH & SONS, Ltd. CALDER v. The COMPANY and Others. 1904, J. No. 2224, With the approbation of Mr. Justice Warrington.

CITY OF LONDON.

IMPORTANT to SEEDSMEN, FLORISTS and Others.

ABSOLUTE UNRESERVED CLEARANCE SALE.

MESSRS. PROTHEROE & MORRIS will SELL by AUCTION, on the Premises, 39, King William Street, on TUESDAY, AUGUST 1st, 1905, at 12 o'clock, immediately following the Sale of the Lease and Goodwill, in suitable Lots, the whole of the STOCK of SEEDS and UTENSILS IN TRADE, consisting of several tons of Onions, Leek, Radish, and Cress: also quantities of Brussels Sprouts, Cabbage, Cauliflowers, Celery, Carrot, Lettuce, Savoy, Spinach, Swede, Turnip, Tomato, and other Vegetable and Flower Seeds. Sundry Office Furniture, large Iron Safe by G. H. Griffiths; a smaller Safe; Weighing and other Machines, Measures, Trolleys, Sieves, 2,000 Sacks, and numerous other items.

May be viewed three days prior to the Sale, or previously by arrangement. Catalogues may be had on the Premises, of Mr. C. T. COURTNEY LEWIS, Solicitor, 3, Adelaide Place, London Bridge, E.C.; of Messrs. E. F. & H. LANDON, Solicitors, 53, New Broad Street, E.C.; of the Receiver, Mr. W. McINTOSH WHYTE, of 11, Queen Victoria Street, E.C.; and the Auctioneers, 67 and 68, Cheapside, E.C.

SOUTH DEVON FLOCK BOOK ASSOCIATION.

ANNUAL SALES OF REGISTERED RAMS will take place as follows:—

At Totnes, Devon, on Monday, July 31st, 1905. Ewes will be included in this Sale.

At Liskeard, Cornwall, on Monday, August 14th, 1905. And at

Truro, Cornwall, on Wednesday, September 6th, 1905

Special attention is called to these Sales, at which a large supply of typical Rams, from all the principal flocks of the breed, will be offered for sale.

Full pedigrees, &c., of these Sheep, and particulars of Conditions of Entry, for Flocks or Sheep, in the Flock Book, can be obtained of the Secretary, W. W. CHAPMAN, 4, Mowbray House, Norfolk Street, Strand, London, W.C.

AUCTION SALES.

CHICHESTER, TUESDAY, JULY 25th, 1905.

GREAT ANNUAL SALE AND LETTING of SOUTHDOWN RAMS, and SALE of EWES, on TUESDAY, JULY 25th, 1905, commencing with the Ewes at 12 o'clock, and followed immediately after by the sale of the Rams.

The above Sale will be held by

HOBGEN BROS., at their Repository in the Chichester Cattle Market (quarter of a mile from Chichester Railway Station), commencing punctually at 12 o'clock on TUESDAY, JULY 25th, when a Grand Selection of Sheep will be offered from the well-known and celebrated Southdown Flocks of:—

His Grace The Duke of Richmond & Gordon, His Grace The Duke of Devonshire, K.G., His Grace The Duke of Northumberland, K.G., Edwin Henty, Esq., Jeremiah Colman, D.L., J.P., Edwin Ellis, Esq., H. Cosmo Bonsor, Esq., A. Heasman, Esq., J. Edward Allen, Esq., Herbert Padwick, Esq., B. Tribe, Esq., The Pagham Harbour Co., Messrs. F. N. & E. Hobgen, and others.

Refreshments will be obtainable in the Hall.

Catalogues may be had of HOBGEN BROS., East Street, Chichester, who will execute commissions.

COCUM FARM,

Six miles from Micheldever Station, two from Sutton Scotney Station, and seven from Winchester.

ANNUAL SALE OF HAMPSHIRE DOWN RAM LAMBS AND EWES.

MESSRS JAMES HARRIS & SON have been favoured with instructions from Mr. George Judd to LET and SELL by AUCTION, on the premises as above, on Thursday, August 3rd, 1905:—

100 RAM LAMBS,
6 SHEARLING RAMS,
and
100 Regular DRAFT EWES,

from his well-bred Cocum Flock, entered in Vol. I. of Flock Book.

Conveyances will meet the principal Trains at Micheldever and Sutton Scotney Stations, and a brake will leave Winchester Station at 12 o'clock, and Andover at same time, on day of sale.

Luncheon will be provided at one o'clock, and sale commence immediately after.

Mr. Judd will be pleased to show his Flock of Breeding Ewes, Ram Lambs, &c., to his friends or intending Purchasers at any time previous to sale.

Catalogues may be obtained of the Auctioneers, Winchester.

IMPORTANT GREAT ANNUAL SALE OF PURE-BRED SOUTHDOWN SHEEP.

For Prime quality of both Mutton and Wool, hardiness of constitution, and early maturity, Southdowns are unsurpassed. First class results obtained when crossed with other Breeds.

CHICHESTER, SUSSEX.

(The principal centre in England for the Sale of Southdown Sheep).

WEDNESDAY, AUGUST 9th, next.

MESSRS. STRIDE & SON beg to announce that they will hold their GREAT ANNUAL SHOW AND SALE of about

400 SOUTHDOWN SHEARLING RAMS AND RAM LAMBS (the largest and best selection to be offered anywhere this season, both Shearlings and Lambs being from leading Breeders.

5,500 SOUTHDOWN EWES of all ages (from a large number of the leading registered Flocks).

COMMISSIONS CAREFULLY EXECUTED. Catalogues on application to the Auctioneers, 63, East Street, Chichester.

WEDNESDAY, AUGUST 2nd, 1905.

CHITTERNE, WILTS.

Four miles from Codford and eight from Lavington Stations, G.W.R., and ten from Amesbury, S.W.R.

MESSRS. WATERS & RAWLENCE are instructed by Mr. JOSEPH DEAN to SELL by AUCTION, on the Premises at Chitterne (on account of the Estate being sold), on WEDNESDAY, AUG. 2nd, 1905, the choicest portion of his grandly-bred

REGISTERED HAMPSHIRE DOWN BREEDING FLOCK,

Entered in the H. D. Flock Book, Vols. I. to XVI., consisting of

1,000 EWES AND EWE LAMBS and
70 RAM LAMBS,

viz.:—

300 Two-Teeth Ewes. 250 Six-Teeth Ewes.
250 Four-Teeth Ewes. 200 Ewe Lambs.
70 Ram Lambs.

This grand and old-established flock is being dispersed on account of the Estate being sold, and seldom has such an opportunity occurred of securing genuine Hampshire Downs. As is well known, Mr. Dean has never entered the show ring, but few flocks have attained a higher position both in this country and abroad.

Chitterne is a very healthy sheep district, and those attending the Sale will have an excellent chance of procuring very choice animals of great size and true character, whilst for quality and depth of flesh the Chitterne Flock stands unsurpassed.

The whole of the Ewes and Ewe Lambs are not excessively made up, but in good breeding condition.

Luncheon at 12 o'clock precisely, and Sale after.

Conveyances will meet the trains at Codford Station to convey persons to the Sale at a charge of 2s. for the return journey, and at Lavington at 3s. 6d. per head.

Catalogues of the Auctioneers, Canal, Salisbury.

AUCTION SALES.

Preliminary.

FRUIT CULTURE AS A FARMING INDUSTRY.

The report of the Committee on Fruit Culture, which the President of the Board of Agriculture appointed to inquire into and consider its present condition and to suggest any recommendations for measures to promote and encourage future extension, has appeared, and been subjected to considerable criticism. Of course, it is of great interest to horticulturists, but, as the committee point out, it is a growing industry, even agriculturally, its increase in recent years having been remarkable. After holding forty-nine meetings and examining sixty-one witnesses they came to the conclusion that "still more fruit might be advantageously grown provided that certain difficulties and disabilities were removed, and if extension were directed into the proper channels." This is no doubt so, but planting is too costly for farmers.

The recommendations and suggestions are forty in number, some of which have been highly approved, while others if not deemed impracticable have provoked considerable criticism.

The generality of farmers, if we except those of the cider counties and those who carry out a combination of agriculture with horticulture in Kent and Worcestershire, have never in the past taken much interest in this subject. The reason is very apparent. The planting of orchards or even the establishment of small fruit plantations would take an amount of capital quite equal to the fee-simple value of a deep, rich soil, such presumably being only what would be selected. The Committee appear to have taken full cognisance of this, inasmuch as they recommend recourse to be had to the National Exchequer for two different purposes. The eleventh clause in the report recommends "that the State be empowered to lend money to landlords who have fruit on their estates for the purpose of supplying the ready money required for the compensation at the determination of a tenancy." The thirteenth clause also recommends that "an Act of Parliament be passed for facilitating the purchase of small holdings by tenants with assistance from the public funds, somewhat on the lines of the measure brought in by the Right Hon. Jesse Collings, M.P."

The eleventh suggestion above quoted appears to give security to landlords to meet the liabilities of plantings already effected by tenants, but there is no suggestion that State aid be given direct for new plantations to be made when both landlord and tenant desire it, but have not the necessary funds to effect the improvement. The interests of landlords are considered also more than those of tenants by the ninth clause, which states that a tenant shall not be entitled to compensation on quitting, unless he provide a successor acceptable to the landlord who will give the same rent and defray the full amount of compensation to which the quitting tenant may be entitled.

The suggested changes in the assessment and rating of fruit plantations and glasshouses, both for imperial and rating purposes, are excellent in several respects as well as those relating to railway rates and the need of more liberality being shown to fruit-growers by the railway companies. But, after all, it must be acknowledged that although great profits have often been made out of fruit-growing in suitable districts, it is a very precarious industry to rely on entirely for a living. In our fickle climate with its cold treacherous springs crop failures are frequent. The small holders of Worcestershire have been punished severely two years in succession. Moreover, the enormous imports of foreign fruit from warmer climes handicap British growers very severely.

Lord Onslow on Agriculture.

Speaking at the luncheon held in connection with the Tendring Hundred Farmers' Club at Thorpe on Thursday, Lord Onslow, ex-president of the Board of Agriculture, said they were accustomed to hear from their more fortunate agricultural brethren in other parts of the country that they lived in the distressful county of Essex. Well, he had the advantage of owning and farming property in that county, and he would venture to tell their friends that they were not nearly so distressful as was said. He did not mean to say that the farmers of Essex were millionares, but, given intelligence and perseverance, they could at least hold their own with the other agriculturists of the country. The evidence of the vitality of Essex was, he thought, shows such as the present.

These shows might be divided into three classes: first, those such as the Tendring Hundred, which were purely local; then such as the Essex County Show, where the farmer would meet with greater competition; and, lastly, notwithstanding the unfortunate circumstances that had attended its latter career, he hoped they would always have one great central show for England in the Royal. (Hear, hear.) There they had the best exhibits of local and county shows, sent up to do honour to their localities. He was satisfied that, if they wished to make the stock-raising side of farming pay, they must breed the best. The best always paid, and, what is more, the foreigner almost invariably came to England when he wanted to buy the best pedigree animals. There lay their greatest encouragement for breeding the best, and he hoped England would long hold her premier position in pedigree stock-raising.

Suggested Land Purchase Scheme for England.

Speaking at a meeting held at Well Vale, near Alford, on Thursday, Lord Willoughby de Eresby, M.P., said he believed the Irish Land Purchase Bill was a good one, and he should like to see the principle of that Bill extended to England. He believed it was a bad thing in this country that there were not larger numbers of men interested in the land as freeholders. He did not believe for one moment that a large and universal scheme of land purchase was possible, or would even be acceptable to the great part of the tenant farmers of England, because he did not think that there was at all a strong desire on the part of the tenant farmers to purchase their holdings.

The Government, he thought, would only be doing right to put out a certain sum of money, say ten million pounds—a far less sum than we had given credit for in Ireland—to enable, as an experimental scheme, people to acquire land in this country. He knew cases in his constituency, and on his own property, where there were small holdings, where he believed men would be willing to buy, and where he would be only too delighted to sell. And he believed that by paying into a sinking fund those men could in forty or fifty years become the owners of those holdings.

The question was entirely one of Government security in advancing loans to enable tenants to purchase, and at the next General Election he intended to bring the matter forward prominently.

The Small Holdings Committee.

The Departmental Committee appointed by the President of the Board of Agriculture and Fisheries to inquire into the subject of small holdings, held a meeting on the 21st inst. Present: The Right Hon. the Earl of Onslow, G.C.M.G.; the Right Hon. the Earl Carrington, G.C.M.G.; the Right Hon. Jesse Collings, M.P.; Major P. G. Craigie, C.B.; Mr. C. Bidwell; Mr. W. Brown; Mr. James Long; Mr J. W. Willis-Bund; Mr. R. A. Yerburgh, M.P., and the Secretary (Mr. T. H. Sutton). Evidence was given by Mr W. J. Harris, Halwill Manor, North Devon, and Mr. C. B. Macpherson, Balavil, Kingussie, N.B.

Seasonable Topics.

Lightning and Tempest.

Farmers are continually liable to losses, and sometimes through circumstances over which they have no control, they are brought face to face with ruin. One can have little sympathy with a man who, through idleness or neglect of business, gets into the unfortunate position of having to wind up his affairs; but when a man fails through losses or sheer misfortune, it is another matter entirely. And farmers are liable to losses in a score of ways. Their stock-in-trade consists largely of living creatures, which are liable to diseases and death from various causes. Quite recently, when terrific thunderstorms visited different parts of the country, we read of cattle being struck suddenly to death by flashes of lightning. In one instance twenty-four valuable beasts were stretched dead in one place, and in other cases less numbers were killed. Some men may be in the fortunate position of being able to stand the financial loss caused by the death of a number of cows, but to others such a catastrophe would mean sheer ruin. Amongst the instances of the death of animals by lightning, which have come before our notice was the case of a working-man whose whole savings were invested in one cow, which was suddenly struck dead in a thunderstorm. The man was disconsolate, for his little all was gone, but fortunately local sympathy took a practical turn, and money was collected locally, by means of which the man was enabled to obtain another cow.

Agricultural Inventions.

A look round the implement department of any big agricultural show is a means of education, because it gives one a good idea of what the inventor has done for agriculture in providing apparatuses for saving time and labour in every department on the farm. We well remember, when machinery was first introduced to agriculture, what an outcry there was that manual labour would be superseded and the working population in the country would be starved. No such thing has happened, however, for now, in the days of machinery, instead of there being a glut of labour, the cry is more generally one of scarcity, and if the farmer could do a little more by machinery he would be saved some anxiety. The farmer, at the outset, needed some persuading before he would take advantage of machinery, and in this he only showed his natural conservatism, but he learnt to realise that he must march with the times or take his chance of failure. Even now there are some who prefer to muddle along in the old-fashioned way rather than take advantage of modern inventions for saving time and labour, anad others do not buy machines because they cost money. This is sheer false economy, for a man who buys a machine for doing any particular work should look upon it as an investment. The apparatus, if good, will pay percentage on capital in the salvation of time and labour, and if it does nothing more, it will pay for itself. As a matter of fact, machines are as essential in agriculture to-day as they are in any other industry, and refusal to use them through sheer prejudice shows a want of common sense.

Inventors of Agricultural Machinery.

It is said that necessity is the mother of invention, and doubtless there were men who saw the necessity of machinery in agriculture long before farmers realised the fact. In short, it is not the actual farmer who can claim credit for the different machines which are now indispensable, but it is the mechanic and implement maker who is ever exercising his inventive brain with the one end—that of making money. And one man begins where another leaves off. That is to say, a certain machine serves a good purpose for a time, till someone sees a way of improving on it, and, this done, the original implement becomes obsolete. Compare an express engine of to-day with George Stephenson's Rocket, which was the wonder of its time. There is hardly any comparison, and yet without the Rocket we should probably never have had the present-day powerful locomotives. Lightness and elegance, without losing strength, are great features of improvement in modern agricultural machines, and the implement maker does not wait till the farmer asks for a certain apparatus before he produces it. If he did this, he would probably wait for ever, but he anticipates the demand, makes his machine, points out its advantages to the farmer, and waits for him to use it. If the implement is any good he does not have to wait long as a rule, for the up-to-date section of the farming fraternity has learnt to realise that machines are essential, and that the implement maker is as necessary to agriculture as the farmer himself.

The Training of Farmers.

Agricultural education is a term with a meaning in these days, and various opinions are expressed as to the best means of training the farmers of the future. It is an open question, however, whether, up to the present time, we have hit upon the best means of training young men to become farmers. All will agree that a sound training is essential if a man is to be successful in agriculture, but the question under discussion is, what is the best means of getting that training. Is it provided at agricultural colleges? Of late years a number of these institutions have been established in different counties, and a good deal of public money is being spent on them. At first these establishments could only be treated as experimental, but that stage is past now, and the question may reasonably be asked what agricultural colleges are doing towards turning out practical farmers. We do not see that country agricultural colleges are intended to train men for colonial life, because we want good farmers at home; neither are they required to turn out estate agents, or provide education for men who never make any practical use of it, but what we should like to see is an official return showing what percentage of the students at agricultural colleges are the sons of farmers, and also what percentage return to the land when their college course is finished and take up farming as an occupation. We are by no means averse to agricultural education, but, on the other hand, are strong believers in it. We realise, however, how essential it is that the education should be of the right character, and that men who go to agricultural colleges should do so in order to learn farming with the idea of becoming farmers. Further, it is essential that the education given should be of a thoroughly practical character, which fits a man for the work-a-day life of a farmer, and not a training which gives ideas above it.

The Fruit Industry of Great Britain.

A Departmental Committee has sat to inquire into the fruit industry of Great Britain, a good deal of evidence has been taken, a large number of witnesses have been examined, a lengthy report has been issued, and a long list of suggestions have been made by the Committee. Just so, and now we are waiting to see if anything further will be done, or whether the forty-page report, after being carefully read, will be packed away along with the summary of recommendations on a shelf and be promptly forgotten. It is suggested that a special sub-department of the Board of Agriculture and Fisheries be established to deal with matters connected with the fruit industry, and that there be a bureau of information and an experimental fruit farm. This is a large order to begin with, but the suggestion is a good and practical one. We have frequently contended that fruit culture, though associated with agriculture proper, is distinct, and, considering its importance, it is essential that a department should be devoted to it. The Committee suggests that horticulture be taught in elementary schools in country districts, and that the attention of local education authorities be called to this. Here, again, we agree, and from our experience, we are convinced that a great deal more good would be done by initiating country children in the principles of horticulture and fruit-growing than by teaching them smatterings of things which are of little or no use to them. And, again, the education of recent years has tended to give the impression to the youthful mind that it is infra dig. to work. Now manual instruction teaches the opposite to this, and we want our country schools to turn out good workmen rather than cheap clerks. If horticulture is to be a subject in country schools, however, it must be general. It is no good playing at it, doing a bit here and a bit there, but there must be a proper authorised system, and the teachers must know sufficient about practical horticulture themselves to be able to impart instruction to others.

Landlords and Orchards.

The Departmental Committee referred to above suggests that the attention of landlords, especially in the West of England, should be called to the pressing need of renovating and replanting the decayed orchards on their property. In doing this the Committee only emphasises what the press, lecturers, and others have been recommending for some time past, but in too many cases, we are afraid, the calling of attention to the pressing need is not unlike pouring water on the proverbial duck's back. Something a little more stringent will be necessary if anything is to be done. When making recommendations, however, the Committee might also have suggested that attention of tenants be also called to the necessity of looking after young trees when the landlord has planted them, for in this matter there appears to be six of one and half a dozen of the other. There are landlords who are contented to see the orchards on their property go to ruin and decay, and they will spend nothing on re-establishment or replacement. It is not likely that the tenant with this present security of tenure will do it. On the other hand, there are landlords who willingly supply trees for the establishment of orchards, but unfortunately they are not always encouraged to do so, and when a man sees a tenant deliberately neglecting newly-planted trees, it is not to be wondered at if he devises other means of spending his money. The deplorable state of many West of England orchards affords evidence that drastic renovation is necessary, but mere calling of attention will never bring about the end desired.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended July 15, 1905, together with the quantities imported in the corresponding week of the previous year:—

	1904.	1905.		1904.	1905.
	No.	No.		Cwt.	Cwt.
Cattle ...	8,935	11,928	Wheat ...	1,761,900	2,410,100

Intercepted Food at Hull.—It is stated by Dr. Wright Mason, in his annual report as Medical Officer of Health for Hull, that during 1904 there were seized by the inspectors 154,165 pounds of meat, offal, 367,656 pounds of fruit, 1,692,604 pounds of vegetables, 517,216 pounds of fish, and 11,631 pounds of poultry and game, a total of 1,224 tons 13 cwt. 2 qr.

Mr. John Porter, a well-known Lancashire farmer, died on Thursday at his residence, Beech House, Rufford, near Preston, in his 85th year. For over 50 years he was connected with Hesketh estates, for which he acted as agent. He assisted materially in reclamation of land at Hesketh Marsh, and was chairman of the Leyland Hundred Highway Board and treasurer of the Rufford Show for many years.

Topcliffe Horse and Cattle Fair was held on Tuesday, when there was a large show of horses, and the best class of agricultural horses seen for some years. There was no demand for horses for Army purposes. Horses for general agricultural work ruled for the best from £50 to £45; secondary kinds, £12 to £18; harness and tram horses, £20 to £30; ponies, £10 to £15; secondary kinds, £4 to £7 each. There was a marked improvement both in the quality and quantity of cattle. Good calving cows and cows newly calven made up to £21; calving heifers and heifers with calf, £12 10s. to £14; year to two-year-old stirks, £8 to £10; three-year-old bullocks and heifers, to £16; and fat beasts, £15 to £18 each.

By a Lobbyist.

There is one imperative necessity upon all associated with rural areas in the interval, be it long or short, which will precede the introduction of the Redistribution Bill. This is to convince the Ministry and the Conservative party that the rural elector is not a decadent political entity as compared with certain of his fellows resident in the towns. For instance, there is no reason why between forty and fifty thousand Wiltshiremen resident on the country-side should be deprived of a distinct and separate representation while twenty thousand Wiltshiremen resident in the city of Salisbury should be conceded it. If you were to skin the Sarumite you would find him composed of very much the same physical texture as his fellow-countymen living in the villages. There is no reason why the twenty thousand Taunton men should be conceded the privilege of individual representation and fifty thousand Somersetshire men told they are to be robbed of the privilege and parcelled out to other constituences with which they may have no sympathy. Mr. T. Gibson Bowles is a sprightly and versatile politician, but this is no sufficient reason why King's Lynn's twenty thousand men should be told they are worthy of a distinctive representation on the Grand Inquest of the Nation, and fifty thousand Norfolk men who surround the town be bidden to be satisfied with being tacked on to one or other of the electoral centres the county is to be permitted to retain. Be assured of this, that this favouritism—and understand that the one assured purpose of the redistribution-scheme, as at present announced, is to vest a greater authority in towns, which will not, like those smaller boroughs I have mentioned, be possessed by an alloying rural sympathy—would mean the divorcing of much of the Parliamentary influence now associated with the counties.

• • •

I repeat my remark of last week. I do not anticipate the revival of the old Parliamentary line of demarcation between the town representatives and the county representatives. Still it is mathematically certain that if the Parliamentary strength of the counties is to be reduced, if a different standard of electoral value is to be demanded from the shires than from the towns, the Legislature will be even less desirous than at present of dealing with agrarian problems. Heaven knows that that desire is at this moment at sufficiently low an ebb. Or if the Legislature does show a willingness to deal with these problems it will be more or less according to the predispositions of the economists of the towns—that is, of the loud-shouting orators whose knowledge of agriculture is chiefly based upon the conviction that the squire is a tyrant, the farmer a ninny, and the labourer a silly, obsequious oaf. This warning is necessary. It will be suicidal to consent to the degradation of the rural representation in Parliament—it will be worse than folly to assent to the establishment of a differentiating standard of electoral value to the hurt of county representation. This is no mere academic or sentimental business. The danger is real. Would it be worth while on the part of the county members of the House—that is, if the continuance of this Parliament is assured—to see men, say, like Sir Alexander Acland-Hood, Mr. Walter Long, and Mr. Ailwyn Fellowes? These be Ministers who may be assumed to have sympathy with the rural position.

• • •

Do not imagine the redistribution purpose has been killed by Mr. Balfour's mistake and by the fact of his expeditious anxiety being checkmated by the Speaker's ruling. If this Government is in power another session we shall have a Redistribution Bill. Even if it be not in power Redistribution is now a Tory "plank." The anxiety should be to preserve as faras possible the present rural representation. Let the great towns be satisfied with the members taken from Ireland. The first duty of rural electors is to educate our statesmen in the fact that they do not think rural constituencies deserve any penalisation—do not deserve any reduction of its membership. If 18,500 townspeople deserve representation, forty thousand country people should not be deprived of it. There is the position in a nutshell.

• • •

Mr. Ailwyn Fellowes's attitude over the report of the Departmental Committee on the fruit industry may not inspire entire satisfaction, but at least it will induce respect. It is an excellent epitome of the method by which his administration has from the first been characterised—the method and manner of the sympathetic man who does not desire to give birth to unreasonable hopes. It would be a good thing if the suggestions could be at once embodied in legislation—a most excellent thing, apart from the advantages it would confer upon fruit culture. It would have established a most excellent precedent in the wider purpose of tenure reform. Even Mr. Channing finds in at least one instance, that the existing Market Gardeners' Act provides a most desirable example. He would have found an Amendment Act based on the recommendations of the committee provide a foundation and justification for legislation of the more emphatic character he has long demanded, and failure to secure which he has long innocuously chafed against. The Minister for Agriculture knows, however, that it is impossible for him to give effect to the proposals in this session—he knew it before even the crisis of Thursday night arose, knew it before the political sky was darkened with the menace of dissolution. With a Premier in power who seeks to find illusory excuses for abandoning a Butter Bill—against which there was no implacable resentment; nay, which had not evoked any serious contentious spirit—the introduction of a Market Gardeners Act Amendment Bill based on these recommendations would be a deed of callous cynicism foreign to the nature of Mr. Fellowes. To assure his friends that he must first study the evidence on which the recommendations of the committee have been based—a very desirable and wise preface we must all admit—is the Minister for Agriculture's method of condoning the temper of his chieftain. Does he think—and I am in this paragraph assuming that this Government will, despite appearances, continue in office—that the portents will be any more satisfactory in the next session? The Premier's present mood is apparently that the Rates Act in itself expresses all that agriculture needs or has a right to demand. That is the Alpha and Omega of reform, the final and only needful concession to rural necessities.

• • •

There is one interesting fact at last commending itself to the mind of those philanthropists who see in the establishment of farm colonies a solution of the unemployed problem. Of course' readers of this page know that the writer is not against farm colonies. To use a favoured phrase of his, he regards them as an anodyne rather than as a panacea, as being more calculated to breed a class of desirable workers for the soil, than as a solution of the unemployed question. The fact which now has run athwart the philanthronic mind is that farmwork is more or less a summer demand, and that the unemployment problem assumes its more acute character in the winter. Would farm colonies be a serious boon to the congested towns in the bitter days of January and February, and when the cold snows of Christmastide render the void belly still more desirous of good fare and plenty of it? Would our future West Hams and East Hams find in the farm colonies a relief for the population robbed of employment at the dock-side by prolonged frosts? It is well that these suggestions have presented themselves to the mind, belated though that presentation be. It serves to reveal that this grim problem is not to be met by some bucolic statesman jauntily waving a magician's wand and calling a series of farm colonies into existence.

• • •

The Liberals undeniably mean to make the rural-housing question one of their popular cards in the coming fight. What is more, they mean to utilise the innocuous Wrightson Act—over which so many vainglorious pretensions were made by its author and his political associates — in order to illustrate their assertion that it was a mere piece of make-believe and bluff designed for the purpose of persuading the House of Commons to refuse to deal drastically and emphatically with the question. Of course, some of us will refute this suggestion; but be assured that it will not altogether fall on non-receptive or sterile soil. Many Liberal candidates are deliberately making a tour of the constituency they are wooing with the object of discovering local data in support of their contentions. Certainly the facts they are accummulating are painful enough—sometimes even appalling. One of these candidates, Mr. R. W. Essex, who is fighting the Cirencester division, thus epigrammatically epitomised the housing situation in certain areas which he has visited, "That good health should after all prevail is a flagrant defiance of the general result of sanitary laws, that decency is not neglected is a proof of the fine texture of the rural character, that morality is respected is a tribute to the innate virtue of the rural heart and mind."

• • •

One bedroom for a man, wife, and family, or two bedrooms for man, wife, grown-up son, and growing-up daughters. A man having to sit down on his bed ere he can undress. If he did otherwise he would come in contact with the ceiling—perhaps knock off the roof. "This," said Mr. Essex, "is the state of things which has come under my observation during my tour. I tell you," he added, "that the Liberal Government which failed to deal with this question would be recreant to its holiest duty."

• • •

Well, forewarned is forearmed. But will the Conservative candidates heed the forewarning? Or will they proceed to reflect the indifference and somnolence towards the rural problems exhibited in the most exalted annals of the political hierarchy? What is the official Conservative attitude towards the proposal to re-shape, amend, and strengthen the Wrightson Act?

• • •

My last paragraph has this week the ominous significance of the postscript to a lady's letter. Shall we have a dissolution? I am writing on Saturday morning, and thus before the definite intention of the Government is announced. I believe we shall have a dissolution: not immediately, of course, because administrative chaos would be the sequel to a peremptory dissolution. The very cadence of Mr. Balfour's speech, the wearied inflection of his voice on Friday, revealed a desire for surcease from the vicissitudes and tribulation of which he has so long been the victim. He will—I make this prophecy now in order that you may compare it with the actual facts—resign and suggest that Sir Henry Campbell-Bannerman should continue the Government in order that the [illegible] work of the year might be completed in a disciplined manner. In the event of consent being given by Sir Henry, Mr. Balfour will promise him support until the dissolution can be formally announced in October. It is no use describing the Ministerial defeat of Thursday night as a snap division. It was not—it took place in a House of four hundred Members and had been preceded by a pressing Tory whip. It was a formal expression of opinion, whose significance was really rather accentuated by the deliberate absence of so many Conservative Members. The division has absolutely changed the political situation. A dissolution in October. That is my prophecy.

EAST ANGLIAN NOTES.

The music of the reaping machine is heard to-day in all the early districts of East Anglia, for the corn harvest has in earnest commenced; and the click, click, click that one hears while journeying through the lanes across country in the Eastern Counties proclaims the fall of a cereal crop that in some favoured spot has ripened sufficiently for the reaper. On Tuesday last, oats were cut down in three counties of East Anglia, and to-day the wheat plant is being severed from its roots in order to secure "quality" for the miller, inasmuch as this cereal must not become dead ripe, or it loses shillings per quarter in price as a millers' wheat, although it should be dead ripe for seed purposes. To-day in East Anglia the sight of the ripening corn is a grand sight, next week many fields will be brown and bare. So we can now say with the poet:—

"Oh! 'tis a goodly sight and fair,
To see the fields their produce bear,
Waved by the breeze's lingering wing,
So thick they seem to laugh and sing;
And call the heart to feel delight
Rejoicing in that bounteous sight,
And call the reaper's skilful hand
To cull the riches of the land."

In the corn harvest we are all concerned, and in the farmer's prosperity we all, in some degree, share. The sight of the fruitful fields should, therefore, gladden the heart of each individual as it does that of the cultivator himself. But the farmer must look with concern on the development of the motor industry, for not only does the motor-car that flies through his district materially wear out the highways and byeways, but the heavy traction not in any way connected with agriculture is a source of heavy expense; while the displacement of horse traction means, especially in towns and cities, a considerable loss in the market value of oats; that, as a crop, has become of considerable consideration in the economics of English farming in recent years. What must, therefore, be in the future his mainstay?

The forty-eighth annual meeting of the shareholders of the Chelmsford Corn Exchange Co., Ltd., was held under the presidency of Mr. Henry Marriage, when the report showed that the gross income for the year amounted to £1,115 4s. 8d., against £1,040 19s. 3d. in the previous account. This result was mainly due to the increased receipts for the hire of the hall, while the rent of stands, standing places, and annual admission tickets had been maintained. The sum of £620 3s. 9d. was available for dividend, and the directors recommended that a dividend, at the rate of £4 10s. per cent. per annum and £70 3s. 9d. be carried forward, with £100 on deposit to form the nucleus of a reserve fund. The report was adopted.

At a meeting of the Executive Committee appointed under the Diseases of Animals Acts, 1894, held at Ipswich, a further report of an outbreak of anthrax at Burton's Farm, Long Melford, Suffolk. Anthrax, it should be mentioned, besides attacking cattle, sheep, and horses, readily affects rabbits, hares, and mice, and fowls have been known to contract it; while, during the last few months, many cases have occurred in men and women in different parts of the country. The characteristic organism, the bacillus, which is the cause of the disease, consists of a straight, rod-shaped body, usually about 0.001 millimetre in thickness and from 0.005 to 0.02 millimetre in length. They are made up of a number of joints rather longer than broad, each of which consists of an envelope with protoplasm in its interior. The symptom of the disease in most acute cases in animals is that they fall down as if they had received a severe blow and go into convulsions. The pulse then becomes quickened, the breathing rapid and laboured, and death follows in a few minutes or hours. In less acute cases, the animal attacked loses its appetite and is feverish and thirsty, after having flux and dysentery. To all appearances it may recover, but, after a short interval, the animal will have a more severe seizure, and, in a fatal case, dies with great enfeeblement, convulsions, and laboured breathing.

The agricultural statistics for 1904, just issued by the Board of Agriculture, show in a very convincing way the supremacy of Norwich amongst the corn and live stock markets of Great Britain. In wheat, barley, and cattle the capital of East Anglia is easily first, its preminence being especially notable in barley, in which nearly twice as much business was done during the year in Norwich as was done in any other centre; while the comparative figures for the past four years show a steady increase in the total head of live stock dealt with on the cattle market.

The writer, on making his way from White Roding to Sawbridgeworth, had occasion to go through the village of Little Hallinbury, anciently called "Hallinbury Bourchier" or "Bowser" on account of its having formerly belonged to the Bouchiers, Earls of Essex, when his attention was called to some red wheat that had been cut for three days, and is now in shock.

OBITUARY.

Mr. J. Smith.

By the death of Mr. Joseph Smith, East Anglia has lost one of its veteran and most popular agriculturists. The deceased gentleman was in his 83rd year, and had been in failing health for some time, so that his death at The Grange, Walton, on Wednesday, was not unexpected; but, nevertheless, much regretted. Several years years ago he relinquished his extensive business, the greater part of which was taken by his youngest son Herbert, who resided with him.

The late Mr. Smith was one of the best-known agriculturists in East Anglia, and as a farmer he had perhaps few equals. His connection with the Suffolk horse, Red Polled cattle, and Suffolk sheep was well and widely known. As to the Suffolk sheep, some fifty years ago Mr. Smith was devoting his energies, and the rare judgment he possessed, in evolving the perfect type of animal with which the public are now familiar. No expense was spared in selection, and the result must have been gratifying when so much success was obtained at public exhibitions. Later on, Mr. Smith took great interest in the founding of the Suffolk Sheep Society, and when he retired from business in 1898, a handsome presentation of silver plate was made to him by the Marquis of Bristol on behalf of the Suffolk Sheep Society, at a meeting of a most representative character. As a public man, in addition to his intimate connection with the leading Agricultural Societies, he for a long time held the position of Vice-Chairman of the Woodbridge Board of Guardians.

Mr. Edward F. Quilter.

It is with regret we have to record the sudden death of Mr. Edward Frederick Quilter, of Hill House, Belstead, and 7, Savile Row, London, W., who suddenly succumbed early on Thursday morning at his town residence, probably to cardiac failure. The deceased gentleman, who was 57 years of age, was in his usual good health on Wednesday, attending a Board meeting in the City in the afternoon, and afterwards taking tea in the West End with his brother, Sir Cuthbert Quilter. The suddenness of his demise can therefore be imagined.

The late Mr. Quilter was an active member of more than one important Board of Directors, and was a familiar figure in business, as well as in Club circles in London. In the county of Suffolk he was a most popular landlord, and since he settled at Belstead had been specially prominent in the breeding of Suffolk horses, the friendly rivalry between the Bentley and Bawdsey studs having done much to stimulate interest in the increasingly popular local breed. Although taking no public part in national or local politics, he was always ready to support any movement for the general well-being.

Sale of a Freehold Estate at West Wittering, Sussex.—Messrs. Stride and Son, of Chichester, offered this freehold estate in six lots at their property sale rooms on Wednesday afternoon. There was a good company present, including the owners of the adjoining land and farmers and gentlemen from surrounding districts. The first lot, Nunnington Farm, comprising 98 acres, was started at £2,000, and advanced steadily to £2,950, and, there being no further bidding, the lot was withdrawn. Lot 2, a field containing 7¼ acres, was put in at £150, and advanced sharply to £220, at which price it was sold to Mr. Stevens, of Earnley. The bidding for lot 5, known as Buckitt or Sheepwash Farm, started at £700, and rose to £900, at which price it was knocked down to Mr. C. Shrubb, of West Wittering. The fourth lot, a field of about 10¾ acres, was started at £500, and Mr. Haskins became the purchaser at £550; Mr. Haskins also secured lot 5, known as Cackham Green, containing about 84¾ acres, for £2,000. The first bid for lot 6, a freehold field of about 5¼ acres, was £150, but the bidding for this lot was brisk, and, after good competition, it was knocked down to Mr. Barker.

Prize Day at Wye College.

With the startling incident of the defeat of the Government on Thursday evening immediately present in their minds, the large audience assembled at Wye College on Friday must have been prepared for the disappointment conveyed in the announcement that the Right Hon. Ailwyn Fellowes, M.P., President of the Board of Agriculture, was unable, owing to pressing political duties, to fulfil his engagement to present the prizes to the successful students. Mr. Lawrence Hardy and several other prominent M.P.'s were absent for the same reason; but, making allowance for these exceptions, the meeting passed off with the usual satisfaction, the Chairman, Lord Ashcombe, being supported by several members of the Kent and Surrey County Councils and by a very numerous gathering of the élite of the neighbourhood, with farmers and others who were interested in the welfare of the College.

The principal, Mr. Dunstan, M.A., in the course of an eloquent and interesting address, referred to the loss sustained by the governors in the death of Mr. E. J. Halsey, whose clear foresight and untiring energy had brought the College to its present advanced position. They had also lost Earl Stanhope, whose valuable assistance could hardly be overestimated. The number of students was constantly increasing, having risen from 74 last year to 89, the present enrolment. With the numbers, the quality of their work had also greatly advanced. A high standard of work was the chief aim of the staff, and the holders of the diplomas about to be presented were well able to uphold the reputation and credit of the College in any part of the Empire. The general utility of the College as a source of information was demonstrated by more than 1,200 letters they had received during the past year from farmers in nearly every agricultural district in the United Kingdom. The residence of students in College was very advantageous both to themselves and the staff, inasmuch as greater intimacy was encouraged, and the characters as well as the work of the students could be better understood. He (the principal) hardly thought that the College was the proper place for the instruction of school masters, the classes for whom would shortly be formed. This technical instruction should be rather imparted in technical schools associated with the training colleges. It appeared to him that the masters had been trained solely with a view to urban teaching, and that the rural side of their duties had been neglected, otherwise the staff at Wye would not have to deal with so many instances of absolute ignorance with respect to rural matters.

Several enlargements of the College buildings had been sanctioned by the governors, and an extension of the farm by 200 acres had been decided upon. The courses of instruction had been also rearranged, whereby farmers' sons could be accepted for a course of 2 years, and other students could be taken on for 3 or 4 years, according to the objects to be obtained. Mr. Dunstan's emphatically expressed opinion that the "fool of the family" was no longer good enough to be a farmer, but that modern farmers required brains as well as capital, because he considered that farming now demanded more from a man than almost any other occupation, was warmly approved by his audience. He regretted that many of their students did not come to College better prepared by their previous teachers for advanced instruction, and believed that this deficiency was due to a great extent to the athletic fetish that had been set up in most schools. He distinctly approved athletics, but when they found, as they had done, that the simple elements of reading, writing, spelling, etc., were neglected, he thought it was time that radical changes should be made, as Wye College did not undertake to provide such elementary instruction. He was also strongly in favour of technical classes for rural labourers, with the object that their work should be accomplished more intelligently and efficiently. Mr. Dunstan concluded by drawing attention to the fact that the College students were making the influence of their training at Wye felt in many parts of the Colonies, and he believed that in this way the College was doing a good part in increasing the strength of the Empire, which they were all called upon to uphold and extend.

The prizes and diplomas having been presented by Lord Ashcombe, Chairman of the College governors, his lordship congratulated the principal upon the excellence of the work and the progress of the College. Though its foundation was very modern, it had already achieved a good reputation, which was not only National but Imperial, and it would certainly continue to enlarge the sphere of its operations under the able guidance of Mr. Dunstan.

Mr. F. S. W. Cornwallis, in proposing a vote of thanks to Lord Ashcomb, referred with satisfaction to the establishment in London of the Agricola Club, which was a rendezvous for previous students and the means of maintenance of the fraternal associations commenced at Wye.

Major Coates, M.P., seconded the proposal, and expressed his satisfaction that, although in its early stages, the College had been a source of great anxiety to the Kent and Surrey Councils; it had now become firmly established on a profitable basis, and would therefore be warmly supported in future.

The Chairman having acknowledged the vote, the company adjourned to the Quadrangle, where tea was served, and the proceedings agreeably concluded.

Early Harvesting in Herefordshire

Mr. J. B. Sainsbury, of Whitecross, Ross, Hereford, has had a remarkably early and fine harvesting of his New Winter King two-rowed barley. He commenced cutting on July 12, the whole crop being fit for the process, and he began hauling on July 19, and at the time of writing was continuing, the whole crop being ripe. Some idea of how the field looked can be gathered from the illustration we give on this page. Mr. Sainsbury claims for his New Winter King barley that it is the earliest two-rowed variety known, is a very heavy cropper, and a favourite with maltsters for colour and extract. It will stand any ordinary winter, and has been grown in Scotland with great success. The straw is very heavy, and stands better than most varieties. Mr. Sainsbury adds that clovers succeed better after Winter King barley than spring-sown on account of this variety's earliness, whilst one can obtain a green crop, turnip, or mustard after a crop of Winter King barley. Mr. Sainsbury has given constant care, and has reselected his variety of barley for the past eleven years, and that his efforts have been crowned with success will be easily seen from what we have stated and the illustration given.

Speech Day at Dauntsey College.

The annual prize day of the Dauntsey Agricultural School at West Lavington, near Devizes, was held on Wednesday week and was honoured by the presence of the Right Hon. Ailwyn E. Fellowes, Minister of Agriculture.

Mr. C. T. Lane, chairman of the Mercers' Company and of the Board of Governors, presided, and he was supported by the Right Hon. A. E. Fellowes, M.P., Lord Edmond Fitzmaurice, M.P., Dr. Somerville, of the Board of Agriculture, and a large company of influential guests.

The Chairman, in a review of the present position of the school, said they had a most satisfactory report to make. They now had forty-nine boarders and twelve day boys, and three-fourths of them were engaged in studying agriculture.

The Head Master gave a very satisfactory report, expressing himself as gratified at the excellent reports they had received from the Board of Agriculture and the Board of Education.

The Right Hon. Ailwyn Fellowes, after some introductory remarks, said the reports of the examinations under the auspices of the Board of Education and of the Board of Agriculture had been most satisfactory, and showed that the school was doing a good work. When the school was opened in 1895 by Mr. Chamberlain, it was thought to be rather as an experiment, and it

Mr. J. B. Sainsbury.

was thought by some that it would not answer. He (the speaker) had had the opportunity of reading the official correspondence and a large number of letters which were received from farmers in that district, showing that they were not so favourable to the scheme at that time as he ventured to say they would be found to be now (Applause.) What was exceedingly gratifying to him was the fact that in the school at the present time no fewer than fifty-two boys were taking up an agricultural course. What was still more important was that forty-six of the boys were the sons of tenant farmers. (Applause.) The result of this must be to revolutionise agriculture in many of its forms. Boys saw new methods and learnt new facts which their fathers had had no opportunity of acquiring, and these would be of considerable use to them in after life. He would like to suggest that the school might be developed by the acquisition of a farm adjacent, which would enable the lads to have an opportunity of putting theory into practice. This was being done in connection with the agricultural colleges in different parts of the country, with beneficial effect. The school might then be made a useful centre for dairy instruction, poultry, and farriery work for the whole of the county. He urged the boys who were leaving to cherish the traditions of their school, and concluded by paying a high tribute to the staff.

Lord E. Fitzmaurice, M.P., predicted much excellent result from the accession to the office of the Minister of Agriculture of Mr. Fellowes, who had a practical acquaintance with the subject.

Other speeches followed, and a programme of sports was subsequently carried out.

Tenant Farmers' Valuations.

The annual meeting of the Yorkshire Land and Tenant Right Valuers' Association was held recently at Leeds. The report and financial statement showed that the Association was growing in usefulness and membership, and that its financial position was very satisfactory.

The first business of the meeting was the election of a president for the ensuing year, and Mr. Ackroyd, of Keighley, was unanimously chosen to fill that position; whilst Mr. Kilby, of Barnsley, and Mr. Weatherhead, of Keighley, were elected vice-presidents. During the meeting reference was made to the fact that it was exactly 21 years since the Association was formed, and that during that time the members had been the means of having justice done between outgoing and incoming tenants, and between tenants and landlords, in accordance with the provisions of the Acts of Parliament that had been passed since the Association was formed. It had been able to do this, it was stated, by the schedule of regulations that had been drawn up for its guidance, and had, moreover, brought together in friendly relationship the men who were engaged in the work of tenant right valuation throughout Yorkshire. The principal business of the last meeting was the consolidation and revision of the various resolutions passed by the Association since its formation. This work entailed so much care that it was impossible to complete the task, and the meeting was adjourned until October 18 next, at the same place in Leeds.

Nantwich Cheese Fair.—Pitch about fifty-five tons, good attendance of buyers. The tone of the market was good; sales freely effected at prices: best, 50s. to 55s.; medium, 45s. to 48s.; lower grades down to 40s.

A large haystack, containing about a hundred tons, situate in a field at Tilgate, close to Three Bridges railway station, and belonging to Mr. J. A. Nix, was found on fire on Monday, and, though two engines were got to work, and two jets were directed on the stack, firemen worked hard until late at night. Only about half the stack was saved, some fifty tons being destroyed or rendered useless. The damage was estimated at £100.

Spilsby Fair.—This annual fair for horses was held on Monday, when there was above an average number on offer. Trade, however, was far from good, except for best quality animals, and these were on a downward scale. Good draught horses for town work made up to £55; good farm horses, £35 to £40; second-class from £18 to £25. 'Bus and van horses sold at from £30 to £35; cab horses, £18 to £20. There were hardly any good trappers on offer, but some of the best Irish drove horses, suitable for making hunters, etc., realised as much as £30.

An Early Barley Harvest:
THE VARIETY IS SAINSBURY'S NEW WINTER KING TWO ROWED BARLEY.

"BE WISE IN TIME."

FARMERS should take care (especially in view of the comparatively low rates of premium) to insure against loss through **STORMS** and **FIRE.**

The **HOMESTEAD, FURNITURE, OUT-BUILDINGS, LIVE STOCK, IMPLEMENTS, STACKS, AND GROWING CROPS** all represent property which can, by the present modern system of **INSURANCE**, be covered at a trifling annual outlay.

INSURANCE against death or injury through accidents should not be neglected.

ROYAL INSURANCE COMPANY.

FIRE, LIFE, HAILSTORM.

Invested Funds . . £13,062,125.

HAILSTORM INSURANCE.

The Royal, besides being the largest Fire Insurance Company in the world, is one of the few offices that undertakes risk from Hailstorm. The important feature for Agriculturalists when effecting protection on their property is the opportunity afforded them of combining insurance against Hailstorm and that of Fire Insurance in one office.

Gentlemen able to influence introductions with this object are invited to make application for Agencies.

Offices, 28, Lombard Street, London, E.C.

Fine Hay Harvest in the Isle of Wight.

SIR,—One of the finest hay harvests is now over; the rain came too late to make a good clover crop, but the meadows are quite an average, and well saved. Mangolds are doing well; swedes have been troubled with "fly"; turnips, which are just being finished sowing, should come away well in all the kind lands. Wheat, barley, and peas are promising and up to average—oats hardly an average. Store sheep have sold well, owing to plenty of keep. Wool, I think, has made the best price for many years.

Your readers will think the farmers' prospects good in this district; and so they would be were it not for the so-called progressive local councils, who will in my case swallow up more than the small extra profits I should have made in this favourable year. If all the agricultural papers and societies would make an effort (the unjust burdens on the land are so palpable to all) no government could resist a well organised appeal for relief from rates too grievous to be borne.

July 21, 1905. HENRY WAY.

Tithes, &c. in Berkshire.

SIR,—July has proved a very forcing month, with many days of great sun power and brilliancy, consequently the crops have progressed towards harvest at a rapid rate. Harvest, in short, has commenced, the machines being engaged in most directions yesterday cutting winter oats and rye. Flocks of sparrows are also busy pecking out the wheat, so that this once important cereal in this neighbourhood will be fit for cutting in our forward districts in a few days—say, at the beginning of August. All crops are big and bulky, except a few fields of oats that are thin, and there will be a large quantity of straw to gather in this season. The harvest generally promises to be a full average—wheat above an average—also fairly early as regards time of ingathering. Haymaking has been rather delayed by the thunder showers we have had; it is, however, now nearing completion, and a large quantity of hay of various grades of quality has been put together. Sainfoins have not bulked so large this season; on the other hand, the later meads have proved heavy, so that abundance of winter keep is ensured, and hay will remain at a moderate price—too moderate, in fact, for some growers. Roots have benefited by the showers, and, where attended to, are coming on apace; but the care exercised in this department is not as it was wont to be formerly. Keep is plentiful, and all stock is at a fair price. I should say the county could carry profitably with its present keep outlook nearly double the stock it possesses. Wools have appreciated in value, but not to the extent anticipated just prior to our local fairs. It is evident that sheep farming pays, as the men who have held and dealt in sheep are now buying estates in land.

Fruit prospects are indeed meagre, but bush fruits have been fairly plentiful. The cost of road up keep continues to increase; whilst roads such as our Bath Road, which runs through South Berks in lovely vale scenery, are practically ruined by the motors and the dust they raise for walking or driving exercise.

Unusually large and extensive properties have come into the market of late for sale, and, where offered in separate farms and small holdings, such find ready purchasers. I note, however, that the tithe forms a heavy burden on present land values—in fact, on one large estate offered in several lots the sum realised was closely approximate to the value of the tithe, if capitalised. Mother Church has, therefore, a heavy dig into the land at the present time, and far exceeding one tenth. Seeing how few attend the Church services, and many who do, attend for what they can get, in a mercenary sense, why not devote the tithe to a more useful purpose—say, poor and education? Nonconformists already provide for their religious views, and why cannot our more wealthy Established Church friends do the same? The ordeal would, I believe, do them good. Labour is, on the whole, fairly plentiful, but most farmers complain that it is not of the quality it was wont to be. There will be, however, a lot of stuff to handle in the harvest just about commencing. R. LOVELOCK.

July 21, 1905.

The Harvest in Suffolk.

SIR,—The prospects for our part of the world (Ipswich) as far as oats and barley are concerned are extra good. The wheat is in certain parts rather thin. We are requiring a nice rain to put in the turnips, which we have been unable to do up to the present on account of the drought. Our beet crops are exceptionally good, and the corn is ripening very fast, and, in most cases, I consider harvest will begin on or about the 26th.

We have had an exceptional hay time, and the hay has been stacked in splendid condition. This is, on the whole, perhaps not in quantity up to the average on account of the drought we had in May; but the quality will, undoubtedly, be very superior, and I think, taken all round, farmers will not have much to find fault with in 1905.

W. G. HICKS.

July 20.

Improved Prospects in Essex.

SIR,—We are glad to be able to chronicle a better look out for farmers than for some years past—the weather has been exactly what is wanted, excepting when very heavy thunderstorms have beaten down the crops. A rainy June sets all things in tune in this county, and we are wanting a genial and fine time in August for our harvest.

Wheat, beans, and peas are the crops of the year, though barleys in some places are very good where they were sown early, and as far as we can judge at present we are to have a better sample than for some time past. Oats are a weak crop as a rule—last year's clovers very patchy; mostly sown with foreign seed. A good crop of mangold and swedes seems assured and white turnips now coming up. Lambs are fetching a high price from 3s. 6d. to 5s. dearer than last year, especially ewe lambs. Wool at 12½d. to 13d. is also a help to the flockowner.

Sainfoin and clover hay of last year are rather more saleable, but grass hay seems to be a drug in the market. On the whole the prospect is more cheerful, and we hope that we shall be able to make up for some of the heavy losses of the past two years.

July 20. A. N. R.

The Outlook in South Wilts.

SIR,—The weather during the last month has been favourable to mixed farmers, rain storms at intervals have been a great help to the roots, and yet we have had beautiful haymaking weather between. The hay, which is a fair crop, is mostly got together in excellent condition, and harvest is rapidly approaching, the beginning of August will see it in full swing. Wheat and barley promise well, in fact, I have not seen the latter looking so well in this neighbourhood for some years. Oats are a medium crop, straw short, and on some farms thin and blighted, the very cold dry May seems to have adversely affected the crop; also the mangolds and early rape, both of which are very uneven and much under the average; swedes and turnips are doing well.

I am glad to say the price of sheep keeps pretty well up, and as wool sold at 2d. to 2½d. per lb. over last year (for washed samples), we must look upon the season as less unfavourable than sometimes. The great drawback to agriculture is labour, not so much quantity as quality. The skilled farm labourer of my younger days is departed, and we get in his place men who slouch through as little work as they possibly can as badly as they can; of course, there are exceptions, but they are few and far between.

I fear the system of primary education is now arranged so as to unfit boys in the country to be of any use to the agriculturists, and very little to any one else. I find that it now takes two men at higher wages to do the same amount of work in most of the ordinary field labour than one man at less wages did twenty or thirty years ago.

July 20. E. H. M.

Corn Crops in West Suffolk.

SIR,—Now that haysel is almost finished (some late pieces not yet carted), we may say there has been some very good hay made again this year, and a good average crop.

And now the corn harvest is quickly approaching, some winter-sown oats being already cut and others ready for cutting. The wheat stands well for harvesting this year, and appears to be a fair crop, but is somewhat blighted in the ear.

Barley in this district is rather driven by the storms, but looks as though there might be a good crop if we get weather suitable for ripening and harvesting it. There appears to be a large breadth of oats, but it is thought they are not generally looking well, although there are some excellent pieces. Mangolds are looking well, but rain is wanted for late sowing of turnips.

July 21, 1905. J. J.

Crop Prospects in South Yorks.

SIR,—Hay is a better crop than was expected, and has been got fairly well; but there has been too much sun and too little wind for it to be of quite the best quality.

Swedes I am afraid, will be a very poor crop. In not a few places they have failed altogether. Potatoes look well, if they can be judged by the tops.

Wheat also looks like being a good crop; but both oats and barley are short in the straw. Rain is wanted now that hay harvest is over.

Stocks generally look well, but keep is scarce.

July 21, 1905. H. T.

Utility Poultry Club Laying Competition.

SIR,—In spite of the great publicity given to the Club's proposal to hold a twelve months' laying competition, I regret to say the response for the necessary funds has been most disappointing, and very little help has been received.

I may perhaps mention that the estimated deficit on the competition is £50, which must be provided before the competition begins. In addition, the Club requires a guarantee of another £50 as security against further loss, but it is not expected that this guarantee will be called up.

I cannot advise the Club to undertake the competition unless the amount required is forthcoming, and I trust, therefore, that those who wish to see the competition held will send a donation at once to Mr. C. Dunkley, Wednesfield, Wolverhampton, who will also supply forms of guarantee on application.

The Utility Poultry Club will give a donation to the fund, and the Poultry Club have kindly offered to guarantee £10.—I am, etc.

B. W. HORNE,
Honorary Treasurer, U.P.C.

49, Gloucester Gardens, Hyde Park, W.,
July 21, 1905.

Harvest Weather.

The "Mark Lane Express" Special Three-Day Forecast.

1. Essex Street, Strand, 12 Noon, Monday, July 24th, 1905.

GENERAL PREDICTION.

The general aspect of the barometric distribution is favouring a continuation of moderate winds, varying from N.W. to S.W., and of fair and warm spells interrupted by occasional temporary showery spells, covering most of the area. South, Centre, and East England and S. Ireland will have most fair weather and least rain. Scotland, N. Ireland, Wales and N. England will have most rain and cloud. The general sequence will be: Fair at first in the Southern half of the Kingdom, Fair to Cloudy and Showery in the Northern half. Later some Showers over most of the area except, perhaps, the Southern borders. Finally, Fairer in the W., N. and S., Showery to Fairer in the N.E. Temperature moderate at first, warmer later, finally warm to moderate.

LOCAL PREDICTIONS.

No 1.—**Scotland**:—**At first cloudy to showery; later some rain to fairer; finally fair to cloudy; wind S.W. to N.W. and W.**

,, 2.—**England (N.E.) and part of Scotland**:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire, (N. & E. Ridings).—**At first fair or fine to cloudy; later some showers; finally fairer; wind N.W. to S.W., and then N.W. to W.**

,, 3—**England (East)**:—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.—**The same as No. 2.**

,, 4—**Midland Counties**:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford-Rutland, Shropshire, Stafford, Warwick, Worcestershire, York, shire (West Riding).—**At first fair or fine; later fair to cloudy and some showers; finally fairer; wind light, variable, to W. or S.W.; then N.W. to S.W. and moderate; temperature moderate to warmer and then slightly cooler.**

No. 5.—**England (South)**:—Middlesex, Berkshire, Kent, Surrey, Sussex, Wiltshire, Channel Islands, Hampshire. **Similar to No. 4.**

,, 6.—**Ireland.—At first cloudy, some rain at times, chiefly in the North; later some passing showers to fairer; finally fair to cloudy; wind S.W. to N.W., and then S.W. again; temperature mild.**

,, 7.—**England (North-West) and North Wales.** Cheshire, Lancashire, Westmoreland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.—**At first cloudy, some showers; later some passing rain to fairer; finally fair to cloudy; wind S.W. to W. or N.W., and finally W. to S.W.**

,, 8.—**England (South-West) and South Wales**:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.—**The same as No. 2, with only a temporary showery spell.**

When the local temperature sequence is not specifically indicated, it may be taken as similar to that in the General Prediction.

Age of Moon — Twenty-two days.

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Monday, July 24th.

GENERAL INFERENCE. The recovery of pressure in the anti-cyclone over the Bay of Biscay promises a temporary improvement in the weather in our Southern districts, but as the barometer is again falling in the North-West, conditions are likely to remain unsettled throughout the North and North-West of our Islands.

SCOTLAND, N. and E.—Moderate or light Southerly to Westerly winds; cloudy or dull, some rain; rather cool.

ENGLAND, N.E.—Moderate or light North-Westerly to Westerly winds; fair at first, some showers later.

ENGLAND, E., MIDLAND COUNTIES, and ENGLAND, S. (London and Channel).—Moderate or light Northerly winds, backing later towards West; weather improving temporarily; moderate temperature.

SCOTLAND, W.—Same as Scotland, N. and E.

ENGLAND, N.W. (and N. Wales).—Moderate or Light South-Westerly winds; changeable, unsettled, some showers; moderate temperature.

ENGLAND, S.W. (and S. Wales).—Light Westerly breezes, fair as a whole; moderate temperature.

IRELAND, N.—Moderate South-Westerly to Westerly winds: cloudy or dull: some rain.

IRELAND, S.—Westerly breezes; fair intervals; occasional showers.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—Wheat, English, steady, quiet. Foreign, sellers, ask late rates, but demand very slow. South Russian quoted at 32s to 36s 6d; No. 2 Club Calcutta, 31s 9d to 32s; Persian, 30s to 31s 6d; River Plate, 32s 6d to 34s. Flour slow, unchanged prices. Hungarian quoted at 30s 6d, Minnesota Gilt Edge at 20s 3d, and Iron Dukes at 21s 3d. Maize steady, quiet, at about Monday's prices. Mixed American quoted at 24s 3d, ex quay, and 23s 9d, ex ship; La Plata, at 24s 6d, landed; 23s 9d, ex ship. Barley dull, and prices tending in buyers' favour. Odessa Nico Kherson, ex quay, quoted at 20s 3d. Oats slow, no demand. Common sorts quoted at 14s 6d to 15s 3d.

Mark Lane, Friday.—Wheat: English steady, quiet. Foreign steadily held at fully late rates, but only a moderate business passing. South Russian quoted at 32s to 36s; No. 2 Club Calcutta, at 31s 9d; No. 1 Northern Manitoba, at 35s 6d to 36s. Flour quiet, unchanged prices. Iron Dukes, ex ship, quoted at 20s 9d, and ex quay at 21s 3d; Pittsburg ilt Edge, at 20s 3d. Maize firm btu quiet. Mixed American quoted at 24s 3d; La Plata, 23s 9d to 24s 6d. Barley slow, unchanged. Odessa, Nico, Kherson, ex ship, quoted at 20s, and ex quay at 20s 3d. Oats steady, quiet. Common sorts quoted at 14s 6d to 15s 6d.

COUNTRY.

Ashford, Tuesday.—Market firm at last week's prices. Wheat, 33s to 36s; English feeding barley, 27s to 29s; foreign grinding barley, 21s; new flat maize, 27s; round maize, 27s to 28s; black oats, 20s to 23s; white oats, 21s to 24s; mazagan beans, 30s to 32s; tick beans, 33s to 35s; flour, whites, 31s; seconds, 28s.

Banbury, Thursday.—Wheat, red, 32s to 34s; barley, 25s to 30s; beans, new, 30s to 33s; oats, 21s to 24s; peas, 30s to 35s per qr.

Berwick, Saturday.—Small attendance, with little supplies of grain, prices remainin gunchanged.

Birmingham, Thursday.—Business at this market is very quiet, and the attendance very thin. Foreign wheat met with but a poor inquiry, and at about 6d per qr. lower on the week. Grinding barley has declined 6d since last market day. Plate maize has advanced 3d and flat ½d per cental. English oats, 21s to 21s 6d per qr. (312lb.); beans, 13s 6d per bag (196lb.), delivered Birmingham.

Bury St. Edmunds, Wednesday.—The market was poorly attended, and the trade was slack all round. A few samples of wheat changed hands at about last week's prices of 33s to 33s 6d per qr, but the trade was only of a retail character. Oats, grinding barley, beans, peas, and maize were all firm at late rates, although in moderate demand. Feeding stuffs firm.

Cambridge, Saturday.—During the week the wheat has been about unchanged. A few pieces of winter oats and rye are cut. At this market the few samples of wheat on offer made former prices, from 32s to 34s per 504lb. New winter oats sold at 19s. Old oats the turn against sellers.

Canterbury, Saturday.—Prices of English wheat are maintained from 34s to 36s, but sales are difficult to make. Oats are in demand at from 20 sto 22s, and grey peas are very scarce at from 32s to 35s per quarter. The cutting of winter barley, oats, and peas has commenced.

Carlisle, Saturday.—Very small supply of oats in our market to-day; slow trade at late rates; 22s 6d to 23s 6d per 336lb.—THOMAS ROBINSON.

Chelmsford, Friday.—Very quiet market, and no change in prices for the little wheat on offer. There were a few samples of new oats brought to market.

Chester, Saturday.—The hay harvest still interferes with the attendance, and the supplie sof English grain are small. The values of all descriptions were well maintained. Egyptian beans have advanced 6d per 480lb, and Indian corn 3d per 240lb. Quotations:—New white wheat, 4s 7d to 4s 9d per 75lb; new grinding barley, 3s 3d to 3s 6d per 64lb; old beans, 5s 9d to 6s per 80lb; Egyptian beans, 33s 6d to 34s per 480lb; old oats, 3s 2d to 3s 4d; new ditto, 2s 9d to 2s 11d per 46lb

Chichester, Wednesday.—Good attendance, but very little trade doing. It was reported that harvesting had commenced in some parts of the neighbourhood. Quotations:—White wheat, 34s to 34s 6d; red ditto, 34s to 34s 6d; grinding barley, 20s to 23s; English oats, 18s to 23s; maize, 25s to 26s; flour, 27s to 29s.

Colchester, Saturday.—A week of hot forcing weather has brought harvest on quickly. Wheat-cutting has commenced and will be getting general next week. Several samples of new winter oats were offered, making 17s to 18s per qr.: no wheat showing. JOSEPH WILES AND SON, LTD.

Coventry, Friday. — Only a moderate attendance. Trade was but moderate, and prices ruled as follows:—Wheat, 12s to 13s per 196lb.; barley, 29s to 33s per 448lb.; oats, 23s to 25s per 352lb.; beans, 12s 6d to 13s per 196lb.; peas, 11s 6d to 14s per 196lb.

Derby, Friday. There was no change to note in the supply and value of wheat, which continued quiet at late rates. Spring corn unchanged. Wheat, white, 34s to 35s; red, 33s to 34s; malting barley, 25s to 28s; beans, 32s to 35s; oats, 20s to 21s.

Devizes, Thursday.—Very little corn of any description at to-day's market. The fine weather has forced on the harvest. Oats, barley, and rye have already been cut, and wheat cutting will become general in about ten days. The following were the quotations: New wheat, 16s 6d to 17s 6d; secondary, 15s to 16s; best barley, 26s to 28s; secondary, 20s to 24s; rye, 22s to 24s; old black oats, 13s to 21s; white ditto, 19s to 22s; malting barley, 26s to 28s; beans, 16s to 18s; fine flour, 24s to 26s; extra fine, 27s to 30s.

Doncaster, Saturday.—Very small attendance of buyers. English wheat firm, and top values 1s 3d per load, but nearly all the best samples have been disposed of. Foreign was also firm, having recovered from last week's depression. Only a limited supply of feeding stuff. Old oats firm at late rates, with a better inquiry. Beans scarce and 6d per quarter dearer.

Dorchester, Saturday.—The attendance again to-day was only moderate, and there was but a very limited supply of corn, though quite up to the requirements of the trade, which was exceedingly quiet. Prices all round were nominally unchanged, and from all that we could gather, the supply of last year's crop is practically exhausted, not only of wheat, but equally so of all other sorts.

Dublin, Friday.—Wheat, 32s to 36s; feeding barley, 24s to 25s; malting ditto, 28s 6d to 29s; oats, 14s to 14s 6d; cwt. meal extra, 16s 6d to 17s; flour, 11s to 12s 6d; pollard and bran, 6s to 6s 6d.

Exeter, Friday.—Trade dull. English wheat scarce, and 1s/- as dear as last week. Foreign unchanged. Barley 3d cheaper. Maize very firm. Flour firm. English wheat, 4s 3d; superfine flour, 26s to 28s; fine, 23s to 26s.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange, and a holiday feeling still prevails. Market quiet for all articles of the trade, and prices practically unchanged on the week.—GIBSON AND CLARK.

Glasgow, Friday.—Spring wheats are held for 1½d to 3d advance, but buyers are loth to respond. Flour quiet of sale; for forward shipment the price is rather in favour of buyers. Mixed American maize firm at 14s 1½d per 280lb, with a moderate demand; round moves quietly at 15s. Beans, barley, oats, peas, and oatmeal slow at steady prices.

Gloucester, Saturday.—No English wheat on offer. Foreign in better demand at 3d to 6d advance. Maize 3d to 6d dearer. Oats and barley firm at late rates.—WAIT, JAMES AND CO.

Grantham, Saturday. — The market was poorly attended, and very little business was done. A few samples of old wheat were disposed of up to 36s per quarter.

Hereford, Wednesday.—Harvesting operations interfered with the attendance. English wheat remained about the same as last week, but practically no business was passing. Old oats were very firm. Wholesale quotations: Wheat, per 62lb., 3s 10d to 4s; barley, per 56lb., 2s 9d to 4s; oats, per 40lb., 2s 3d to 2s 9d; beans, per 65½lb., 3s 9d to 4s; vetches, per 65½lb., 4s 6d to 6s 6d.

Ipswich, Tuesday.—Wheat: The supply is now so small that prices are almost nominal at from 33s to 34s per qr. Feeding corns were not in large demand, but prices are generally good, and fully firm on the week. Oats at 21s to 23s, grinding barley at 24s to 27s, and maize at 25s per qr. Feeding stuffs were also firm at last week's prices.

Leeds, Tuesday.—Under the influence of continued fine weather, heavy shipments, and weak American advices, the wheat trade has turned flat, the demand is of the merest retail character, and, although there is no pressure on the part of holders to force sales, prices of most foreign descriptions have declined 6d to 9d per qr. on the week. English, though scarcity, maintains its value. Maize, beans, and oats quiet.—DUNNS AND CO.

Leeds, Friday.—Both English and foreign wheat fully maintain Tuesday's prices, with a slight advance for best Americans. Slow demand for beans, peas, oats, barley, maize, and flour, prices, if anything, favouring buyers.

Leicester, Saturday.—There was a fair attendance of buyers, with restricted supplies of home-grown wheats. Red wheats, 32s to 34s; white wheats, 33s to 35s per 36 stones; grinding barley in fair demand; beans steady; fine oats, 23s to 24s per 20 stones.

Lincoln, Friday.—There was a small attendance, and very little grain on offer. Wheat and oats samples were so few and trade so quiet that any change in quotations could not be gathered. Feeding stuffs generally firm, and maize fetched recent prices.

Liverpool, Friday. The market has had a very small attendance, and sales very quiet but firm, from ½d to 1d dearer. Flour very quiet, but without further quotable change in prices. Maize, mixed American, is firmly held for 1d advance, and there is a fair inquiry for the small quantities available. Plate is steady, with a quiet trade, and the turn in sellers' favour. European sorts are irregular, with only a small inquiry. Barley, malting and feeding sorts, quiet, unchanged. Beans firm, at 3d advance, and there is a fair demand. Peas firmly held at full prices, but in small demand. Oats a dull trade, at about late rates. Oatmeal firmly held at recent currencies, but demand slow. Oilcake a very quiet trade, without change in price.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday. — Business at the Corn Exchange to-day was by no means extensive. The millers hold off buying wheat except for present need; the cost of it is just about the same as on Thursday last. Barley is slightly dearer, and black oats are a trifle higher than recently, but that cannot be noted for white sorts. Maize is firm, the demand not brisk, as price is considered high. No change in any other description of grain.

Manchester, Thursday. — The market was slow. English wheat was dearer, but foreign somewhat slow. Flour quiet and unchanged. Indian corn, mixed American, about 1d dearer. Foreign barley unchanged. Peas, Canadian, dearer, and both English and foreign dearer. Bran occasionally 6d per load dearer, and thirds unchanged. Oatmeal was firm.

Newark, Wednesday.—Wheat a very small show, and prices firm at last week's extreme rates. Oats and beans firm at full prices. Quotations:—Wheat, 34s to 35s; oats, 21s to 23s; beans, 34s to 35s per qr.

Newcastle-on-Tyne, Saturday.—A quiet demand prevailed at our to-day's market for wheats and last week's prices were fairly maintained; maize scarce on spot and dearer; foreign oats steady at last week's quotations with a fair demand; Scotch oats, however, was neglected and to tempt buyers lower quotations had to be made; beans again dearer; peas unchanged; barley trade almost nil.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—There was again a small attendance and few samples on offer; prices were unchanged. Wheat, 32s to 34s; barley, 24s to 32s; oats, 20s to 23s; beans, 31s to 34s; peas, 28s to 33s; flour, 24s to 29s.

Nottingham, Saturday. The few parcels of English wheat still in merchants' hands are held for too high a price for millers; foreign slightly in sellers' favour; grinding barley steady; oats in poor supply and values maintained; beans scarce and held for 6d advance. — ROBT. HUBBLE.

Peterborough, Saturday.—Another week of forcing weather has ripened the growing crops rapidly, and here and there a forward piece of wheat will be cut next week. Not much business passing; wheat was scarcely so well sold, as last week; spring corn unaltered. THOMAS HILL AND SON.

Plymouth, Thursday.—There was a very fair attendance on our market this afternoon. Wheat was unchanged; barley 6d and maize 3d dearer, with oats also unchanged. ORLAND& DAVIS AND CO.

Reading, Saturday.—The market again was very quiet, and but little business was done at the following prices:—Wheat, 33s to 36s; grinding barley, 23s to 26s; oats, 20s to 22s; beans, 30s to 36s; peas, 28s to 31s; flour, 24s to 27s.

Retford, Saturday. — Very small supply of English wheat, the few samples on offer making 32s 6d to 33s per quarter; slightly damaged maize was worth 26s 6d, and sound 27s 6d per 34 stones delivered here; grinding barley, 24s 6d; white oats, 20s to 22s; and black ditto, 19s 6d and 20s per quarter. The prospects of the coming harvest in this district were reported as follows: Wheat in fair condition, and likely to be beyond the average yield; oats light; barley requires rain.

Ripon, Thursday.—English wheat has an upward tendency, and made 1s per qr. more money. A moderate attendance. English wheat, 33s 6d to 34s; foreign wheat, 32s to 36s; grinding barley, 23s to 24s; oats, 19s to 21s; round maize, 26s to 26s; flat maize, 27s to 27s 6d.

Shrewsbury, Saturday.—Quotations: Wheat, 14s to 14s 6d per 496lb.; old white oats, 16s to 17s; new ditto, 13s to 14s 6d; peas, 11s 6d to 12s 6d; beans, 15s to 16s per 496lb.

Stamford, Friday.—Small attendance, many farmers having commenced harvesting. A large amount of old oats has been cut. Old oats are almost exhausted. The reports respecting the prospects of this season's crops are very encouraging, barley being particularly promising. Old oats, 21s to 24s; wheat, 32s to 33s; barley, 28s to 28s 3d; beans, 32s to 33s per quarter.

Sunderland, Saturday.—Very little wheat offering, which held for full prices. Barley and oats unchanged. Arrivals nil. E. AND F. RICHARDSON.

Tunbridge Wells, Friday.—Wheat, white, 34s 6d to 35s 6d; red ditto, 33s 6d to 34s 6d; barley, 27s to 32s; grinding ditto, 19s to 23s; English oats, 19s to 21s; rye, 23s to 24s; peas, 31s to 36s; beans, 32s to 36s; tares, 48s to 56s; maize, 24s to 28s.

Warwick, Saturday.—Very little business doing. Very small supply of wheat, and new supply waited for by buyers, who will be ready for it as soon as it can be got upon the market. No alterations in price.

Winchester, Saturday.—Wheat in fair demand at fully last week's rates; barley and maize a shade dearer on the week; oats unaltered; flour steady at late rates.—FEAR, COLEBROOK AND CO., LTD.

Wisbech, Saturday.—A small attendance and very little doing at market; farmers' wheat about exhausted; reds nominally 34s; oats 20s 6d to 21s 6d; other articles unchanged.—JAMES FLETCHER.

Worksop, Wednesday.—Poor attendance. White wheat, 32s to 33s; red ditto, 31s to 32s; barley, 26s to 28s; grinding barley, 24s to 26s; white oats, 21s to 22s; black oats, 20s to 21s; flat maize, 27s to 28s; round maize, 27s to 28s per qr.

Yeovil, Friday.—But little home-grown grain offering; best samples quoted at 32s 6d to 33s 6d per quarter; secondary, 30s to 31s; foreign, 33s to 34s; oats, white, 16s 3d to 21s 6d; black ditto, 17s 3d to 20s 3d; Irish black, 17s 9d to 18s 3d; best barley, 28s to 30s; secondary, 22s 6d to 25s; foreign grinding, 20s 6d; maize, round, 24s 6d to 25s; ditto, flat, 23s to 24s; beans, 32s 6d to 36s; yre, 22s 6d to 23s 6d; tares, winter, 4s7 6d to 52s; spring ditto, 40s to 42s 6d. Flour in quiet demand, superfine sellnig at from 26s 6d to 28s, and fine 23s 6d to 26s. Offals continue to sell well, bran making more.

York, Saturday.—There was practically no wheat left in this district. On the market prices are unchanged. Fine white, 32s to 33s; red and mixed, 31s to 32s per quarter of 36 stones; feeding barley, 24s to 26s per quarter of 32 stones. Oats stead; white Tartary, 18s to 19s; black, 19s to 20s; short oats, 20s to 21s per quarter of 24 stones; rye, 7½d per stone; beans, 10d to 11d.

FOREIGN

Hamburg, Saturday.—The weather has been rather unsettled the last week, but is improving now, with glasses rising. Prospects in Germany remain quite satisfactory, but much depends upon the weather at harvest time, as cutting of barley will likely not commence before early next month, and the same may be said of the Bohemian and Moravian districts; whilst in Hungary the crop is practically finished. As regards quantity it has turned out quite satisfactory, but quality varies a good deal, principally in colour.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday. — Daily thunderstorms caused some anxiety about the rye crop, and prices advanced. Reports respecting other cereals continue satisfactory. Root crops are decidedly benefiting from the rainy weather. Wheat little inquired after. The growing crop looks promising; 60-61 Ko. Mecklenburg and Saale new crop; August September delivery is offering at 32s to 32s 6d per 504lb.; 80 Ko. River Plate prompt is held at 30s 9d to 31s; American Hard Winter No. 2 and Red Winter No. 2, August-September, 30s 6d; 78-79 Ko. Danubian 2 per cent., 29s 6d per 480lb. c.i.f. Hamburg. Russian rye ready for shipment from hence is in demand at 24s 3d to 24s 9d; 9 15-20 South Russian, July shipment, is selling at 23s 6d; August-September is held at 23s 3d per 480lb. c.i.f. Hamburg. According to special reports respecting the new crop of barley, there are good prospects in the Saale districts, there being a large quantity and well filled grains; if the present rainy weather does not last too long we may expect fine quality. From Bohemia and Moravia reports are varying, harvest will be later than last year, and the result in general scarcely so good. Samples of Slovakian barley show a stout grain and varying colour; but these first samples are of little use; it will yet take a few weeks till reliable samples of actual parcels can come forward. In Northern Germany and in Denmark the crops so far have a good appearance. Feeding barley meets more attention; 60-61 Ko South Russian, July, is selling at 18s 9d; August, 17s per 100lb. c.i.f. Hamburg. Maize on the spot continues scarce. Mixed and River Plate costs 23s 9d to 24s 3d; July-August, 23s to 23s 3d per 180lb. c.i.f.—JOHN TATLOCK.

Paris, Wednesday.—In provincial markets wheat prices are firmly maintained, and the few offers are quite sufficient to meet millers' requirements. Business is very calm at the Bourse de Commerce. In view of the return of fine weather and less pessimistic reports as to the state of the crops buyers are reserved, and term prices have fallen from 5c. to 20c. for flour, and from 5c. to 10c. for wheat. Rye quiet, unaltered. New home-grown wheat will not appear on the Paris market so soon as was expected, as the work of harvesting has been retarded by laid fields; the fields left standing are very fine. Business, meanwhile, is very quiet; in spot wheat holders are asking an average rise of 25c. per 100 kilos, but millers are buying hardly anything so that this increased quotation is merely nominal. Oats: The stocks at Paris only amount to 4,140 qrs., not sufficient for one day's consumption; this is making shorts nervous, and the price of current parcels exceeded 20f. to-day. The demand for barley should soon become brisk, as stocks are exhausted. Maize market steady at late prices.

THE BALTIC.

Wheat cargoes are so out of favour that their holders, making a grace of necessity, quote a firm market. The four recorded transactions include arrived Australian at 31s. 9d. per 480 lb., White Calcutta on passage at 30s. 9d. per 492 lb., and Argentine for prompt shipment at 29s. 9d. per 480 lb.

Maize cargoes are firmer for near futures. The sales include American at 22s. 9d. per 480 lb., and Argentine at 23s. 3d. nearly due, 23s. due in a month (sailer), and 22s. 9d. prompt shipment. By a fast steamer, 23s. would be demanded.

Barley cargoes are quiet, but 17s. 6d. per 400 lb. is a price which tempts purchasers of the new crop, for October shipment from Russia.

Other cargo sales include White Liban oats at 15s. 3d. per 304 lb., Smyrna beans at 30s. per 480 lb., Calcutta linseed at 40s. 3d. per 410 lb., and Egyptian cottonseed at £5 16s. 3d. per ton.

The London Corn Trade Association C. F. and I. quotations for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian Wheat Contracts, are as follows:—No. 2 Club Calcutta 30s. 6d., Soft Red Calcutta 30s. 3d., Bombay Soft White Delhi 31s. 6d., Karachi Soft White Delhi 31s. 6d., Soft White Karachi 30s., Choice White Karachi 30s. 6d., Soft Red Karachi 29s. 9d. These prices are all per 492 lb.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 6 wheat (1 Adelaide, 1 Bahia Blanca, 1 Brisbane, 2 Melbourne, and 1 Sydney), 2 linseed (1 Buenos Aires and 1 Rosario); total 8.

The sailings of grain and seed-laden vessels from ports-of-call for the week were 7 wheat (1 Belfast, 1 Birkenhead, 1 Bristol, 1 Dublin, 1 Hamburg, 2 London), 2 linseed (1 Dunkirk, 1 Hull); total 9.

Since January 1, 1905, the total arrivals have been 233 wheat, 2 flour, 2 wheat and oats, 1 wheat and linseed, 1 flour and wheat, 13 barley and wheat, 8 barley, 5 maize, 1 beans, 4 locust beans, and 34 linseed; total 304.

Last week during the same time the arrivals were 122 wheat, 1 wheat and maize, 30 barley and wheat, 14 barley, 4 maize, 4 beans, 4 locust beans, 1 rye, 17 linseed, and 1 canaryseed; total 198.

EGGS.

(Prices are 1s., except where otherwise stated.)

Wednesday.—Barnsley: 11 to 12. Boston: 13. Colne: 1s. per score. Dorchester: 11½ to 12 per 4 z. Goole: 12 and 13. Hereford: 12 and 13. Holsworthy: 13. Keighley: 12 and 13. Kirkby-moorside: 12 and 13. Knaresborough: 12. Louth: 13. Market Drayton: 12 and 13. Market Weighton: 13 or 14. Newton Abbot: 13 per dozen. Northallerton: 12 or 13. Truro: 2d per dozen. Uttoxeter: 1s 2d per score. Worksop: 1s 2d per score.

CATTLE.

Thursday.—Axminster: 11 to 12. Barnsley: 11 and 12. Brigg: 11 to 13. Driffield: 11 and 12. Devizes: 12 to 13. Evesham: 12d to 1s; per doz. Kidderminster: 14. Northtawton: 12. Penzance: 9d to 11d per doz. Penrith: 13. Ripon: 13 or 14. Scarborough: 11. Wetherby: 13 to 14.

Friday.—Altrincham: 1s 1d to 1s 4d. Ashburton: 1s 2d to 1s 3d. Crewe: 1s 2d to 1s 3d. Cullompton: 1s 1d to 1s 2d. Helmsley: 11d to 1s 1d. Leyburn: 1s 1d to 1s 2d. Lostwithiel: 12d. Macclesfield: 1s 2d to 1s 3d. Redruth: 1s 2d to 1s 4d per 24 ounce roll. Richmond: 1s 2d. Austell: 1s 2d. Stockport: 1s 3d to 1s 4d. Sandbach: 1s 2d to 1s 3d. Tavistock: 1s 2d to 1s 6d. Totnes: 1s 2d to 1s 3d. Whitchurch: 1s to 1s 2d. Barnstaple: 1s 1d.

Saturday.—Appleby: 11d to 1s. Berwick: 11d to 1s. Bridgnorth: 1s 1d to 1s 2d. Carlisle: 11d to 1s. Doncaster: 1s 1d to 1s 2d. Grantham: 1s 1d to 1s 2d. Howden: 1s to 1s 2d. Lancaster: 1s to 1s 1d. Malton: 10d to 1s. Pontefract: 1s 1d. Retford: 1s 2d to 1s 4d. Richmond (Yorks): 1s 3d to 1s 4d. Shrewsbury: 1s to 1s 1d. Skipton: 10½d to 1s. Stokesley: 11d to 1s. Whitby: 1s. Worcester: 10d to 1s 3d. York: 1s 2d to 1s 3d.

MILK.

London, Saturday.—Week ending July 21.—The prices of milk has been firm, prices ranging from 7d to 1s 2d per imperial gallon, the average price being about 8d per gallon. — THE CENTRAL ASSOCIATION OF DAIRY FARMERS.

BUTTER.

(Prices are at per lb., except where otherwise stated.)

Wednesday.—Barnsley: 1s 1d to 1s 2d. Boston: 1s to 1s 2d. Colne: 1s 0½d. Dorchester: 11d to 1s 1d. Goole: 1s to 1s 1d. Hereford: 1s to 1s 2d. Kirbymoorside: 10d to 1s. Knaresborough: 1s 6d to 1s 8d per 24oz. roll. Market Drayton: 1s to 1s 1d. Market Weighton: 1s 6d to 1s 10d per 24oz. roll. Truro: 8d to 10d. Uttoxeter: 11d to 1s. Worksop: 1s. Keighley: 1s to 1s 2d; Louth, 11d to 1s; Holsworthy: 1s 4d.

Thursday.—Axminster: 10d to 11d. Birmingham: 1s 1d to 1s 3d. Brigg: 1s to 1s 2d. Driffield: 10d to 11d. Devizes: 1s 2d to 1s 3d. Evesham: 1s to 1s 0½d. Kidderminster: 1. Northtawton: 1s. Penistone: 11½. Penzance: 9d to 11d. Plymouth: 1s 3d to 1s 5d. Ripon: 1s 8d to 1s 10d per 24oz. roll. Scarborough: 1s 3d. Wetherby: 1s 2d to 1s 4d.

Friday.—Ashburton: 10 and 11. Altrincham: 10. Barnstaple: 14. Camelford: 10d per dozen. Derby: 12. Helmsley: 14. Leyburn: 13 or 14. Lincoln: 13 to 15. Lostwithiel: 16. Macclesfield: 10 and 11. Redruth: 9d per dozen. St. Austell: 14. Stockport: 10 and 11. Tavistock: 12 to 13. Totnes: 10d to 11d per dozen. Otley: 12 or 13. Whitchurch: 13 and 14.

Saturday.—Appleby: 12 and 13. Berwick: 10d to 11d per dozen. Bridgnorth: 12. Carlisle: 12 and 13. Doncaster: 12 to 14. Grantham: 14 and 15. Howden: 13 and 14. Lancaster: 10 and 11. Malton: 12 to 14. Pontefract: 13. Retford: 1s 7d to 1s 8d per score. Richmond (Yorks): 12 and 13. Shrewsbury: 12 and 13. Skipton: 12 and 13. Stokesley: 12 and 13. Whitby: 12. Worcester: 12. York: 10 to 12.

CHEESE.

Glasgow, Wednesday. — Arrivals of cheese at the Glasgow market were free this week. There was a fair trade passing, especially in Dunlop cheese, full prices being obtained. Cheddars were almost neglected. Cheddars and Dunlops were priced from 46s to 52s per cwt. Canadians attracted sparse attendance, home parcels being reckoned better value.

Newport, Wednesday. — A fair demand and an average attendance. Quotations:—Caerphillies, 42s to 46s per cwt; fancy dairies, 43s to 48s; truckles, 43s to 68s; doubles, 40s to 42s; Derbys, 50s to 54s. A supply of ten tons was pitched.

WOOL.

Canterbury, Saturday.—The slight depression noticed in the market last week seems to have passed off, and there is now a better feeling in regard to trade; 1s 9d is given for best lots of Kent fleeces, 8d for lamb wool, 1s 0½d for half-bred fleeces, while Downs make from 1s 1d to 1s 1½d per lb.

Halifax, Saturday.—Business for the raw material is quiet, and there is some change in price in favour of the buyer. The decline is attributed, in part, to the receipt of American purchases are not leaving this side. While merinos and fine cross-breds are almost unchanged, coarse cross-breds are lower, and have brought down the value of home grown wool.

London, Saturday.—English per pkge.: 4 [illegible]—Fleeces, South Down hoggs, £[illegible] to £14; [illegible] to [illegible] 12s, £12 10s to £13; half-bred wethers, £[illegible] to £13; Kent fleeces; £12 to £12 5s; South Downs ewes and wethers, £12 to £13 10s; Leicester do., £12 to £12 10s; Colonial—per lb. Vic., Fleece, super., 1s 1[illegible]d to 1s 1[illegible]d; super. good, 1s 1[illegible]d to 1s 2d; super. average, 1s 1[illegible]d to 1s 2[illegible]d; fair; 1s 1[illegible]d to 1s 2[illegible]d; N.S.W., super. average, 1s 2[illegible]d to 1s 2[illegible]d; greasy average, 11d to 1s 1[illegible]d; S. Aus., greasy average, 9d to 9½d; N.Z., super. average, 1s 2[illegible]d to 1s 3d; greasy average, 1[illegible]d to 11½d; Cape, super. average, 1s 2[illegible]d to 1s 3d; fleece average, 1s 1[illegible]d to 1s 2[illegible]d; greasy average, 9[illegible]d to 10d; Natal, scoured, 1s 5d to 1s 6d; greasy average, 9[illegible]d to 9½d; crossbreds grs. Vic., good to super., 1s 1[illegible]d to 1s 2d; New Zealand, fine, 1s 2[illegible]d to 1s 3d; fine medium, 1s 0[illegible]d to 1s 1d; fair to good, 1s 1d to 1s 2d.

York, Thursday.—Only a moderate supply, the majority of which had been forward last week, but not the number of new sheets promised, prevented large figures. Trade continued quiet at about 5d per stone reduction upon last week's prices. Good bred hoggs, 13s 6d to 14s; good bred ewes, 12s 6d to 13s; cross-bred ewes, 11s 6d per stone of 14lb.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The brilliant sunshine of the past week has brought us to the very gates of the wheat harvest. The Lammas-loaf of our forefathers was an offering on a day coincident not with us August 1, but with August 10th and 11th. This year it will be quite easy to offer loaves of new wheat on the 10th prox., for plenty of wheat will be in sheaf by the 1st. The yield should be good in quality, as well as 10 per cent. above the average in quantity. On a total wheat area of 1,800,000 acres, we may anticipate perhaps a yield of 7,650,000 qr., and there are some reasons for believing that the area actually under cultivation is rather larger than 1,800,000 acres. The acreage returns, however, will be available in August, so that estimates can well tarry until then.

The Buff Book Code, 2594, which was issued on the 19th inst., gives us some useful particulars of what markets are noted for good prices and what exchanges are, unfortunately, of an opposite repute. We also learn that certain markets are ceasing to sell corn. These, happily, are very few in number, but, of course, our regret is that there should be any. We have however, to mention Kendal, Cardigan, and Garstang. English wheat sales now exceed 100,000 qr. a year—at Norwich, 111,601 qr., and at Peterborough 103,299 qr. They exceed 50,000 qr. at Mark Lane, 61,141 qr. at Chelmsford, 73,974 qr. at Ely, 50,914 qr. Cambridge, 73,761 qr. Lincoln and Hull, 76,388 qr. London business has not declined, but the actual market structure is altogether inconvenient and behind the times, with the result that there has been a great increase in the business done in offices and also by telephone. Of such business our readers hear, through our market reports, but the Government inspector gets no particulars of actual sales; to these he is only entitled where the grain was sold on the actual market.

English barley sales now exceed 100,000 qr. at the following markets:—Ipswich, Norwich, Lynn, Lincoln, and Berwick. Of these exchanges Norwich is easily the chief. London sells 53,711 qr. of barley.

Oats are a bigger business in London than anywhere else, and 127,372 qr. have been sold in the past twelve months on the actual market. Other large markets for oats are Colchester, Ipswich, Yarmouth, Norwich, Salisbury, Devizes, Lynn, Spalding, Basingstoke, Boston, Lincoln, Peterborough, Chichester, and Wisbech, but none of them compare for a moment with London. London and Lincoln are good markets for English pulse, London and Chelmsford for English rye.

With respect to prices, the best for wheat have been realised at Mark Lane, Chelmsford, Ipswich, Birmingham, Farnham, Kingston, Canterbury, Maidstone, and Leicester, while exceptionally low values seem to rule in the districts of Peterborough, Spalding, Brigg, Wadebridge, and Truro.

Barley fetches satisfactory prices in the districts of Halesworth, Reading, Guildford, Rochester, Maidstone, and Hertford, but is exceedingly disappointing in price in the regions represented by Cheltenham, Warminster, Plymouth, Truro, Wadebridge, Dorchester, Banbury, Hull, and, we regret to add, Mark Lane.

Oats usually sell well in London, but during the last twelve months local demand has been exceptionally good, and the London average has been exceeded at Uxbridge, Halesworth, Melton Mowbray, Coventry, Birmingham, Warwick, Stratford-on-Avon, Oxford, Bicester, Aylesbury, Abingdon, Wallingford, Farnham, Guildford, Redhill, Kingston, Croydon, Rochester, Canterbury, Ashford, Maidstone, Tunbridge, Lewes, Horsham, Southampton, Plymouth, Oakhampton, Bath, Gloucester, Tewkesbury, Ross, Hereford, Evesham, Worcester, Oswestry, Burton, Derby, Sheffield, Ripon, Northallerton, Darlington, Stockton, Newcastle, Alnwick, Berwick, Carlisle, Penrith, Wrexham, Welshpool, and Cardiff.

It is evident that unless London wishes to lose its trade in barley of home growth it must bid a little better price for it, while the metropolitan average for oats, though not unreasonably low in itself, clearly is ceasing to be high enough, a long list of other places where London is outbid being, as we have just seen, disclosed. The foreign oats do not satisfy the owners of valuable horses or supply enough vim for the horses which are very hard worked in the London streets. Consequently English oats are deserving of a better price than London is at present willing to pay for them. The warning of the new Government return should not be neglected.

Sales of English wheat at the statute markets since September 1 have been as follows:—

This season, 1,592,000 qrs. at 28s 9d per qr.
Last season, 2,005,000 qrs. at 27s 1d per qr.

The rise of 1s. 7d. on the year is gratifying

Sales of English barley at the same list of markets have been as indicated:—

This season, 3,132,000 qrs. at 24s 9d per qr.
Last season, 2,772,000 qrs. at 22s 1d per qr.

Sales of oats thus compare:—

This season, 1,125,000 qrs. at 17s 0d per qr.
Last season, 1,006,000 qrs. at 16s 3d per qr.

The imports of the week were as follows:—

Wheat, 563,000 qrs.; a large supply.
Flour, 56,520 sacks; a very small arrival.
Barley, 27,000 qrs.; a very small arrival.
Oats, 196,000 qrs.; a large supply.
Maize, 144,000 qrs.; two-thirds of an average.

The total imports since September 1 have been:—

Wheat, 21,200,000 qrs.; a large supply.
Flour, 3,960,220 sacks; the smallest for twenty years.
Barley, 5,492,000 qrs.; mediocre supplies.
Oats, 5,432,000 qrs.; fair supplies.
Maize, 8,606,000 qrs.; small supplies.

Imports of beans since harvest have been:—

This season	339,000 qrs.
Last season	442,000 qrs.

Imports of peas this season thus compare with last cereal year:—

1904-5	393,000 qrs.
1903-4	441,000 qrs.

The falling off is chiefly in Canadian, Australian, and New Zealand peas; Indian and Dutch sorts have arrived in reasonable quantity.

Stocks of wheat in granary are thus computed:—

In farmers' hands	675,000 qrs.
In merchants' hands	2,817,000 qrs.
Total	3,492,000 qrs.

The supply of wheat on passage shows little change from a week ago.

American	78,000 qrs.
Russian	315,000 qrs.
Indian	940,000 qrs.
Argentine	690,000 qrs.
Australasian	647,000 qrs.
Various	50,000 qrs.
Total	2,720,000 qrs.

The quantity of flour on passage has sunk to the all but unprecedentedly low quantity of 122,000 sacks.

Of maize, the quantity on passage exceeds an average, but the supply on spot is so small that the price of the staple has again hardened.

Flat corn	300,000 qrs. on passage.
Yellow corn	600,000 qrs. on passage.
Round corn	30,000 qrs. on passage.
Total maize	930,000 qrs. on passage.

Of Barley, 165,000 qr. are on passage—100,000 qr. of Russian, 10,000 qr. of Californian, 35,000 qr. of Smyrna, 10,000 qr. of Roumanian, and 10,000 qr. of Persian.

Of oats, 517,000 qr. of linseed, 212,000 qr., and of cottonseed, 210,000 tons are on passage.

America reports that the winter wheat is in good condition, the harvest weather is almost too hot, and farmers find the labour of actual harvesting excessive. The shipments last week were 31,000 qr. of wheat, 7,000 qr. of barley, 11,000 qr. of oats, 93,000 qr. of maize, and 26,000 sacks of flour.

Argentina is shipping more maize than ever, but of wheat she is not sending off quite as much as before. Latest returns are:—Wheat, 242,000 qr., maize, 472,000 qr.; and linseed, 28,000 qr.

Russia has still a wonderful reserve of old wheat, but the maize, barley, and oat reserves are at last showing signs of exhaustion. Last week's exports were:—Wheat, 563,000 qr.; barley, 110,000 qr.; oats, 216,000 qr.; and maize, 21,000 qr. Roumania added 95,000 qr. of wheat and 7,000 qr. of barley. Roumanian produce approximates closely with Russian in its general characteristics and market value.

Other shipments of the week were 217,000 qr. of wheat, and 20,000 qr. of linseed, from India; 14,000 qr. of wheat, from New Zealand; 14,000 qr. of maize, from European Turkey.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Fruit and greenstuffs in season in plentiful and steady demand. Quotations for English stock: Apples, 8s to 0s per bushel; grapes 9d to 3s 6d; peaches, 1s 6d to 12s per dozen; green figs, 1s to 3s 6d; nectarines, 2s to 15s per dozen; greengages, 8d to 1s per box; cherries, 3s to 10s 6d; gooseberries, 2s 6d to 4s; black currants, 3s to 5s 6d; re delitto, 3s to 5s per half sieve; apricots, 3d to 10d per box; ditto, 4s 6d to 6s 6d per half sieve; melons, 1s to 3s each; tomatoes, 2s to 4s 6d; beans, 2s 6d to 3s; scarlet runners, 2s 6d to 3s per half sieve; broad beans, 9d to 1s per bushel; carrots, 1s 6d to 3s; turnips, 2s to 4s; mint, 1s 6d to 3s; parsley, 1s 6d to 2s; radishes, 4d to 5d per dozen bunches; cabbages, 3s to 5s; vegetable marrows, 3s 6d to 5s per tally; green onions, 2s to 3s per dozen bunches; mushrooms, 6s to 12s per 12lb.; beetroots, 2s to 3s per dozen bunches; spinach, 1s 6d to 2s per bushel; green peas, 2s to 4s 6d per bag; ditto, 2s to 3s 6d per bushel; cos lettuce, 6d to 10d per score; cauliflowers, 1s to 3s; cucumbers, 1s to 3s; endive, 1s to 1s 6d per dozen; horseradish, 2s to 10s 6d per dozen bundles; potatoes, 4s to 6s 6d per cwt.

TO-DAY'S MARKETS.

MARK LANE, MONDAY, July 24.

[FIRST REPORT.]

Harvest was stated to be in active progress round London, and as far north as Coltishall and Horstead, beyond Norwich. The crops being cut are rye, winter oats and barley, and a few fields of early October-sown wheat. Farmers are in good spirits. English produce to-day was almost off the market, but a few samples of wheat, rye, and oats were still to be met with, and these made at least former prices. Foreign wheat barely made the terms of the 21st, but maize was scarce on spot, and, if anything, rather dearer from Friday. The buyers of foreign barley and oats expected 3d. to 6d. decline, but did not obtain it, save in a very few cases. Of linseed, the buyers were willing to pay old prices, while several holders asked for 6d. rise. Oilcakes were strongly held. No fresh business was reported in beans, peas, millet, or dari.

CLOSE OF THE MARKET.

AMERICAN ADVICES COME FIRMER FROM LAST WEEK, BUT THE LONDON TRADE WAS LITTLE AFFECTED THEREBY. EVERYTHING WAS, AND CLOSED, A DULL TRADE UNDER THE INFLUENCE OF THE BRILLIANT SUMMER WEATHER.

THE FLOUR TRADE.

MARK LANE, MONDAY, July 24.

There were few buyers to-day, but for Town Whites, at 28s. cash; Town Households, 25s. cash; whole meal, 26s; best and country whites, 24s. per sack, there was, after all, more inquiry than we have known at some July markets. The trade, though lethargic, was hardly to be styled depressed. America cabled offers to ship new north-western flour, in October, at 30s. c.f.i., but this is a florin above the ideas of the average buyer. Iron Duke, at a guinea, cash or spot, sold quietly. Kansas offers to ship new flour from winter wheat, at 24s. 6d. in August. There are buyers at 24s. c.f.i. Hungarian, French, and Australian flour holders asked old terms, but seldom got them. Argentine flour was steady. There was also a steady market for bran middlings, Pollard and Farina.

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club, St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Saturday at the close of the week's trade were :—

WHEAT (per cental).

Argentine	6s. 6d.	July delivery.
No. 2 American Red	6s. 10d.	" "
" "	6s. 9d.	Sept. "
" "	6s. 8d.	Dec. "

MAIZE (per cental).

American	4s. 11d.	July delivery.
"	4s. 11d.	Aug. "
"	4s. 10d.	Sept. "
"	4s. 9d.	Oct. "

These are not official prices, but will, we believe, be found practically correct. Official quotations, we hear, are likely to be resumed very shortly.

Wheat (American red winter) is quoted to-day 6s. 10d for September, and 6s. 9d. for December, while American mixed maize is quoted 4s. 11d. for August, and 4s. 10d. for October delivery. Trade is dull.

GRAIN AND FLOUR FACTORS REPORT.

Flour, owing to strong American advices, is held for 6d. to 1s. per sack advance. Grain. Indian corn firm at 14s. 1½d. to 14s. 3d. per 280 lb. Oats are in large supply, and prices in buyers' favour. Barley and peas firm. Beans in retail demand at unchanged prices. Mill Stuffs. Bran rather better. Thirds in excellent demand. MCKINNON AND MCDONALD (Glasgow).

Flour. Trade continues quiet, and prices nominally unchanged. Offals.—Bran generally quiet. For immediate shipment prices unchanged; higher prices, however, are being quoted for forward delivery.—GREENHILL BROTHERS (Belfast).

The arrivals of foreign wheat are again large; the trade is firm, and last Monday's prices are maintained. Flour is steady in value. Maize 3d. per qr. dearer. Barley unchanged. Oats 3d. per qr. lower.—COVENTRY.

Owing to the sharp rise in America, holders of flour generally ask an advance of 3d. to 6d., except for bakers' qualities, which remain as last quoted. A quiet business is all that can be recorded.—T. S. MEDILL AND SONS (Mark Lane).

Milling offals are unchanged in price from last week, with a better demand for middlings.—JOHN BAWCOMB AND CO. (Mark Lane).

FEEDING STUFFS.

London, Monday.—Linseed cake: There is no change to report in prices, either for foreign or home made, trade being just as quiet, though a few buyers prefer to secure parcels ready for delivery and store rather than pay what is asked for future deliveries. Cotton cake: Quiet and unchanged. Decorticated cotton cake and meal: Inquiry keeps brisk and values are again higher. Linseed: Demand is better but no alteration in the market.

English Linseed Cake	ex mill	7 12 6	to 7 15	0

ROBERT AND JOHN HEWETSON.

THE BALTIC, 1 p.m.

STATE OF TRADE.

Wheat cargoes are quiet, in smaller lots or "parcels" (i.e., 100 to 500 tons) there is a trifle more doing from Saturday. All cargoes of oil-seeds, barley, oats, and maize are a quiet sale, and prices are hardly so good as at Saturday's close.

BUSINESS DONE.

WHEAT.—Azoff, 33s per 492lb., August shipment; No. 2 Hard Winter, 30s 9d per 480lb., August shipment; Australian, 31s 6d per 480lb., arrived; Bahia Blanca, 31s per 504lb., on passage.

MAIZE.—Argentine, 23s per 480lb., on passage; American, 23s per 480lb., on passage.

BARLEY.—Azoff, 18s 9d per 400lb., on passage; Azoff, 17s 4½d per 400lb., October shipment; Kustendje, 18s 9d per 400lb., prompt shipment; Californian, 24s per 448lb., October shipment.

OATS.—Petersburg, 14s per 304lb., prompt shipment; Roumanian, 13s 3d per 304lb. September shipment.

BEANS.—Smyrna, 30s per 480lb., August shipment.

LINSEED.—Argentine, 40s 3d per 416lb., August shipment.

COTTONSEED.—Egyptian, £5 15s per 2,240lb., arrived.

PROVISIONS.

London, Monday.—The arrivals of bacon last week were from Ireland 2,178 bales, and from foreign ports 13,158 bales. There was a very general recovery in bacon prices last week, and the market was a very steady one, although still a fair quantity of under-priced bacon pushed for sale. Prices ranged:—Irish, 58s to 65s up to 71s; Danish, 52s to 66s up to 71s; Canadian, 50s to 58s up to 63s. Butter: With the continued hot and dry weather, the butter market was very steady:—French, 86s to 104s; Danish, 114s to 115s; Russian, 90s to 100s; Irish, 93s to 106s; Colonials, 94s to 104s. Lard: The lard market was steady: Irish, 41s to 49s; Danish, 46s to 48s; American, 34s 9d to 36s 6d.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter: The Danish Committee has raised the Copenhagen Official Quotation by three kroner, and it now stands at 95, which is the highest at this time of the year since 1893. Unless a great change in the total imports of butter occurs, there seems no chance of lower values for some weeks, and it is very doubtful even then, as the time of year has gone by for any great increase in the production of butter in the Northern Hemisphere. Cheese: The hand-to-mouth method of buying still continues; but the volume of business this week is not quite so large as last week. Prices on spot, however, are virtually unaltered; but in Canadian values have advanced about 1s. per cwt. "Choicest" Canadian is making 49s to 50s per cwt., and "Choicest" New Zealand 54s to 56s for white, and 51s to 52s for coloured.—W. WEDDEL AND CO.

CATTLE.

Metropolitan Market, Islington.

	Monday, July 24, 1905. British.	Total.	Monday July 25, 1904.
Beasts	1,100	1,100	1,500
Sheep and Lambs	7,709	7,709	7,709
Calves	30	30	—
Milch Cows	60	60	90

Quotations per 8 lbs. (sinking the offal):—

ENGLISH

	Inferior.	Second.	First.
Beasts	2s 10d	3s 6d	4s 0d
Sheep	3s 8d	5s 2d	5s 10d
Lambs	5s 4d	6s 2d	6s 6d
Calves	3s 8d	4s 10d	5s 2d

Milch cows, per head, £16 to £21 10s.

British arrivals include as follows: Scotland, nil; Eastern Counties, 112; Midland, Home, and Western Counties, 56; Devon, 30; Ireland, 123.

We note to-day an increase of 120 head in the number of beasts offered for sale to-day compared with Monday last; the supply as usual at this season of the year consisted principally of grass fed Herefords and Runts from the Midland Counties with a fair proportion of Irish, these latter consisting of 75 Dublins and 48 Waterfords, for which there was a very limited enquiry, with a downward tendency in value, although not quotably so. Trade for both prime and second quality English cattle was of a slow but steady nature, late currencies governing all transactions. Fat butchering cows and bulls met with a limited enquiry, consequently 2d. per 8 lbs. less money had to be accepted to effect sales. A clearance is expected to be made.

The following are top quotations per 8 lbs. (sinking the offal):—

	To-day.	Monday, July 25, 1904.
Devons	4s 6d to 4s 8d	4s 6d to 4s 8d
Herefords	4s 6d to 4s 8d	4s 6d to 4s 8d
Norfolks	4s 4d to 4s 6d	4s 4d to 4s 6d
Runts	4s 0d to 4s 6d	4s 2d to 4s 4d
Lincolns	3s 10d to 4s 0d	4s 0d to 4s 2d
Irish	4s 0d to 4s 3d	4s 0d to 4s 2d
Fat Cows	3s 4d to 3s 6d	3s 6d to 3s 8d

There was an increase of 100 in the number of sheep and lambs penned compared with Monday last. Trade for both wethers and ewes was of a slow but firm nature for anything small, heavy weights being extremely unsaleable. Both Scotch and Irish descriptions were in average supply, and met with a steady enquiry at last Monday's values. Amongst the latter arrivals were some lambs; these found a ready sale at a slight advance in value. English lambs met a firm trade at 2d. per 8 lbs. more money. The supply included 300 Scotch, 1,225 Irish, 500 Yorkshires, and 1,224 from Norfolk, Suffolk and Essex. A clearance is expected to be made.

Undermentioned quotations are at per 8 lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	Monday, July 25, 1904.
8 st Scotch	5s 8d to 5s 10d	—
7½ to 8 st Downs	5s 6d to 5s 8d	5s 4d to 5s 6d
9 st Downs	5s 4d to 5s 6d	5s 0d to 5s 2d
10 st Half-breds	5s 2d to 5s 4d	4s 10d to 5s 0d
10 st Yorkshires	4s 4d to 4s 6d	—
12 st Lincolns	—	4s 4d to 4s 6d
10 st Irish	5s 0d to 5s 2d	5s 2d to 5s 4d
10 st Down Ewes	4s 0d to 4s 2d	3s 10d to 4s 0d
11 st Half-bred ditto	3s 10d to 4s 0d	3s 8d to 3s 10d
5 st Down Lambs	6s 4d to 6s 6d	6s 2d to 6s 4d
6 st Half-bred Lambs	6s 0d to 6s 2d	5s 10d to 6s 0d
6 st Irish ditto	6s 0d to 6s 2d	—

Calf trade slow, the best on offer being quoted at from 4s 10d to 5s 2d per 8lbs. (sinking the offal).

London (Central), Monday.—Fair supplies, moderate demand. Beef: Scotch, 4s to 4s 6d; English, 3s 8d to 3s 9d; American, 3s 5d to 3s 9d. Mutton: Scotch, wethers, 4s 2d to 5s 2d; ewes, 3s 6d to 3s 8d; English, wethers, 4s 4d to 4s 10d; ewes, 3s 4d to 3s 8d; lambs, English, 5s to 6s; New Zealand, 3s 6d to 3s 10d. Veal: English, 3s 4d to 4s 4d; Dutch, 3s to 4s. Pork: 3s 4d to 4s 2d per 8 lb.

St. Ives (Hunts), Monday.—Beasts, 261; sheep and lambs, 1,737; pigs, 400. Beef, 7s to 7s 6d; mutton, 7s 7d to 8s 4d; lamb, 8d to 10d; pork, 5s 9d to 6s 6d. Fat and store cattle; sheep, and pigs fair demand. Milch cows short supply, fair demand; prices £14 to £22.

FOREIGN.

Deptford, Monday. — Beasts, 682. To-day's supply of beasts compared with Monday last showed a decrease of 709, and consisted of 487 from the United States, and 195 from Canada. Trade was of a very slow nature, with a decline of 1d in regard to States beasts. Canadians slightly firmer. The best States on offer to dress from 720 lb. made 4s; seconds, 3s 10d. Canadians, 3s 11d; seconds, 3s 8d to 3s 10d per 8 lb. (sinking the offal). On Saturday the supply consisted of 1,832 from the United States and 423 from Canada, trade for which was slow at from 3s 9d to 4s for the former, and from 3s 8d to 3s 10d for the latter. Besides the above, 400 States and 700 Canadian were held back for Monday. 193 Canadian ewes were consigned, and were quoted at from 3s 10d to 4s per 8lb. (offal given in).

Liverpool, Monday.—A larger supply of cattle in market to-day; demand very slow in sympathy with country markets, and prices lower. Sheep and lambs shown in about same numbers as on Monday last; demand slow. Small finished sheep made late rates. Lamb trade easier. Beef, 6½d to 5d; mutton, 8d to 6d; lamb, 8½d to 7d per lb. At market: 936 cattle and 11,733 sheep.

HOPS

London, Monday.—W. H. and H. Le May, 67, Borough, London, report:—There is a fair amount of business doing for the time of year, and stocks are getting into a small compass, at the same time market must be quoted in buyers' favour. The reports from the plantations are altogether favourable.

HAY AND STRAW.

Manchester, Friday.—Hay, old, 4[illegible] to 5[illegible]; [illegible] new, 4½ to [illegible]; clover, old, 5[illegible] to [illegible]; [illegible] new, 4[illegible] to [illegible]; wheat straw, 4d to 1[illegible]d; oat ditto, 3[illegible] to [illegible] per stone.

Whitechapel, Saturday.—Good supplies were offered and met a good demand. Best old, 75s to 80s; inferior ditto, 60s to 70s; specially picked hay, 85s; good ditto, 65s to 70s; inferior ditto, 45s to 55s; meadow and sainfoin, 67s to 75s; straw, 30s to 42s per load.

POTATOES.

York, Saturday.—A quiet trade on last year's potatoes owing to large consignments from Scotland and Lincolnshire which had the result of lowering prices. Quotations: 2s 6d per hamper of four score lb.

LIVE STOCK AND MEAT TRADE REVIEW

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

For fat beasts of both prime and second quality, trade, practically confined to Monday, opened on that day very slowly at last week's quotations, and continued so throughout the day; the tendency in regard to value being in favour of the buyer in some cases to the extent of 2d. per 8 lb. Fat butchering cows were in average supply, and met with a slow but steady inquiry from both town and country buyers, late currencies governing all transactions; bulls, on the other hand, met with little demand, notwithstanding a decline in value. The Irish arrivals consisted of 75 Dublin (10 of which were choice black-polled cattle and 22 Waterfords), for this class of cattle trade also ruled slow at late values. No stores were offered for sale.

At the Foreign Cattle Market, Deptford, the arrivals were rather larger than last week, there being an increase in the supply from both Canada and the United States. Trade throughout the week was of an exceedingly slow nature, with a marked downward tendency in value. The total number of beasts on offer at both markets was 4,646, as against 4,249 during the preceding week, consisting of 1,000 British (increase 120) and 3,646 Foreign (increase 277); these latter comprising 3,038 from the United States and 608 from Canada. The following were the top rates paid per 8 lb. (sinking the offal):—80 to 90 stone Downs, 4s. 4d. to 4s. 6d.; 80 to 90 stone Black Polled Dublins, 4s. 6d.; 90 to 95 stone Herefords, 4s. 6d.; 95 stone Runts, 4s. 2d. to 4s. 4d.; 90 stone Norfolks, 4s. 2d. to 4s. 4d.; 100 stone Shorthorns, 3s. 10d. to 4s.; 95 stone Irish, 4s. to 4s. 3d.; 90 stone States, 3s. 9d. to 4s.; 95 stone Canadians, 3s. 8d. to 3s. 10d.; 90 stone fat cows, 3s. 6d. to 3s. 8d. The sheep trade at Islington was of a dull and dragging nature for both wethers and ewes, heavy descriptions meeting with no inquiry, a few small, choice quality sheep succeeded in maintaining the previous week's values, Yorkshires also met with a decline of 2d. per 8 lb. On the other hand, Scotch and Irish sold fairly well, all sales being governed by last week's quotations. Lambs were slightly in excess of the inquiry, salesmen consequently had to accept 2d. less money to effect sales. On Saturday at Deptford 193 Canadian ewes were offered for sale, and made a fair price. The total number penned at both markets was 4,883, as against 3,710 during the preceding week, consisting of 4,690 British and 193 from Canada. Best pens made per 8 lb. as follows (sinking the offal):—7½ to 8 stone Downs, 5s. 8d.; 8 stone Scotch, 5s. 10d.; 9 stone Downs, 5s. 4d. to 5s. 6d.; 10 stone Irish, 5s. 2d.; 10 stone halfbreds, 5s. 4d.; 10 stone ewes, 4s. 2d.; 12 stone Lincolns, 4s. 6d.; 9 stone Yorkshires, 4s. 6d.; 5 stone fat Down lambs, 6s. 4d.; 6 stone halfbred ditto., 6s.; 6 stone Irish ditto, 6s.; Canadian ewes, 3s. 10d. to 4s.

Calves were in full supply, and were quoted at from 4s. 10d. to 5s. per 8 lb. (offal given in).

No pigs on the market.

Trade in Scotland.

The number of cattle on offer this week has been larger. Owing to the excessively hot weather trade has been a shade quieter, and prices on an average nearly 10s. a head lower. Fat cows in rather larger supply, and they maintained previous prices. For the season of year there was an average supply of sheep. Those of useful weights met a good inquiry, and prices were well maintained, but heavy weighted sheep were just the turn lower. Cheviot and black faced ewes, if of good quality, made rather more money. An exceedingly large supply of lambs. The high prices of the previous week were barely maintained, and in some cases a fall of 1s. to nearly 2s. a head had to be accepted. Fat calves met a rather better inquiry, and sold dearer. Pigs in moderate supply, and also dearer. The first of the store sheep and lamb sales was held at St. Boswells on Thursday. There was a large and exceedingly good show, although the quality was more mixed than usual. There was a very large attendance of buyers, and everything of good quality made satisfactory prices, but secondary descriptions were rather cheaper. There would be an average advance over the whole sale of fully 6d. per head. Very few store cattle on offer, and scarcely any sales effected. There was a fair show of milch cows, and they met a slow trade at prices £1 a head down from last week. Quotations:—Top price of best cattle, per live cwt., 38s. 7d.; current, from 30s. to 35s.; mutton, to fully 8½d. per lb. JOHN SWAN AND SONS, LTD.

Trade in Ireland.

The supply of cattle was a large one for that season of the year, but owing to scarcity of grass, condition was generally backward. The depleted pastures have much to say for so many cattle being sent in the market in such a half-meated state, and unless we get plenty of rain soon, the season will be a disastrous one for graziers. For really good well-finished beasts, prices were fairly well maintained at last day's figures, but for ordinary cattle prices, live weight, were from 1s. to 1s. 6d. per cwt. lower. For some fancy cross-bred Aberdeen and Hereford beasts, up to 33s. 6d. per cwt. (live weight) was given. Good fat cows were in demand, and sold briskly. Prime ox and heifer beef, from 52s. to 56s., and for very choice, up to 58s. per cwt.; good second class beef, 46s. to 50s.; and other qualities, from 44s. to 45s. per cwt. In the mutton department, home butchers confined their attentions to light-weight sheep, as in the continuance of hot weather, heavy sheep are not wanted. There was a fair inquiry for good hoggets for the London and Lancashire markets, best selling at from 44s. to 54s., and small to medium, from 32s. to 42s. each. Prime wether mutton rated at from 7d. to 7½d. per lb.; ewe, 6d. to 7d.; and inferior sheep at very irregular prices. A good home and export inquiry was experienced for good, well-fed lambs, at firm rates, from 30s. to 38s.; good medium qualities, 26s. to 30s. each, but small, thin lambs were not wanted, and failed to clear. There were 10,514 sheep and lambs offered for sale, a decrease of 419 on the previous week. Prime veal scarce, and in stronger demand at from 7d. to 8½d. per lb.; no improvement in coarse calves.

A quiet trade for milch cows; best springers making up to £20 and £21 each; good heavy dairy cows, from £15 to £18; and other sorts from £8 upwards.

The store cattle trade is dull and listless, any little stir consequent on the hope of a continuance of showery weather, having been checked by a rising barometer. Most of the grazing lands are so dry and burnt up that it has been found impossible to market the stock on them, except at ruinous rates. Some who find their lands stocked beyond their feeding capacity, are selling off, but it is easy to understand that the demand for stores is very limited. Some of the salesmen who had advertised auction of store stock, have postponed the sales till the prospects are more favourable.

Trade in the West.

After meeting a very indifferent trade for several weeks, milch beasts are once more being actively sought after, and, though they have not quite got back to the old level, still they are in a very fair way for doing so, useful heifers and good-class cows again selling from £17 up to £22 a-piece, and, in a few exceptional cases, to £23; but then this must be for something quite out of the ordinary run. Plainer beasts are much slower of sale, though we hardly know that values can be quoted as showing any marked change as compared with late currencies. Grazing beasts are still steadily going up in value, and, though we cannot in truth say by "leaps and bounds," yet there is a perceptible improvement in values, which may be given generally as showing a rise of from £1 to £2 per bullock for the best, which we may give as making £25 to £33 per pair; whilst for the rougher grades values range from £24 down to as low as £17 or £18. Young stock continues to bring a decent return, yearlings making £6 to £8 10s., and three-year-olds £10 to £13. The sheep trade remains in a fairly healthy state, and we may quote draft Down ewes as making from 40s. up to 52s. apiece, though Horns bring rather more; young ewes, selling up to as high as 58s., ranging down to 45s or 46s apiece; store hogs, 30s to 37s; whilst working ewe and wether lambs range from 35s. up to 42s. apiece; any class of lamb being one of the best selling things on the market just at present.

A good many fat beasts are being offered at many of the markets, but the trade is by no means active, except for the ripest steers and maiden heifers, which are making from £18 to £25 apiece for the best, though at Wimborne one rare Shorthorn heifer made £25 15s. (or from 11s. to 11s. 6d. per score), which is the very outside value. Fat cows are much quieter at 9s. to 10s., and coarse heavy beasts not so much by 1s. per score. Best calves sell up to £5 10s. apiece; but prices are back not only for best but for seconds as well. The mutton trade is again favouring the buyer, except for the very smallest wethers, which make 7½d. to 7¾d. per lb. in the wool; and ewes, the trade for which is much depressed, not more than 6d. to 6½d. Lamb in the wool here makes up to 10d. in the wool and 9d. for shorn. Pigs are keeping up exceptionally well in value, best class porkers making 9s. 6d. to 10s. per score; baconers, 8s. 6d. to 9s.; and heavy sows 7s. to 7s. 6d.

LONDON.

Islington, Thursday.—Beast supply consisted entirely of fat butchering cows and bulls, trade for which was slow and dragging, with a downward tendency in most cases, to the extent of 2d per 8lb. Top prices:—Fat cows, 3s 6d; fat bulls, 2s 10d to 3s 2d per 8lb. Decrease of ten in number penned in sheep market, supply consisting chiefly of Downs and half-breds, with the average number of lambs; latter sold well, last Monday's quotations being well maintained. Small choice wether sheep met a firm trade at late rates, but heavier descriptions met a very limited demand, chiefly owing to the hot weather. Ewes met slow but steady trade, with rates in favour of sellers. Best pens made per 8lb as follows:—7½ to 8-stone Down sheep, 5s 8d; 9-stone ditto, 5s 6d; 10-stone ditto, 6s 4d; 10-stone half-breds, 5s 2d to 5s 4d; 10-stone Down ewes, 4s 2d; 5-stone fat Down lambs, 6s 4d to 6s 6d; 6-st half-bred ditto, 6s. Largest supply of calves this season, which met slow trade; best offered quoted at 4s 10d to 5s 2d per 8lb. Quotations per 8lb sinking the offal:—Beasts, 2s 10d to 3s 6d; sheep, 3s 8d to 5s 8d; calves, 3s 6d to 5s 2d; lambs, 5s 4d to 6s 6d. Total supply:—Beasts, 20; sheep and lambs, 3,180; calves, 100; milch cows, 5.

London (Central), Friday.—A large quantity was delivered, for which a very slow demand was experienced, prices, however, keeping firm. Arrivals of beef included 70 tons Scotch, 780 Liverpool sides, 2,300 hindquarters, and 1,500 American refrigerated, also 1,500 Argentine chilled hindquarters and forequarters. Quotations: Beef, Scotch short sides, 4s 4d to 4s 6d; long sides, 4s to 4s 2d; English, 3s 8d to 3s 9d; American Deptford-killed, 3s 6d to 3s 9d; Liverpool sides, 3s 5d to 3s 8d; American refrigerated hindquarters, 3s 6d to 3s 10d; forequarters, 2s 2d to 2s 4d; New Zealand hindquarters, 2s 3d to 2s 5d; forequarters, 1s 7d to 1s 8d; Argentine chilled hindquarters, 2s 6d to 2s 8d; forequarters, 1s 6d to 1s 8d. Mutton: Scotch wethers range from 4s 2d up to 5s 2d; ewes, 3s 6d to 3s 8d; English wethers, 4s 4d to 4s 10d; ewes, 3s 4d to 3s 8d; New Zealand, 2s 5d to 3s; Dutch wethers, 4s 6d to 4s 8d; ewes, 3s 4d. Lamb, English, range from 5s to 6s 7d; New Zealand, 3s 6d to 3s 10d. Veal, English and Dutch, 3s up to 4s 4d. Pork, English, 3s 4d to 4s 2d; Dutch, 3s 4d to 3s 10d per 8lb.

COUNTRY.

Ashford, Tuesday.—Business steady at last week's prices, except pork, which showed a slight increase. Best beef, 4s 6d to 4s 10d; secondary, 4s 3d; mutton, small half-breds and Downs, 5s 4d to 5s 10d; Kent wethers, 5s; lamb, 6s 8d to 7s 2d; veal, 4s 6d to 5s; pork, roasters, 8s 6d to 9s; small store pigs, 10s to 14s each.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a good attendance of buyers to meet a supply of 33 fat beasts, 63 calves, 486 fat sheep and lambs, 85 pigs, and 129 head of dairy and store cattle, for which the following prices were realised:—Devon steers made from £18 10s to £22 10s, shorthorn steers £18 to £20, heifers £18, cows £13 10s, polled steers £18, cows £17, a West Highland bull £18, fat calves 80s to £5 15s; small ditto 20s to 50s, fat porkers 30s to 56s, store pigs 16s to 20s, dairy cows £8 10s to £22 15s, fat Down wethers and ewes from 50s to 58s, smaller 44s to 48s, old ewes 30s to 40s, six months' old Down lambs 42s to 50s, smaller 34s to 40s, choice three months' old sucking lambs (Downs), 30s to 40s, cross-breds 31s to 33s 6d, Southdown 31s 6d to 33s 6d, cross-bred ewes up to 44s, Welsh ewes 26s. A short supply of fat beasts met a fair inquiry, the best lots being cleared at an advance on last week's figures. A good show of fat sheep and fat lambs, and a clearance very nearly made; more money given for prime fat wethers; young ewes, and choice lambs; for old and over-fed ewes the trade was slow, and price slower. The best class milch cows met a brisk trade with a good inquiry. Store cattle moved off more readily at slightly improved prices. Fat calves: The trade remains about the same as last week. Fat and store pigs, with a short entry, were in demand at late prices. Ruling values:—Prime Devon beasts, 6¾d to 7¼d; shorthorn ditto, 6d to 6¼d; bulls, cows, and inferior, 6d to 5½d; best quality fat sheep and big lambs, 8d to 8¾d; secondary ditto, 7d to 7¾d old ewes, etc., rams, and inferior, 5½d to 6d per lb; choice fat sucking lambs, 9d to 10d per lb; fat calves, 7d to 8d per lb; fat porkers, 8s to 9s 6d per score.

Berwick, Saturday.—Only 41 beasts were penned. There was no demand, and no sales were effected. The attendance of farmers and buyers was about the smallest this season.

Birmingham, Thursday.—Small supply beasts, sheep, and pigs. Trade fair for beasts and sheep; trade slow for pigs. Beef, 5¼d to 6¾d; a few Herefords, 7d per lb.; mutton, 6d to 8¼d per lb; lamb, 8¼d to 9d per lb; veal, 6¼d to 7d per lb; bacon pigs, 9s 4d to 9s 6d per score; cutting pigs, 9s 4d to 9s 6d per score; sows, 7s per score.

Bristol, Thursday.—The market was quiet and uneventful, the demand being moderate and business dull. An average quantity of beef; prices unaltered. Sheep and lambs in moderate number; light wethers firmer at 7¾d, and ewes at 6d, whilst lambs declined to 8d and 9d. There were few pigs and values were unchanged.

Calne, Friday.—Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of Back.	Price per Sc. s.	d.
6sc. 10 lb. to 9 sc. 10 lb.	2½ in. and under	9	6
Under 10 sc.	Not exceeding 2½ in.	9	6
Under 11 sc. 10 lb.	2¾ in.	9	0
Under 12 sc.	3 in.	8	6

C. AND T. HARRIS AND CO., LTD.

Canterbury, Saturday.—A good demand for milch cows at from £15 10s to £17 10s; ewe tegs were making 36s to 42s; and a few lambs were also offered. Supplies of store cattle are limited.

Carlisle, Saturday.—The supply was the smallest of the season, there being only between 100 and 200 Irish store cattle exposed. Buyers were very scarce, and trade dragged. Small heifers, £7 10s to £10 10s; best ditto, £10 10s to £14 10s.

Chester, Thursday.—A smaller supply of stock, fewer buyers, and a quiet trade, prices being about the same as last week, with a slightly lower tendency in certain departments. Quotations: Milch cows, £15 to £22; calves, £14 to £19; barrens, £10 to £13; heifers, £9 to £14; stirks, £6 to £10; and sheep, 1s to 3s.

Chichester, Wednesday.—A good company of buyers were in attendance. Fat cattle met a firm selling trade at prices similar to those of previous market. A good demand prevailed for dairy cattle at fully 30s per head advance on late prices. Owing to the dry weather, grazing cattle met rather a dragging sale, and a good many lots were turned out of the ring unsold. Quotations: Prime Devon steers, 4s 6d to 4s 10d; prime Shorthorn steers, 4s 4d to 4s 8d; prime Polled Scotch, 5s 4d to 4s 8d; fat cows, 3s 6d to 3s 8d; best South-down sheep, 6s 3d to 6s 4d; best West Country sheep, 5s 8d to 6s; fat ewes, 4s 4d to 4s 6d, fat lambs, 7s 2d to 7s 6d; veal, 4s 6d to 4s 10d; porkers, 3s 8d to 4s; store pigs, 15s 6d to 23s.

Colchester, Saturday.—There was again this week a poor supply of everything, and beef made from 4s 2d to 4s 4d per stone; mutton, 5s 6d to 5s 8d; lamb, 6s; and pork, 3s per score.

Doncaster, Saturday. The market was poorly supplied with cattle and sheep,and there was an indifferent attendance, trade being exceedingly slow. Milch beasts were firm, and made £17 to £23; bullocks, £12 to £17; heifers and drapes, £11 to £15; stirks, £7 to £9; young stores, £4 to £7; sheep, 35s to 45s; lambs, 25s to 27s each.

Dorchester, Wednesday.—Full supplies and a full attendance at to-day's market. A fairly brisk inquiry. Calves made £3 to £5 17s 6d for the best; seconds, 48s to 58s; and rearers, 22s to 42s. Best wether mutton sold at 7½d to 8d per lb; ewes, 40s to 48s; and lambs, 9½d to 10d per lb. Bacon pigs made 9s to 9s 3d per score; porkers, 9s 6d to 10s; and heavier animals, 7s 6d to 8s.

Dorchester, Saturday. Good supplies of stock came to hand at to-day's cattle market, while sales were conducted by both Messrs. Duke and Son and by Messrs. Symonds and Sampson, and trade ruled fairly active for best things. Milch beasts, of which there was a large offer to select from, selling very well at from about £15 15s to £19 for best heifers, others making £9 15s to £15; yearling heifers £18 to £24 per pair. The fat beef included some very nicely furnished grassed beasts, which made £17 to about £19 10s each (or 10s 6d to 11s per score, and in some cases rather more); seconds, 9s to 10s. The best class for mutton may be quoted 7½d to 8d per lb. (or from 47s to 52s each for wethers); fat ewes very slow trade, except for young animals of medium weights, which made 7d to 7¼d per lb., other qualities, 44s down to 36s (or 6d to 6½d). Lamb a trifle more saleable on the best up to 39s each (or 9¼d to 10d).

Dublin, Thursday. — Numbers in market: Beasts 2,344, increase 24; sheep 10,314, decrease 419; calves 37, decrease 11. A slow and dragging trade experienced for all descriptions of cattle with prices in favour of buyers and a clearance difficult to effect. Choice light weight sheep and fat lambs in fair request at last week's prices, other sorts in favour of buyers. Cattle, live weight, best, 30s to 33s per cwt.; rough and inferior sorts, 26s to 29s per cwt. Mutton, dead weight, 5½d to 7½d per lb.

Edinburgh, Wednesday.—Owing to the continued drought, trade was nearly at a standsill. Half-bred gimmers sold to 44s, half-bred Dunmonts to 40s, Cheviots to 36s, and grey-faced to 34s each. Few store cattle on offer; conditioned animals to £14, Irish cows to £19 10s, and shorthorns to 23s per head.

Exeter, Friday.—Inquiry for the best quality beasts; steers and heifers, 11s 6d; cows, 9 to 10s 6d. Small supply of sheep brisk trade; small wethers, 5d to 8½d; large, 8d; ewes, 6d to 6½d. Best quality lambs in demand, 10d in wool, 9d shorn; breeding ewes, 42s to 45s; calves, 7d to 7½d.

Glasgow, Wednesday.—Cattle were a shade cheaper. Sheep and lambs steady. Top Scotch cattle, extreme 64s, current 58s to 60s per cwt.; top hoggs, 8¾d; secondary, 8d to 8¼d; lambs, 8d to 9d per lb. Dead meat quiet; best Scotch beef, 6d; States, 5¾d; Canadian, 5½d; best cows, 5d; best hoggs, 8d; black-faced wethers, 7½d per lb. At market: Cattle, 684; sheep and lambs, 4,494.

Gloucester, Saturday.—Messrs. Bruton, Knowles and Co. report their sales as follows:—A short supply of cows and calves, with good trade for the best quality. A short supply of store cattle, with very little demand.

Hereford, Wednesday.—Owing to the hay harvest supplies were moderate. The beef trade was fluctuating, but the average was about the same as last week. Best bullock and heifer made from 6d to 6½d per lb; cow beef as low as 5d. Veal at the same as last week, about 7½d per lb, for a small supply. Trade was brisker on the sheep, yearling mutton realising 6d to 6½d per lb. Lambs, being a short supply, found a ready sale at 9d per lb. Pigs were a poor supply, and trade was a trifle better than last week. Porks made 5d per lb. Few store cattle were in the market, and there was little call for them.

Ipswich, Tuesday.—Messrs. Robert Bond and Sons report a good supply of fat cattle for the season, all of which were yard-fed. Trade was firm at from 8s 3d to 7s 6d per stone. Grazing cattle scarce, and demand slack. At the special sale of dairy stock there was a large entry, including 40 Dutch cows and heifers, all bred by the owner, who offered the whole herd. There was a large attendance of buyers, many from distant counties, and a good demand was experienced throughout. Cows with calves by sides made from £32 5s to £26 15s, heifers in calf £23 10s to £16 5s, heifers, 14 months £12 10s, 8 months £8 5s. In addition to these a considerable number of shorthorn and polled cows and heifers were offered. Heifers fresh calved sold exceptionally well, the best making from £23 15s to £17 5s. Fat sheep were short, and sold at current rates; Suffolk shearlings to 60s, half-breds to 68s. Grazing lambs were in good demand; Suffolks 37s 6d to 24s, half-breds 36s to 26s. Fat swine were in good demand, last weeks values being well maintained. Numbers at sale and market: 631 cattle, 3,469 sheep, and 933 swine.

Leicester, Saturday.—With pastures scorched up trade suffered severely, while sales were only possible at a further decline of 10s to 20s per head. The restricted supplies were more than equal to the demand. Choice milch cows, £20 to £23; secondary, £14 to £16; bullocks, £12 to £14; calves, 15s to 30s each.

Lynn, Tuesday.—Fat beasts average show for time of year; trade slow, 7s to 7s 6d per stone. Very few store beasts, scarcely any trade, £6 to £11 each. Average show of sheep, trade slow, 8s 9d to 9s 3d per stone; store sheep, 40s to 44s; store lambs ,20s to 30s; fat lambs, 25s to 40s each.

Manchester, Friday. — Beef: First-class, 5½d; second class, 4¾d to 5¼d; third class, 3¾d to 4¼d. Mutton: First-class, 7¼d; second-class, 6¼d to 7d; third class, 5¼d to 6d. Veal: First class, 6d; second class, 5d to 5½d; third-class, 4d to 4½d. Lamb: First class, 7½d; second class, 7d per lb.

Norwich, Saturday. The supply of fat beasts was equal to the demand at 7s 3d to 8s per 14lb. Scarcely any store cattle offered, trade was very quiet, and but few lots were disposed of, selling at about late rates, £6 to £16 per head. Lambs in smaller supply; trade quiet, at 28s to 34s per head. A large number of breeding ewes, which made 50s to 52s per head. Fat sheep made 8s 6d to 9s 6d per stone. Smaller number of fat pigs, which sold for 5s 9d to 6s per stone, an extra 3d being realised for best quality animals. Small number of store pigs of moderate quality, for which there was no demand.

Nottingham, Saturday.—There was a fair show of milk beasts and a good trade resulted. Best milk cows made £18 to £23, and in-calf heifers £15 to £19. Only a small supply of store beasts, and a dragging trade. Strong heifers and steers fetched £8 to £12, and younger beasts £5 to £7; calves, 25s to 50s.

Preston, Wednesday. Good attendance. Trade rather slow all round. Good supplies of cattle and sheep. Heifers and bullocks, 6½d to 6¾d; a few nice Scotch heifers, 7d; cows and bulls, 5d to 5¾d; hogg sheep, 8¾d to 8¾d; tups, 5d to 5½d; ewes, 5½d to 6¼d; lambs, 8¾d to 9d. At market: Sheep, 2,470; cattle, 220; and calves, 180.

Retford, Saturday. Not many store cattle, scarcely sufficient to test prices. Really top milch beasts easily maintained late rates of £17 to £20; steers and heifers, £10 to £12; calves, 40s to 50s.

Romford, Wednesday. Short supply of fat beasts; trade very slow. Best animals, 4s 4d to 4s 6d; middlings, 4s to 4s 2d per stone. Calves a very bad trade at 4s 3d to 4s 10d per stone. Sheep in short supply; trade about the same. Best sheep, 5s 4d to 5s 6d; middlings, 5s to 5s 2d per stone; ewes a better trade, at 4s to 4s 2d per stone. Lambs in short supply; trade about the same, at 6s 4d to 6s 6d per stone. Very slow demand for store beasts. Pig trade slow.

Thame, Tuesday.—A large attendance of buyers. Trade all round remarkably brisk, each lot quickly changing hands. Beef selling with an upward tendency. Mutton considerably higher. Veal, bacon, and pork in good demand. Stores of every description a good sale. Messrs. Bond and Burrows disposed of 83 choice heifers and oxen, 215 fat sheep and lambs, 55 fat and weaning calves, and 40 bacon hogs, porkers, and store pigs. Fat oxen made from £16 to £21 2s 6d, fat heifers £15 to £22, fat wethers 48s to 58s, fat ewes 45s to 50s, fat lambs 30s to 41s, fat calves 68s to 95s, weaning cow calves 30s to 62s, bull calves 10s to 51s, bacon hogs £3 1s to 5£4 10s, porkers 26s to 38s, store pigs 10s to 21s.

Truro, Wednesday. Fat bullocks, 56s to 60s per cwt.; harreners and store bullocks, 40s to 48s; cows and calves, £11 to £15 each; rearing calves, 20s to 35s; wethers, 7d to 7¼d per lb; ewes, 5½d; lambs, 8d to 8¼d; pigs, 11s to 42s each; beef, 6d to 8d per lb; mutton, 6d to 8d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8d; bacon (uncured), 6d to 7¼d; ditto (cured), 7d to 9d; pork (carcases), 4½d to 5¼d per lb. Number in cattle market: Bullocks, 267; calves, 65; sheep, 289; pigs, 230; one horse, one donkey, one dog. Business very brisk. Attendance very good.

Wolverhampton, Wednesday.—There was a good supply all round; trade slow. For useful milch cows a fair demand. Beef, 5d to 7d per lb; mutton, 6¼d to 8¼d per lb; lambs, 8½d to 9d per lb; veal, 6d to 7d per lb.

Worksop, Wednesday.—Moderate supply of beef, and rather slow trade, best qualities making 7s to 7s 6d per stone; secondary qualities, 6s 6d to 7s; best Southdown wethers and cross-breds, 8d to 8¼d; ewes, 6d to 7d; lamb, 9d to 9¼d per lb.

Yeovil, Friday.—Good inquiry for milch beasts, which sold at from £14 10s to £20 each for heifers and calves, and £12 10s to £17 10s for cows and calves; in-calf heifers, £14 to £15 15s; in-calf cows, £13 10s to £16 1s0 ;steers, yearlings, £8 to £9 10s; two-year-old heifer,s £9 10s £12; yearlings, £7 10s to £9 15s; ewes sold at from 40s to 45s; wethers, 42s 6d to 47s 6d; lambs, 25s to 32s.

York, Thursday.—Owing to the drought and the dried-up state of the pastures, the supply of both English and Irish store cattle was very small indeed, and trade was absolutely at a standstill. Calving and milch cows were in good supply, but the quality, except in a few instances, was not high. The recent improvement in the trade continues, and most of the stock found purchasers at fully late rates. One or two of the best animals made up to £22 each, and a good many others sold at from £17 10s to £19. Second-rate cows might be bought at £14 to £16. As is usual at this time of the year, the supply of sheep and lambs was very small. The best twice-crossed shearling sheep made up to 46s each, and Mashams from 36s to 40s. Sellers asked up to 24s for lambs, but there was practically no trade.

Irish Live Weight Quotations.

Department of Agriculture and Technical Instruction for Ireland.)

The following returns are those of actual sales made in Robson's Cattle Mart, Belfast, the stock being weighed either before or after sale, for week ending July 1°, 1905.

GAME AND POULTRY.

Smithfield, Saturday.—Large supplies were to hand, and a rather better demand prevailed. Quotations:—Fowls: Yorkshire, 2s 3d to 2s 9d; Essex, 2s 3d to 2s 9d; Boston, 2s to 2s 6d; Surrey, 3s to 3s 9d; Sussex, 3s to 3s 6d; Welsh, 2s to 2s 6d; Irish, 1s 9d to 2s 3d; geese, 4s 6d to 5s 6d; Aylesbury ducks, 2s to 2s 3d; country, 2s to 2s 3d; quail, 1s to 1s 3d; Bordeaux pigeons, 8d to 10d; feathered, 8d to 10d; wild rabbits, 6d to 8d; tame, 1s 4d to 1s 8d each; Australian, 6s to 8s per dozen.

SEEDS.

Hull, Tuesday.—Linseed: The arrivals are 2,672 qr Bombay, 15,932 Rosario, 810 Sam Lorenzo, 2095 St. Petersburg—total, 21,509 qr. Linseed has been practically neglected throughout the week, and in the absence of demand values have dropped about 2s per qr. River Plate: Spot has sold down to 38s, afloat 38s 6d, July-August 39s, August-September 39s 3d. Bombay is held above the market, August-September being quoted 42s. Calcutta is again being offered as far forward as April-June next year, but does not attract any attention. Oilseed cakes: Linseed cakes firm, unchanged. Cotton cakes are 1s 3d to 2s 6d per ton dearer, but demand very quiet. Spring corn: Barley: In foreign barley of the new crop not much business has taken place, as shippers insist upon higher prices than buyers are disposed to give. In feeding there is no material alteration to note. Oats continue a very slow trade at weak prices. Beans are about exhausted. Plate maize, through scarcity, has mended 6d to 1s per qr, but fresh lots are due shortly. Prime mixed maize is in very small compass. Cottonseed: There was a little more steadiness in this article about the middle of last week, with business done in Egyptian passage and July at £5 16s 3d and August at £5 17s 6d, but the market soon turned quiet again, and although quotations practically unchanged there is at the moment nothing doing. A little November-January changed hands at £6 to £6 1s 3d with still sellers at latter price. Bombay sold at £4 17s 6d to £4 18s July-August and August-September, also same for new crop December-January, January-February.

FEEDING STUFFS.

Mark Lane, Monday. [illegible] There is a slight improvement to report in the demand for cotton compound and [illegible] and a general tendency to [illegible] but rather more [illegible] during the forthcoming week. Russian and [illegible] are unchanged. London made [illegible] quoted. Cocoanut cakes [illegible] a poor inquiry [illegible] All qualities at a slight [illegible] Decorticated [illegible] cheaply offered at £5 17s 6d [illegible] £5 5s per special digestive meal which Messrs. Gow, Hand" brand is available at £6 17s 6d, "Ley" brand at £6 1s 6d, and meal at £5 11s 6d [illegible] of matted East India seed in bags [illegible] of £4 15s per ton. Maize germ meal: Stocks of white American are now exhausted, but English [illegible] obtainable at last week's quotations. Maize gluten meal is in good demand at £5 5s to £5 15s per ton. Rape meal: Landed lots of Rangoon are firmly held at £4 8s 9d to £4 10s, which is the ex ship price [illegible] shippers for arrival. Broken Rangoon [illegible] good value at £4 15s per ton ex docks. Locust beans at least rather more attention at £5 5s for white and £5 10s for kibbled. Nitrate of soda is without alteration at £11 per ton ex quay.

MOLASSINE FEEDING MEAL, packed in bags of 1 cwt. each. Price per ton, £6 15s., in ton lots and upwards. £7 10s. per ton in less than ton lots. Free on rail, Liverpool or London. Uniform delivered price for small quantities, 10s. per bag of 1 cwt.

MANURES.

Liverpool, Friday.—There is practically no trade, and quotations are purely nominal in the absence of business. Nitrate of soda is declining, and now quoted at £10 to £10 7s 6d, according to quality. Nitrate of soda, best quality, i.e. guaranteed 95 per cent. pure, in bags, £10 5s to £10 7s 6d; East India bone meal, in bags, £5 7s 6d to £5 10s; kainit, prime 23 per cent., sulphate of potash, in bags, £2 2s 6d; palm nut cake, prime, in bags, £5 15s to £6; linseed cake, American thin oblong, prime, in bags, £7 5s to £7 10s; linseed cake, English, prime, in bulk, £7 17s 6d to £8 7s 6d; linseed cake, foreign, round, prime, in bags, £7 17s 6d to £8; cottonseed cake, N.A. decorticated, prime, new, in bags, £6 17s 6d to £7 3s 9d; ditto, ditto, English decorticated, prime, soft, in bags, £7 5s to £7 7s 6d; ditto, ditto, English undecorticated, prime, in bulk, £4 10s to £4 15s; ditto, ditto (crushed), 20 to 25 per cent. oil guaranteed, prime, in bags, £6 17s 6d to £7; maize germ meal, in bags, £5 17s 6d to £6; corn oil cake, 10 to 13 per cent. oil, in bags, £6; rice meal, Rangoon, as imported, in bags, £5 per ton.. Linseed, fine bold feeding, in bags, £8 7s 6d to £2 9s 6d per quarter 416lb.; cod liver oil cattle feeding, prime, in casks, 4s 6d per gallon; treacle, feeding prime, in brls., 4s 4½d to 4s 6d per cwt. D.N.S. Brand superphosphate of lime, guaanteed, 25 to 27 sol., in bags, nominal; ditto, ditto, guaranteed, 30 to 31, in bags, nominal; ditto, ditto, guaranteed, 35 to 36 sol., in bags, nominal; basic slag, prime quality, guaranteed 30 to 35 per cent. phos., in bags, nominal; basic slag, prime quality, guaranteed, 38 to 45 per cent. phos., in bags, nominal; basic slag, finest quality, guaranteed, 42 to 50 pr cent. phos., nominal.—H. JONES LANGAR AND CO.

POTATOES.

Borough, Saturday.—Supplies were on a good scale, but met with slow request. Quotations:—New English, 70s to 80s per ton; Jersey, 4s 5d; St. Malo, 4s to 4s 5d; Teneriffe, 7s to 8s; Scotch, 3s 9d; Dutch, 2s 9d per bag.

Goole, Wednesday.—The market for potatoes at Goole is now almost over, and yesterday there were hardly any lots changing hands, buyers waiting for the new season's crop, which will soon be on the market. The prospects for the present season are excellent, the Marshland district not having suffered to any extent from want of rain, and crops are, moreover, looking very healthy. In the retail market yesterday, potatoes sold at 3½d to 4½d per quarter stone.

Spitalfields, Saturday.—Large supplies of English were available, but the demand was generally poor. New Canary No. 3 7s 6d per cwt; English, 60s to 80s per ton; Dutch, 2s 9d per bag.

Manchester, Saturday. Yorkshire reds, 7s to 9s; Sandy, 5s to 7s; Cheshire reds, 5s to 6s; kidneys, 5s to 7s 6d; snowdrops, 5s to 6s. Lincoln reds, 6s to 7s per 14 stone; Bedfords 4s 6d to 5s 3d per cwt.

HOPS.

Worcester, Saturday. In view of the excellent prospects of the growing crop growers are more disposed to accept current rates, and several lots have lately changed hands. The pockets have been weighed over this week. Nothing has arrived to check the plants, which now look all that can be desired. Picking will be early this year.—CHARLES FARAM AND CO.

Overton Sheep Fair.

This, one of the most important of sheep and lamb fairs in the South of England, took place on Tuesday, and that it still holds its own was proved by the large entry and attendance. About 15,000 sheep were penned, a number in excess of last year, and trade was brisk, at good prices. The regular draft ewes from the best known flocks throughout the fair made on the average just about the same prices as last year, there being some instances of them making from 2s. to 3s. per head more, and also some of 2s. to 3s. less, and others making the same prices. The lambs taken all round were a good 2s. to 3s. per head above last year's prices. There were fewer young ewes (two-tooths) than last year, the average for all the best lots was from 4s. to 6s. above last year's prices. The committee were enabled to offer a similarly liberal list of prizes to that which has been a characteristic of Overton Fair for many years past, and the support which is forthcoming at the hands of noblemen and gentlemen resident in the district is indeed most gratifying. The entries in the prize classes were good all through, notably in the ram lambs. The Judges were Mr. Allen, of Eastover; Mr. James Futcher, of Fovant, Salisbury; and Mr. Webb, Andover; the following being their list of awards:—

Class 1.—Pen of wether lambs, from a flock of any number, bred and fed by the exhibitor: 1, F. A. Holman, Dunley Manor, Whitchurch; 2, J. Pickard, Chapmansford, Whitchurch; 3, W. and G. Crimble, Southington, Overton.

Class 2.—Pen of full-mouthed ewe sfor breeding purposes and bona-fide for sale, the whole of which shall have been fed by the exhibitor from November 10, 1904: 1 and 2, Lord Ashburton, Northington Down Farm.

Class 3.—Pen of two-tooth ewes: 1, F. A. Holman: 2, Lord Ashburton.

Class 4.—100 two-tooth ewes (open to farmers and dealers): 1, A. Holman, 2 ,Lord Ashburtno.

Class 5.—Pen of ram lambs of any breed, bred by the exhibitor: 1, H. C. Stephens, Cholderton, near Salisbury; 2, Sir W. G. Pearce, Bart., Chilton Lodge, Hungerford; 3, F. A .Holman.

Messrs. James Harris and Son's catalogue comprised 6,250 ewes and lambs, being about 1,000 fewer than last year. There was a good selling trade throughout, especially for lambs, which were certainly dearer than at Stockbridge, the ewe trade being about the same. For regular draft ewes the prices ranged from 45s. to 54s. 6d. For wether lambs, by far the best lot were shown by Mr. F. A. Holman, of St. Mary Bourne, a grand pen, which, after taking first prize in the show pens, realised 54s. 6d. and 54s. in two lots of fifty each. The second prize pen of Mr. Pickard, of Chapmansford, sold in twenties, made 47s. to 49s. Other prices for wether lambs ranged from 32s. to 43s. 6d.

Messrs. Frederick Ellen and Son disposed of about 3,200 ewes and lambs at similar prices to the above.

At the conclusion of the sale of store sheep Messrs. James Harris and Son offered 30 Hampshire Down ram lambs from the flock of Mr. A. Philippi, Crawley Court, and 60 ram lambs from Sir Richard Rycroft's flock, and, although no extravagant prices were realised, every lamb offered found purchasers. The prices given for Mr. Philippi's ranged from 4½ to 6½ guineas, and averaged £5 9s. 6d. The 60 lambs from Sir Richard Rycroft, Bart., made from 3½ to 5½ guineas, averaging £4 2s.

Ipswich Wool Sale.

Messrs. Robert Bond and Sons' second wool sale of the year too place at Ipswich, on Friday, when, as compared with those obtained on the 16th June, prices showed a decline from a ½d. to a 1d. per pound. Last year it was the other way about, the second sale yielding the best results to the growers of wool. About 15,000 fleeces were now pitched, the weather was hot and dry, and there was a good muster of buyers, although several firms were unrepresented who bought extensively last month. The top price was 13¼d., given for two sheets of Southdown hogget from Mr. J. A. Hempson, as compared with 14d., the leading figure at the June sale. Washed wool of the various breeds ranged as under: Southdown hogget 13¼d. to 12¾d., Southdown ewe, 12½d. to 11½d., black-faced hogget 12¾d. to 12½d., black-faced ewe 12½d. to 11d., half-bred hogget 12½d. to 12¼d., half-bred ewe 12½d. to 11¾d.; and unwashed—South-down 9½d. to 9d., black-faced, 8¾d. to 8d., half-bred 9d. to 8d., Scotch hog 7½d., locks 7¼d. to 6½d.

The Gloucestershire Agricultural Society and Bath and West Show.

At the adjourned annual meeting of members of the Gloucestershire Agricultural Society, held on Saturday, there was an interesting discussion on the question of whether to hold a show next year or amalgamate with the Bath and West Society for their exhibition at Swindon.

The President (Mr. W. E. Hicks-Beach) said the facts of the matter were: At present they had no invitation from any town or county for holding a show next year, and as many of them knew the Bath and West were going to Swindon, and possibly—so some of them thought—it might be wise for Gloucestershire to accept their proposals and join them in their show there, and have no county show for Gloucestershire at all in 1906. He knew that was much against the feeling of some of their old members, but he thought it would be wise to take that course, and he was not at all afraid, as some of them seemed to be, that their subscriptions would drop off through having no country show. The Bath and West gave them terms which he called generous, but which he was told were the general terms with them. They did at all events give some advantage to that society. As some of them knew they had a sort of general invitation from Lydney, but that had fallen to the ground. They had invitations from Stroud, Tewkesbury, and Gloucester for 1907.

Mr. J. T. Hobbs moved that there be no county show next year, but that they join in the Bath and West of England exhibition at Swindon. He said it was a most excellent society, well managed, and Gloucestershire would have no regret afterwards, he was sure, if they joined them for next year on the terms most generously offered by that society.

The Secretary stated that the terms offered were that on condition of Gloucestershire suspending the holding of their show next year and subscribing £100 towards the prize list of the Bath and West, they would endeavour to consult their wishes so that they might have some restricted prizes for their own members or county, and the members of the Gloucestershire Society would have all privileges in every respect that were enjoyed by members of the Bath and West.

The motion was finally carried unanimously.

The question of whether or not to amalgamate with the Herefordshire and Worcestershire Society was allowed to die a natural death for the present at least.

Irish Harvest Prospects.

Notwithstanding the long continuance of the drought, and the excessive heat which has prevailed since the opening weeks of June, the crops, as a whole, are more promising than might have been anticipated, and the outlook is by no means dispiriting. The wheat crop, which is still, in our opinion, confined to a smaller acreage than its claims to profitableness entitle it, is described as looking splendid, and certainly any fields which have come under our observation this year might be truthfully described in these terms. Barley also promises exceedingly well, and a good yield is confidently anticipated. Last season the yield showed a falling off from the year previous, which in turn showed a decline from 1903, so it is the hope of growers that the average of 1902 may again be reached this season. There is a general concurrence of opinion that the oat crop will cut exceedingly deficient in straw, though the yield of grain may prove satisfactory. The excessive heat, coupled with lack of moisture unduly contracted the period of growth, and forced the plants prematurely into ear. The result has been that the crop, especially on thin soils, is of the very lightest description. On heavy soil, however, and especially on manured ground after roots, the crop has turned out heavier than was expected, and some really good fields under these conditions of grow— have come under our notice. The reason, no doubt, is due in a large measure to the increase in the moisture-holding capacity of the soil derived from the incorporation and decay in it of the farmyard manure, which, in its turn, not only acted as a mulch to conserve the moisture present, but served as a sponge to hold a larger supply in reserve for the needs of the plants.

Potatoes everywhere look especially promising, and, judging from their luxuriant growth, one of our correspondents feels justified in describing them as "the best crop of the season." It is rather early, we fancy, to venture a comparative statement of this kind just yet; but there is no gainsayin the fact that the promise of a plentiful crop of tubers is exceptional. The potato plant builds up in its underground stems the supply of starch, which is afterwards destined for the food of man, and this process it can only do, or do only to the greatest advantage, in the presence of direct sunlight. Keeping this in mind, we have good grounds for our belief that the potato crop this year will not only be large, but also of exceptional quality. The early varieties at present being raised are unusually dry and floury, and we will be surprised if the same good qualities will not characterise the later and maincrop varieties.

Concerning the mangel and turnip crop, there is a considerable conflict in statement. Reports from the North indicate that both these crops, though delayed by the drought and the fly attack, are now looking very promising, and may be expected to come up to the average yield of other years. The Midland and Southern reports are not nearly so assuring, and in some districts, where even the slight rainfall which improved the conditions elsewhere, was not experienced, a partial failure of the crop is predicted. All over the southern province there is a general tale about the mangels being late and very patchy, while in some of the Midland counties turnips are still in a very bad way, one correspondent describing them as being completely burnt up. Early sown turnips, on the whole, seem to have done best; but exceptions to this rule have occurred, so much depends on the soil conditions and other considerations. At present it seems difficult to tell how both these root crops may turn out. There is no doubt the present is a very critical stage of their growth, and the arrival of timely rain would improve matters considerably. Any shortage in the root crop would be a matter of serious moment to the farming interests, and we can fully appreciate the anxiety with which the progress of the crop during the next fortnight or three weeks will be watched.

Pastures still continue in a very burnt-up condition owing to want of rain, and though the showers which have fallen occasionally within the past ten days have refreshed the surface herbage slightly, not nearly sufficient rain has fallen to thoroughly soak the soil, and to provide the much-needed drinking-water for the stock on uplying fields. Great inconvenience to stock-owners has been caused in this way, and although cattle have had to be driven considerable distances for watering purposes, or water conveyed specially to them in the fields, they are not making such a thrive as under normal conditions of grass and water supply in other years they would have made. The hay season for the late meadows is now in full swing, and, looking back on the past month of bright sunshine and drying reezes, more ideal conditions for the perfect saving of hay—and that with the minimum amount of inconvenience and handling—could not have been wished for. Seeds or upland hay cut surprisingly well considering the season, and though the average yiel will fall short of last year's figure, the shrinkage may not turn out to be of much consequence. Meadows, as a rule, cut fairly well, and while one of our correspondents thinks the yield may be put down as only half a crop, there are others who think the average was fully reached. One thing is certain, that if the quantity be under the average, the quality will be well above it, and tha stock will this winter be provided with fodder at once nutritious and palatable.—*The Farmers' Gazette.*

Doctors and Our Milk Supply.

As was only to be expected, the question of our milk supply was, among other matters, discussed at the Congress of the Royal Institute of Public Health, held last week. No fewer than four papers dealing with the subject were read, and perhaps the most interesting was that of Mr. H. R. Rhodes, who comes from America. He described the production of medically certified milk as carried on at one of the farms of which he had charge under the New York Medical Committee. By this system practically everything except the milk itself is sterilised, and the natural product thus assured a high pitch of cleanliness sells at a shilling a quart to the well-to-do New Yorker. One passage from this paper is worth quoting:

"The day's work commenced at 4.30 a.m. every morning by each cow being led singly, and in turn, from their living stable into the washing and cleaning shed. Here they are washed with sponges and brushes in antiseptic water and dried with sterilised towels. As each cow is finished off a lad leads it by the halter to the milking shed, where it is fastened to a snap along the wall.

"Here the milkers take each cow in hand as it arrives from the cleaning shed. These milkers are required to wash themselves thoroughly in a bath-room provided, adjacent to the milking shed, and to wear clean linen clothes that are frequently washed and sterilised twice daily."

The result of all this elaborate care was that, according to Mr. Rhodes, while ordinary milk supplied to New York was found to contain 5,000,000 bacteria to the cubic centimetre, an analysis of certified milk showed an average of only from 1,500 to 1,600 bacteria in the same bulk.

The other papers were read by Dr. T. D. Lister, assistant physician to the Royal Waterloo Hospital for Children, who gave reasons for the establishment of municipal milk depots, declaring that children were dying by thousands every year for the lack of such provision; Dr. L. W. Hope, medical officer of health for Liverpool, who described in detail the encouraging work carried on by the milk depot of that city, at an annual cost of £1,200; and Councillor A. W. Short, of Bootle, who advocated in a paper full of facts and figures, the municipalisation of the milk supply.

Live Stock Record.

PROSPECTS OF THE RAM SALES SEASON.

The present week will bring into train several important ram auctions, and henceforth all through August quite up to the middle of September there will be sales of rams in different parts of the Kingdom, somewhere or other, almost every day. So far as sales have gone yet, tradings have been pre-eminently satisfactory to sellers, and there appears to be every prospect of higher prices than usual being realised by breeders this year. All circumstances are indeed favourable for such a forecast. We trust that recent frequent rainfall has enabled farmers to get a satisfactory turnip plant. The fly has been very busy in many districts, but judging from the general character of reports hopes may be entertained that the July outlook in this particular will prove favourable to sheep-trading rather than otherwise. Certainly the recent rise in the rates of wool ought to help the ram trade. Almost all sorts of wool are worth at least 2d. per lb. more than last year. A century ago flockowners bred for wool more than for mutton, and although circumstances have greatly changed in this respect, the value of the fleece is till an important factor promotive of sheep-husbandry. But apart from these natural influences, the extraordinary activity of foreign buyers, especially those seeking sheep for the Argentine, has caused ram sales which have already taken place not only to go off well but to have been characterised by some remarkably high prices.

Thus the Royal first-prize Shearling Lincoln ram of Messrs. Wright was bought by Mr. F. Miller for the Argentine for 1,000 guineas. At Mr. H. Dudding's Riby Grove auction the same buyer gave 500 guineas for the second-prize Royal Shearling, and he would have been prepared to have given a far higher sum, so it was said, if he had met with a competitor at the auction to bid against him. Other high prices for rams at the Riby Grove auction were 420, 210, 150, 105, and 100 guineas, the average realised for thirty-one Shearling rams being over £90 each. Several of the leading flockmasters of the Lincoln breed have made so many sales recently by private contract that they will have no need to auction their Shearlings this year. The Argentine buyers have never previously been so keen. Messrs. Wright have sold sixty-five to Mr. Miller, in addition to the 1,000-guinea sheep. Mr. Dudding had specially reserved one hundred rams for the Argentine trade, and Mr. Miller has bought the whole of them. Mr. Casares, another agent for Buenos Ayres, bought Mr. T. Casswell's Royal Champion ram, and has since secured many rams from the flocks of Messrs. Dean, Mr. C. Howard, Mr. Dixon, etc.

Nor have these active foreign tradings been limited to one breed. The Hampshire flock-owners have been able to clear off their Shearling and older rams, which they have been doing with great readiness, as their sales and lettings being chiefly for ram lambs will not be affected thereby. Mr. James Flower has disposed of his Shearling ram, aptly named Fame—for after being let for 180 guineas last year, he has won firsts this show season at some half-dozen leading exhibitions, including the Royal Counties and the Royal. Five other Shearlings from Chilmark will accompany him. Mr. H. C. Stephens has also sold several rams for South America, which have distinguished themselves as prize-winners. When we find also that on one steamboat there were recently despatched sixteen Shropshire rams including the celebrated Royal first prize two-shear, as well as nine from Mr. C. Harding's and six from Mr. Butter's flock, and that a large consignment of Kent sheep from the flocks of Mr. C. File, Mr. H. Rigden, and the Earl of Verulam, accompanied these Shrops, we perceive that the Argentine net is this year being extended widely. All this bodes for good, and it is to be hoped there will be no check in respect to disease outbreaks for many years to come to interfere with the demands of Argentine flockmasters for British rams, and even when their demands have been satiated there are other vast territories in South America awaiting the golden tread of the sheep for the development of their agricultural resources. We trust that we have entered on an extended era of shepherding all the world over, which is bound to bring British flockmasters larger demands for rams and genuine prosperity.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending July 15, 1905:

NOTE.—The figures for the current year are approximate only.

Lady Warwick College.—The fifth anniversary of the foundation of the Lady Warwick College, Studley, was celebrated on Wednesday by the holding of a show of flowers, fruit, vegetables, etc., in the Castle grounds. There was a very large attendance of visitors, including the Countess of Warwick, Lord Brooke, Mr Wilson, K.C., and Miss Wilson, Chatham, Ontario, and Mr. Brooke Hunt, of the Board of Agriculture. The exhibits were staged in two large marquees, the table decorations being arranged in a spacious room in the Castle. The produce exhibited by the students was generally of a high-class character, and the show was altogether the most successful of the series.

STOCK AND SHOW NOTES.

By Herdsman.

The sixteenth annual show of the Warrington and District Agricultural Society will be held in Walton Park on Thursday, August 17. Prizes, cups, etc., are offered to the value of about £750. As in past years, Sir Gilbert Greenall, Bart., gives a district champion cup value £10, and two silver cups value £5 each. Mr. F. Stapleton Bretherton gives a special prize value £5, and the vice-president, Mr. T. Henry Lyon, a silver cup value £5, while Lady Greenall offers three special prizes of £2 each to the blacksmith for the best shod horse which has been regularly shod at the same forge during the six months or thereabouts previous to the date of the show, in certain specified classes. Mr. J. Whittaker Kenworthy, Mr. James Gould, Messrs. Henry Milling and Co., and Messrs. Day and Sons also offer special prizes. Medals are offered by the Shire Horse Society, the Hunters' Improvement Society, and the Hackney Horse Society. There are classes for Shires, hunters, hackneys, harness horses, jumpers, tradesmen's or tenant farmers' turnouts, cattle, pigs, cheese, and butter. A special feature of the show will be novice classes in the open hunter and open harness classes for horses not having previously won large prizes at other shows. Entry forms and all particulars may be obtained from Mr. H. Beresford Melville, Bold Street, Warrington. Entries close on Wednesday, August 2.

For their thirty-third annual show, which takes place on Tuesday, August 15, the Heanor Agricultural and Horticultural Society is offering upwards of £250 in prizes. Classes are provided for horses, cattle, sheep, pigs, poultry, pigeons, rabbits, and song birds, some of which are open to the United Kingdom, and among the numerous specials are the medals of the Shire and Hackney Horse Societies. Entries close August 8 with the secretaries, Messrs. G. H. Holmes and J. Covel, 11, Market Street, Heanor, Notts, from whom prize schedules, etc., can be obtained.

The second biennial sale of hackneys, Welsh ponies, brood mares, made harness horses, cobs, etc., belonging to Messrs. J. Jones and Son, will take place on Thursday next at Dinarth Hall, Colwyn Bay, Messrs. H. Manley and Sons being the auctioneers. As most horse breeders are aware the name of Messrs. John Jones and Son has been for the last twenty-five years prominently identified as owners and exhibitors of Welsh cobs and ponies, whilst their success in the show-ring has been remarkable. The most noteworthy successes have been achieved since the introduction into the stud of that noted hackney-pony sire, Julius Cæsar II. 5666, one of the most successful pony sires in the United Kingdom. He was purchased by Mr. J. Jones, in 1895, at the dispersal of Sir Humphrey de Trafford's pony stud, at the record price of 210 guineas, and the outlay has been fully justified, three of his progeny having since realised £1,800. Following the precedent of the sale two years ago, with few exceptions all the animals catalogued will be sold without reserve, and thus breeders are offered a good opportunity to purchase young stallions, fillies, and foals as an addition to, or nucleus of, a pony stud.

During the week I have received some catalogues of sales to be conducted by Messrs. J. Thornton and Co. in the course of the next month or two. They include the dispersal of a number of pure-bred Shorthorns belonging to Mr. F. J. Steward, Whitehall, Brigstock, Thrapston, at Whitehall Farm, on Wednesday next, the 26th inst.; a selection from the Southdown flock belonging to Mr. R. J. Col-

man, at Crown Point Park, Norwich, on Thursday, August 3; and the sale of sixty head of Shorthorns belonging to Lord Brougham and Vaux, at Brougham, Penrith, on Friday, September 1. All three dispersals are sure to attract a large company of breeders from all parts, the stock to be offered being of the very highest quality and well known.

A valuable consignment of high-class pedigree pigs was shipped from Liverpool on the 11th inst. by the Houlder Line steamship "Drayton Castle," for Brisbane, Queensland. These included a choice Middle White boar, and two sows from the celebrated "Walton" herd owned by Sir Gilbert Greenall, Bart., of Walton Hall, Warrington, and three Berkshires (a boar and two sows) from Mr. Jefferson's well-known Peel Hall herd. The whole of the animals were personally selected from the respective herds by their new owner, who has been paying a visit to this country, and from their superior breeding should prove a valuable acquisition to his present herd.

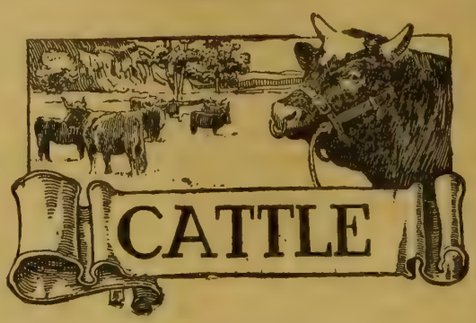
Mr. H. J. Kingwell, of Great Aish, South Brent, Devon, has met with much success this year in the exhibition and sale of Large Black pigs. He has obtained the award of the following prizes:—1st and 2nd at the Royal Show; 1st at the Bath and West at Notting ham; 1st at the Devon County Show; 2nd at the Somerset County (Bath). In addition to the two young boars sold by auction for 16 and 9½ guineas respectively at the Royal Showyard, Mr. Kingwell sold two sows (sisters of the boars) for 15 guineas each, and these are to go to Australia. Another young boar of the same litter was sold to Mr. Frank Dodd, of Chester, and the new owner has entered him for show at the Royal Lancashire, to be held at Liverpool. At the Royal it was remarked that Mr. Kingwell's pen of young sows (three) was the heaviest pen of pigs in the yard of any breed at the same age. Mr. Kingwell has sent other pigs during the past six weeks to Warmley, to Wolverhampton, to Exeter, and has not only sold at good prices, but has purchased recently a noted Cornish Large Black boar named Trescowe Pride (No. 875) at a good price.

At a meeting of the council of the Yorkshire Agricultural Society, held last week, the secretary, Mr. J. Maughan, stated that the arrangements for the Society's show at Hull, on August 9, 10, and 11, were all in a satisfactory condition, and he presented the following list of entries:—

Section.	1905. Hull.	1904. Huddersfield.	Average for last 5 years.
Cattle	230	249	221
Sheep	122	103	120
Pigs...	99	112	—
Horses	442	377	463
Total Live Stock ...	893	841	804
Total Ent's of all kinds	1,124	1,085	1,093

The figures given in the average column include sections not now represented in the prize list. In the case of pigs the average is not given, as in certain of the years there were no entries owing to the prevalence of swine fever. The number of feet frontage for implement shedding at Hull this year is 6,850, at Huddersfield last year it was 6,102, and the average for the five years is 6,588. Mr. Maughan added that a very satisfactory feature of the entries was that the horses are largely in excess of last year. Shorthorns are also in advance of the Huddersfield entry, but dairy cattle are below, the reason being that so high a standard has now been reached that only the very best quality animals have any chance of success. Arrangements have been made with the Hull Corporation and the three Ridings in respect to the movement of swine, whilst arrangements have been concluded with all the principal railway companies to issue return tickets to Hull for thirty miles and upwards at a single fare and a quarter, available for return to Saturday, August 12.

Altogether there is every prospect of the above show being a most successful one, all that is apparently needed being fine weather, which I hope will be vouchsafed the society. As regards next year's show it was reported at the meeting already mentioned that the Sites Committee recommended the Council to accept the invitation of the Mayor and Corporation of Middlesbrough for the show in 1906, and it was unanimously decided to adopt the recommendation, subject to Middlesbrough sending a deputation to the meeting at Hull on the show day to formally ratify the invitation.



Notes and Jottings.

Another week of unbroken drought has passed over the larger portion of the country since my last notes were penned, and no matter if one meets breeders or feeders from the North, South, East, or West, the complaint of shortness of feed in the pastures comes from one and all alike. Yet, generally, feeding cattle in particular have done fairly well. White clover has been very much in evidence during the past month or six weeks, much more than during the average of seasons, and this alike in pastures that have been dressed with artificial manure and those that have not been dressed. The natural dryness of the season has apparently kept the stronger varieties of grasses from asserting themselves so much, and, given more air, and liberty to the leaves of the delicate white clover, whose sweet blossoms form quite a sheet of white in many pastures.

It has often been said by some one or other of our leading authorities, upon the value of grasses and clovers—and I saw this same thing repeated in a prominent agricultural paper recently—that white clover is not a desirable plant in the pastures, and that it is not as nutritious and beneficial to the cattle pastured there as some of the other varieties of feed. Now my experience has been that there are occasions, and kinds of fodder, green feed, cakes, etc., that give much better results in practice than in theory, and white clover to me has been one of these. Walking to-day over the aftermaths, which, by-the-bye, are but very scanty, I find that the cattle have devoured down to the roots all the moist places where the white clover has grown best, and at all times the presence of this succulent herbage has been looked upon by graziers as an indication of the greatest richness of pastures.

It has been noticed how well cattle eat up such pastures, and almost invariabaly do well upon them. The short grass of a lawn mown continually with lawn-mowing machines, too, when carefully used, is one of the best feeds for indoor stock in the summertime, and this feed, owing to its being continually kept closely mown, usually consists very much of the leaves of the white clover. Then, again, the fact of the cattle always choosing that portion of the pasture first that is most prolific in this herbage is a proof that they like it, and it seldom happens that cattle are bad judges in such matters. Again, if we take the fact that a lot of cattle in a coarse pasture of grasses in which white clover is almost or entirely absent we find that they neither relish the feed as much or rest and thrive as well upon it.

The meat markets, especially beef, have of late been very depressed. Whether the beef has been marketed in quarters or upon the hoof, the highest quotations in the highest markets show a slight decline as compared with a year ago. The hot weather has no doubt a temporary influence in that direction, which is, perhaps, intensified, taking the country through, by the number of so-called unemployed, who, in consequence of their, perhaps in some cases (but very few), enforced idleness, have not the means wherewith to consume their usual quantity of meat. Shortness of pasturage, too, is causing in many places the disposal of more than the usual number of animals, and in some instances they prove to be not quite as well finished as would be well.

American and Canadian reports generally seem to sound rather a warning note in respect of grazing cattle or heifers. In the first place, it is said that on many of the leading or large ranches very much greater than the average number of fat stock will be forthcoming this fall owing to the fact that many lots of steers that ought to have been finished off last autumn were held over, and will augment the present year's supply. At the same time, a warning note is sounded that, so far as the Northern American Continent is concerned, the present year will in many instances be the last one in several immense districts in which ranch cattle will be fattened, a number of very large ranches having been split up and fallen into the hands of settlers, whose modes of farming will produce far less cattle and beef for a time than the old system.

In view of such facts, which are, there is no doubt, correct and stubborn facts, British breeders will do well to stick to their guns in the way of cattle-breeding, and maintain and increase, if possible, their ordinary numbers of stock, always bearing in mind that the quality is maintained as well as the numbers, and that it is the best that are most readily sold, and that leave the most profit behind them. Sheep-breeding in America, too, appears to be very much on the increase, and with wool at a better price than for years past, and mutton dear, there is little doubt business will increase very considerably in that direction, and this, too, will certainly have at least a little effect upon the beef and cattle supplies of that great Continent.

It has been admitted by many farmers of late years that it pays better to breed and feed than simply to purchase the raw material in its unfattened state, and just finish it for the block. This theory is a pretty sound one, and will be found by far the most profitable way of going on where the farmer and those around him do not begrudge a little trouble in the feeding and management of the youngsters, as great care is needed in this respect; but when these cares are over and the feeder finds himself the possessor of a large herd of highly-bred stock, secured, as we may say by instalments, past troubles sink into oblivion. There is no question that the man who is a feeder only finds greater difficulty every day in purchasing well bred stock, and experience has proved that badly bred ones leave little or no profits.

With regard to the rearing of calves for fattening when matured, a great many and various systems are followed. Some simply let a cow bring up her own and another purchased calf, letting them run out in the fields or fold yards; others take the trouble to milk the cows and feed the milk, to which other foods have been added, from a pail, some using one means and some another of increasing the capacity for bringing up a number of calves at as small an expense as possible. In some recent experiments carried out in calf feeding at the Kansas Experiment Station, some valuable hints have been obtained. One of the main things taught is the great value of skimmed milk as a food for bringing up stock calves, this product being rich in bone and muscle formers, and the calves were found to make better progress later on than those reared upon their dams.

The "Sale of Butter Bill" is being looked forward to as being likely to afford some benefit to the butter producing portion of dairy farmers as soon as it is passed and becomes law. Our dairy papers and thousands of our consumers are continually throwing in the face of British butter makers what they call the superiority of a great deal of foreign butter as compared with the home-made product, and at home are continually yelling about the superior properties of creamery butter as compared with that of individual dairy farmers. Those people who have to make their homes largely in hotels know many of them to their sorrow, how utterly unpalatable, and, it may be said, unfit for food much of the butter put before them at these establishments has been during the recent hot weather.

The recent award of milking prizes at Park Royal should be, plainly speaking, an eye-opener to many dairymen. The number of animals that were disqualified owing to the poverty of their milk being almost incredible. It is much to be regretted, and detracts immensely from the instructive value of such tests that the results are so late in being published. This year nothing was known of them practically until the majority of visitors had left the show. Had these results been published upon the opening or second day of the show, it would have given those interested an opportunity of inspecting these animals and of seeing if outward signs of this poverty were visible. This might be done were the animals received into the yard, and tested prior to the general exhibition.

Another matter of very vital importance is

the question of food used. These cows ought to be all fed alike and under the superintendence, as regards their feeding, of some thoroughly responsible and reliable person. Until this is done, and the weight of food consumed by each animal published, very little, or, we may say, no benefit whatever in the way of intelligence will be conferred upon the dairy portion of our stock breeders. What availeth it so far as rent paying and making a living is concerned if one cow succeeds in giving five or six gallons of milk a day, if the cost per gallon in production is, as it would often be found to be, double that of the cow that yields three or three and a half gallons, the latter also improving her value by better condition, whilst the former is only sinking away?

There was little to choose in the way of breeds as to the richness, or rather as to the disqualifications on account of poverty of the milk, as regards the large breeds, Shorthorns, Lincoln Reds, South Devons, and Red Polls all showing in the disqualifications, and Longhorns also. Ayrshires, Channel Islanders, and the smaller breeds all passed favourably in this respect; but, as regards the former of these breeds, no awards were made beyond the first and second prizes. Roughly speaking, Jerseys came out best of any breed, and probably Dexter Kerries next best. The latter breed and the sisters, the Kerries, did not have quite as good a time as for the past few years at Messrs. Robertson's annual sale at Park Royal. Shortness of feed may, perhaps, account for this, and also for the low prices prevailing at a recent sale of Red Polls.

Sale of Dutch Cattle at Ipswich.

Messrs. Robt. Bond and Sons sold at Ipswich on Tuesday a herd of forty Dutch cattle, the property of Mr. Allan Gant, of Ramsey. The animals were all bred by the owner, and included some good specimens of the breed. There was a sharp demand, and high prices were realised throughout, buyers attending from long distances. Details:—

	£	s.
Polly, 6 years old, and calf ... Lord Radnor, Wiltshire	28	0
Princess, 5 years old, and calf		
Strawberry, 5 years old, and calf ... Mr. L. Lucas, Ramsey	27	0
... Mr. A. C. Haddenham, Pakefield	27	10
Darkie, 5 years old, and calf ... Mr. A. C. Haddenham, Pakefield	32	0
Duchess, 5 years old, and calf ... Lord Radnor	28	10
Violet, 5 years old ... Mr. H. W. Girling, Reydon	23	10
Spot, 5 years old ... Mr. H. W. Girling, Reydon	21	0
Cowslip, 5 years old ... Mr. E. J. Keeble, Gt. Oakley	17	10
Snowball, 4 years old ... Lord Radnor	23	0
Heifer, about 2 years old ... Mr. A. C. Haddenham	22	10
Heifer, ditto ... Lord Radnor	20	0
Heifer, ditto ... Mr. A. C. Haddenham	21	10
Heifer, ditto ... Mr. L. Lucas	22	10

Heifer, about 20 months old ... Mr. W. Dybell, North Walsham	13	10
Four Heifers, about 12 months old ... Mr. W. Dybell, North Walsham (each)	12	10
Eight Heifers, about 8 months old ... Mr. A. Hutley, Braintree (each)	8	5
Two Heifer Calves ... Mr. J. C. Dawson, Nacton (each)	5	0
Bull, 2½ years old ... Mr. H. W. Girling	13	0
Bull, 20 months old ... Lord Radnor	15	10
Bull calf, 10 months old ... Mr. W. Dybell	15	15

Horse Notes.

"He doth nothing but talk of his horse."
—Merchant of Venice.

Good may be expected to arise from the persistent efforts that Mr. Philpotts Williams is making to bring the question of light horse breeding before the country, and his lecture under the auspices of the Army League and the Imperial Defence Association is, so far as it goes, a cheering sign. To say that our horses have deteriorated would not be correct. In every breed there are as good horses as ever there were. The records of the racecourse show that our thoroughbreds are as stout and as fast as ever they were, and in the hunting field there are more horses which go to hounds satisfactorily than used to be the case. But there are not so many light horses bred as are required—the demand has increased more rapidly than the supply, and herein lies our weakness. Government aid is called for; it is suggested that there should be a restriction, if not a prohibition, on the foreign sale of mares and fillies, and that the Government should undertake to either subsidise breeders under certain conditions, or commence breeding establishments as is done abroad. A restriction or prohibition on the sale of mares to go abroad is, at any rate at present out of the range of practical politics. Mr. Philpotts Williams says that the 700 horse shows in the United Kingdom are so many horse fairs at which the foreigner has the opportunity of buying our best mares. That is so, but Mr. Williams and those who think breeders and farmers should sacrifice themselves for the good of the community, forget how easy it would be to keep those mares in the country. The men who sell them would take the same money or less from an English customer. It is precisely because the foreigner is a good buyer that he gets some of the best. He does not get them all.

Though the Government might do more than it does to encourage horse breeding it is questionable whether any great benefit would be derived from Government interference. It is very questionable if a Government stud would be a satisfactory solution of the difficulty. Because Government studs succeed to a certain extent abroad it by no means follows that they would do so in this country, the private enterprise of which in horse breeding has far surpassed the Government efforts of other countries as is sufficiently evidenced by the throng of foreign buyers who come over to visit us every summer. The danger seems to be that there is a decreasing market for the second or third rate horse. What is meant by the term as a model the horse possessing speed but [illegible] something which is necessary for him to rank in the first or second class. The future market for such horses seems likely to be curtailed by the increase of motor omnibuses and electric trams, and with the omnibus and van motor-driven, the army seems to be the only great market left for the class of horse named. This means a decrease in price except in the case of a war when there would be famine prices at once. It may be safely assumed that [illegible] about double the estimated number if a [illegible] war was on the way. Now the danger seems to be that the foreigner may get our good mares at even less than their value. The most practical way to prevent this seems to be to support the Brood Mare Society, for which Mr. Williams has done so much. If this Society was supported as it should be, or kindred societies were formed, horse breeding would soon be put on its proper footing, and there would be no need for complaining of a deficiency of horses. The patriotism of private individuals seems likely to effect more benefit at a less cost than any Government scheme, but it is evident that on the question of the horse supply that it requires rousing.

The way in which the Cleveland Bay breed has been neglected is from a national standpoint culpable. Here we had the finest foundation for the general utility horse in the world as I have frequently pointed out in these columns, and we simply let it slide because it was unfashionable. I am led to make these remarks by a paragraph which I saw in a Yorkshire newspaper a few days ago to the effect that a gentleman had purchased some high-class Cleveland Bay fillies with a view to experimenting in the direction of hunter breeding. And then the newspaper went on to say that should the experiment prove successful it would provide good weight-carrying hunters and solve a problem which had long puzzled breeders, or words to that effect. All which is of course so much twaddle.

For a hundred and fifty years certainly, but very probably for many more the cross between the Cleveland Bay mare and the thoroughbred sire has been a matter of common practice. I myself have written columns, historical and otherwise, about the cross between the thoroughbred and the Cleveland Bay, and some twenty years ago I bought nine Cleveland Bay mares for the late Duke of Hamilton, who got them with the express purpose of breeding hunters from them by thoroughbred sires. But this is only a recent occurrence. Let us for a moment go back to ancient history. In 1735 was foaled a horse named Traveller, by Almanza. He was bred by Mr. Osbaldeston, and was a notable horse in his day, winning many plates. He was sold at the end of his racing career, and for many years was a country stallion travelling in the neighbourhood of Yarm, at the low fee of one sovereign, and very frequently less. The excellence of his stock from the country mares, most of which in those days were Cleveland bays, drew attention to him, and the first Duke of Cleveland fancied him sufficiently, and determined to give him a trial. The result of his alliance with Slighted by All was Dainty Davie, who, so far as we are able to judge, was the best of his year. At any rate, he was so good that the Duke was not long in buying him, and though he was an old horse he sired some useful horses. He was seventeen or eighteen years old when he mated with Slighted by All.

Why Traveller was neglected in the early part of his stud career it is impossible to say. His history is enveloped in obscurity from the time he ran his last race to the time the Duke of Cleveland patronised him. But it is well known that when he was in the neighbourhood of Yarm he was mated with the mares of the country, i.e., with the Cleveland mares, and many a good Cleveland bay stallion owed his extra dash and quality to old Traveller, whose name appears in many of the old pedigrees of Cleveland Bay sires.

Coming down to a later date—about one hundred years after the birth of Traveller—we find, on his own showing that the Primate was the best horse in Sir Harry Goodricke's stable when that gentleman hunted the Queen. And the history of the Primate is an interesting one. He was by President from a Cleveland Bay mare, and was bought by Mr. John Maynard, of Harlsey Castle, when three years old. Mr. Maynard, a very heavy man, hunted him with his own hounds and Mr. Milbanke's, and sold him to Sir Harry Goodricke for 400 gs. Sir Harry wrote that he was the best horse out of a stable of fifty, and, I believe, that when he was sold after Sir Harry's death he made 600 gs.

Forthcoming Live Stock Sales.

Date.	Stock.	Owner.	Place of Sale.
July 24	Hampshire Down Sheep...	Mr. T. J. Buxton	Waters Place Farm, Ware, Herts.
25	Hampshire Down Sheep...	Various	Didcot Junction.
25, 26, & 27	Horses	Various	North Wales Repository, Wrexham.
25 & 26	Southdown Sheep... ...	Various	Chichester Cattle Market.
26	Shorthorn Cattle	Mr. F. J. Steward... ...	White Hall Farm, Brigstock, Thrapston.
26	Hampshire Down Sheep...	Mr. W. M. Harris ...	Basingstoke.
27	Hampshire Down Ram Lambs	Mr. F. A. K. Falconer ...	Alresford Fair, Hants.
27	Hampshire Down Ram Lambs	Mr. J. Goldsmith	Alresford Fair, Hants.
27	Longhorn Cattle	Mr. W. H. Sale	Atherstone, Warwickshire.
27	Hackney and Welsh Ponies	Messrs. Jones and Son ..	Colwyn Bay, North Wales.
27	Horses	Various	York Horse Repository.
28	Hampshire Down Sheep...	Marquis of Winchester ...	Weyhill Fair.
28	Hampshire Down Sheep...	Mr. F. A. Holman ..	Weyhill.
28	Hampshire Down Sheep..	Mr. H. O. Stephens ..	Weyhill.
28	Hampshire Down Sheep ..	Mr. W. S. James	Cattle Market, Kettering.
28	Devon Longwoolled Shearling Rams	Various	Exeter Cattle Market.
28	Suffolk Sheep	Various	Kesgrave, near Ipswich.
29	Devon Longwoolled Shearling Rams	Various	Taunton Cattle Market.
31	South Devon Rams ...	Various	Totnes, Devon.
31	Suffolk Horses	Various	Ipswich.

He was the highest-priced horse at the sale. Mr. John Maynard was a great believer in the cross, and the Primate was not the only horse bred that way that he sold for 400 gs.

I have had a most interesting letter from an old East Riding man on the subject of Cleveland Bays, and I trust if he sees this he will forgive me for quoting him. "I have seen the time," said he, "when much of the East Riding was farmed with clean legged—no white—mares—a golden bay; and I have seen the farmers' wives ride to market on pillions behind their husbands on these mares. These mares, crossed with whole coloured blood, bred either hunters or coachers—short backs, cut their tails as hunters, if not coachers. . . . I have seen to my sorrow fifty beautiful mares exported to Prussia by old Ryby Nicholson every fortnight. England was then fooling away what you cannot replace at about £30 each."

England is not doing that now; and, as I pointed out earlier in this article, the export of mares can easily be stopped by rich people at home. But in the days of which my correspondent speaks the Cleveland Bay was neglected, and sent out of the country wholesale, simply because men failed to recognise what an important factor they were in horse breeding. And something very similar, though in a different way, has gone on during the last 25 years. When the revival took place men, hastening to be rich, bred entirely for the foreign market. Immediately that there was a falling off in the foreign demand, many of them—not all—gave up breeding pure bred Clevelands, and crossed their mares with Hackneys or thoroughbreds. There was a time when it would have been comparatively easy to have got up a good stock of valuable mares. It is not out of the range of possibility to do that now; but it will be a work of time and patience. In a few years, unless something is done at once, I fear it will be impossible. And I would point out that the methods which have stood the test for over 150 years seem to be far more worthy of support than more or less chimerical theories on crossing.

I was at the Bedfordshire show at Ampthill on Wednesday, and was very pleased to see the judges, Mr. A. Parker and Mr. G. Taylor, rode the hacks. This resulted, as might have been expected, in some of the "fashionable" high-stepping type being put back. And quite right. What is the use of a hack that no one would ride five miles, or could ride five miles, without being shaken to death? And if a hack is no longer a necessity, he is a luxury; and if hack classes are kept in show schedules, hacks should be "pleasant conveyances."

THE LOOKER-ON.

Show at Chesterfield.

The show of the Chesterfield and East Derbyshire Agricultural Society progresses each year, there having been a steady increase in the number of entries of recent years, and last week a further advance was noted, a record being established. The exhibition was the 63rd that has been held, and in every respect it was a great credit to the society, the stock being of an excellent character. The entries totalled 397, comapred with 374 last year, and 364 in 1903. There were 212 horses, an increase of 7, 58 cattle as against 75 last year, 72 sheep, an increase of 22, 17 pigs, and 38 entries of dairy produce. Delightful weather favoured the gathering and the attendance was good. Agricultural horses made a very good display. There was not a big class of mares with foals, but they included an animal of rare merit, and one which has taken honours at many leading shows. This was Tom's Flower, which has captured no fewer than five gold medals of the Shire Horse Society. She formerly belonged to Messrs. James Forshaw and Sons, of Carlton-on-Trent, Newark, but is now the property of Mr. Joseph Grimes, of Highfield, Pallerton. Mr. J. Grimes was successful in the barren mare class with Warlie's Bluebell, by Blythewood Conqueror. She also won the Challenge Cup as being the best mare belonging to a tenant farmer. Mr. Grimes thus repeating his last year's victory, and he has only to be successful once more to win the cup outright, as he did the previous one. Warlie's Bluebell also secured the silver medal of the Shire Horse Society. Though the hunting classes were not of large dimensions, they contained animals of almost unrivalled character. Classes for pit ponies were included in the catalogue for the first time, and they obtained strong support, the sturdy animals coming in for much attention. The standard attained in the cattle section was a high one, the bull classes being excellent. Sheep, too, were good—in fact one of the best displays seen at Chesterfield, the entries being more numerous and the quality much improved, whilst of pigs there was a moderate show.

Notes and Jottings.

Some interesting facts have been given to the agricultural press of the results obtained by crossing rams of certain other breeds with Welsh ewes. This information having already been widely circulated, it need not be referred to more fully here, save to draw attention to the fact that such tests are most valuable, and, further, to emphasise this value.

On all hands it is admitted that the export demand for stud sheep is one of the most lucrative portions of the ram-breeder's business. This demand, therefore, is one worth giving all encouragement possible, and, hence, any matter that would aid in this direction is worthy of repetition.

The object of all who import our stud rams for the improvement of their native stock is to breed rams for this purpose. This being so, it follows that any information as to the value of different breeds of sheep when used for cross-breeding is of the greatest interest and value to these buyers.

If this is so, then there can be no question but that experiments such as have been conducted with the Welsh ewes ought also to be conducted with other breeds. When one remembers the grand fat sheep exhibited at Smithfield in the lamb classes for cross-breds, and the various crosses that have been tried to produce the cross-bred lambs for competition there, it is a matter of regret that a full record of all the details of their breeding, etc., has not been tabulated and placed upon record.

It will probably be urged that, so far as regards Smithfield Show, one cross more than any other has been successful: quite so, but this does not prove that in different localities and under other circumstances other crosses would not be quite as profitable.

The Smithfield crosses have proved themselves the best for that purpose, but it has yet to be proved this cross is the best for all purposes or the most profitable for the general feeder.

Another point these Welsh experiments have brought to light—namely, there is still much to be learnt in this direction. Experiments in crossing of two pure breeds are useful and valuable, and it would doubtless be well worth the while of sheep societies to give encouragement to such cross-breeding tests, with a view of being able to show by actual results the value of the service of sires of their breed, both upon other pure-bred ewes, and also upon nondescript ewes with no particular line of blood.

The notable rise in the value of wool has been much commented upon, and many excellent sales have been made. One of the best we have heard of is that effected by the Duke of Richmond for the wool of his Goodwood Flock, which, at the Chichester Wool Sale, realised 15½d. per lb. of washed wool. Many growths of Kent wool have realised fully 1s. per lb., and one we heard of at Ashford last week made 12½d. per lb. Contrast this with 5½d. and 6d., the ruling prices two or so years ago, and the importance of this rise in value will be fully realised, equalling in the Kent breed some 3s. 6d. to 4s. per sheep.

Looking around the various pens of Hampshire Down sheep and lambs at Salisbury Fair, one could best realise how great a part the sheep play in the successful working of that huge tract of land adjacent to Salisbury. A visit to any one of these large holdings there will always bring home the importance of the sheep to the profitable occupation of land, not only in that district, but in all others where sheep will thrive and do.

Another notable feature of this fair, or sale, was the remarkable prices obtained for the fat wether lambs, barely of an average age of six months. Up to 50s. per head was realised, and quite a number went over 40s. Surely there is profit in this.

That the Hampshire Downs have a well-deserved reputation for early maturity, is well known; but facts such as the remarkable early development of their ordinary wether lambs are not sufficiently well known. Many times, when I have been quoting the remarkable results given by Smithfield average daily gain, I have been met with the rejoinder that such gains are only those of show sheep. Would it not, therefore, be advisable for the Hampshire Down breeders to arrange for an actual test to be taken of, say, for instance, the first-prize pen of either fifty or eighty fat wether lambs at the next Salisbury Fair, the lambs to be weighed alive and then dressed. Whatever the result might be, it would be of value and interest both to those interested in the breed at home, and also in the Colonies and elsewhere.

The agricultural returns show a reduction in the number of sheep in the United Kingdom as compared with the preceding year by 1.87 per cent. The aggregate total is 29,105,100 head, which is the heaviest total recorded since 1888, when it was 28,938,716. This diminution of the sheep stock of the country is a matter of regret; but it is more than probable largely due to the fact that under the present system of early maturity and rapid development the average age of sheep slaughtered is very much less than formerly, and consequently, even with the smaller number kept for breeding purposes, it is more than likely that the weight of mutton produced is larger than it used to be in former years.

The number of ewes kept for breeding purposes in 1904 was 11,436,017, which shows a decrease of 0.43 per cent. as compared with the corresponding total for the previous year. This reduction, though a small one, is a matter of regret, because any reduction of the breeding stock of the country is a matter of serious import, particularly of sheep. These are, without question, one of the most valuable assets our farmers can have, and no other domestic animal gives so good a return for the money invested, nor are any more valuable in respect to maintaining the fertility of the soil.

Reference to the tables for the different parts of the United Kingdom shows, however, that the whole, or, at any rate, the larger proportion, of the reduction has taken place in Ireland because, whilst this country's total for 1904 is 3.25 per cent. less than in 1903, Great Britain shows an increase of 0.02 per cent, the increases being 0.52 per cent. for England, 1.06 per cent. for Wales, and a decrease of 1.42 per cent. in Scotland.

Practically, England, Scotland, and Wales have just maintained the stock of the previous year, a matter we are pleased to note, because it shows that, so far as regards these countries, the annual decrease has been stopped.

Inverness Sheep and Wool Fair.

This famous fair, which was held on the 14th and 15th inst., was one of the most satisfactory to buyers and sellers that have been held at Inverness for about a generation. The great demand for Cheviot and blackfaced wools—manufacturers in the United States seem to want as much wool as they can get—ensured an exceptional attendance of wool buyers at the market; and, on the other side, the sheep farmers of the Highlands, feeling assured that they would obtain enhanced prices for sheep and wool, were ready to meet the buyers in an accommodating spirit. Business was therefore got through with a degree of dispatch that was almost up-to-date, and was somewhat foreign to the old ways of bargaining. Some well-known Highland farmers held back their plots for the autumn sales, in the confident expectation that the market rates would be bettered. The indications are that the demand for first-class wools will further strengthen, and some of the sheepowners, being inclined to think that keep will be more plentiful in the South than had been indicated in the reports on the harvest prospects, have also held back for a further increase.

The advance on the prices obtained at the same market last year may be quoted as follows:—Cheviot sheep, 1s. to 2s. per head up; Cheviot lambs, 1s. 6d. up; blackfaced sheep, 1s. to 2s. up; blackfaced lambs, 1s. to 1s. 6d. up; Cheviot wool, 4s. to 5s. per stone up; blackfaced wool, 6d. to 9d. up.

Sheep Fairs and Sales.

Braintree.

The annual sale of sheep and lambs held at Braintree by Messrs. Bales took place on Thursday, when there was an entry of upwards of 5,600 animals, and a large company of buyers. The lambs were an exceptionally good lot all round, the high class and quality being a matter of general comment. The prices realised were considered on the whole to be very satisfactory. Shearling Suffolk ewes made up to 61s., Suffolk ewes to 49s., half bred full mouthed ewes up to 44s., and Hampshire Down ewes to 44s.

Camelford.

At Camelford Fair on Monday the supply was below the average, and there was keen competition, especially for the lambs, with the result that sales were fast and good prices realised. Many flocks were intercepted on the road to the fair, and others were purchased from the farms. In those instances lower prices were realised, and agriculturists were disappointed to find that bringing them into the fair would have considerably increased their returns. Lambs made from 20s. to 33s.; wethers, 42s. to 53s.; fat lambs, 8½d. per lb.; fat wethers, 7½d.

Chichester.

At Chichester on Wednesday Messrs. Stride and Son held their second special sale of the season of about 3,000 Southdown and other lambs. There was a large company of buyers present, and a good selling trade prevailed throughout, and, with the exception of one lot, every lamb was sold, prices ranging from 28s. to 35s. 6d.

Halesworth.

There was a large attendance at Messrs. Stanford and Broom's annual lamb sale, at Halesworth, on Thursday. The catalogue of 7,000 lambs and sheep comprised 4,600 half-bred lambs (mostly first-cross), 550 black-faced shearling and flock ewes, 200 half-bred shearling and flock ewes, 30 fat sheep, and 10 ram lambs. Competition was good, and the prices realised satisfactory. Half-bred lambs made up to 35s., ram lambs 50s., wethers 37s., and ewes 39s. 6d.; blackfaced shearling ewes fetched up to 52s. 6d. and lambs up to 45s.

Harleston.

Messrs. George Durrant and Sons' annual sale of lambs, ewes, and grazing sheep, at the auction mart, Harleston, took place on Monday, when the entries comprised 3,050, from the principal flockmasters in the district. Trade was fairly brisk, and the prices realised were very satisfactory, the highest price for lambs being 36s. per head, and for ewes 64s.

Kingsbridge.

About 2,500 sheep were sold at Kingsbridge Fair on Thursday, at prices that were considered good. Breeding ewes in pen realised 37s. to 45s. 6d. each; some of special breed reaching 52s. to 53s. 6d. top price; wethers in pens of five and ten sold at 54s. 6d. to 57s. each; ram hoggets £4 to £5 10s. each; one or two prime animals, £8 8s.; single wether sheep, 7½d. to 8d. per lb.; ewes, 5d. to 5½d.; lamb, 9d. to 10d.

Wool Fairs and Sales.

Dublin.

At Messrs. Ganly and Son's sale at Dublin on Wednesday the catalogue comprised 400,000 lb. of home-grown wools, all of which appeared to be in prime condition. There was a large attendance of buyers, but competition was very irregular, and much quieter than on the opening sale last month. Prices for bred wools, and for seaside and mountain qualities were from 1d. to 3d. per lb. lower, while Scotch and crossbred descriptions ruled about the same as at the June sale. Kerry wools were neglected. Considerable quantities withdrawn owing to buyers not offering up to consignor's reserve. Prices: Shropshire and Downs, 12¾d. to 13¾d.; fine hoggs, 12¼d. to 12¾d.; deep hoggs, 11½d. to 12d.; fine wethers, 12d. to 12½d.; deep wethers, 11d. to 11½d.; Wicklow mountain and seaside, 9d. to 10½d.; strong mountain, 8½d. to 9d.; bred greasy fleeces and mats, 8½d. to 10¾d.; blackfaced and Scotch, 6½d. to 8½d.

Lewes.

The second annual wool sale was held at Lewes on Monday in place of the annual wool fair, which has come to stay. All the best-known farmers in the eastern division of the county had entered fleeces, and buyers were present from a great distance. No fewer than 35,000 fleeces were catalogued, and the prices realised were very satisfactory. Of the 160 lots offered, less than half a dozen were passed over unsold. The average price realised was about 1s. 0½d. per lb., some fleeces making as much as 1s. 2½d. per lb. All the wool offered was English wool, and was comprised practically of fleeces from Southdown flocks, only a few Kent, Exmoor, Scotch, and crossbred fleeces being included.

Teesdale.

Haymaking operations interfered with the attendance at the Teesdale wool-sales last week, but a fair amount of business was transacted. Scotch wool came more freely to hand, and the feature of all classes of wool was its marked cleanliness. Quotations:—Best Leicester hogg, 13s. to 13s. 6d. per st.; half-bred fleeces, 12s to 12s. 6d.; Scotch wool of the best class, 7d. per lb.

Sussex County Show.

From small beginnings, this county show has grown to be one of the best in its district. The hearty manner in which all connected with its management do their work, assisted by their able and courteous Secretary, thoroughly deserves the success that has attended this year's exhibition held at Horsham. This mid-Sussex town gave the Society a hearty welcome, and the show ground was well adapted for its purpose. The arrangement of the ground was well planned, and little, if any, exception could be taken to this. One point, however, must be mentioned, namely—the bad method adopted in the arrangement of the catalogue. Evidently those responsible for this have but little need to refer to the catalogue, or otherwise we should not find the horse section commencing at number 1, and a little later find the same numbers again used in the cattle section. This duplication of numbers is much to be deprecated, and will, we trust, be avoided in future years; in fact, the faulty manner in which the catalogue is compiled is the worst feature of the otherwise excellent show.

Horses.

The first section is that for agricultural horses, which were judged by Mr. A. H. Clarke, of Moulton Eangate. This was a particularly strong section, and one in which the improvement of the past fifteen or twenty years' careful breeding of Shire horses in this country was seen to great advantage. Fifteen entries were made in the brood mare class, and the merit ran high all through. Rendall Lass, by Regent II., won first for the Marquis Camden, whose position was closely challenged by another excellent mare, Mr. J. Pearman's Creslow Belle III., that came second; her stud mate, a nice type of a weighty brood mare, Dogdyke Duchess, came third, and Poling Chance, owned by Mr. Thomas Dare, took the r.n.

We do not remember ever seeing a better class of foals at any county show for a very long time than we saw at this show. Not only was it a large class, twenty-two in number, but its merit was excellent. The winning foal, Mr. J. Pearman's chestnut colt by Hurdle Champion, was a grand colt, said by competent judges to be good enough to win in any company, an opinion your reporter thoroughly endorses. Next came a bay filly from the Marquis Camden's stud by Westley Regent, a first-class filly of high merit. Messrs. J. and H. Robinson owned the third winner, a well-known filly by Girton Charmer; whilst the r.n. went to a capital black colt, with good bone, by Hendre Champion, owned by Mr. Thos. Dare. Half-a-dozen entries made up a very creditable class of yearlings. Mr. T. Luckin won first with Sussex Menestrel, by the champion horse Menestrel. Mr. A. Luckin was second with a weighty one in Orford Charm; and Mr. T. Dare, with Poling Smart, took third, and the r.n. with an unnamed colt by D'Arcy Albert. Six entries were found in the two-year-old class. Mr. T. Luckin's Sussex Surprise, by Hendre Champion, secured the preference, followed by a very good filly of Mr. T. Dare's, Poling Dainty, by D'Arcy Albert. The third winner was Orford Champion from Mr. T. Luckin; and Mr. G. Duct, with Floradora, bred by Mr. J. W. Measures, took r.n.

The three-year-old class was of some good merit; here the winner was Orford Bridesmaid, a well-bred filly owned by Mr. A. Luckin; Love of Okehurst, bred by Messrs. Locke-King, and owned by Mr. W. G. Fladgate, ran close for first honours, but had to be content with second place. Mr. T. Luckin, with Bosphorus, bred by Mr. J. Parnell, came third—this is a very good filly—and Mr. W. Prince was r.n. The four-year-old and upwards mare class had a grand one for its winner in Mr. T. Luckin's Sussex Bluegown, which was followed by another of practically the same merit, Mr. John Allenby's Nailstone Lady of the Lake, bred by Mr. E. Clarke (Atherstone). The stallion class was a better one than we have often seen at this show. Mr. A. Luckin won correctly with Orford Prince, by Hendre Champion, followed by Mr. P. F. R. Salliard's Bridegroom William, by that grand old stud horse Prince William; and the same owner won the r.n. with Grenaragh Draytman.

Messrs. T. Wickham Boynton and W. G. Lambarde were judges of the hunter classes. This section was a good one, and very many of the best horses of the present day were in competition. The brood mare class was a good one, Sir M. R. Burrell, Bart., with Speculation, took first honours, and second and third with Florence and Chartreuse. Sir M. R. Burrell also won first in the foal class with a first class foal out of the winning mare. The leading winners in the other classes were Messrs. E. T. Norris, M. Seth Smith, W. A. Thornton, J. A. Mullens, and H. F. Sturdy. In the riding classes, wherein there were many superior animals, Messrs. E. T. Norris with Blood Royal, J. H. Stokes with Rosebud and Wiskey, H. M. Mackusick with Goldbeater, A. Gorham with Joan, and J. P. Hornung with Draco were the leading winners. In the champion class for any age, Mr. J. H. Stokes won with Wiskey, who beat Mr. H. M. Mackusick's well-known Tennis Ball, which was followed by Mr. F. G. Colman's Chance.

The two classes of covert hacks secured a good entry. Sir M. R. Burrell and Messrs. J. Colman, Leigh Brook, and C. B. Toms were the principal winners. Sir Gilbert Greenall and Mr. A. Rowell judged the Hackney classes, in which, though the entries were of moderate numbers, the merit was very good. Rosadora won with every ease in the brood mare class for Mr. W. B. Tubbs, Atwick Flirt taking second honours for Mr. J. F. Mitchell. This latter exhibitor won first in the foals with a fine filly foal out of his winning mare by His Majesty, Mr. J. A. Mullens taking second honours. Administrator won first honours in the stallion class and the special prize as best stallion for Mr. W. B. Tubbs, Brave Member was second for Sir Walter Gilbey, and Copper Prince third for Mr. A. Benson. The latter exhibitor went to the fore in the two-year-old class with Copper Duke, taking precedence of Sir Walter Gilbey's Dashing Lad, who had Mr. S. Shorter's King's Equerry as his close attendant. The jumping, driving, and other exhibition classes were well filled, and the competition good all through.

Cattle.

Messrs. H. Leney and Hugh Gorringe were judges for the Shorthorn and mixed breed classes. Two of these were for cows and heifers and two for bulls. The former were practically all representative of dairymen's herds, and the merit was very good all through, particularly in the cow class, in which we found quite a number of real good cows. Messrs. G. F. Sanford and Green Bros. were leading winners, and the last-named, together with C. and E. Robinson and T. Watson, took the prizes in the order named in the heifer class. The older bull class had the Marquis Camden's Roan Foundation for its winner, but a more stylish and shapely one was found in the second bull, from the Duke of Richmond's herd, Silver Coir. A white with good form and nice type from Sir E. Loder came in r.n. A roan of nice quality, Faries Chieftain, took first for the Marquis Camden in the yearling class, and Sir A. H. Brown was second.

The Sussex cattle, judged by Mr. Gerald Ward and C. D. Mare, have never been better represented at this show than to-day. A better lot of females, particularly in the yearling heifer classes, we have not seen for years. Old Mayflower 8th won first honours for the Hon. R. P. Nevill, a very typical cow she is; the Earl of Derby, with Fancy, came next; and Messrs. Cumtice and W. G. Fladgate were third and r.n. Earl Winterton won with Sunlight 5th, first in the two-year-old class, a beautiful heifer, very straight and even in her flesh. She won the female champion honour, and was r.n. for the best Sussex in the show. Bewbush Wind 4th, another capital heifer, was second for Mr. Salliard; Brunswick Queen from Mr. E. E. Braby came third in this strong class, leaving the r.n. for Mr. E. Bannister's Limehurst Broadhorn, a neat and typical animal.

The class of the section and of the show was the yearling heifer class in this breed. A beautiful heifer is Sunlight 7th that won first honours for Earl Winterton and the r.n. for female champion honour. We admired this heifer very much, she was third at the Royal, and her herd mate, now third, then was first. Such a choice, is a very excellent heifer, and, whilst we agree with the award [illegible] this heifer has particularly good merit. The second winner here was in the same place at the Royal, is Gwendolm of Lynwick, owned by Mr. J. Anngier. The r.n. was Mr. Salliard's Bewbush Woodmancote, another choice heifer. Two from Mr. W. Cuttley, and one from Mr. J. Anngier were h.c., and those sent by Count Munster and

W. A. Thornton were c. The Earl of Derby's Mayor went first and was made best male and champion of the yard; Mr. Salliard's Bewbush Marquis was second; and the Earl of Winterton's Bewbush was third. The two-year old bull class was a good one. The winners were Eric, from Mr. C. J. Lucas; Bonfire Prince, from the Hon. R. P. Nevill; and Champion of Dumgewick, from Mr. E. Braby were the winners in the order named. Nine entries made up a very excellent class, and the winner was that grand young bull Shillinglee Bewbush, one of the best of its age we have seen for some while. Mr. E. E. Braby, with Lord of Dumgewick, came second, and J. Goodman third.

A neat and good entry of Aberdeen-Angus represented this breed. Messrs. G. Drummond, who won the champion honours, was, together with Mr. G. A. Cooper and J. H. Bridges, who was first, second and third in the two-year-old class, were the leading winners in the section.

The Jersey entry was a large and most typical one of special merit and excellent type. Lady de Rothschild's Whitewood, first in the cow class of nineteen entries, won the championship prize as best cow or heifer of her breed, and also the Blythwood bowl. Lord Rothschild's Oxford Snowdrop, first in the two-year-old heifer class, taking the r.n. for these honours. Captain L. G. Gisbourne, with Glorious Lad, first in the two-year-old class for bulls, won Admiral Brand's champion bull prize; Lord Rothschild's fine yearling bull Favour, first in its class, taking the r.n.; Captain Fraser, Mr. J. C. Drew, Admiral the Hon. T. S. Brand, A. Miller-Hallett, etc., were also leading winners.

The Guernsey classes were not large, but the merit very excellent. Mr. E. Hambro won for cows and bulls, and Mr. F. Hargreaves for heifers and young bulls.

Sheep.

The Dexter Kerry class were small, but the merit was very good indeed. The Duchess of Devonshire and Mr. B. de Bertodano were the leading winners. Messrs. W. Brown and W. Toop judged the excellent classes of Southdown sheep. The class that is unique for this show, namely, nine ewes of the usual flock ages, is one of particular merit and interest, because it brings out the type of any flock far better than any other class. In the ewe class for hill flocks great gratification was expressed upon the success of the Duke of Richmond, who, in addition for his first prize here also won the silver medal for best pen of hill ewes. Mr. A. Cooper came second, and Mr. A. M. Singer third. The second prize pen was an excellent one. In the ewe lamb class from hill flocks, a grand pen of great merit and very uniform won first honours for Mr. A. Cooper, Mr. A. M. Singer taking second and r.n., and the Duke of Richmond third. The merit of this class was good. The under hill flock ewes found their winner in Mr. John Tompkins's pen of well matured ewes; Mr. E. Henty's, which were not quite so even in type and size, were second; and the Duke of Devonshire's third. The ewe lamb class in this section was a superior one, particularly the first prize pen that came from Mr. E. Henty's flock, they won first, and, subsequently, the medal for best pen of ewes or ewe lambs in the yard. Mr. J. Tompkins was second, and the Duke of Devonshire third. The class for three yearling ewes was one in which the competition was thoroughly keen. The Duke of Devonshire won first honours by the decision of the referee, Mr. E. Ellis came in for second honours, a very choice and good pen. The Duke of Richmond went to the third place, and Colonel A. F. Walter was r.n.

The two shear ram class was one of fine merit. The two that won first and second honours both came from Mr. E. Ellis; these were of high merit and first class in the flesh. The winner here was made r.n. for the gold medal for best male in the yard. The Duke of Devonshire was third, and the Duke of Richmond came in for r.n. In the next class the Goodwood flock was well to the fore; here first and second honours went to the Duke of Richmond, the winning ram was that grand ram that won first honours at Bournemouth, and this sheep, at a later period, was made winner of the gold medal as best ram of its breed. The Duke of Richmond thus winning two out of the three medal offered at this show, an excellent test of the merit of this flock. Mr. E. Ellis was third and h.c. with two very fine rams, and the one that came in r.n. from Mr. E. Henty's flock had excellent type and good merit.

The award that gave Mr. E. Henty precedence in the ram lamb class was one not generally approved of, and had either Mr. E. Ellis or Colonel A. F. Walter, who were respectively second and third, been preferred, a better and more typical lamb would have won. In view of the decisions given in the other classes this award is difficult to understand. Fourth honours went to Mr. Ellis, and the r.n. to Mr. E. Henty. An excellent entry of butter and live poultry completed a real good show.

Staffordshire.

The Staffordshire Agricultural Society have every reason to be pleased with their visit to Walsall last week after a lapse of sixteen years, for the show proved one of the most successful on record; in fact, so far as the attendance is concerned it was the best, for on the two days close on 24,000 visitors paid for admission, this number being the largest ever recorded in the history of the society. The show itself was also one on which the society can be congratulated. The total number of entries of live stock was 671, as compared with 525 last year, when the show was held at Hanley, a substantial increase of 146, while at the last Walsall meeting in 1889, the entries were but 431. The cattle numbered 246, against 181 a year ago; there were 318 entries of horses, as compared with 247; 75 pens of sheep, against 66; and 28 pens of pigs, against 31. The other sections were equally satisfactory. The samples of cheese numbered 71, against 85; butter 28, against 46; poultry 418, against 320; pigeons 209, against 128; and there were also 75 exhibits of honey and bee appliances, as compared with 79 in 1904. Much interest was taken by the visitors in the stock, and the exhibits in the smaller departments were also a source of attraction. Before entering into a description of the various sections we may mention that at a meeting of the committee of the society, held during the show, under the presidency of Captain W. B. Harrison, it was resolved to accept an invitation to hold the show next year at Stone.

Horses.

Agricultural horses always make a good show here, and last week's was no exception to the rule; in fact, the display was better than ever. In several of the classes the competition was open to the United Kingdom, instead of, as was formerly the case, only to the district comprised within the society's radius, and the result was that prizewinners were drawn from a very wide field, and some particularly fine animals were shown. Mares and fillies, in both open and local classes were of excellent type, whilst many useful geldings were shown. There was a close competition in the class for two-year-old stallions between Mr. Warner Barrs' Nailstone Cup Bearer and a bay belonging to Sir Albert Muntz, and they were eventually placed in the order named. Mr. J. W. Whitehurst took third prize with a colt that at the Lincolnshire Show, at Grantham, won the first card. A notable prizewinner received the first ticket in the entry for yearling stallions, viz., Ratcliffe Forest King, which was first at the Shire Horse Society's Show, in February, in a big yearling class, and took as high honours at the recent Royal Show, and Shustoke Monarch, which came next in order of merit, is another colt of good type, with plenty of weight about him, but he did not move quite so satisfactorily as the prize-taker. Mr. Cross, of Rugby, was third with Catthorpe Archon, a colt of wonderfully fine Shire character, but rather on the small side. Mr. Bernard Wall, of Coleshill, had an outstanding win in the class for two-year-old geldings, with a well-grown bay colt with good, sound feet and splendid action. Newstead Stamp was the only gelding entered in the three-year-old class, and, being a useful animal, the first prize was not withheld. Some valuable, weighty geldings, foaled not later than 1901, were forward, and the first and second prizewinners, Samson and Hilcote Patch, were particularly well shaped, and quite of the right stamp for town work. The competition between dray horses shown in gear was watched with great interest. Laughton Pink and Tatton Iris, the first prize winners, were a pair of wonderfully good mares. The first-named has been a great winner at Derbyshire local shows for the past two or three years, and still retains her old form and freshness. In the open entry for Shire mares foaled in or previous to 1901 Sir Alexander Henderson, Bart., was awarded premier honours for his beautifully proportioned Poole Duchess, whilst Earl Egerton of Tatton was close up with Rocks Madam. The first-prize mare in the three-year-old open class was Sir Albert Muntz's Bonny Blue, which has been a great winner all the way round this year. Ivy Fashion, the second prize taker, is an animal of quality, and was a high-price purchase at Mr. Smith-Carrington's sale in February last. Nailstone Lady of the Vale, a fine brown mare was first in the two-year-old class, which, although open to the kingdom, furnished three local winners. Yearling Shire fillies, also an open class, comprised a numerous entry of typical specimens, and here the famous Buscot Fantasy, was placed first. She is a very smart filly, with nice limbs and feet. Peak Dolly, a well bred bay, ran the first prize winner rather closely, but she has hardly so much scope as Sir Alexander Henderson's filly. The remaining classes in the Shire section were all well filled, and contained many noted winners. Poole Duchess, a mare which has already been referred to, was awarded the championship for the best Shire mare or filly in the yard; whilst Edith of Rolleston, a mare owned by Sir Oswald Mosley, was the winner of the Shire Horse Society's gold medal.

The young hunter stock shown was of a very encouraging character, both in point of numbers and quality. In the older classes the horses were more easily placed, but they included some very fine specimens. Colehurst Pride, a mare of size and quality, and one to breed hunters from, was shown in the opening class for brood mares with a foal at foot, and was easily first. A very promising animal was also entered in the class for three-year-olds. This is Gold Cloud, which was not only first in its class, but secured a special and silver medal. Another particularly successful exhibit was Just Dew, owned by Mr. Arthur Kendrick, which won the South Staffordshire Hunt special and the silver medal offered for the best entire colt. The silver medal for hunter fillies was taken by The Nun, Messrs. Ballard and Son's well-known filly.

The judging of the hackneys and turn-outs led to some exceptionally keen competition. The hackneys and cobs made the best display for many years—indeed, it is questionable if a better has been witnessed at any of the Society's shows. The brood mares were a strong class, Mr. Baker's Mattishal being placed first on account of her superior size. Her bay filly Shelbourne Hamlet received the premier award in its class, though it was run rather closely by Jolly Jack, a younger foal belonging to Mr. Hussey, with extremely good action, and of excellent type. Among the big hackneys Mr. A. H. Pooler's Caynton Phillis, which has won many prizes and taken the Hackney Society's medal at previous shows, was a very easy first, her hock action being noticeably good. She also won in the harness class, beating a horse which showed plenty of dash in Wigginton's Surprise. With regard to the turn-outs the milkmen's class was weak, but the butchers' section was highly creditable. In the class for single turn-outs there was a surprisingly good selection, and many were of such excellence that the task of selection proved difficult.

The judging of the pit ponies was also completed, and it was found that a very creditable lot of animals had been got together. The larger ones were very sturdy, and showed plenty of bone, while the smaller ponies also made a creditable show. A class for ponies which had worked underground for not less than ten years proved extraordinarily successful. The winner of the premier prize was sixteen years old, and although of an age at which most ponies have passed their best, showed clean legs and feet, and fine all-round quality. The second prize winner had actually worked in the pit between sixteen and seventeen years, and was still in good condition.

Cattle.

The quality of the cattle was high all round, and the display a highly creditable one. The vast majority of the animals were of the Shorthorn breed, and some useful specimens were brought out. A very level and well-bred bull, Duke of Sedburgh, took the first prize for Mr. I. Parton in the aged class, and Mr. R. P. Cooper's second winner, Rose Victor, a thick specimen, full of quality, improved on the position he occupied at the Bath and West show. Mrs. Inge's smart Bletchley Buccaneer, which led in the yearling class, possesses the highest Shorthorn character, and the same lady was in front in the calf class with a well-grown youngster Butterscotch, which gives promise for the future. In the class for cows, Sir Oswald Mosley was first with the stylish Yours Faithfully, three years old, the receiver of the reserve honour at the Bath and West and Royal shows. Second place was taken by Captain Harrison's six-year-old Elderberry IV., a cow of large scale and in fine condition, which was awarded the championship at Malvern. A capital class of two-year-old heifers was headed by Sir Oswald Mosley's Proud Duchess and Rolleston Elder Flower, which gained the first and second honours. The winner is an attractive heifer, nicely brought out, and full of character. Sir Oswald Mosley's Rolleston Regina was well beaten in the yearling heifer class by Mr. W. A. H. Bass's Whitewall Anna, a lengthy animal, adequately furnished, and admirably brought out. Heifer calves were in grand condition, most of them well grown, and of great promise. The best was Sir Oswald Mosley's Rolleston Spice, which has beautiful hair and typical style. The Shorthorn Society's special prize for the best bull in Staffordshire was won by Mrs. Inge's grand-looking Bletchley Buccaneer, whilst the same Society's special prize for pedigree dairy cows in milk went to Mr. J. Myatt, for a six-year-old, and next to it for the Staffordshire Society's prize was placed a four-year-old belonging to Mr. W. A. H. Bass. The cattle best adapted for dairy purposes looked well, and the tenant farmers' classes were filled with animals of exceptional merit. The three classes of Jerseys contained several useful exhibits,

some of which have secured honours on previous occasions. Mr. W. C. Cooper was very successful, for he won the first prize for cows and heifers and the second for bulls, while Captain Gisborne, who was beaten in the female classes, leads the Whittlesbury exhibitor in the male department. The Aberdeen-Angus cattle had three classes, and the number of entries was larger than in the Jersey division. The best class was that for cows calved previous to December 1, 1902, and here Mrs. Macpherson won first prize with a splendid cow, nine years old, which also received the silver medal of the English Aberdeen-Angus Cattle Association for the best animal in the section. In the class Mr. J. J. Cridlan was placed second; but in the heifer division he secured both prizes, and the challenge cup presented by the late Mr. L. A. Macpherson to the exhibitor who gains the greatest number of points in the section. The bulls were poorly represented, the best being shown by Mr. J. B. Brooks.

Sheep.

The Shropshire was the only breed of sheep shown, and it might be imagined that the exhibition would be as important as the one in the adjoining county of Salop, but unfortunately the Society exclude the winners at the Royal Agricultural Show, with the result that the section was deprived of an important feature. So far as it went the display was useful and of average merit, but if there were no restriction it is certain that the attractions of the department would be infinitely greater than they are. The younger classes, both of rams and ewes, were the best, and they included a number of exhibits of surpassing excellenece. A big, well-grown, strong sheep belonging to Mr. A. S. Berry credited him with the leading honour in the class for rams of any age, and Mr. R. P. Cooper won easily in the shearling ram class, although Mr. J. Harding was represented by a couple of useful pens which were honoured with the second and third awards. Mr. Cooper was also first for pens of five shearling rams, and Mr. Harding was in front in the ram lamb class with a remarkably good specimen. There were only three pens of five ewes, but all were in fine show condition, the premier pen being Mr. Cooper's. The pens of five ewe lambs formed a characteristic feature, and the competition in the class for pens of five ram lambs was very good, while several excellent contests were noticeable in the tenant farmers' classes.

Pigs and Produce.

There was a capital lot of pigs of the Large, Middle, and Small White breeds. Mr. A. C. Twentyman was a successful exhibitor, taking several prizes, as well as the Society's silver medal for the best boar in the yard. A few attractive Tamworths and Berkshires were penned, among the representatives of the latter breed being the biggest pig in the show. This was a prize boar shown by Mr. G. Pedley.

The produce section was a large one, and included some excellent lots of butter and cheese, several years have elapsed since there was such a good show of honey, both for colour and quality.

Darlington.

Originally the show at Darlington consisted of horses and dogs, but to enlarge its scope the Society this year included some cattle classes, and these attracted 38 entries of good stock, so that the experiment was justified. There was, however, a great falling off in the horse section, the entries being 228 as against 330 last year, and 374 in 1903. Some of the dropping away is accounted for by the fact that the jumping contests were abolished; but this would not cause more than half the decrease, so that the other half has to be accounted for. Quality was, however quite up to the average, as were also the dogs, the entries of which compared favourably with other years.

Hunters made a capital show. Brood mares were a small but choice lot, the chief winners being Messrs. Ward's famous old prize-taker, Beatrice, and Mr. E. Lloyd Pease's ten-year-old Lady, who last year, as this occupied second position. A fine class were the heavy weight hunters, which included a number of animals that have frequently contended against one another. Mr. J. H. Stokes's Baronet was placed first, before Mr. W. B. Brown's Royal Oak (who was at the top of a restricted class), while third honours fell to Messrs. Ward's Ireland, another capital mover. The three-year-old geldings were headed by Mr. F. A. Rickaby's Splasher, who occupied a corresponding position here a year ago as a two-year-old, an unnamed roan belonging to Mr. John Brown now taking the next ticket. The pick of the two-year-old hunters of either sex was Mr. T. B. Newton's nice black filly, Lady Gilling, who likewise got the leading award in the farmers' class, and a very promising lot of yearlings was topped by Mr. G. Marton's bay filly Pineapple.

Roadsters mustered well, and among them were many that have successfully gone the round of the shows this season, beginning with the opening meeting in London. Again Mr. Thomas Boddy's Dewdrop, the ten year-old daughter of Chocolate Junior, led the way among the brood mares. It was a small class, but it also included Mr. J. Henderson's Whitburn Bella, a Garton Duke of Connaught mare, only three years old, which took second honours. There was a nice collection of youngsters, especially foals, but yearlings were rather scarce. The any age class was very well filled, and here Mr. S. R. Tennant's Authority was placed first, and Messrs. Leo Snowden and Son's Belmont Star, from Harrogate, second; both geldings are five years old, the former being by Ganymede and the latter by Garton Duke of Connaught. Mr. Rickaby's Ringlet and Messrs. Ward's Kildale fought for supremacy in the riding class for ladies' hacks, and they were eventually placed in that order. In the driving class they took the same positions. Both prizes in the pony class (in harness) were won by Mr. T. P. Robinson, of Wiggington, with Pinderfield Sapphire and Pinderfield Ruby, the first-named also gaining the premier award in the saddle class. The coaching and harness classes were not so well filled as might have been wished. In this section were Mr. George Grandage's three-year-old filly Woodland Beauty, first at the Royal and first here, and Mr. George Elders' Ailsuby Beauty, who was second at Park Royal, but now beaten by a four-year-old bred and shown by Mr. George Thompson. Agricultural horses comprised some good representatives of both Clydesdales and Shires.

Bedfordshire.

Fortune favoured the Bedfordshire Agricultural Society in every respect for their exhibition at Amptill Park on Wednesday. The showyard was a most charming one; the entries were up to the average, both as regards numbers and quality; the weather was beautifully fine, and the gate a good one. The Society are greatly indebted to the people of Ampthill and the Duke of Bedford, for, according to the old-established rota, it was the turn of Luton to receive the visit of the County Show, but it appears that it was not practicable to obtain a suitable ground. Ampthill then stepped into the breach, and, opened by his grace, the inhabitants did everything to make the show a success; and, in addition to supporting the show on the day, they raised no less a sum than £180, which is a record for any town, not even excepting Bedford itself. They also proved themselves the possessors of some rare-class animals, many of which gained honours in the various classes.

The cart horses were more numerous than for some years, but, despite this, there were few animals of real outstanding merit, and certainly not so many as previously. On the average, however, the class of animals was distinctly good, though one or two of the classes took a lot of judging owing to many of the animals being very moderate. The hunters were much better than usual, those in the open classes being especially worthy of mention. The driving classes attracted some classy animals, and the hackneys were quite up to the average of previous years. There was a distinct improvement in the sheep as regards quality, but the number of entries was about the same as usual.

The cattle were a good lot, and among these were 12 pedigree Shorthorn bulls which have been purchased by the Society—the money being found by the Duke of Bedford for the use of agriculturists in the county, the object being to improve the breed of Shorthorns in the district. A considerable portion of the money required for the upkeep of the animals has been subscribed, and the Society now requires only about £130 to make the scheme a complete success. The twelve bulls are located at Riseley, Roxton, Chellington, Bromham, Wootton, Haynes, Meppershall, Millbrook, Sharpenhoe, Woburn, Hockliffe, and Limbury; so they are well distributed. The Society's roan bull, Florian, a useful-looking beast, was second in the class for young bulls, Messrs. Hipwell and Sons' Sharnbrook Marquis being first in this and two other classes, besides winning the District Prize of £10 given by the Shorthorn Society for the best bull in three counties. It has a perfect type of head, neck, and quarters, broad and level back, and splendid hair. In one class for ages between 1½ and 3 years, the Society's bull, Clapton Prince, with fine masculine head, was first; and a Red and White shown by Mr. J. F. H. Harter was second. A useful looking bull was the roan Sarabaand, shown by Mr. F. A. W. Wyatt. The pigs were numerous and of good quality, and the other departments of the show were well filled.

The judges were: Cart horses: Mr. W. F. Gullin, Borough Farm, Peterborough; and Mr. E. H. Cartwright, Kedleston Grange, Derby. Nags: The Hon. A. Parker, The Cottage, Doveridge, Derby; and Mr. G. [illegible], Cranford, Middlesex. Cattle: Mr. J. A. Pease, Dearham Home Farm, Thrapston; and Mr. John [illegible], Maisey Hampton, Fairford. Sheep and pigs: Mr. R. Dickens, Newton Purcell, Bicester; and Mr. [illegible] Hayter, The Mount, Whitchurch. The chief awards were as follows:

CART HORSES.

Colt foaled in 1904: 1, S. Draper, Wilden, Worcester (Wilden James); 2, F. Crawley, Stevenage, Herts (Stevenage Prince); 3, F. Brown (Houghton Conquest).

Filly foaled in 1904: 1, T. Long, Upper Stondon (Stondon Heartsease); 2, J. King and Sons, Broom; 3, S. Draper (Wilden May).

Gelding foaled in 1904: 1, W. S. Brocklehurst, Kempston (Kempston Friar); 2, Street and Phillips, Priestley (Priestley Primus); 3, R. Long.

Filly foaled in 1903: 1, J. King and Sons (Southill Pearl); 2, R. Long (Brigstock Baroness); 3, T. Teasdale, Steppingley (May Queen).

Gelding foaled in 1902, the property of a tenant farmer: 1, J. Day, Roxton Park.

Mare foaled in 1902, the property of a resident in the county: 1, J. King and Sons (Southill Mayflower); 2 and 3, C. Keevil, Billington (Blagdon Victress and Lockings Corona).

Mare four years old and upwards, the property of an exhibitor in this or adjoining county: 1, H. Towgood, Little Shelford (Eastern Dawn); 2, R. Long (Stondon Violet); 3, W. S. Brocklehurst (Kempston Dubchick).

Gelding four years old and upwards, the property of a tenant farmer in the county: 1, T. B. Kitchener and Co., Potton; 2, J. Day.

Pair of geldings or mares of any age, the property of a bona fide tenant farmer in the county: 1, G. Street (Maulden Lady Bedford III. and Maulden Magnate); 2, H. Gates (Captain and Major); 3, B. Howkins (Halstead Rose and Daisy).

Pair of geldings or mares foaled before 1902: 1, G. Street (Maulden Lady Bedford III. and Maulden Magnate); 2, H. Gates (Captain and Major).

Mare and her foal: 1, C. Keevil (Blagdon Beauty); 2, H. Towgood (Shelford Sash); 3, W. S. Brocklehurst (Montford Gipsy).

Mare and her foal, the property of a bona-fide tenant farmer in the county: 1, C. Keevil (Blagdon Beauty); 2, W. S. Brocklehurst (Montford Gipsy); 3, C. Keevil (Blagdon Princess); 4, R. Long (Stondon Peony).

Colt foal, the property of a resident in the county: 1, J. King and Sons; 2, C. Keevil; 3, W. S. Brocklehurst (Kempston Harold).

Filly foal, the property of a resident in the county: 1, W. S. Brocklehurst (Kempston Heroine); 2, R. Long; 3, T. Teasdale.

Special prize for the best animal exhibited in Classes 1 to 6 inclusive, the bona-fide property of a resident within the district: 1, T. Teasdale (May Queen); 2, Street and Phillips (Priestley Primus).

For the best animal exhibited in Classes 7 to 14 inclusive, the bona-fide property of a resident within the district: 1 and 2, G. Street (Maulden Lady Bedford III. and Maulden Magnate).

Shire Horse Society's silver medal for the best Shire mare, filly, or filly foal, that is registered or eligible for registration in the Stud Book: 1, C. Keevil (Blagdon Beauty); 2, R. Long (Stondon Heartsease).

A piece of plate, value £20, for the best cart horse (gelding or mare), the property of a tenant farmer: 1, C. Keevil (Blagdon Beauty); 2, R. Long (Stondon Heartsease).

HUNTERS, HACKS, OBS, AND PONIES.

Mare suitable for breeding hunters, with her foal at foot, property of a resident in Oakley or adjoining hunts: 1, W. and J. A. Cheney, Gidding Grove (Haddon Lass); 2, J. Sturges, Woburn Sands (Violet); 3, T. H. Barnard, Kempston Hoo.

Yearling colt, gelding, or filly, for hunting purposes, the property of a resident in the county: 1, R. Long; 2, B. Howkins.

Two-year-old colt, gelding, or filly, for hunting purposes, by a thoroughbred horse, the property of a resident in the county: 1, Wm. Whitehead, Shelton Hall; 2, S. Whitbread (Topthorne).

Three-year-old gelding or mare by a thoroughbred horse for hunting purposes, bred in Beds. or Hunts: 1, W. and J. A. Cheney (Monarch); 2, W. Whitehead.

Four-year-old gelding or mare, for hunting purposes, bred in the county, or the property of a bona fide tenant farmer or his son within the county: 1, N. and A. Sturges, Ampthil (Togo); 2, W. and J. A. Cheney (Bashful).

Hunter under 14 stone: 1, J. Drage, Chapel Brampton; 2, J. S. Watson, Towcester (Amber).

Hunter, 14 stone and over: 1, J. Drage; 2, J. H. Stokes (Gold Reef).

Hunters' Improvement Society's silver medal for the best hunter filly: W. Whitehead (Simon Fraser); r., R. Long.

For the best hunter mare or gelding: W. Whitehead; r., R. Long.

Cob not exceeding 15 hands: 1, W. Manning, Leighton Buzzard; 2, Deacon and Co., Bedford (Gloria).

Hackney of any age, 14 hands and over, the property of a resident in the county: 1, W. Whitehead; 2, T. H. Woodcock (Dolly).

Harness horses, exceeding 15 hands, in single harness: 1, R. W. Jay, New Southgate (The Gentleman); 2, John Kerr, M.P., Hemel Hempstead (Forest Freeway).

Cob not exceeding 15 hands, in single harness, the property of a resident in the county: 1, S. Lamming, Astwick Bury (Why Not); 2, Miss E. M. Heysham (B[illegible]).

Pony not exceeding 13·2 hands, in single harness, the property of a resident in the county: 1, E. J. W[illegible], Ampthill (Bessy); 2, J. S. Tansley, Bedford (Black Bess).

Pony not exceeding 13·2 hands, in single harness: 1, J. L. Round, Broadholme, Wellingboro' (Berkeley Claudius); 2, R. A. de Mancha, Waterside, Frogmore (No. 984).

Special prize for the best animal in Classes [illegible] inclusive, the bona-fide property of a resident within the district: 1, H. J. Humphreys; r., W. I. Roberts, Lidlington (Peg).

BULLS.

Bull of Shorthorn type not exceeding 30 months, the property of a resident in the county: 1, Hipwell and Sons, Sharnbrook (Sharnbrook Marquis); 2, Beds Agricultural Society (Florian).

Bull of Shorthorn type between 24 months and three years, property of a resident in the county: 1, Beds. Agricultural Society (Clapton Prince); 2, J. F. H. Harter, Cranfield (Count).

THE TENS OF THOUSANDS of users of MOLASSINE MEAL should see that their stock have a portion in every feed all the year round, not simply as a condiment when an animal is out of condition, or occasionally as a fillip. MOLASSINE MEAL is the most valuable and economical food, displacing all condiments, and should be given in place of the same weight of oats, beans, grain, cake, or other feeding stuffs. Sold by all corn merchants and the MOLASSINE CO., Ltd., 36, Mark Lane, London, E.C. —[ADVT.]

Bull above one and not exceeding three years old: 1, Hipwell and Sons, Sharnbrook (Sharnbrook Marquis); 2, W. Jackson, Hitchin (Rossett Patriot 4th).

District prize of £10, given by the Shorthorn Society of Great Britain and Ireland, for the best Shorthorn bull in Beds., Herts, and Middlesex, calved in 1904: 1, Hipwell and Sons (Sharnbrook Marquis); 2, W. Jackson, Hitchin (Rossett Patriot 4th).

COWS AND HEIFERS.

Heifer, between one and two years old: 1 and 2, H. S. Leon (Princess II. and Princess).

Heifer between one and two years old, the property of a tenant farmer in the county: 1, Hipwell and Sons (Sharnbrook Miss Nymph); 2, E. Abbiss.

Shorthorn cow or heifer, in calf or in milk, not exceeding three years old: 1, H. S. Leon (Lancaster Lady); 2, G. Street.

Dairy cow in milk or in calf, the property of a tenant farmer in the county: 1, H. Campion (Beauty); 2, E. Abbiss (Ginger).

Two dairy cows of one herd, in milk or in calf, the property of a tenant farmer in the county: 1, J. Day; 2, E. J. Watson (Daisy and Buttercup).

Cow of any age, in calf or in milk: 1, H. S. Leon (Roseleaf); 2, J. Day.

Special prize for the best animal exhibited in Classes 35 to 44, inclusive, the property of a resident within the district: 1, G. Street; r., E. Abbiss (Ginger).

SHEEP.

Short-woolled shearling ram: 1 and 3, T. Fowell Buxton (Hampshire); 2, G. Street (Oxford).

Three ram lambs of any breed: 1 and 2, T. Fowell, Buxton (Hampshire).

Oxford Down shearling ram or ram lamb, in Flock Book or eligible for entry: 1, G. Street; 2, B. Howkins.

Five pure-bred theaves, eligible for entry in Flock Book: 1, T. Fowell Buxton (Hampshire); 2, G. Street (Oxford).

Ten crossbred theaves, the property of a Bedfordshire tenant farmer: 1, Hy. Campion; 2, R. M. Bodger; 3, J. E. Brown.

Breeding ewes of any age or breed, which have suckled lambs up to June 1, 1905, the property of a resident in the county: 1, G. Street (Oxford); 2, B. Howkins (Oxford).

Ten wether lambs, the property of a tenant farmer in the county: 1, R. M. Bodger; 2, R. Quenby and Sons, Kempston.

Ten ewe lambs, the property of a tenant farmer in the county.—1, R. M. Bodger; 2, G. Street.

Special prize for the best exhibit in Classes 48 to 52 inclusive, the property of a resident within the district: 1 and r., G. Street (Oxford Downs).

PIGS.

Boar under two years old, the property of a resident in the county: 1, R. Long (Middle White); 2, H. J. Humphreys (Berkshire).

Sow and pigs, the property of a resident in the county: 1, P. Bass (Black); 2, F. Smith (crossbred).

In-pig sow, the property of a resident in the county: 1, C. T. Part, Luton (Berkshire); 2, Three Counties Asylum, Hitchin (Yorkshire).

Two sow pigs under twelve months old, the property of a resident in the county: 1, W. I. Roberts; 2, Three Counties' Asylum.

Special prize for the best exhibit in Classes 54 to 56 inclusive, the property of a resident in the district: 1, F. Smith; r., H. J. Humphreys.

SHOWS IN BRIEF.

Boston.

The Boston Show Society, which was established in 1870, held its annual exhibition of horses and flowers on Wednesday and Thursday for the third time in succession in the People's Park, placed at the disposal of the society by the Mayor and Corporation, and a better show ground could not be conceived. The flower beds, lawns, and trees were a show in themselves and the well-kept park was generally admired by the visitors. The weather was all that could be desired, but the attendance was much below the average. The show of horses was not so large as on some former occasions, but, with regard both to numbers and quality, it compared very favourably with other shows held this season—the Hackneys, indeed, being in advance of the county show. The flowers were the best for several years, the blooms being in perfect condition.

Launceston.

The annual show of Launceston Agricultural Society was held on Thursday, and was an unqualified success, there being an increased entry, and the attendance above the average, the weather, fortunately, being most favourable. The entries totalled 334, being made up as follows:—Horses, 160; bullocks, 60; sheep, 36; pigs, 8; dairy classes, 60. The horse classes were well filled, and many animals of exceptional merit exhibited; whilst in the cattle classes were to be seen many South Devon beasts which secured premier honours at the recent Bath and West Show at Nottingham. Sheep were well represented, as were also the pigs, whilst for the first time for five years a dairy produce section was introduced, and, judging from the success which attended this particular section, it should become a permanent feature of the show.

March.

The annual show of the March Shire and Hackney Horse and Foal Show Society was held on Tuesday and both the heavy and light breeds were well represented, the entry of 218 constituting a record. Shires formed excellent classes. The championship for foals went to Mr. Wm. Richardson's colt, and the challenge cup now becomes his own property. Hackney foals formed a splendid collection, and here the championship went to Mr. Tibbatt, for an excellent filly by Harlow Garton Dane. Mrs. Hartley Batt's Royal Winner, Heathfield Squire, beat Mr. Jay's Tow-Law Performer, and won the president's cup for the best horse or mare in harness.

British Possessions

beyond the Seas

AND THEIR

London Representatives.

NOVA SCOTIA.

Offers advantages to British Agriculturists with moderate capital. Improved Farms at Low Rates. Fertile Lands. Famous Fruits. Enormous mineral deposits of Coal, Gold, Silver, Iron, Copper, Lead and Tin. Climate temperate and healthy. Easily accessible to all the principal markets.—Full information supplied by the Agent-General for Nova Scotia, MR. JOHN HOWARD, 57a, Pall Mall, London, S.W.

Agriculture in Holland.

VII.*

The Royal Netherlands Dairying Company.

I will resume with a description of the Royal Netherlands Dairying Company, established in 1882 under the name of "Netherlands Dairying Company," and started its business with two factories.

These introduced factory cheese-making into Friesland, which, before 1882, was completely unknown in that district. The new industry has made tremendous strides, and the company added three factories to their list, and this example was extensively followed; cheese and butter factories (private and on the co-operative system) arose all over Friesland. In recognition of the services this company rendered in establishing a new industry, it pleased H.M. the Queen, in 1900, to confer on the company, by Royal warrant, the honorary title of "Royal."

The quantities of milk daily worked by the company have gradually increased—in the beginning they were very small indeed—the farmers now selling their milk to the factories, instead of turning it into butter and cheese, as their fathers and grandfathers have done before them. This proved to be a tedious, difficult, and even expensive undertaking, but gradually they have been won over to give the new system of disposing of the milk a fair trial. In 1889 three of the factories, though originally containing sufficient space, had to be extended, in order to create room for the sea of milk that poured into them. The daily quantity of the milk worked in summer by the five factories did not fall far short of 50,000 gallons. In winter these quantities sink to one half or less, till the farmers, accustomed to the new conditions of business, began to change the "calving-time" of the cows. Now part of the calves are born in spring and part in autumn, instead of all in spring as the old custom was, and in consequence the flow of milk is more regular.

The products of the company soon succeeded in attracting the attention of the trade in England, Scotland, Germany, Belgium, and France, and before long its reputation was firmly established. The trade mark "Pan" is now one of the best known brands in England, and more particularly in London, where the average daily consumption of Pan-Goudas amounts to about a thousand cheeses.

Belgium is another important customer for Pan cheese, and every week waggon loads are despatched from the railway stations near the factories straight to the chief towns in Belgium. The rest of the company's cheese is divided between Scotland and Germany, very little being left over for other countries and exportation purposes, the demand continually exceeding the supply.

For some years the company has been packing butter in tins, but this business was pushed less and less on account of the increasing demand for "Pan" butters nearer at home. At present the tinning business is quite unimportant, only old, regular customers, who pass their orders before the grass season sets in, being served. This is not the place to enter on extensive technical details, suffice it to say that in course of time the entire system of butter-making has been changed and considerably improved, and the differences in cheese making twenty years ago and now are so great that we can say that an entirely new system of cheese-making has been evolved.

Co-operative Creamery at Grouw.

The co-operative society for establishing and carrying on a steam creamery was established at Grouw, in 1896. As farmhouses at Grouw are situate far from each other on canals, channels, and lakes, many were of opinion that the creamery would have little chance of being carried on, and even the founders indicated as a great difficulty the way in which milk should be transported. It very soon proved, however, that, in spite of the far distances of the farms, the milk could be brought together per vessel in a very advantageous way, and that the difficulties in connection with the transport of the milk (in stormy weather and during the winter months) could be very well surmounted.

The issued capital was £4,333 and obtained by a loan in bonds, of which the main shareholders were the inhabitants of Grouw, and the creamery, which originally accommodated to manufacture at the utmost the milk of 1,200 cows, soon wanted enlargement. Fortunately the founders had foreseen this increase of the number of members, and the plant had been made large enough in order to manufacture the milk of all the cow-keepers at Grouw. The co-operation has now 35 members, and the milk of 1,914 cows is being worked in the creamery. This spring 7,360 gallons of milk have daily been manufactured into butter and cheese. Since 1900 the butter is being sold through the agency of the Friesche Co-operative Zuivel Export Vereeniging (Friesian Co-operative Company for the Export of Milk Products), while the cheese (Friesland, Edam, and Gouda models) is being sold to different wholesale dealers.

The selling of the dairy products by retail takes place in two warehouses belonging to the society; twenty-two persons are busy in the factory, whilst thirteen persons are trusted with the milk conveyance. The milk transport is being done for the society, and the expenses amount nearly to 2d. per 20 gallons of milk. Up to the end of last year 165,000 gallons of milk have been received for which has been paid to the members £26,560.

The board of the society have three members, chosen by the members of the society. Members of the board are at present—Mr. A. G. Jelles, president; Mr. Y. R. Jonker, vice president; and Mr. R. K. de Jong, secretary. The daily management of the transactions of the creamery in its full extent is entrusted to the manager. Mr. Tj. Kuperus, who is at present manager, was appointed in May, 1896, before the establishment of the factory.

(To be continued.)

* *Previous instalments appeared June 5, 12, 19, 26, and July 10, 17.*

Royal Veterinary College.

The thirteenth annual general meeting of the Royal Veterinary College was held at Great College Street, N.W., last week, Colonel Sir Nigel Kingscote presiding.

The report presented stated that during the financial year 1904-5 sixty-six students entered the college as against fifty-three in the previous twelve months. The governors were pleased to record that the work of the college had been carried out satisfactorily, and that the attendance and behaviour of the students had been good on the whole. At the examinations held by the Royal College of Veterinary Surgeons in July last 65 per cent. of the 240 students of the college passed as against 58 per cent. of the 336 students from other veterinary colleges. The number of students for the winter session, 1904, was 231, or six less than in the previous year. Students who obtained the Diploma of the Royal College of Veterinary Surgeons numbered 36 as against 34 last year, and 37 passed the first professional, 37 the second, and 47 the third, as compared with 37, 48, and 36 respectively last year. The post graduate courses in veterinary pathology and bacteriology, first held in January and February, 1904, have been continued in the present year.

The daily average of horses in the infirmary during the year ending March 31, 1904, was 49, at a cost of 1s. 1d. per night for forage and bedding, showing a decrease of one farthing on last year's individual cost. The number of animals brought to the college for advice and treatment numbered 1,319 against 1,566 in 1903-4. The number of horses examined for soundness had decreased from 803 to 747.

The new subscribers numbered 174, including ten members of the medical profession and eight of the Royal Agricultural Society. There were at present 114 and 896 annual subscribers. Cases of gratuitous advice were on the increase, numbering 7,428 as against 6,673. Inspections in this connection had also increased from 10,633 to 11,609.

As regards finances, the governors regretted the fact that there was a deficit of £500 on the year's working. During the year complete or partial post mortem examinations had been conducted in the research laboratory for members of the Royal Agricultural Society and veterinary surgeons, and of these cases eighty-seven specimens had been sent for analysis to the clinical laboratory. The report was carried with acclamation.

SULPHUR FOR HOPS.

"AXE" BRAND
VENTILATED FLOWERS SULPHUR
has the merits of being CHEAP and of VERY FINE QUALITY.

"AXE" BRAND
ROLL BRIMSTONE
is the right quality for use in the kilns.

Home Notes.

The Crop Prospects,

are warmly debated both in town and country, various opinions being expressed as to the ultimate issue. There is, however, no difference of opinion as to the present condition of the plantation, the weather being ideal, and the results thus far apparently very promising. The bine is almost everywhere plentiful, strong and healthy, and although vermin is still in evidence in most gardens, and the existence of mould necessitates sulphuring in many districts, these dangers are not generally existent to sufficient extent to cause any immediate anxiety. My own observations, during a short journey into Kent this week, suggests that there is risk in the excessive luxuriance of bine and foliage, lest there should not be sufficient energy in the roots to carry the growth forward to the fulness of flowers and fruit. Some gardens I have seen are exceptionally rich, presenting for an almost impenetrable mass of bine, the poles, wires, and strings being so heavily-laden that it seems almost impossible for the plants to progress further. Others, that are more moderately bined, have been seriously infected with mould spores, and copious applications of sulphur have not completely remedied the evil, as fresh manifestations were plainly visible. Again, there were doubtless sufficient lice remaining to develop into a dangerous attack of blight should the weather encourage them, and on many of the abundant laterals, the pin had perished, becoming useless for flowering. It is therefore quite possible that the present brilliant external appearances may end in partial failure, and that the actual crop will not be nearly so heavy as has been predicted. I am inclined to think that the chances for and against a greater than an average yield are about equally balnced.

The Borough

is, however, entirely under the influence of present reports. We have always a strong party amongst our traders, who seem to rejoice in anything that appears to make for low prices. The interests of the growers, upon the basis of whose exertions and profit the Borough hop trade stands, are practically ignored by many of our people. I cannot understand why they should be so ready to "bear" the market. But so it is, and just now it seems as if too many are ready and willing to jeer at holders, whose faith is being so severely tried, and to chuckle over their disappointment. Some day, I trust, growers will assert themselves, and will take up the management of their own business, or at least, ascertain who are their reliable friends, and who their secret foes, in order that they obtain the proper recompense for their anxious and costly labour.

Californian Hop Contracts.

I am glad to see that the Canterbury Farmers' Club has been discussing this matter. There is little doubt that the Herst and Armour combination is an ugly fact, which may cause trouble on this side. Being themselves large growers, they possess certain advantages over the ordinary merchants, and my friend, M. H. Durst, of California, says that unless English growers and merchants combine to fight the enemy with their own weapons, very important results may follow. Nevertheless, he does not think there is any immediate danger. The combination cannot grow hops in America cheaper than others, whatever may be the ultimate extent of their operations. But it is not safe for English growers to rest in calm contemplation of these proceedings, which will doubtless injure, and possibly, in the end, destroy, their position. The question should therefore be handled sensibly, practically, and speedily, so that we may be fully prepared for any eventuality that may arise.

Hop Reports.

VALLEY OF THE MEDWAY. — The bine still looks well, and is throwing out no end of laterals, but it is still thought there is too much bine. There is a good deal of vermin in some grounds, and fresh fly have been seen. Most growers have decided to wash all over again, which means a lot of work, owing to so much bine. The horse washer in some grounds is next to useless. Some mould may be found, but not to any extent. Some bramlings are well out in burr, and should hot weather continue, picking will be earlier than usual.—(July 22.)

Foreign Notes.

Export of German Hops.

An inquiry has been instituted by the German Government for the purpose of ascertaining in what manner and to what extent the export of hops to the United Kingdom might be assisted. From 1890 to 1901 the sales of German hops in England, it is said, steadily grew, but since 1902 they have remained stationary, even if they have not declined. This is presumed to be in consequence of exports coming from other countries, and notably Hungary and the United States; and hence the action of the German Government.

America.

Recent news from the Pacific Coast is somewhat conflicting. Mr. M. H. Durst, the large Californian grower, writes me in a decided optimistic tone, with regard to the immediate and ultimate future of the market. He is of opinion that the crops in Oregon, California, and Washington will not turn out nearly so large as have been reported, and that the final results will hardly exceed those of last year. It is positively stated that several speculative dealers have contracted for future deliveries far more largely than they are covered, and that consequently they will be compelled to buy. It is therefore easy to understand that their efforts to bear the market will be unremitting. But growers are fully alive to the position, and meetings are being held in every district, which have so far resulted in practical unanimity for the pooling of the 1905 crop, in order to withstand the pressure exerted by buyers. Mr. Conrad Krebs, the president of an important hop-growing company, is taking the lead in this protective organisation, and it appears as if the movement will be successful. Mr. Durst says there is much vermin in Oregon, and the same in Sonoma County, Cal., but whether it will do much damage depends on weather conditions. "One hardly knows what to predict, but meantime we are banking on good prices for 1905's and the balance of our 1904's."

From New York State I hear that crop prospects are generally favourable. Brewers are holding off from buying, and the N.Y. market being thus very quiet, although quotable unchanged, is rather weak and unsettled.

Nuremberg.

Demand being very slow and sales being limited to small quantities, the present tendency of the market is in the direction of lower prices. The general satisfactory appearance of the plantations induces the few growers who have held their hops on speculation, to clear them out, therefore the arrivals at the central depots have lately exceeded the sales. The absence of any export business also assists the downward movement, which, however, has not yet altered values beyond 5s. to 10s. It is, however, admitted that although the outlook for yield may be accepted as satisfactory, there are dangers to full fruiters yet to be considered. The steady continuance of hot weather, and the necessity of rain, are causing anxiety in many districts, and as in England, so in Germany, it is impossible to calculate correctly upon the yield until it is actually in hand. Samples of early Styrian hops are now fairly plentiful at Nuremberg. These earlies have been pushed forward rapidly by the favorable conditions, and are eagerly examined as precursors of the bulk to follow.

Belgium.

The white bine hops in Poperinghe are rapidly developing burr, and it appears probable that if the weather continues favourable a full average crop will be gathered, both here and in Alsace. Prices are rather lower both for spot parcels, and for forward deliveries of 1905 growth.

Foreign Crop Prospects.

FRANCE.—Storms with hail and rain were frequent this week, and it is feared that the considerable area of laid grain will delay harvest operations, as scythes must be used in lieu of reaping machines. The quality, if not the quantity, is said to have suffered.

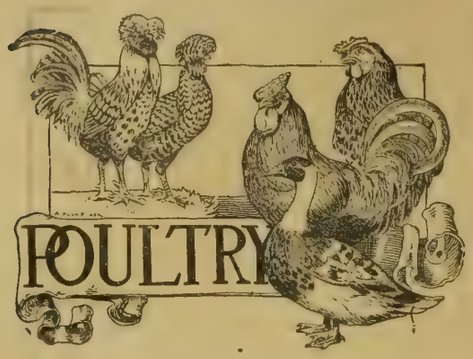
HOLLAND AND BELGIUM.—Harvest began at the end of last week, and, notwithstanding some interruption from rain, is progressing well.

GERMANY.—The cutting of rye began last week. Corn prospects in the main are satisfactory, and with fine weather should soon become general.

RUSSIA.—The official estimate of crop conditions in the returns between 1st and 14th inst. does not confirm the gloomy reports of failure and impending famine. Summarised briefly, conditions are as follows:—Winter wheat as a whole will be above an average. Spring promises an average; oats and barley in the aggregate are considered above an average; maize, favourable results are expected; rye is expected to be under an average. In South-West Governments and in Poland a good yield is reckoned upon. The position is satisfactory to bad in Samara, Viatka, and North-Eastern districts, also in parts of Taurida and the Don Territory. In the rest of the Empire it is satisfactory.

AUSTRALIA.—Mail advices confirm the impression that the area under wheat is much in excess of recent years, and the outlook is more promising than has been the case for the last ten seasons.—*Dornbusch* (July 21).

All official reports and notices of the National Association of English Hop Growers are printed in the MARK LANE EXPRESS, *and current information from all parts of the world, likely to be of interest and benefit to the members of the society, and Hop Growers generally.*



Advantages of Incubators.

Hundreds of years ago the hatching of poultry artificially was practised by the inhabitants of Egypt, but it was only during the present century that the incubator reached perfection. To produce a healthy chicken from a fresh fertile egg—heat, air, and moisture alone are needed. These, of course, must be supplied in the proper proportions, and the machine that can do this with the least trouble will be the popular incubator. Having used an incubator, a fifty-egg machine, with much success for many years, we wish to advance a few claims in favour of their more general use.

The primary claim for their adoption, we consider, is their simplicity of operation, and the little personal attention that is required when incubation is proceeding. After the eggs are introduced the operator's duties are so light and easy that they might be performed by a child of ten years. If the regular attendant be absent for a day, the work can be deputed to any other member of the household, who has seen the duties once performed.

Large numbers of chickens can be obtained by this method, and at any season of the year. From the beginning of March to the end of July in almost any situation, the incubator may be kept constantly at work, and if the place be well sheltered, and adequate accommodation be had for rearing, to these months may be added January and February. Birds hatched later than June, however, should not be used for stock purposes, even were they to have special attention and favourable weather.

On November 1, a few years ago, we filled the incubator with fifty eggs, being curious to see how they would hatch, and how the chicks would thrive. Eggs at the time were not plentiful, the hens having not recovered from their moult. The complement was made up from different sources, and many of them seemed, from their size, to be the eggs of pullets, which are inferior to those of hens for hatching purposes. Forty of these produced strong chickens—a hatch better than was anticipated at this unseasonable time of the year.

The foster mother was placed in an out-house, with a dry earth floor, which is more suitable for chickens than wood or other material. The door faced the south so that they might not lose a gleam of the precious sunshine, and a light wooden frame covered with wire netting was made to fit the doorway. This movable door proved to be of great advantage, giving to their apartment more light and to them fresh air, and, when it was obtainable, the warmth of the sun.

If a strong south wind was blowing a piece of coarse canvas was attached to the under half of the door for protection. Being the only brood on hand at the time, it got special attention. On every alternate day we suspended by a string from the roof a few pieces of raw liver, about six inches from the floor. The exercise the chickens had in trying to obtain pieces of the meat kept them warm, and was highly beneficial to them. This brood did so well that we have never been without a late hatching since.

Chickens reared artificially thrive better and are more independent than chickens reared in the natural way. They are also less liable to death by accident, as a hen in her search for food often leads her young into places of danger, where, but for timely aid, many would perish. Active hens—good mothers we call them—often take their offsprings long distances at a time, overtaxing the strength of the weak ones of the brood. The stronger ones keep pace with her, and by them the mother's movements are regulated. In this way many a valuable brood is reduced.

AUCTION SALES.

IMPORTANT GREAT ANNUAL SALE OF PURE-BRED SOUTHDOWN SHEEP.

For Prime quality of both Mutton and Wool, hardiness of constitution, and early maturity, Southdowns are unsurpassed. First class results obtained when crossed with other Breeds.

CHICHESTER, SUSSEX.

(The principal centre in England for the Sale of Southdown Sheep).

WEDNESDAY, AUGUST 9th, next.

MESSRS. STRIDE & SON beg to announce that they will hold their GREAT ANNUAL SHOW AND SALE of about

400 SOUTHDOWN SHEARLING RAMS AND RAM LAMBS (the largest and best selection to be offered anywhere this season, both Shearlings and Lambs being from leading Breeders).

5,500 SOUTHDOWN EWES of all ages (from a large number of the leading registered Flocks).

COMMISSIONS CAREFULLY EXECUTED.

Catalogues on application to the Auctioneers, 63, East Street, Chichester.

BIRTLEY ESTATE, BRAMLEY, SURREY. One mile from Bramley Station (L.B. and S.C. Railway), 2½ miles from Shalford Station (S.E. Railway), and 4 miles from Guildford (L.B. and S.C. Railway, L. and S.W. Railway, and S.E. Railway).

DISPERSAL OF THE WHOLE OF THE HON. HENRY CUBITT'S PURE-BRED REGISTERED AND TRADE-MARKED SOUTHDOWN FLOCK (Registered No. 110), consisting of about

1,000

HEAD,

In ages as follows:—

160 SHEARLING EWES,
110 FOUR-TEETH EWES,
93 SIX-TEETH EWES,
139 FULL-MOUTHED EWES,
45 DRAFT EWES,
204 EWE LAMBS,
232 WETHER LAMBS, and SIX RAMS,

Which

MESSRS. STRIDE & SON are favoured with instructions from the Hon. Henry Cubitt, M.P. (all the farms on the estate being let), to SELL BY AUCTION, at THE HOME FARM, BIRTLEY, on THURSDAY, AUGUST 10th next (the day after the Great Annual Show and Sale at Chichester).

This Flock was founded in the year 1882, by the purchase of ewes from some of the best Hill Flocks in East Sussex. The rams used have been chiefly selected from the famous prize-winning flocks of Mr. Edwin Ellis, Mr. William Toop, Messrs. Murrieta, Mr. Geo. Peel, Mr. Alfred Heasman, and Mr. F. N. Hobgen.

The Birtley Ewes thus embrace some of the best and most fashionable strains of Southdown blood: they possess exceptional size, great scale, and wonderful constitutions, which, combined with their choice breeding and beautiful quality, render them well worthy the attention of Southdown Breeders.

Luncheon (by ticket only) at One o'clock.

Sale to commence punctually at Two o'clock.

The Flock is open to inspection at any time by appointment with Mr. Allen Baker, Bailiff, Birtley Farm, Bramley, Surrey.

Catalogues of Messrs. Messenger and Thurgood Town Hall Chambers, Guildford; or of the Auctioneers, Auction and Estate Agency Offices, 63, East Street, Chichester.

(*Auction Sales continued on page 126.*)

AUCTION SALES.

IMPORTANT SALES OF PURE BRED STOCK.

JOHN THORNTON & CO. will SELL by AUCTION as follows:—

THURSDAY NEXT, AUGUST 3.—The entire Whitlingham Flock of SOUTHDOWN SHEEP (about 1 000 head), at Crown Point Park, Trowse, Norwich.

FRIDAY NEXT, AUGUST 4.—Col. A. F. Walter's SOUTHDOWNS, at Bearwood Wokingham.

FRIDAY, AUGUST 11.—Mr. A. T. Miles' Flock of SOUTHDOWN SHEEP, and about 50 LARGE WHITE YORKSHIRE PIGS, at Buckwell, Wye, Kent.

FRIDAY, AUGUST 18.—Sir N. W. Throckmorton's SOUTHDOWN Flock, at Buckland Faringdon.

FRIDAY, SEPTEMBER 1.—The Rt. Hon. Lord Brougham and Vaux's SHORTHORNS, at Brougham, Penrith.

TUESDAY, SEPTEMBER 5.—Mr. Henry Williams' SHORTHORNS, at Moor Park, Harrogate.

THURSDAY, SEPTEMBER 7.—Third and final portion, about 120 head of the Whitlingham RED POLLED herd at Trowse, Norwich.

Catalogues may be had of JOHN THORNTON AND CO., 7, Princes Street, Hanover Square, London, W.

FIXTURES FOR 1905.

MESSRS. PAXTON & HOLIDAY beg to announce the following important Sales of OXFORD DOWN RAMS, RAM LAMBS, EWES & THEAVES.

WEDNESDAY, AUGUST 2nd.

UPPER WINCHENDON, near Aylesbury Bucks. The Forty-eighth Annual Sale of about 50 OXFORD DOWN SHEARLING RAMS from the celebrated Registered Flock of Messrs. J. & S. Treadwell.

SATURDAY, AUGUST 5th.

BICESTER SUMMER FAIR. About 2.000 EWES, THEAVES, LAMBS, and RAM LAMBS, being drafts from the Principal Oxford Down Flocks in the neighbourhood.

WEDNESDAY, AUGUST 9th.

OXFORD GREAT RAM FAIR. About 300 OXFORD DOWN SHEARLING RAMS and RAM LAMBS, and 20 OXFORD DOWN THEAVES from the well known Registered Flocks.

THURSDAY, AUGUST 31st.

BANBURY RAM FAIR. OXFORD DOWN SHEARLING RAMS and RAM LAMBS from the Registered Flocks.

WEDNESDAY, SEPTEMBER 6th.

HEMPTON GREEN, NORFOLK. OXFORD DOWN RAM LAMBS from the noted Flock of Mr. George Adams, Royal Prize Farm, Faringdon.

TUESDAY, SEPTEMBER 19th.

NORTHAMPTON RAM FAIR. About 200 SHEARLING RAMS and RAM LAMBS, consigned from the Flocks of the Principal Oxford Down Breeders.

The Sheep may be seen by arrangement with the respective Owners, from whom catalogues may be had; or of the Auctioneers, Bicester, Oxon.

FRIDAY, AUGUST 4th, 1905.

THE MANOR FARM, WINTERBOURNE STOKE, WILTS.

Four miles from Wishford Station, six from Wilton, and nine from Salisbury.

MESSRS. WATERS & RAWLENCE are instructed by Mr. CAREY COLES to LET and SELL by AUCTION, on the Premises, on FRIDAY, AUGUST 4th, 1905, 97 RAM LAMBS AND 3 RAMS from his highly-bred Registered HAMPSHIRE DOWN FLOCK.

From personal inspection of this year's selection of ram lambs, the Auctioneers can speak in the highest terms of their general excellence; for years it has been recognised what great uniformity is apparent in the Winterbourne Stoke Flock, and it must be very satisfactory to the spirited owner that, whether at home or abroad, universal satisfaction is always expressed by those who purchase from this noted flock. Great judgment is shown by Mr. Coles in the selection of sires, with the result that great uniformity of character and type is always maintained in the highest degree, whilst the sheep carry that depth of flesh and superior fleece which is so marked in all the animals bred at Winterbourne Stoke.

Luncheon at 12.30 and Sale after.

Conveyances will meet the Trains until midday, at Salisbury, Wilton, and Wishford.

Catalogues of the Auctioneers, Canal, Salisbury.

THURSDAY NEXT.

THE 20TH ANNUAL SALE AND LETTING of 80 GRAND PURE-BRED HAMPSHIRE DOWN RAMS AND RAM LAMBS, from MR. LAMBERT'S OLD-ESTABLISHED REGISTERED FLOCK, will take place in a field adjoining the Cattle Market at CAMBRIDGE, On THURSDAY Next, AUGUST 3rd, 1905, at Two o'clock

MESSRS CHALK, Auctioneers, 11, Alexandra Street, Cambridge and Linton, of whom Catalogues may be obtained.

RAILWAY ANNOUNCEMENTS.

LONDON AND NORTH WESTERN RAILWAY.

ROYAL LANCASHIRE AGRICULTURAL SOCIETY'S SHOW, LIVERPOOL, AUGUST 3rd, 4th, 5th and 7th, 1905.

The London and North Western Railway Company has extensive accommodation at Liverpool for dealing with Live Stock, Implements, and Merchandise traffic passing to and from the Royal Lancashire Agricultural Society's Show, to be held at Liverpool 3rd to 7th proximo.

Live Stock will be dealt with at Stanley Station, where the Company has extensive Horse and Carriage Landings, Cattle Docks, and every facility for dealing expeditiously with such traffic.

General exhibits and other merchandise will be unloaded at Rathbone Road Station, but small consignments will be dealt with at Edge Hill Station, where the Company has a large number of carts and every accommodation for quick delivery.

Passenger traffic such as Poultry, Dogs, small parcels, &c., will be dealt with at Wavertree Station, while Carriages and Horses can be unloaded at either Edge Hill or Mossley Hill Stations, according to the requirements of the senders.

All information may be obtained from Chief Goods Manager, Euston Station, London, or from District Goods Manager, Waterloo Station, Liverpool.

The Company will have an office and representative on the Show Ground to give information.

Sefton Park is the nearest Passenger Station to the Show Ground, and a frequent service of trains will be run to meet the requirements of passengers.

Forward Merchandise, Live Stock, &c., to and from the Show by this Company's route, care being taken to clearly consign the exhibits "Per London and North Western Railway."

FREDERICK HARRISON,
General Manager.

General Manager's Office,
Euston Station,
London, July, 1905.

THE CAMBRIAN RAILWAYS COMPANY.

THE WELSH NATIONAL AGRICULTURAL SOCIETY'S SHOW, ABERYSTWYTH.

JULY 31st, AUGUST 1st and 2nd.

The Railway Company have made arrangements to run Special Cheap Excursion Trains in connection with the above Meeting to numerous stations on their system.

Children under Three years of age, Free; Three and under Twelve, Half Fares.

No Luggage Allowed.

The tickets are not transferable, and are only available to and from the Stations named upon them and by the trains specified on the Bills, and are not available for break of journey at any intermediate Station. If used otherwise, the tickets will be forfeited and full Ordinary Fares charged.

The Company cannot be responsible for detention on the line, at the same time every exertion will be made to ensure punctuality.

All information regarding Excursion Trains and Tourist Arrangements on the Cambrian Railways can be obtained from Mr. W. H. GOUGH, Traffic Superintendent, Oswestry.

C. S. DENNISS,
Secretary and General Manager.

Oswestry, July, 1905.

FOR HEALTHY CALVES USE

VESTA CREAM MEAL

This, our latest Calf Meal, has been specially made for use with either Skim or Separated Milk, and after the first few days can be used alone.

It is very nutritious, easily digested, prevents scour, and imparts a beautiful sleek skin.

It is one of the richest milk substitutes obtainable, and fine healthy thriving calves are reared on it by the leading breeders of cattle.

It is therefore a *perfect milk substitute*.

T. GITTINS, Esq., Wrentnall Farm, Shrewsbury, says

"I am more than pleased with your Calf Meal, I consider it excellent in every way"

15s. per cwt. Carriage Paid to Nearest Station.

All communications for that issue should reach this Office as early as possible, and in any case not later than by first post on FRIDAY MORNING NEXT.

POISONOUS SHEEP DIPS.

As our readers are aware, the Board of Agriculture recently inaugurated experiments to test the suitability of various preparations as cures for sheep scab without detriment to the fleeces of the animals dipped. The essential ingredients of the approved prescriptions were lime and sulphur, carbolic acid and soft soap, and tobacco and sulphur. Prescriptions containing arsenic were not scheduled as preparations which could be recommended. Although such dips were recognised as thoroughly effective in curing scab, the possible danger to human beings attendant upon their preparation rendered it advisable that they should be compounded by qualified persons only, and therefore the prescriptions were not given. The Board, however, recognise that there are a large number of sheep dips on sale which may be regarded as equally efficient cures for sheep scab, and have arranged for examination of any dips for sheep scab which the manufacturers may submit to them for approval. On being satisfied that a preparation may be relied on as a cure, the Board will issue their formal approval to the manufacturer, with an intimation that he is at liberty to label the preparation to that effect when offering it for sale.

In thus franking the preparations of private firms and manufacturers, however, the Board must be careful to insist on proper precautions being taken to prevent the dip killing the sheep, as well as the scab. That the cure may sometimes be worse than the disease is shown by a disaster which occurred some years ago in Northumberland. A large farmer at New Heaton brought an action against a tradesman to recover damages for negligence and want of skill in selling a sheep wash, which poisoned the sheep. The farmer had recently purchased the stock, and taken a farm of about 1,000 acres at Burton, in addition to his place at New Heaton. Seeing an advertisement in a newspaper headed "Important to Farmers," and greatly recommending the defendant's "Celebrated Sheep Wash" for the destruction of tick, lice, and vermin in sheep, he ordered a quantity of the wash, which was sold in powders. The powders were duly delivered, the instructions on the powders being that each one was to be mixed with three or four gallons of boiling water, and that the mixture, with 4lb. of soft soap, should then be diluted with forty-five gallons of cold water, which would make a wash sufficient for fifty sheep. The direction was implicitly followed, and one Saturday in August 869 sheep were dipped in the wash. Of these, sixty were dipped after the wash had been much diluted, as they had been washed before. The sheep were brought a considerable distance to the sheds, and they were turned back into the sheds, and sent back to their pasture at intervals during the day.

History does not record what happened to the parasites, but on Sunday one of the sheep died. On Monday several more died, and many were seen to be ill—foaming at the mouth, shaking their heads, and lying down. On Tuesday a greater number died; on Wednesday more still; until, in the course of a few days, 850 of the sheep were dead, and only nineteen survived. The nineteen survivors were part of the sixty which had been dipped in the very diluted mixture. Moreover, the hands and arms of the shepherds which had been dipped in this very effective and efficient sheep wash became sore, and mortified and sloughed, and the men were ill for some time. The powders were analysed, and it was found that each powder, weighing 2lb. 10oz., contained 1¼lb. of arsenic, 1¼lb. of soda ash, and 2oz. of sulphur. The judge directed the jury that their decision must be founded on whether this was a reasonable, fit, and proper composition to be used, according to the directions on the package, for dipping sheep. The jury emphasised their opinion by awarding the farmer £1,400 damages for loss of his sheep.

The Board of Agriculture are hardly likely to include the above prescription in their schedule of recommended dips. By if by mistake they approved of a preparation which was afterwards found to be dangerous to man and beast, and resulted in a similar catastrophe, an interesting question might arise as to their liability for holding up to the world a noxious compound as a suitable sheep wash for ordinary use, without at the same time warning the public of its dangerous qualities.

Speech by Lord Wenlock on Agricultural Topics.

Speaking at the luncheon held in connection with the Malton Show on Wednesday, Lord Wenlock made some interesting remarks concerning agriculture generally. His Lordship at the outset expressed the opinion that agriculture was improving, and remarked that one of the best symptoms of an improvement in agriculture was that if a farm became vacant there was a certain number of solvent applicants who were willing to bid for the place at a reasonable rent. He did not think that the British farmer could throw any stones at the landlord nowadays that the rents were too high. The landowners had accommodated themselves to the necessities of the case, and had put their rents at such a figure that the tenants, generally speaking, were able to make a livelihood out of the land. They could congratulate themselves on the great improvement during the last twenty or thirty years in the condition of the agricultural labourer.

At the present time they were properly agitating for an improvement in the houses of the labourers. One of the greatest difficulties which confronted landlords was the provision of decent and proper cottages. The rents received now left a very small percentage of return on the outlay involved, but he believed that as a result of the efforts now being made it would soon be found possible to erect a cottage for a labouring man, with three bedrooms, for £150. But they would have to go a great deal further before they would see the same number of persons engaged in agriculture as formerly.

The people naturally demanded that their food should be cheap. The only way in which it was possible to get the people back to the land in anything like sufficient numbers to make any appreciable difference in the overcrowding of our towns would be for the country to make up its mind to give a bounty on wheat-growing. It was an heroic measure, no doubt, but it was the only way in which any great portion of the present large acreage of bad grass could be brought under cultivation, and made to produce more food for the people than it did now. "Bad food, closely overcrowded cities, want of employment, and stunted growth"—he proceeded—"this is the price which we have to pay for cheap food. It is a curious thing that while the agriculturists—reduced in numbers though they are—are doing more and more every year to improve the standard of the quality of their stock, the human beings driven off the land are becoming so deficient in physique and their general stature is becoming so deteriorated that the subject is engaging the attention of statesmen as to a remedy for this state of affairs."

We had to thank those who had brought about this excessive cheapness in food that the great mass of the population was reduced to such a low ebb that they were not able to bear arms in the way their forefathers did to uphold the honour of the country in the manner in which it used to be done.

Seasonable Topics.

The Advent of August.

The passing away of July, the gradual shortening of the days, and the rich glow of increasing ripeness which may be noticed amongst vegetation on every side, all are reminders that summer is running its course to the end. Being a privileged individual in this direction the farmer has his little grumbles, but of late the fates have been kind to him in many ways. Though grass crops in all cases were not quite up to the standard we like to see, there is satisfaction in surveying the stacks built of hay which never had a drop of rain on it, and those who made the best of their opportunities in July have little to complain about with respect to the hay harvest. When we think of seasons in the past in which hay-making continued into September, and, in some cases was not completed at all, we have reasons to feel thankful for the tropical July sunshine of this year. A glimpe at cornfields displays a golden glow of ripening mellowness, which suggests early reaping, and, all things considered, we think climatic conditions at the height of summer have done more than a little to redeem the shortcomings of the beginning. With the advent of August, townsfolk rush away from stifling streets to seek relaxation in the country and by the sea; but the farmer's work is not yet over, and it is not till the last of the crops is safely harvested that he can think of holidays, even if he allows himself this treat at all.

❦ ❦ ❦

Cuckoos and Caterpillars.

Everyone is familiar with the cuckoo who comes to herald the spring, and returns again in that mysterious manner which is peculiarly his own as the summer reaches its height. We all have a sentimental regard for the cuckoo, which, perhaps, prompts us to overlook his bad habit of appropriating the nests of other birds for his own use, and compelling them by a system of fraud to bring up his offspring; but, in spite of these shortcomings, the cuckoo plays a useful part. In common justice to him let it be said that the cuckoo does not live entirely by sucking the eggs of other birds as is sometimes supposed, but he is a voracious insect eater, and has a decided liking for long hairy caterpillars, which smaller birds fight shy of. Quite recently we have been watching the operations of a pair of cuckoos in an apple tree which was badly infested with the prettily-marked hairy caterpillars of the Lackey moth. Every day they came, and could be seen devouring the insects until they had made a meal, after which they departed, but to return the following morning. These visits continued until there was not a caterpillar left on the tree, and then the birds flew away and were seen no more. By his call the cuckoo tells us when he comes, but his departure is silent, and takes place when the supply of caterpillars runs out. During the period of his residence amongst us, however, the cuckoo is responsible for the destruction of a host of insects, and is, consequently, a friend of the fruit grower.

❦ ❦ ❦

In View of Hop-picking.

Kentish hop-gardens present a charming picture now that poles and strings are covered with clustering bine, and under the influence of the summer sunshine the crop is advancing towards maturity. Hops still remain the most important crop in the southern county, and as the time for picking draws near everyone becomes more or less interested in the question of prospects. At the moment of writing the outlook is favourable, and the early appearance of the burr indicates that picking will not be late in commencement this season. As is usual at this time of the year there are numerous advertisements in the local papers seeking the services of pickers, bookers, cashiers, dryers, and so on for the busy season. People who read about the rush from East London to Kent when the hop picking is on are inclined to think that the whole of the work is done by the Cockney element, but this is by no means the case. In fact, hop growers prefer local pickers, and would gladly rely on them altogether if there were sufficient available; but as this is not the case, the nondescript fraternity from the Metropolis is welcomed. The individual, however, who rises from the level of the commonplace to a position of importance at hop-picking time is the dryer, because his task is one of considerable responsibility. In fact, a good dryer is a man of untold value to a hop grower, and when the latter has got a capable and trustworthy servant in this department, he endeavours to retain his services year after year. Hop drying is one of those tasks which are mastered better by experience and observation than by all the theory in the world, and this is where the old dryer scores. He knows his work, and being aware of the fact, he realises a sense of his own importance during the time that hop-picking is on. Any ordinary individual can soon learn to pick hops, and local schoolmasters during holiday time are equal to booking, but the dryer must be a man of experience and knowledge of his work, or he may be the means of his employer soon losing money. In view of this fact, it is not surprising that good dryers are eagerly sought after.

❦ ❦ ❦

Haybarns.

We remember the introduction of the first haybarn in a district where these erections were hitherto unknown. The pillars were of iron and the roof formed of corrugated sheets, and there was nothing extraordinary about it, but nevertheless the strange building was the subject of numerous comments on the part of the local farmers. They failed to see how hay stored under a thing like that could be as good as if it were built in a stack and thatched in the old-fashioned way. But corn-growing had not gone out of fashion then, straw was more plentiful than it is now, and labour was cheaper and easier to obtain. The old haybarn still stands where it was erected, but it is not alone in its glory, for similar buildings have appeared on nearly all the homesteads round about, and the farmers who are still without haybarns are perpetually petitioning the landlord to supply them. Nowadays the farm without a haybarn is not considered to be properly equipped, which is proof sufficient to show how much these commodities are appreciated for their usefulness. No argument is needed to show what a valuable acquisition in the saving of time, material, and labour a good haybarn is on a farm, and yet when they were first introduced they were looked on with a certain amount of suspicion. It is true, in many ways, that farmers do not welcome new things, but when the utility of a fresh introduction is made clear, they follow each other like sheep in their desire to obtain it.

❦ ❦ ❦

Summer Drought.

The tropical sunshine of July has had its effect on pastures, which in many cases present a burnt, dried-up appearance, and there is in consequence a shortage of feed for sheep and cattle. Oh, for rain to set the aftermath growing, says the farmer, ever mindful of himself, after the hay crop is safely harvested, and the green spots in dried-up districts are the fields where the grass was cut early and the herbage has had time to make fresh growth. A writer in a recent issue of the MARK LANE EXPRESS spoke of the value of a good green crop during a period of summer drought, for those farmers whose business it is to provide milk. We emphasise the writer's remarks, because we know how the milk yield falls off when the cows have to rely for their food on sundried pastures. But lucky are the farmers who never suffer through want of water in dry seasons. They have much to be thankful for, as we know of nothing more wearying than having to cart water long ditsances for sheep and cattle. Yet many have to do this, and there is an outcry now from various quarters about the shortage of the water supply. Water-carting, though absolutely necessary when circumstances demand it, is profitless work, because it demands the expenditure of a good deal of time and labour which could be well spent in other directions. In view of these facts we maintain that the question of water supply is a matter which should never be overlooked when taking a farm.

❦ ❦ ❦

Giving Notice.

It falls to the lot of some men to be able to spend a lifetime on one farm without ever having occasion to think of leaving, while others never seem to settle long in a place, and are frequently making changes. Why farmers actually leave their holdings and take others is best known to themselves, but we have met with instances of men who have given notice more than once without any intention of leaving at all. Of course, there is an object in view when this is done, and whereas sometimes it comes off, at other times it does not. Last year an instance came before our notice of a farmer who gave notice because he could not agree with his landlord over some small matter. The man was doing very well, and had no real intention of leaving, but when he made an attempt to withdraw his notice he found he had reckoned without his host. The landlord, by the way, never gives a tenant notice so long as things are going on satisfactorily, but when he receives a notice he rarely allows it to be withdrawn. The result in this case was that the tenant had to leave through his own act, and in addition to being put to the expense of removal he had to put up with an inferior farm. A moral adorns the tale, namely, that a tenant should not give notice unless he really intends to leave, and that the giving of a notice is not always a safe way of obtaining some object in view.

❦ ❦ ❦

Rabbits on Farms.

Many of our readers will remember the hue and cry there was in certain quarters when the Ground Game Act was passed. It was asserted that the days of the cosmopolitan rabbit were numbered, and that soon the whole family would be wiped off the face of the earth. The fear was groundless, however, and rabbits flourish now as vigorously as ever they did. If they are represented in numbers sufficient to do appreciable damage to the farmer's crops he has the law in his own hands, but as for obliterating rabbits entirely, farmers generally have no such desire. If for no other reason the farmer likes to have a few rabbits about him in order that he may gratify his inborn taste for sport, and we know of nothing more pleasant at this time of the year than a quiet walk in the cool of the evening in quest of young rabbits, which form a welcome addition to the bill of fare. Indeed, farmers get many little pleasures in a quiet way, and one of them is the privilege of being able to stroll out, gun in hand, in the delicious coolness of a summer's evening with the object of potting a few rabbits for the morrow's meal.

Unlet Farms of the Crown.

A certain number of farms belonging to the Crown were specified in last year's report as unlet, and the following, according to a statement made by Mr. Victor Cavendish, in the House of Commons last week, are still unlet:—

Place.	Acres.	Vacant Since.
Cambridge (Burwell)	916	1904
Hants (I. of W.)	763	1903
Kent (I. of S.)	1,157	1892-1903

Mr. Cavendish has assured Sir Walter Foster that any application for part of a farm as a smaller holding would be considered, but it must be borne in mind that a division of the farms into smaller holdings, except for allotments, would involve substantial outlay in the provision of additional farmhouses and buildings.

Essex Farmers at Cambridge University's Farm.

On Tuesday about forty Essex agriculturists visited the experimental farm at Impington, near Cambridge, worked by the Cambridge University Department of Agriculture, the trip being organised by Mr. G. Clarke, F.I.C., of the Chemical and Agricultural Department of the Essex Education Committee. The party was received at Burgoyne's Farm, which is within a mile of Histon Station, by Professor T. H. Middleton, and were entertained to light refreshments on arrival. Burgoyne's Farm, it may be explained, consists of about 140 acres of light and medium soil, and has been leased to the department for nine years rent free, the department to have the option at the end of that time of a further lease at the rate of about 5ls. per acre. The land was in very bad condition when taken over, and for teaching purposes was, therefore, very suitable. Mr. Middleton is at the head of the department, but the farm is under the management of Mr. H. Henshaw.

Mr. Middleton, before starting on the tour of

inspection, gave an outline of the work that is going on at Burgoyne's Farm, and other places, and under his guidance the party then proceeded to the garden, where there are kept, in a large cage, many varieties of wheat from all parts of the world. Mr. Middleton explained that the object of this wheat breeding was to raise by selection varieties which would be good miller's wheat, as well as strong in constitution and free growers. This season, four generations of wheat hybrids of various parentage are being grown. The difficulty is in fixing the various types. In the case of oats cross breeding has not been resorted to, but a number of the best varieties now on the market have been systematically tested.

Proceeding to the root fields, the visitors were shown the experiments being conducted there. There are two stages with mangolds, swedes, turnips, and kohl rabi. The best known varieties are first grown side by side, and the weight of each crop ascertained. At the same time samples are taken of each variety, and analysed in the University laboratory, and in this way can be determined which variety is the most profitable to grow. The second stage consists in the analysis of individual roots, and those which contain the largest percentage of food materials are saved for growing seed.

Experiments on potatoes are also being carried out as to the merits of the leading new varieties and the effects of change of "seed," sprouting in trays, the size of sets, cutting sets, "greening" of sets, and growing in the pit. The various plots were described by Mr. Middleton, who explained where the seed had come from and how it was planted, etc. The visitors were able to judge of the results for themselves. One thing seemed very clear to the veriest tyro, viz., that it pays southern potato growers to get new seed from Scotland, rather than to grow their own.

Another fact that stood out plainly, according to the professor, was that the best results are obtained from medium-sized seed. Experiments with clover and with oats having been described in detail, the tour terminated with a visit to pasture land, where Professor Middleton described the treatment for improving pasture, answering many questions here, as elsewhere during the afternoon, on points of special interest to members of the party.

The Agricultural Outlook in Wiltshire, Hants, and Dorset.

We have again to thank a large number of correspondents for enabling us to publish reports on harvest prospects and the condition of agriculture in Wilts, Hants, and Dorset. On the whole, the season from an agricultural point of view has been a favourable one, and the outlook is more promising than for some years past. The abundance of sunshine and hot weather has hastened the maturity of crops, and harvest is likely to be general next week.

Of cereals wheat is the best crop, and all our correspondents describe the yield as over average or average. A few reports speak of a deficiency in the ear, and slight blight is visible in a few instances, but this is the exception, and on the whole the crop promises to be a heavy one, of good quality, and with plenty of straw. Barley is also likely to be a good crop and rather better than last year, whilst the colour and yield promise to be satisfactory. Oats appear to be the worst of the cereals. Winter and early sown are a fair average, but spring-sown are poor, the drought in May apparently in many cases having stunted the growth.

The crop of hay is not so heavy as last year, and in some cases is spoken of as light. On the whole, however, the growth is an average one, and, thanks to the fine weather which prevailed during the hay-making season, the whole has been well secured in excellent condition.

The reports with regard to the roots vary to some extent. Those who have benefited by local showers report the crop as an average one, whilst others describe it as backward and uneven. Although in a few cases some sowings have failed, on the whole the crop is more promising than might have been anticipated. The reports are most unfavourable with regard to mangolds, but swedes and turnips promise a fair yield. Rain, which is greatly needed, would still do much to improve the crop, but if the present dry weather continues much longer, the crop is likely to suffer very considerably.

Sheep and cattle are generally described as healthy, and in good condition; sheep are about the average number, and the breed of lambs was a good one.—*Salisbury Journal* (July 29).

For having in his possession a carcase of diseased meat, intended for human food, William Bennett, butcher, was on Thursday sent to gaol for three months, by the Chesterfield magistrates.

Agricultural Politics.

BY A LOBBYIST.

The significance of the Parliamentary proposals made by Mr. Arthur Stanley, M.P., lies in the fact that it would give a distinctive position to the motorist. He would, it seems to me, become at once a chartered person—licensed, delegated, empowered by the State to the usage of the roads under special conditions. Well, it may be necessary. I was reading this week a letter in the *Salisbury and Winchester Journal* written by Mr. John Bennett-Stanford, a name once to conjure with in Wiltshire. If I understood this epistle aright, the roads ought to be absolutely left to motorists, and the other users of them ought to be fined. A flock of sheep passing along a highway does, says Mr. Bennett-Stanford, infinitely more harm to it than a thousand motor-cars; a careless carter may do a world more damage than a hundred cars. Ergo, the thousand sheep ought to be refused right of usage; the carter ought to be placed in gyves. Then the gentlemen from Houndsditch or Park Lane—they have usually one lineament in common—would be able to enjoy themselves with broken-English enthusiasm, and the duty of the British farmer—that malicious rascal who has dared own that thousand sheep—would be permitted the glorious privilege of contributing towards the maintenance of their highway.

• • •

We are to have classified roads, vide Mr. Arthur Stanley and his seven Parliamentary associates. We are to have national roads and other roads. And the maintenance, alteration, and restriction of such roads is to be provided for out of moneys supplied by Parliament. What penalty will be placed upon the motorist if he doesn't use the national roads? What will it matter to him if, instead of using the highway partially maintained out of funds supplied by Parliament, he insists on using the road maintained by that pernicious master of the flock of sheep? And Mr. Stanley would proceed with fine method. He would enact that suburban districts shall be laid out according to some definite plan and that new trunk roads of adequate width shall be built and the existing ones widened before building operations are commenced, and "so render unnecessary the costly street widening." This is most admirable philosophy. I only hope, however, that Mr. Arthur Stanley will insist on inflicting some adequate punishment should a suburban area prove indifferent to its duty. What if, as a fine, each suburban area were made to bear the cost of a balloon service for the carriage of that flock of sheep from field to field, or market to market, or made to bear, say, a year's cost of a college for the training of carters in ways that shall not disturb the motor gentleman.

• • •

Mr. Arthur Stanley has made one very practical suggestion in his Bill. This is, that the county councils should be the supreme authority for all highways within the county. The educational example is really an excellent one. The incidence of the maintenance of the cost of education and the maintenance of roads have much in common. In both instances there is a partial responsibility attaching to the State and a partial responsibility attaching to the local area. The educated child may be an asset of the area, but he is also an asset of the State. Upon the area is placed the responsibility of evolving an instrument that shall be of value to the State. The county authority should also have placed upon it the responsibility of maintaining public roads, to the cost of which a definite contribution should be made by the State. If Mr. Stanley and his coadjutors would introduce a Bill on these simple lines he would place the whole agricultural world under an obligation—aye, even the dastardly fellow who has the effrontery to own Mr. Bennett-Stanford's flock of a thousand sheep. Mr. Stanley and Mr. Bennett-Stanford have instead given us a very piquant insight into the motorist mind. *A has* the pedestrian, the fellow who, if he doesn't walk on two legs, may ride on four with a horse ahead of him, and the brutal farmer who dare want to walk his flock of sheep along the public road for whose upkeep he has to pay. Why not a close time for the pedestrian and the flock of sheep?

• • •

My prophecy as to the policy of the Government in regard to an election was wrong. And if prophets have not the luxurious right to be wrong, who have? My prophecy as to the probable date of the general election I still believe to be right and wise. The contest will in all probability take place in October. There is undeniably a great distaste on the part of many Conservatives to meeting another session. They hold that it would only be a season of tribulation and turmoil and chagrin. This being so, it follows that they would prefer an election on the old register. A new register is invariably unfavourable to the Conservatives. On an old register those interests which are generally Conservative have a chance of assertion. The property vote, then, has an improved opportunity of making its importance felt. While this is so the nomads of our electoral life are more difficult to be traced. These facts must, of course, have impressed itself on the official mind of Conservatism. It will be to the advantage of Conservatism, always assuming, of course, that the resolve has been arrived at not to meet the House of Commons in another session—to have an election in October.

• • •

The speech of Lord Willoughby de Eresby, which THE MARK LANE EXPRESS reported in its last number, in favour of the extension of the principle of land purchase to England, is an evidence of the trend of opinion. Lord Willoughby de Eresby is not a Tory of the miocene and pliocene order, but he is undeniably a Tory; and, what is more, he is a representative of the aristocratic sentiment. When such a man as he pronounces so emphatically in favour of Mr. Jesse Collings' land purchase scheme—for that, of course, is what his speech meant—and avows his own willingness to sell to tenants aided by the State in their desire for ownership, we have an assurance that we are progressing rapidly towards the yeoman-ideal. When, however, his lordship says that "the question is entirely one of Government security in advancing loans to enable tenants to purchase," I fear me that he mistakes the temper of his own party. The question is one of converting the Conservative party to his purpose. Not, believe me, the territorial element in Conservatism. To-day there is a keener sympathy with the idea of voluntary purchase in Conservatism than there has ever been. If a vote were taken of the squirearchal element in Conservatism you would find a preponderating force in its favour. The element in Conservatism which is antagonistic is the plutocratic element—the men, not of broad acres, but of well-filled purse, to which a providential industrialism gives the character of the widow's cruse of oil. These be the men who hanker after the delights (*sic*) of rural landlordism—who long for the spacious parks and the attached farms.

• • •

I have received a somewhat vigorous remonstrance from a well-known Conservative Member of Parliament against what he assumes to be my predilection for Liberal candidates. I retort upon my friend with another remonstrance. He has mistaken my regret at the apathy, the anti-ruralism, of Conservative officialism for sympathy with the antagonists of Conservatism. There be Conservatives like Mr. Jesse Collings, Sir John Dorrington, and Lord Willoughby de Eresby who have a practical policy—a policy affecting land purchase.

small holdings, and the labourers; but what official sympathy from Conservatism has this policy received? We have measures of definite moment to agriculture introduced into the House of Commons, and then abandoned without even a faint semblance of a practical effort being made to seure their adoption. We have the greater men in agriculture reprobating the Ministerial apathy in real stalwart fashion, and we have that Ministry absolutely indifferent to the necessity of disproving these assertions. These be the incidents that I reprehend, and they have no more association with sympathy with Radicalism than they have with the anti-libidinous ethics of the Koran.

The Hampshire Crops.

Following its usual custom, the *Hampshire Chronicle* has published the reports on farming and crop prospects from thirty of the leading agriculturists of the county, and the majority speak more hopefully of the present season than for many years past. There is no doubt, our contemporary adds, had it not been for the timely rain of June 5, the outlook for this county, at least, would have been one of the gloomiest on record, but this splendid rain, followed by a cool week with some additional showers, saved the situation.

Taking a summary of the reports, first, as regards the wheat crop, eighteen consider it over average, ten average, and not one under, whilst two do not give an opinion. In reference to barley, four give it as over, eighteen average, and only three under, whilst five do not give an opinion as to yield. The oat crop appears to vary a good deal. Whilst winter oats are generally good, the spring sown are under average, and especially the late sown. Not a single correspondent gives this crop as over average, and only seven average; seventeen return it as under.

As to the hay crop, although it is spoken of generally as well harvested, yet it is considerably under average, especially mowing pastures and old sainfoins; in fact, it comes out as follows:—Over average, none; average, nine; and under, eighteen.

The root crop is favourably reported upon, for whilst only seven give a bad report of this most important crop, twenty-three speak hopefully, and especially if we get shortly a good rain. The mangel crop is very disappointing, and in many instances has been ploughed up.

Visit to Scotch Nurseries.

A number of the friends and customers of Messrs. W. P. Laird and Sinclair, Ltd., from the Arbroath district visited the firm's extensive nurseries and trial grounds at Monifieth on the 22nd inst. Agriculture, arboriculture, horticulture, and floriculture are all branches of the nursery and seed trade that engage the close attention of this firm, and the unanimous opinion of the large party of visitors was that to the hands of the two managing directors, Mr. J. W. and Mr. W. P. Laird, all the branches of the trade give evidence of careful study and attention. The party were received at Fountainbrae House by Mr. J. W. Laird, who acted as guide, taking them round and pointing out all the principal items of interest. The nurseries are beautifully situated, and command at many points a magnificent view of the estuary of the Tay and right up beyond Newport and Dundee. From a business point of view the "exposure" is all that could be desired. Lying close to the German Ocean, the trees that are here grown cannot fail to be hardy, and consequently well adapted to successful transportation to all parts of the country.

Much interest was taken in several plots of potatoes here and there growing in the nursery, and although the keen edge is off this indispensable tuber as compared with the excitement of last year, still there was sufficient interest displayed to give evidence that the excitement has sharpened the interest of agriculturists, and caused them to be more observant and to give greater attention to this imporant crop.

The newest varieties of potatoes, to the number of forty, are being tested this year by the firm, Golden Wonder, Highlander, Conquering Hero, Eldorado, Sim Gray, Pearl, Diamond, Money Maker, Duchess of Cornwall, and many other well-known varieties are making fine growth and looking well. Mr Colin MacPherson's three new varieties, introduced by the firm last year, namely, The Macpherson, New Victoria and Early Champion, were looking remarkably well, and exceedingly good reports are being received from the South

NORTHERN NOTES.

There is a great difference between the climatic conditions of the East Coast and the West Coast of England, and it is a relief to pass from the arid parched eastern shores to the western side and to note the different aspect of the crops and of vegetation generally. Not that even in the west is there much humidity, but still the contrast is very striking. Harvest is approaching rapidly, and in the north will commence unusually early. Oats are changing fast, and some fields are already cut. The word "changing" is used advisedly, as "ripening" would scarcely be an appropriate term. We often hear the word "dying" used as though it were synonymous with ripening, but this season many flats of oats are dying under the sun's heat and the drought, and are not ripening. But the promise of the wheat crop is a good one, and that of barley at least fair.

"Everything comes round to him who will but wait," and now the East Coast has at last been visited by refreshing showers at a date when it seemed as though the clerk of the weather office had forgotten the existence of such a locality. The rains will afford some assistance to the pastures, although the season is too far advanced to admit of ought but a partial recovery. The root crops will benefit very considerably, although their present condition is really "parlous."

The caterpillars of the diamond back moth have done great injury, although perhaps not to the extent that was anticipated; forward swedes have suffered least, backward fields have suffered very severely, and some are entirely ruined. Farmers have congratulated themselves upon the comparatively little harm done by the turnip fly, but the root crops have many other enemies in a dry hot season, and the only cause for wonder is that they have stood as well as they have done.

The weaning time has now arrived, and the question with most flock owners is what they shall do with their lambs. Where fields of clover have been specially laid up for the lambs, the herbage is so short that the growth will be consumed before anything is ready to succeed, and the aftermath of grass and clover and sainfoin has in most places scarcely made an appreciable start. Naturally a good deal of stock is being pushed into the market, and as a consequence the price of beef has fallen, and in many provincial markets anything over 6d. per lb. is only to be had for animals of the finest quality. The trade in the best class of mutton has not been affected to nearly the same extent, and cross-breds of medium size are in good demand. Room must be found for the weaned lambs, somewhere, and so although the day of final separation will be postponed until next month in many instances, the grass pastures are being lightened in order to provide food for the lambs.

As a natural consequence the price of oilcakes and high-class artificial foods is hardening rather than declining, and this makes the position of the stockkeeper and grazier more unfortunate. But it is absolutely necessary to provide the flocks and herds with artificial food; it would be folly to allow animals in good condition to lose ground on account of the additional expense of artificial foods. If either sheep or cattle lose ground for a week, it takes at least two weeks to recover the ground that has been lost, if indeed the lost ground is ever again regained.

The condition of the wool trade is not encouraging. It is very strange that there are at any time so few buyers of long wools in the north, and now that the American demand is for the moment stayed, there seems to be absolutely no buyers for such wool. A great part of the season's clip is now in the hands of the factors and they will not sell at the present at a reduction, but they will not buy of the grower, and the manufacturers will only buy of the factors, and so for the moment things are absolutely at a standstill. The expected Japanese demand is not yet in evidence, and manufacturers are endeavouring to bring about a slump in English wool, but as the bulk of the clip has passed out of the hands of needy growers the anticipated slump will probably not arrive. Later on there will pretty certainly be a revival in the trade, although it is doubtful whether the farmer will obtain any higher rates than those prevailing three weeks or a month ago.

What may be termed the period of the local agricultural shows has set in, and everywhere local committees and secretaries are complaining of the want of public support. But the plain fact is that agricultural shows are overdone. Nearly every village now has its local show, and under such circumstances how can it be expected that the public will support all of them. After all, to the uninitiated, one agricultural show is very like another, and even if a farmer from one district is staying in another district a couple of hundred miles away, about a couple of these gatherings will satisfy him. He is interested in the first he goes to, as he sees animals of different breeds than those to which he is accustomed, but the second has smaller charms for him, and for a third he has no liking. In one's own district one may find interest in repeated visits to scenes where one may compare different types of breeds of which one has an expert knowledge, but it is not so interesting to repeatedly examine specimens of breeds and varieties of stock that are comparatively strange. The other day a disgusted official was heard to say that the general public found much more attraction in a group of pierrots by the seashore, or in a cycle exhibition, or a motor-car race, and he was undoubtedly right, although it is not so clear why the fact should put him out so much. However, the same position occurs everywhere, and if instead of increasing the number of petty exhibitions, local managers would eliminate the weaker organisations or bring about amalgamations and seek to join forces, their prospects of success would be much greater. If the number of local agricultural shows were reduced by one half, agriculture would be benefited.

One of the burning questions which will shortly come to the fore will be that of agricultural co-operation. Not on the lines so often advocated in interested quarters—a successful movement can only be actuated from within. Farmers cannot be guided by outside forces, and it is well for them that they resist all such attempts; but a movement from within will be irresistible, and one of the first steps will be the co-ordination of the powerful agricultural clubs and the weaker agricultural societies, and the elimination of certain elements which events have proved nither make for ornament nor utility.

M. Y.

July 28.

Farm Colonies: Departmental Committee Appointed.

A Departmental Committee to consider Mr. Rider Haggard's report on the Salvation Army Colonies has now been constituted, the names of the members composing it being as follows:—

Lord Tennyson, G.C.M.G. (chairman).
Mr. J. S. Davy, C.B., General Inspector of the Local Government Board.
Mr. Arthur Wilson Fox, C.B., Deputy Comptroller, General and Labour Commissioner, Board of Trade.
Mr. Bernard Holland, C.B.
Mr. Henry Lambert, of the Colonial Office, and Chairman of the Managing Committee of the Emigrants' Information Office.
The Hon. H. L. W. Lawson, M.P., member of the Managing Committee of the Emigrants' Information Office.
Colonel Llewellyn, M.P., representing the Board of Agriculture.
Mr. Herbert Samuel, M.P., and
Mr. Sidney Webb.

The Committee are instructed to consider the suggestions made in Mr. Rider Haggard's report on the Salvation Army Colonies in the United States and at Hadleigh, and to advise the Government whether any steps can usefully be taken for promoting agricultural settlements in the British Colonies of persons taken from the cities of this country. It is desired that the report should embody the views of the Committee upon any questions or proposals of a practical nature relating to emigration, which may arise during the inquiry.

Droitwich and Bromsgrove Farmers' Club.

At the annual meeting of the members of this club, Mr. E. B. Cotton (hon. secretary) reported that, after paying away to members cash prizes to the amount of £84 and prizes in kind £34, there remained a small balance in hand. It was agreed to invite Mr. R. B. Ward, of Westwood Park, to become president for the year, and Mr. E. B. Cotton was again appointed hon. secretary and treasurer. The members decided to accept the offer of Mr. J. W. Wall, of Hindlip, and hold this year's show at the Ford, near Droitwich.

EAST ANGLIAN NOTES.

The thinly attended markets throughout the Eastern counties proclaim by reason of the absence of the farmers that they—the farmers—are all busy in the harvest fields, for the farmer takes care to be absent as little as possible from the scene of the harvest operations. In fact, for his own interests, visits and journeys are postponed, and the markets even for a time are unattended, inasmuch as all his energies are concentrated in his cornfields, where he restrains and directs hasty and careless hands, while he urges on the slow and cautious. It is to the farmer's advantage that the ground shall everywhere be well cleared and the crop secured in the best condition, while the weather and other circumstances are favourable. So one can understand the considerable progress that has been made during the past week, and the bare, brown patches that can be seen in the early districts from which the corn has safely been carted and housed.

Thus, the cornfield is a busy and interesting scene, and such it appears equally to have been in the days of the poet Homer, who wrote thus:—

> Here stretched in ranks the swelled swathes are found,
> Sheaves heap'd on sheaves here thicken up the ground;
> With sweeping stroke the mowers strow the lands,
> The gatherers follow and collect in bands;
> The rustic monarch of the field descries,
> With silent glee, the heaps around him rise.

In fact, we must say that this year all the processes of harvest are pleasant to behold, and inspire feeling of gladness and contentment in spite of the fact that the heavy rains that fell on Wednesday night in south Lincolnshire and Cambridgeshire beat down a few hundred acres of corn and completely put a stop in some districts to harvest work the following day; while the downpour in south Essex late on Thursday afternoon, although it put a stop to the ingathering and cutting of the harvest, was welcomed by most farmers for its beneficial effect on the grain, and its cooling effect on the air.

New wheat, if it is not shown on Mark Lane Corn Exchange at Monday's market, will be in evidence at Romford next Wednesday, or Bishop's Stortford the following day, for the threshing machine started work in south-west Essex on Wednesday morning last.

Some remarkable records in the size of families are shown by the awards of the Lincolnshire Agricultural Society, in connection with which premiums are annually offered to farm labourers who have brought up and placed out the greatest number of children without having "parochial relief." This year it was found that eight men were the fathers of no fewer than 124 children, and four prizes were awarded:—1. J. G. Willoughby, of Calceby, who had 20 children born to him, of which 17 had been brought up and 12 placed out. 2. C. E. Blanchard, of Sleaford, with 19 children born, 14 brought up, and 14 placed out. 3. Stephen Robinson, of Rothwell, with 14 children born, 11 brought up, and 11 placed out; and 4. John Elsey, of Lusby, with 14 children born, 14 brought up, and 9 placed out. It should be mentioned that one of the stipulations of this competition was that the competitors had not occupied more than half an acre of land.

Although he would be a bold man who asserted that the agricultural depression which has now been drawn out almost thirty years is about to take its departure; nevertheless, the fact remains that in the purely agricultural counties of Norfolk, Suffolk, and Cambridgeshire, as well as Essex, land is steadily increasing in value. And it was not a surprise, therefore, when Messrs. Cruso and Wilkins offered, at King's Lynn, on Tuesday last, to public competition, the Barwich Hall freehold estate at Barwich and Bamar, Norfolk, comprising residence, gardens, agricultural premises, 5 cottages, and about 1,015 acres of arable and pasture land, now in the occupation of Mr. Clement Savory, at an annual rental of £800, that the property was withdrawn at £17,500.

The Canadian motor waggon, which is decorated with the varied products of Canada, after being on show at Park Royal during the Royal Agricultural Show, has made good progress on its tour through the Eastern counties. It is expected in Norwich on Saturday, 29th inst., and any inquiries concerning the car should be addressed to Mr. B. G. King, of Haymarket Chambers, Norwich.

July 28.

CHEAP COTTAGES: GARDEN CITIES.

On Tuesday a large number of visitors had the opportunity of inspecting the Garden City at Letchworth, near Hitchin. The occasion was the official opening of the cheap cottage exhibition by the Duke of Devonshire, K.G., who was supported by Mr. J. St. Loe Strachey (chairman of the executive committee of the exhibition), the Bishop of Hereford, the Earl of Crewe, Mr. Justice Grantham, and Mr. Ralph Neville (chairman of the first garden city company).

The exhibition is an attempt to solve the problem as to whether a suitable cottage can be erected for approximately £150, so that if it let at £6 a year, the owner would at all events be receiving within a fraction of 4 per cent. for his outlay, not counting the cost of the land. On these terms there is a reasonable probability of some improvement being effected in the houses of agricultural labourers, and there can be little doubt that with more civilised accommodation in prospect there would be a diminution of the tendency on the part of country-bred young men and women to flee to the towns.

There are four classes in the exhibition:—

1. Detached labourer's cottage, containing living-room and scullery, or kitchen-scullery, and three bedrooms (two with fire-places). No room to be less than 7 ft. 6 in. in height, and cubic space in bedrooms to be not less than 2,000 ft., and the estimated cost to be not more than £150.

2. Pair of five-roomed cottages, costing not more than £300.

3. Group of three or four cottages, six rooms, including scullery, not to cost more than £35 a room.

4. Detached cottage or pair of cottages, six rooms, costing not more than £35 per room.

The cheapest cottage in the exhibition is that designed by Mr. A. Randall Wells, of Hastings. Built of brick, it works out at 2¾d. per foot cube. The cost is estimated at £150, plus the profits, and other items deducted in accordance with conditions. There is a living-room 15 ft. by 14 ft., a parlour 14 ft. by 10 ft., a scullery (with bath) 14 ft. by 7 ft., and three bedrooms, all with fireplaces and recesses for clothes. This is one of the group of cottages adjoining agricultural land intended for tenants of small holdings. Another cheap house of this group is that put up by the Wire-Wove Roofing Company, which works out at 3½d. per foot cube. Its principal feature is a large living-room, 21 ft. by 14 ft. 6 in., and a large scullery 17 ft. 6 in. by 9 ft. There is no parlour, but three bedrooms of useful size, all on the ground floor.

Another one-storey building is put up by the Darlington Construction Company at the cost of 3.6d. per foot cube. Its walls consist of 1 in. weather boards, a layer of inodorous felt, and asbestos cement sheeting ¼ in. thick. Experiments carried out by the College of Science at Newcastle indicated, it is stated, that the above combination was equivalent, when temperature conditions were steady, to 9 in. of brickwork. The asbestos cement sheeting can be papered, but does not look amiss as it is, and the assistant in charge of the house declared that it could be washed without injury. Concrete is used in various forms in the construction of many of the cottages.

In some cases concrete and timber are used, and in other cases the concrete is reinforced with steel. One of the best concrete habitations is that erected by the Concrete Machinery Company, Limited, of Liverpool, partly to recommend their portable hand-power machinery for making concrete blocks. The concrete blocks are made on the spot of gravel, sand, and cement, and the cottage in question is the first built by this process. It comprises parlour, kitchen, scullery, and larder, three bedrooms (two of which are 14 ft. 6 in. by 12 ft.), and it is claimed that it could be erected in six weeks for £150. It is fitted with a bath, that folds up into a recess behind the kitchen fire, and it is averred that by the patent boiler connected with it a hot bath could be obtained in half an hour, with an expenditure of 3½ lb. of coal. Some walls consist of "timber framing, expanding metal lathing, and Portland cement," giving 4 in. hollow space, and in many cases the usual lath and plaster for internal walls is replaced with fireproof material, such as plaster laid on expanded metal lathing, or the patent material "Mack."

A very excellent pair of cottages, with interior walls of "Mack," is built by the Letchworth Building Syndicate, Mr. V. Dunkerley being the architect. The outer walls are of asbestic brick, and by the adoption of the Mansard roof, three capital bedrooms are obtained. There are two other good features of this pair—a "model cottager" combined range, copper and bath, and the utilisation of a new idea for chimneys passing through the bedrooms. Instead of 4 ft. or so of solid brickwork from floor to ceiling, there are two comparatively small shafts of fire clay, one for the kitchen chimney and one leading from the bedroom fire, the space between the two being fitted with a cupboard for linen, etc. Yet another feature is "the sink recess" in the kitchen-scullery, shut off by a door when not in use. The architect says that the cost, including builder's profit, model cottager and bath, is £150 per cottage, and as twenty-two similar cottages are now being erected in another part of the Garden City, the estimate is probably nearer the mark than the estimates of many of the so-called "cottages," whose construction excites as much wonder as admiration when the "cost" is considered.

One plan of building is "brick-on-edge, reinforced with ironwork, and built in cement mortar," giving a hollow wall of great strength and cheapness. In another house there are "wire walls," otherwise steel framing and plaster 7 in. thick—rough-cast plaster outside and ordinary plaster inside. Here, as in some other cases, there is an underground tank for rain water.

British Possessions
beyond the Seas
AND THEIR
London Representatives.
NOVA SCOTIA.

Offers advantages to British Agriculturists [illegible] moderate capital. Improved Farms at low Prices. Fertile Lands. Famous Fruits. Luxuriant natural [illegible]. Coal, Gold, Silver, Iron, Copper, Lead and Tin. Climate temperate and healthy. Easily accessible to all the principal markets. Full information supplied by the Agent-General for Nova Scotia, MR. JOHN HOWARD, [illegible] Pall Mall, London, S.W.

Successful Co-operation.

A deputation of farmers from the Earl of Scarborough's Lincolnshire and Yorkshire estates recently visited Brandsby, a village sixteen miles from York, where an agricultural co-operative scheme is in successful operation, to learn how things are done there. The deputation reached York soon after nine o'clock in the morning, and were whirled to their destination in one of the splendid motor 'buses belonging to the North-Eastern Railway Company. Pulling up eventually in a dingle, the party found themselves opposite a quaint wooden cabin, with the legend surmounting the doorway: "Brandsby Dairy and Trading Association. Licensed to sell tobacco"; while on the other side of the roadway was a storehouse, with another double the size in course of erection. The Squire (Mr. Fairfax-Cholmely), to whose initiative the establishment of the Brandsby Association is due, gave the party the warmest of welcomes, and so did the Committee of the Association, and soon the deputation were inspecting the depôt, asking questions and receiving a most interesting account of the advantages derived, and the progress made by this, one of the pioneer agricultural co-operative societies of England.

The value of organisation to the farmers of the Brandsby district unquestionably found its strongest proof in the establishment by the North-Eastern Railway Company, purely at the instigation of the Society, of a motor waggon service between there and the main line at Tollerton. The deputation were actually on the scene when a motor puffed up laden with five tons of linseed cake and cotton cake, and the Lincolnshire farmers at once commenced to discuss amongst themselves the probabilities of their being able to induce one of the companies to grant them, if they combined, similar facilities.

The delegates were entertained by Mr Cholmely to luncheon, and afterwards, in the shade of a magnificent oak, there was a little speechmaking. The vicissitudes of the Brandsby Society, which started simply as a co-operative dairy, were traced by the Squire, who emphasised the advantages of the department for the purchase of agricultural requirements. It was surprising, he said, what [illegible] was told to by many of the cake merchants. Most firms would not give a guarantee as to the quality of the cake. Then, again, they found that certain firms who were prepared to give a guarantee were no more to be relied upon than others. When a Society bought perhaps 500 tons of cake it took care to have it analysed, and saw that the members were getting the full [illegible] of oil. Previous to the starting of the [illegible] Mr. Cholmely added, a small warehouse was taken near the station, in which coke was stored, and members brought that back when they took goods to the railway, and thus saved themselves an empty journey.

"BE WISE IN TIME."

FARMERS should take care (especially in view of the comparatively low rates of premium) to insure against loss through **STORMS** and **FIRE.**

The **HOMESTEAD, FURNITURE, OUT-BUILDINGS, LIVE STOCK, IMPLEMENTS, STACKS, AND GROWING CROPS** all represent property which can, by the present modern system of **INSURANCE**, be covered at a trifling annual outlay.

INSURANCE against death or injury through accidents should not be neglected.

Notts Improved Prospects.

SIR,—Harvest operations have commenced in this locality with the cutting of oats, and in a few days will be general. The wheat crops look well with an increased acreage under cultivation to the extent of 10 to 15 per cent., and will be above an average yield. Barley is, perhaps, about an average; spring sown oats below; beans and peas about an average. Winter beans, barley, and oats much better than the spring variety this season. Mangolds look well, turnips patchy and thin, potatoes doing fairly well, and have improved since the showers. But we have had very little rain in this locality, and the season is a very trying and expensive time for grassland farmers, for there is neither grass nor water in the ponds; some good downpours would be welcomed. The corn crops are standing up well, hence the reaping machines will be much in evidence this year. The wheat fields are looking golden and mellow; however a few pieces of oats have been attacked with the aphis fly, the crop at its best is only medium, straw short, thin, and blighted. The hay crop has gone into very little room, very light, but well secured; seeds and clover better. Stock generally looks well on the scanty pastures, however the showers have freshened them up. Many "half-meated" fat cattle are seen in the markets, causing depressed trade owing to the shortage of keep. The outlook is better than last harvest, and with an increase in the price of wool, farmers most certainly ought not to find fault with 1905. There has been a good crop of bush fruit, with nice promise of apples, pears, and plums in North Notts, although many apples have dropped off during the drought.

AGRESTIC.

July 27.

Fair Prospects in Kent.

SIR,—Agricultural prospects in this county are fair, in spite of the severe drought and heat that has been experienced since June. In this district (near Rochester) the rainfall this month has been only .24. Wheat and barley are the cereals of the year, especially the former. Oats suffered from wireworm, and are very uneven. Roots and potatoes are suffering from the dry weather, late potatoes looking bad, and are shutting up in places, and on light soils grass, too, is beginning to get short, and flockmasters will soon be in difficulty as to what their lambs are to be weaned on! The fall was very short about here, a lamb to a ewe being about the average. The hay crop on the whole has been secured in fair order, but the stacks are about half the size of last year. Hops look well, in many places there is too much bine, the burr in the early sorts is now getting quite forward, there is a little vermin at places, but not enough to cause much alarm, although some growers are washing. Mould is rather troublesome, and the sulphur machines are kept busy. Harvest will be general next week, but even now a few fields of oats and wheat are being cut.

W. S.

July 28.

Harvest in West Sussex.

SIR,—Harvest is now engaging everyone's attention. Winter oat cutting began on the 19th. Some spring oats will be fit to cut by the 27th, and wheat cutting will be in full swing a day or two after. Oats are ripening off too fast for a heavy crop of good weight; but winter oats are a better crop than for some years past. Wheat looks well, and is thick, but there are several complaints of blight; the sunny weather is all in its favour. Both wheat and winter oats are more twisted and badly laid than for several years, yet it is not so much beaten down as it is the many ways it has gone down that will make the cutting go badly. However, labour is more plentiful than it has been the last few years.

Haying is practically over. The crop is fully 10 cwt. lighter than last year's. Most of it is stacked in splendid condition, but prices do not look like being any better than last year. Roots require a good rain; some of the backward sowings will not come up until they get some. Most people have an excellent plant, although some fields are very patchy. Mangolds, as usual, enjoy the sunshine, and have much improved the last month.

Wool has sold well this year—about 2½d. rise on last year's price; and sheep, both fat and store, are selling well; altogether, flockmasters look like having a good year.

H. W. D.

July 21, 1905.

York (North Riding).

SIR,—In our district of Wensleydale the hay is only a very light crop, but got in good condition. Oats is short in straw only; barley promises fairly well; wheat is a good average crop; turnips is a very poor crop; there are lots been sown three times over, the fly eating them off again; the weather is so very droughty, the pastures and fog all burnt up; potatoes looking fairly well; the prospect is very bad in face of winter.

J. W.

July 28.

Corn Cutting in North Lincolnshire

SIR,—Although only two-thirds of the way through July, at the market yesterday we heard of the first field of corn cut. Many others are ripe, or nearly so, and several neighbours will commence on Monday.

This early period, after such a dry spell, betokens a good wheat crop, of which I estimate a 10 or 15 per cent. increase in area, and a good yield, weather permitting.

On the contrary, barley and oats are poor, the latter especially; only the early-sown fields are very good.

Enquiry is beginning as to lamb-selling, showing that the slight showers have saved the turnip crop, and we shall have winter food.

Swedes are not so good as other turnips. The Diamond Moth is damaging them very much. Thousands fly off when you walk through the crop.

The bulk of the wool has been sold, the best clips at 30s. per tod. Those who have speculated cannot quite reach their old bids. This is for long-wool, the higher price of which is ousting the half-bred sheep once more, although the mutton is better to sell, if the wool be not.

July 21, 1905. NORTH LINDSEY.

Good Wheat Crop in North Lancashire.

SIR,—The hay is mostly in, a lighter crop, but well got. Roots are doing fairly well, but have not got a start off like we have seen them some years. Wheat is the best crop of the season; oats and barley are fairly good, and the dry weather will help the yield.

The early part of the year has been so hot there will not be much old grass on the fields for autumn and winter use. Stock have summered well, but prices are against profits.

July 26.

Poor Outlook in Mid Staffordshire.

SIR,—The continuance of drought is a source of considerable anxiety in this district, and not only is the present output of farm produce from grass greatly lessened, but, also, the partial and, in many instances, the total failure of green crops gives an unpromising outlook for next winter.

The hay harvest may be estimated at about three-fourths of an average crop, and, unfortunately, the clearing of the hay crop at an early date has not been followed by any considerable growth of aftermath. An unusually large quantity of concentrated foods has become necessary for dairy cows, whose yield of milk has been greatly reduced, although the richness of the milk is above the average.

The markets for beef and mutton have not been much lowered in price by the persistent drought because the supply of fat stock is not excessive. Meanwhile, the slow progress of feeding makes for an accumulation of imperfectly finished animals which later on in the season will come out for sale.

Of cereal crops wheat is much the best, and oats the worst. Almost every field of the small acreage under wheat is above an average, and the harvest in this district is close at hand. The straw of barley and oats—especially of oats—is short; and, speaking generally, the deficiency in the stock of dry fodder, whether of hay or straw, will be somewhat serious.

July 26.

Heat and Drought in Essex.

SIR,—The extreme heat and dry weather of the past month has to some extent modified what had, up to then, promised to be a capital season. The corn has ripened, it appears, somewhat prematurely, which on light land, at any rate, means anything but a good sample of barley, while spring oats are cutting up light, though the winter variety is good and heavy. Feed for stock is now getting short, and showers will be welcomed to freshen up the grass, and at the same time to help mellow the barley before it is harvested.

D. ABBOTT GREEN.

July 29, 1905.

Satisfactory Outlook in Somerset.

SIR,—The hay crop is fairly satisfactory, and has been made well. Wheat is about the average. The oat crop of which is by far the largest grown in the district, will be light, owing to the cold and drought of May.

The root crop promises to be a good one, although there are many bare patches owing to wireworm and rooks. Grass is plentiful and good.

A. S. LOVELACE.

July 29, 1905

The Great Northern Company's claim that they make "a specialty of holiday traffic," is fully borne out by the special excursion facilities they are offering for August Bank Holiday. On Friday, August 4, there are cheap express excursions from London to North-Eastern stations and Scotland for 7 or 17 days, and on Friday and Saturday, August 4 and 5, there are similar trips to the Midlands, Norfolk, Lincolnshire, Lancashire, Yorkshire, and North-East England, for 3, 6, or 8 days. On Sunday and Monday special non-stop half day excursions are run to Skegness at the exceptionally low fare of 3s., which is a marvel of cheapness, working out to about 8 miles for a penny. On Bank Holiday, August 7, there are excursions to Grantham and Nottingham for a half, one, two, or three days, as well as day and half day trips to main line stations. The cheap week-end tickets usually issued each Friday and Saturday, will be issued on Friday, August 4, Saturday, August 5, available for return on Sunday, August 6, Monday, August 7, Tuesday, August 8, or Wednesday, August 9. Full particulars of these special facilities are contained in an attractive programme, which can be obtained from any Great Northern Office, or direct from the Chief Passenger Agent at King's Cross.

Harvest Weather.

The "Mark Lane Express" Special Three-Day Forecast.

1. Essex Street, Strand, 12 Noon, Monday, July 31st, 1905.

GENERAL PREDICTION.

The general aspect of what are termed the action centres of barometric pressure, in particular the persistence of the seasonal anticyclone over Biscay is favouring a continuation of mostly fair weather over the British area, with an occasional showery spell chiefly affecting the Northern and Western districts, and only partially and temporarily affecting the Middle, East, and South.

The general sequence will be: 1. At first moderate Westerly (N.W. to S.W.) breezes, Fair with Cloud, some Showers in Ireland and Scotland. Temperature, Normal or Mild. 2. Later mostly W. to S.W. and S. winds, freshening, Fair to Cloudy and some Showers, spreading, temporarily over most districts, but light or absent in Nos. 3 and 5. Temperature, Warmer in the South, Centre, and East. 3. Finally, S.W. to W. winds, Moderate. Fairer generally, some Showers, chiefly in the Northern districts, and Mild.

LOCAL PREDICTIONS.

No 1.—Scotland:—At first mostly cloudy—fair in the S. and some showers chiefly in the North; later freshening winds, some passing, more general showers; finally fairer; temperature, normally cool to mild.

„ 2.—England (N.E.) and part of Scotland:—Peebles, Selkirk, Durham, Lincoln, Northumberland, Roxburgh, Yorkshire, (N. & E. Ridings). **—At first some passing showers; later fairer; wind S.; finally some passing showers to fairer; temperature similar to No. 1.**

„ 3—England (East):—Bedford, Cambridge, Essex, Hertfordshire, Huntingdonshire, Norfolk.**—At first fair to cloudy, normally mild; later fair to cloudy, some light showers; S. to S.W. winds and warmer; finally fairer.**

„ 4—Midland Counties:—Buckingham, Derby, Gloucester (part), Hereford, Leicester, Northampton, Nottinghamshire, Oxford-Rutland, Shropshire, Stafford, Warwick, Worcestershire, York, shire (West Riding).**—The same as No. 3, with more probability of showers in the Northern Counties.**

No. 5.—England (South):—Middlesex, Berkshire, Kent, Surrey, Sussex, Wiltshire, Channel Islands, Hampshire.**—The same as No. 3.**

„ 6.—Ireland.—At first showery, chiefly in the North and West; later some showers more generally, except in the S. and S.E.; finally fairer with some showers as at first. Temperature, mostly normal to mild, with a good deal of cloud.

„ 7.—England (North-West) and North Wales. Cheshire, Lancashire, Westmoreland, Anglesey, Carnarvon, Denbigh, Flint, Merioneth, Montgomery.**—At first fair with cloud; later some showers; finally some showers to fairer.**

„ 8.—England (South-West) and South Wales:—Brecon, Cardigan, Carmarthen, Glamorgan, Pembroke, Radnor, Cornwall, Devon, Gloucester (part), Monmouth, Somerset.**—At first fair with cloud, normal to mild; later fair to cloudy and warmer; some passing showers; finally fairer and mild to normal.**

When the local wind directions are not specifically indicated, they may be taken to approximate to those under the General Prediction.

Age of Moon—Thirty days.
New Moon — August 1st. 4.3 a.m.

One-Day Forecast prepared by the Meteorological Office at 11 a.m. on Monday, July 31st.

GENERAL INFERENCE.—There are no indications of any important changes occurring during the ensuing 24 hours. Fine weather is likely to continue over the greater part of the country, but disturbances over the Northern Atlantic will cause some showers in Scotland and Ireland.

SCOTLAND, N. and E.—Moderate Westerly breezes; fair generally, some showers.

ENGLAND, N.E., E., MIDLAND COUNTIES, and ENGLAND, S. (London and Channel).—Moderate or light breezes, mainly Westerly; fair or fine generally, becoming warmer.

SCOTLAND, W.—Same as Scotland, N. and E.

ENGLAND, N.W. (and N. Wales).—Light Westerly breezes, fair generally.

ENGLAND, S.W. (and S. Wales).—Same as England and Midland Counties.

IRELAND, N. and S.—Same as Scotland, N. and E.

CORN MARKETS.

LONDON.

Mark Lane, Wednesday.—A quiet tone prevailed, with values making no appreciable change from last day. Foreign wheats ruled quietly steady; with No. 2 Club Calcutta landed, quoted at 32s. Maize continues firm, but quiet. La Plata ex ship offers at 24s, and mixed American landed at a similar figure. Flour dull at last quotations. Barley steadily held. Odessa Nicolaieff, July shipment, ex ship, is quoted at 19s 6d. Oats unaltered.

Mark Lane, Friday.—Wheat: English steady, quiet, at about late rates. Foreign in slow demand; sellers ask late rates, but to do business 6d less money would have to be accepted. South Russians quoted at 32s to 35s 6d; No. 2 Club Calcutta, 31s 6d; No. 2 Northern Manitoba, at 34s 0d. Flour dull, unchanged; Hungarians quoted at 30s, and Iron Dukes at 21s 3d. Maize in limited request, at about late rates; mixed American, landed, quoted at 24s 6d; and River Plate, ex ship, at 24s. Barley slow, with prices tending in buyers' favour; Odessa, Nuco, Kherson, ex ship, quoted at 19s 6d to 19s 9d; landed, 20s 3d. Oats dull and lifeless; common sorts quoted at 14s 6d to 15s 6d. Arrivals, July 22-27: Foreign wheat, 119,500 qrs.; oats, 139,520 qrs.; maize, 23,440 qrs.; flour, 15,750 sacks.

COUNTRY.

Appleby, Saturday.—There was a sample of new oats forward, which sold in small quantities at about 24s per 20 stones.

Ashford, Tuesday.—Business improved. Wheat firm at 33s to 36s; English feeding barley, 27s to 29s; foreign grinding barley, 21s; Mazagan beans, 30s to 32s; tick beans, 33s to 35s; maize advanced slightly, new flat, 27s to 28s; black oats, 20s to 23s; white oats, 21s to 24s; flour, whites, 31s.

Banbury, Thursday.—Wheat, red, 32s to 34s; barley, 27s to 29s; beans, new, 32s to 34s; oats, 21s to 23s; peas, 30s to 35s per qr.

Berwick, Saturday.—Small attendance. Oats easier. Wheat, 31s to 33s 6d; oats, 21s to 22s 6d.

Birmingham, Thursday.—A very sparse attendance at this market, business being quiet. Foreign wheats move very slowly at about last market day's prices. Plate maize has advanced 3d on the week, and flat 6d. Grinding barley is unchanged at 20s 3d per 400lb at Sharpness. English oats 22s to 22s 6d per 312lb. Beans 13s 6d to 13s 9d per bag (196lb) delivered Birmingham.

Brighton, Thursday.—There was a small attendance at Brighton corn market yesterday, and trade was quiet at last week's prices. The supply of wheat was short, and prices were nominal. Quotations: Barley, 28s to 33s; grinding ditto, 22s to 24s; oats, English, 19s to 22s; new ditto winter, 19s 6d to 20s per 42lb; peas, 29s to 30s; beans, 31s to 32s.

Cambridge, Saturday.—A few samples of wheat on show made 6d less than last week. Red wheat, 33s 6d. New black and grey winter oats made 17s 6d. Harvest is now in full swing. Several pieces of wheat have been cut, but the corn is not in a condition for market, and there are rumours that the quality may not be so good as was expected. In some cases it is blighted.

Canterbury, Saturday.—Old corn neglected. New black winter oats were offering at 18s, and some grey peas of fair quality were sold at 30s; oats, both English and foreign, are quiet and rather pressed for sale. Other articles unchanged.

Chelmsford, Friday.—Old wheat dull to 6d lower. A few samples of new wheat, not in good condition, were on offer, selling at from 31s to 33s, but really there were no fixed prices. New oats made from 16s to 18s, and a few samples of new barley were on offer, but these had little sale.

Chester, Saturday.—Trade quiet, and no quotable change in prices of corn, oats, and beans. Bran and thirds are going into consumption more freely at advanced prices. Quotations:—Wheat, white and red, 4s 7d to 4s 9d per 75lb.; barley, grinding, 3s 3d to 3s 6d per 64lb.; beans, old, 5s 9d to 6s per 80lb.; Egyptian beans, old, 33s 6d to 34s per 480lb.; oats, new, 2s 9d to 2s 11d; ditto old, 3s 2d to 3s 4d per 46lb.; Indian corn, new, 13s 6d to 13s 9d per 240lb.

Chichester, Wednesday.—An unusually small attendance, and less trade than usual, even for the time of year. A single sample of old oats was offered by a farmer, and there was no new corn. Quotations:—Old wheat, 34s to 34s 6d; oats, 19s to 22s; maize, 26s to 26s; grinding barley, 20s to 21s; flour, 27s to 29s.

Colchester, Saturday.—The weather has been favourable for harvest operations during the past week. Two or three samples of new wheat were offered and made about 34s to 36s per qr. New winter oats sold at about 17s per qr.—Joseph Wilkes and Son, Ltd.

Coventry, Friday.—The attendance was very small, and but few samples offered. Trade quiet in wheat at about last week's rates. Oats and beans firm. Prices: Wheat, 12s to 13s per 196lb.; barley, 29s to 33s per 448lb.; oats, 23s to 25s per 352lb.; beans, 12s 6d to 13s per 196lb.; peas, 11s 6d to 14s per 196lb.

Derby, Friday.—No change to note in wheat, which continues quiet at late rates. Spring corn unaltered. Quotations: Wheat, white, 34s to 35s; red, 32s to 34s; barley, malting, 32s to 34s; beans, 32s to 33s; oats 20s to 21s.

Devizes, Thursday.—The first new corn made its appearance at Devizes market in a number of sacks of new winter oats, but the wet has not as good condition, having been threshed too soon. Winter oats are said to be a good crop. The following were the quotations: New wheat, per 504 lb. for old, scarce; 32s to 36s; red, per 504 lb., 32s to 34s; white ditto, 32s to 34s; barley, malting, 32s to 34s; grinding, 28s to 30s; oats, new, 18s to 20s; old, 20s to 22s; beans, 32s to 34s; extra fine, 37s to 38s.

Doncaster, Saturday.—No English wheat to speak of; several spots foreign per 504 lbs. 34 to 35 per qr. Barley and peas were wanted to-day, whilst oats and beans were easy. All feeding stuffs in request.

Dorchester, Tuesday.—Only a very small attendance to-day, and comparatively little business passing, stocks being [illegible] and sellers have held their former [illegible] to offer and [illegible] to-day. The new season's crop in the [illegible] remain unusually backward. Farmers [illegible] engaged on the harvest [illegible] kinds of grain and roots are [illegible] much needed, but to-day [illegible] to be [illegible] to ascertain even [illegible] with the [illegible] of corn.

Dublin, Friday.—Wheat, 18s to 20s; barley, 11s to 12s; malting, 18s 6d to 20s; oats, 11s to 14s 6d; oatmeal, extra pinhead, 11s 6d to 13s; pollard and bran, 6s to 6s 6d.

Exeter, Friday.—Trade slow, with prices generally unaltered. English wheat scarce, and fully as dear as last week; foreign unchanged. Oats rather easier. Flour steady. English wheat, 4s 3d; superfine flour, 25s to 28s; fine, 23s to 26s.

Glasgow, Wednesday.—The trade during the week has been quiet, but firm, for breadstuffs, buyers' and sellers' views being somewhat apart. Maize has been the turn dearer. Barley scarce on spot, and firmly held. Oats, being in liberal supply, are rather the turn in buyers' favour. Other articles remain unaltered. There was the usual attendance at our corn exchange to-day. Wheat and flour dull and nominally unaltered. American corn 1½d dearer on the week. Other articles of the trade quietly firm at unaltered prices.—Gibson and Clark.

Glasgow, Friday.—Wheat quiet and unaltered. Flour might be similarly described. The local millers are kept fully employed, and their prices are unchanged. Mixed American maize in moderate request at 14s 3d per 280lb Feeding stuffs generally command a poor inquiry; holders adhere to previous values.

Gloucester, Saturday.—No English wheat offering. Foreign slow, prices favour buyers. Feeding stuffs quiet, and maize, barley, and oats are all the turn lower.—Wait, James, and Co.

Grantham, Saturday.—The market was fairly well attended, but business was extremely quiet. No new corn was offered, and for old samples the quotations were unaltered from last week.

Leeds, Tuesday.—A few hours' rain on Saturday night relieved the drought, but more is sadly needed for root crops and pastures. American contradictory crop reports have once again caused sharp fluctuations in prices, option values being more particularly affected. The consumptive demand has continued slow. Holders of wheat, however, insist upon 6 per qr advance on last Tuesday's rates. Maize, beans, and oats quiet and unchanged.—Dunns and Co.

Ipswich, Tuesday.—There were a few samples of wheat offering, but the demand was rather slack, and it was difficult to make last week's full prices of 33s 6d to 34s per qr delivered at Ipswich. Maize was steady at last week's prices of 25s to 25s 3d per qr, and grinding barley was firm, but oats, in consequence of foreign arrivals, were quiet at 21s to 22s 6d per qr; foreign 19s to 20s per 335 lb. Lentils unchanged at 23s 6d to 24s per 504 lb. Linseed cakes very firm, at £8 to £8 5s per ton. Milling stuffs scarce and firm.

Leicester, Saturday.—Fair attendance of buyers and dealers, with very moderate supplies of home-grown wheats. Trade ruled quiet in view of an unusually early harvest. Red wheats, 32s to 34s; white wheats, 33s to 35s per 35 stones; beans and barley in fair request at firm rates; fine oats, 23s to 25s per 26 stones.

Lincoln, Friday.—A very moderate market; attendance small. Very little old English wheat on offer, late rates prevailing. Foreign firm but unchanged from last week. No new corn showing.

Liverpool, Friday.—Wheat: There has been a small attendance at the market, and wheat is very quiet with a small trade doing at a general decline of ¼d since last Tuesday. Flour: A very quiet trade at about recent currencies for both home-made and foreign brands. Maize: Mixed is steadily held at ¼d decline, with a quiet trade passing. Plate is in moderate request at a full 1d. decline from Tuesday: European sorts unchanged. Barley: Malting quiet, unaltered; feeding slow at ¼d decline. Beans are strong, but rule quiet. Peas firm at late rates, but quiet. Oats quiet, with a limited trade doing at about last Tuesday's prices. Oatmeal firmly held at last quotations, but slow to move. Oilcake firm for all qualities, with a rather better demand at occasionally higher prices.—Segar and Tunnicliffe.

Manchester, Thursday.—English wheat 6d per qr and foreign ½d per cental dearer on the week. Flour unchanged and quiet. Indian corn: Mixed American scarce; prime quoted at 5s 6d to 5s 6½d here; no Plate offering on spot, but to arrive 5s 5d. Oats quiet at late rates. Barley: Foreign occasionally ½d more money. Beans: Egyptians, old, 6d, and new, 3d higher. Bran, thirds, and oatmeal unchanged.

Newark, Wednesday.—Wheat a small trade at previous values. Oats and beans moved quietly at unchanged quotations. Wheat, 34s to 35s per qr; oats, 20s to 22s per qr; beans, 34s to 35s per qr.

Newcastle-on-Tyne, Saturday.—A quiet demand for wheat at our to-day's market at last week's prices; maize scarce on spot, holders demand 6d more over last week's quotation; peas steady at late rates; beans firm at last Saturday's prices; holders of Scotch oats had to reduce prices to make sales, foreign, however, made the full prices of this day week; barley favouring sellers.—Joseph Pollard and Co.

Norwich, Saturday.—There is scarcely any wheat on offer at our market to-day, at late quotations. Wheat cutting will become general next week in this district. Fine and warm weather has prevailed during the past week, with occasional showers. Wheat, red, 33s 6d to 34s per qr., weight 63lb. per imperial bushel. Corn inspector's return for the week ending July 24, 1905:—Wheat, 1,111, 31s 11d.—J. Arthur Mills.

Northampton, Saturday.—Small attendance and limited supplies. There was small supply of new winter oats on offer at 18s 6d, and the stock of old corn was practically exhausted. Wheat, 33s to 34s; barley, 24s to 32s; old oats, 20s to 23s; beans, 31s to 34s; peas, 28s to 33s; flour, 24s to 29s.

Nottingham, Saturday.—The little English wheat in merchants' hands are held for full prices. Foreign trade slow and slightly easier. Oats and beans in limited supply and full values maintained.—Robt. Hebble.

Peterborough, Saturday.—The weather during the past week has been stormy. Scarcely a ramp of corn in market to-day and price nominally unaltered. Harvest will be pretty general next week if weather permits.—Thomas Hill and Son.

Plymouth, Thursday.—A quiet demand prevailed at our to-day's market, which was very quiet but steady. Last week's prices were still maintained.—Orlando Davis and Co.

Preston, Saturday.—Thin attendance. No farmers' corn on offer, and prices nominally the same as last week. Wheat, white 5s 7d to 5s 9d, ditto red, 5s 6d to 5s per windle of 280lb.; flour, 23s to 26s 6d per pack of 240lb.; oats, 2s to 2s 2d per bushel of 45lb.; oatmeal, 6s to 6s 6d per load of 240lb.; Indian meal, 15s 6d to 15s 9d per load of 240lb.; beans, 6s 6d to 7s per windle of 40lb.

Reading, Saturday.—Business was quiet in all departments, and last week's prices were maintained. Wheat made 33s to 35s, grinding barley [illegible] to [illegible], oats [illegible], beans [illegible], flour, 24s to [illegible].

Retford, Saturday.—There was an unusually thin attendance, and very few samples of any kind of grain on offer. English wheat was worth 33s and 34s per qr. Maize was very scarce and dearer, round and flat, 28s, delivered here. English beans, 32s; black oats, 19s to 20s; white ditto, 21s; and for finest, 22s per qr. Some oats are cut in this district, and the harvest is expected to be general in less than a fortnight.

Ripon, Thursday.—Round maize shows a downward tendency. Business extremely quiet. English wheat, 33s 6d to 34s; foreign ditto, 32s to 36s; grinding barley, 23s to 24s; oats, 20s to 21s; round maize, 27s to 27s 6d; flat ditto, 27s to 27s 6d per qr.

Shrewsbury, Saturday.—The following were the quotations: Wheat, 14s to 14s 6d per 225lb.; oats, old white, 16s to 17s; new white, 14s to 14s 6d; peas, 11s 6d to 12s 6d; beans, 15s to 16s per 240lb.

Stamford, Friday.—Very thin attendance, and quiet trade. No new samples of new grain offered. Old wheat, 32s to 33s; old oats, 20s to 21s 6d; beans, 33s to 34s per qr.

Sunderland, Saturday.—Moderate show of wheat which maintained late rates. No spring corn offering. Arrivals, coastwise, nil; ditto foreign wheat, 72,639 qr.—E. and F. Richardson.

Warwick, Saturday.—Very little grain of any kind on offer, not sufficient to test prices. Old rates are ruling for all English grain. Foreign grain rather easier. Feeding stuffs rather dearer and in good demand.

Winchester, Saturday.—No English wheat on offer. Foreign maintained at fully last week's prices. Barley 3d. per qr. cheaper on the week. Oats and maize unchanged. Flour fair consumptive demand at late rates.—Fear, Colebrook and Co., Ltd.

Wisbech, Saturday.—A small market and little business doing. Old wheat scarce and late rates maintained. Millers waiting for new, which promises fine quality should the weather be favourable for harvesting.

Wolverhampton, Wednesday.—There was a small attendance, and little business was passing. Quotations:—Wheat, 13s to 14s per 216lb; English beans, 13s 6d per 196lb; oats, 13s 6d per 196lb.

Worksop, Wednesday.—Moderate attendance. White wheat, 32s 6d to 33s 6d; red wheat, 32s to 33s; barley, 26s to 28s; grinding ditto, 24s to 25s; white oats, 22s to 24s; black oats, 20s to 22s; round maize, 27s to 28s; flat maize, 26s to 27s; beans, 30s to 37s per qr.

Yeovil, Friday.—A few samples of new grain were shown, and the quality was good, but no business worth mentioning was transacted. Some of last season's corn was quickly purchased by millers. Best samples made from 32s 6d to 33s 6d per quarter; secondary, 30s to 31s; foreign, 33s 6d to 34s; oats, white, 16s 6d to 21s 6d; black ditto, 17s 6d to 20s 3d; Irish, black, 17s 9d to 18s 3d; best barley, 27s 6d to 30s; secondary, 22s 6d to 25s; foreign grinding, 20s 6d; maize round, 24s 9d to 25s 3d; ditto flat, 22s 6d to 23s 6d; beans, 32s 6d to 35s; rye, 22s to 23s; winter tares, 47s 6d to 51s 6d; spring ditto, 40s to 42s. Little doing in flour, but prices were firm, superfine making from 26s 6d to 28s; and fine 23s 6d to 26s. Offals continue in good request, bran maintaining last week's advance.

York, Saturday.—Only a small attendance of farmers, and little grain of any kind offering. English wheat was a shade easier in price; best sorts, 32s to 33s; red and mixed, 31s to 32s per qr. of 35 stones; feeding barley, 24s to 26s per qr. of 32 stones; oats steady; white Tartary, 18s to 19s; black, 18s to 20s; white Cartons, 20s to 21s per qr. of 24 stones. Beans, peas, and maize unchanged.

FOREIGN

Hamburg, Saturday.—Weather is improving now, and this was very welcome, as cutting of barley is commencing and will be quite general towards the middle of next month from the Saale districts and other parts of Germany. The reports remain quite satisfactory of Bohemian, and the first samples were shown, but looked rather poor; but the Chevalier barleys are not secured yet, and will undoubtedly turn out better. The quality of the Hungarians has decidedly improved, and a good many really nice samples are shown, but some are defective in colour.—Francis M. Th. Duhne.

Hamburg, Saturday.—Latest reports about the crops vary considerably, according to the weather, in different parts of the country; in some drought and in others heavy storms have done much damage, in consequence of which the hopes for a full average harvest are somewhat reduced. In many places the crops were laid by heavy rains, which will injure the quality. Wheat remains quiet; millers show no inclination to follow any rise of prices. Fine old Mecklenburg is held at 32s 6d to 33s per 504lb. f.o.b.; Red Winter, No. 2, at 30s 6d; 80 Ko. River Plate, at 30s 9d per 480lb. c.i.f. Hamburg. Much of the new rye is damaged by rain, in consequence of which there is a good demand for old rye, spot parcels of South Russian fetching 25s to 25s 6d; 9 15-20 Nikolajeff afloat, 24s 6d per 480lbs. c.i.f. Hamburg. A considerable quantity of barley has already been carried in Austria-Hungary; quality is varying, but most of it shows a yellow, some even a rather dark, colour. From Slovakia we shall get a well-filled grain of light yellow colour. In Germany the rainy weather retards reaping, and it remains to be seen how quality will turn out. Feeding barley continues in fair request; 60/61 Ko South Russian, July shipment, is selling at 18s 3d; September-October, at 16s 9d per 400lbs. c.i.f. Hamburg. There is a fair trade doing in maize, mixed and River Plate on the spot selling at 24s; August-September, 23s 9d to 23s 3d per 480lbs. c.i.f. Hamburg.—John Tatlock.

Paris, Wednesday.—No business of importance is doing at the provincial markets, and late prices are maintained. At the Bourse de Commerce buyers display no eagerness. The fall in the American markets is gradually exerting a depressing influence, and prices of flour have dropped from 10c. to 15c. Wheat is quiet, and prices have lost from 10c. to 15c., except as regards current parcels, which have gone up 10c. owing to a good demand from "shorts." Rye quiet at nominal prices. Oats in good demand with a rise of 10c. to 25c., according to month. At the weekly spot market the situation remains undecided in home-grown wheat. Harvesting is being rapidly pushed on and, if the weather be favourable, offers of new wheat will be all the more pressing as prices are good and stocks in millers' hands are almost exhausted. In consumption marks of flour business still remains difficult. Rye flour, due to the scarceness of rye, the market is firm with unaltered prices. To-day there were also buyers of new rye at from 14f.25 to 14f. per 100 kilos at station of departure, but sellers insist on asking from 14f.25 to 14f.50. Oats are now at 20f. 50, the highest price of the campaign, but this price cannot last with new oats coming along.

THE BALTIC.

There are few buyers of wheat cargoes just now, but sellers are fairly confident. Sales between 25th and 29th inst. were: Australian, 31s. 9d. per 480 lb.; Rosario, 30s. per 480 lb.; Roumanian, 30s. per 492 lb.; Russian, Winter, 33s. 6d. per 492 lb.;

and Red Kurrachee, 30s. 3d. per 492 lb. No American cargoes were sold, either on passage or for shipment.

Maize is in fair request. Argentine cargoes are held for 23s. 3d. per 400 lb., with buyers at 23s. American at 22s. 9d. per 480 lb., are a steady sale. No cargoes of Russian maize have been on sale of late.

Barley is quiet, with a small but steady sale of Russian new crop, for October shipment at 17s. 6d. per 400 lb. For a cargo of Reval oats, 15s. per 304 lb. was accepted on Friday, and on the same day a cargo of La Plata linseed was parted with at 39s. 3d. per 416 lb. Both these sales argue a declining market. On Saturday a cargo of Indian cottonseed, for December shipment, made £4 15s. per ton.

The London Corn Trade Association c. f. and i. quotations for the settlement of rejections and difference in weights on wheat under Rule No. 4 of the Association East Indian Wheat Contracts, are as follows:—No. 2 Club Calcutta, 31s. 3d.; Soft Red Calcutta, 30s.; Soft White Delhi, 31s. 6d.; Karachi Soft White Delhi, 31s. 6d.; Soft White Karachi, 29s. 6d.; Choice White Karachi, 30s.; Soft Red Karachi, 29s., all per 492 lbs.

The arrivals of grain and seed-laden vessels at ports of call for the week were:—6 wheat (1 Concepción, 1 Geelong, 1 Melbourne, 1 Rosario, 2 Sydney), 4 linseed (1 Concepcion, 1 Monte Video, 2 Rosario)—total, 10.

The sailings of grain and seed-laden vessels from ports of call for the week, were:—10 wheat (1 Antwerp, 2 Birkenhead, 2 Cardiff, 1 Cork, 1 Hamburg, 1 London, 1 Stockton, 1 Tyne Dock), 4 linseed (2 Antwerp, 1 King's Lynn, 1 Rotterdam)—total, 14.

Since 1st January, 1905, the total arrivals have been 239 wheat, 2 flour, 2 wheat and oats, 1 wheat and linseed, 1 flour and wheat, 13 barley and wheat, 8 barley, 5 maize, 1 beans, 4 locust beans, and 38 linseed—total, 314.

Last year during the same time the arrivals were:—138 wheat, 1 wheat and maize, 30 barley and wheat, 14 barley, 4 maize, 4 beans, 4 locust beans, 1 rye, 18 linseed, and 1 canaryseed—total, 215.

EGGS.

(Prices at per 120, except where otherwise stated.)

Wednesday. Barnsley: 11 to 12. Beverley: 14 per 132. Colne: 1s 9d to 1s 11d per score. Doncaster: 1s 4d to 1s 6d per dozen. Goole: 12 and 13. Hereford: 12 and 14. Kirbymoorside: 12 and 14. Knaresborough: 12 to 13. Louth: 16. Market Drayton: 12 to 13. Market Weighton: 14 and 15. Newton Abbot: 1s 4d to 1s 6d per dozen. Northallerton: 13. Stockton: 11. Truro: 1s 10d per dozen. Uttoxeter: 1s 6d to 1s 7d per dozen.

Thursday. Axminster: 9d to 1s per dozen. Birmingham: 10 to 12. Brigg: 13 and 14. Driffield: 15 and 16. Devizes: 14 to 16. Kidderminster: 14. Northtawton: 12. Penistone: 12. Penzance: 9d to 11d per dozen. Plymouth: 12. Ripon: 12. Scarborough: 11. Wetherby: 13 and 14.

Friday. Altrincham: 10 and 11. Barnstaple: 14 and 15. Camelford: 10d per dozen. Chester: 12. Crewe: 11. Derby: 12. Helmsley: 14. Knutsford: 11. Leyburn: 13 or 14. Lincoln: 14 and 15. Lostwithiel: 1s. Mansfield: 11. Nantwich: 13. Northwich: 11. Otley: 11 and 12. Redruth: 9d per dozen. Ripon: 1s. St. Austell: 14 and 16. Stockport: 1s. Tavistock: 14 to 1s. Totnes: 11d to 1s per dozen.

Saturday. Appleby: 1s and 1s. Berwick: 11d to 1s per dozen. Bridgnorth: 12. Carlisle: 12 and 13. Doncaster: 13. Grantham: 13. Howden: 12 to 14. Ipswich: 12 to 14. Malton: 12 and 13. Pontefract: 1s per 24. 1s 6d per score. Richmond (Yorks): 12. Shrewsbury: 12 and 13. Skipton: 12 and 13. Stokesley: 12 and 13. Whitby: 11 and 12. Worcester: 12. York: 12.

MILK.

London. Saturday. Week ending July 29. The price per milk has been maintained, the average being 8d per imperial gallon, with occasional sales at higher prices. CENTRAL ASSOCIATION OF DAIRY FARMERS.

BUTTER.

(Prices at per lb., except where otherwise stated.)

Wednesday. Barnsley: 1s 2d to 1s 3d. Beverley: 1s 1d. Colne: 1s to 1s 1d. Dorchester: 11d to 1s 1d. Goole: 1s 1d to 1s 2d. Hereford: 1s to 1s 2d. Keighley: 1s 1d to 1s 2d. Kirbymoorside: 11d to 1s. Knaresborough: 1s 10d to 2s per 24oz. roll. Louth: 1s. Market Drayton: 1s to 1s 1d. Market Weighton: 11d to 1s. Newton Abbot: 1s 4d to 1s 5d. Northallerton: 1s 10d to 2s 1d per roll of 24oz. Stockton: 1s to 1s 2d. Truro: 9d to 10d. Uttoxeter: 1s 1d to 1s 2d. Worksop: 1s 1d to 1s 3d.

Thursday.—Axminster: 10d to 1s. Birmingham: 1s 1d to 1s 2d. Brigg: 1s 1d to 1s 2d. Driffield: 1s 2d to 1s 3d. Devizes: 1s 3d to 1s 4d. Kidderminster: 1s. Northtawton: 1s 2d. Penistone: 11d. Penzance: 1s 1d to 2s. Plymouth: 1s 5d to 1s 6d. Ripon: 1s 10d to 2s per 24oz. roll. Scarborough: 1s 3d. Wetherby: 1s 4d.

Friday.—Altrincham: 1s 1d to 1s 2d. Barnstaple: 1s 1d and 1s 2d. Crewe: 1s 1d to 1s 2d. Camelford: 1s. Derby: 1s 1d to 1s2d. Helmsley: 1s. Knutsford: 1s 3d. Leyburn: 1s 10d to 2s per 24 oz. roll. Lostwithiel: 1s 2d to 1s 2d. Otley: 1s 4d to 1s 6d per 24 oz. roll. Redruth: 11d. Runcorn: 1s 3d. St. Austell: 1s 2d to 1s 3d. Stockport: 1s 1d to 1s 3d. Tavistock: 1s 4d to 1s 5d. Totnes: 1s 1d to 1s 2d. Chester: 1s 1d to 1s 2d.

Saturday.—Appleby: 1s to 1s 1d. Berwick: 1s to 1s 1d. Bridgnorth: 1s 1d to 1s 2d. Carlisle: 11d to 1s. Doncaster: 1s to 1s 1d. Grantham: 1s 1d. Howden: 1s to 1s 2d. Ipswich: 1s to 1s 2d. Malton: 1s to 1s 2d. Pontefract: 1s 1d. Retford: 1s 1d. Richmond (Yorks): 1s 1d to 1s 2d. Shrewsbury: 11d to 1s 2d. Skipton: 1s to 1s 1d. Stokesley: 1s to 1s 1d. Whitby: 1s 2d. Worcester: 10d to 1s 3d. York: 1s 2d to 1s 3d.

CHEESE.

Glasgow. Wednesday.—There were large arrivals of Cheddars and Dunlops, and the demand was limited to Grocers and provision dealers who had disposed to buy in small, seeing the weather is so warm. The quality of cheese coming to the market is satisfactory. Cheddars and Dunlops were quoted 44s to 54s per cwt.

Newport. Wednesday.—A supply of home and foreign cheese was present. About 200 tons were present. An active demand, a fair demand. Quotations:—Caerphillies, 44s per cwt.; fancy dairies, 52s to 54s; truckles, 48s to 52s; Derbys, 53s to 54s.

POTATOES.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The harvest is in progress in Essex and Thanet, and the first threshings of new wheat are expected to be seen at Chelmsford in the one region and at Canterbury in the other before the present week is out. There is such an utter exhaustion of old crop supplies, that millers are paying what may be termed urgency money to farmers to induce the very earliest threshings; 32s. to 33s. is likely to be the opening price of new English wheat on the country markets, but this will be for 63 lbs. to the bushel, and 32s. 6d. per 504 lbs. equals only 31s. per 480 lb., which is the Government quarter.

The barley has been ripening up fast since St. Swithin, and will be a better crop than was then anticipated. The great heat has told on the oats on dry slopes and other situations where it is not wise to grow them, as a rule. On these on a fit land, they will often be agood crop. The new rye is above the average, and samples have already reached Mark Lane, Colchester, and Canterbury markets. The price asked is 24s., and 23s. is forthcoming.

The French wheat harvest is well forward, but the ingathering continues to be interrupted by heavy electrical storms. The estimates of the quantity available for the mill vary very much, and it is not yet possible to form any very clear view. In Germany, rust is very widespread but the crop is regarded as attaining an average. In Austria, as well as in Hungary, the yield is above the mean. Roumania has the largest yield on record, but the weight is not quite up to an average; the forcing summer has resulted in a small grain sample, though the heat has not been sufficient to render the character of the corn ricey or flinty as in downright tropical climes.

The Russian crops are, on the whole, well spoken of, and attempts to make out that there is scarcity are not to be regarded as other than political or financial manœuvres. Quiet has been restored at Odessa, and shipments are in full progress from that port.

Persia has good quality crops, but the decline of the area under cereals renders it unlikely that there will be much for export.

The American Board of Agriculture have supplied our own Board with some interesting particulars of some crops not given in the monthly or "Bureau" reports. The following are the returns for the last three years, the figures in each case being in *millions of bushels*:—

	1902.	1903.	1904.
Rye	34	29	27
Buckwheat	15	14	15
Potatoes	285	247	333
Rice	21	21	21
Flaxseed	29	27	23

It would be interesting to know what the U.S.A. did with a surplus of 86,000,000 bushels of potatoes. Linseed, always an "exhausting" crop, seems to be losing favour with the American farmer, even as it did long since with the Englishman.

The visible supply of wheat in America is thus telegraphed:—

July 29, 1905	2,228,000 qrs.
July 30, 1904	2,290,000 qrs.
July 31, 1903	2,520,000 qrs.

Although the present total is the smallest of the three, it is not so much the smaller as to account for the all but entire cessation of American wheat shipments.

The tocks of foreign wheat in England are reckoned at 2,905,000 qr. This includes flour as wheat on the usual basis. On July 30, 1904, the stocks were 2,325,000 qr., and on July 31, 1903, they were 1,975,000 qr.

The sales of British wheat since harvest at 189 statute markets have been as follows:—

This season, 1,665,000 qrs. at 32s. 3d. per qr.
Last season, 2,645,000 qrs. at 27s. 1d. per qr.

Recent sales have been extremely small, even when the late period of the season is borne in mind.

The sales of British barley are thus returned:—

This season, 512,000 qrs. at 34s. 9d. per qr.
Last season, 277,000 qrs. at 29s. 6d. per qr.

Last week only 20,800 lb. of barley changed hands, against eleven times that quantity a year ago, yet, on the whole season, the present has done much the bigger business.

Of oats, the returns run as follow:—

This season, 1,1[illegible] qrs. at 17s. 1d. per qr.
Last season, 1,[illegible]00 qrs. at 16s. 9d. per qr.

Imports into the United Kingdom last week were:—

Wheat, 6,1[illegible] qrs.; a very large arrival.
Flour, 62,[illegible] sacks; much less than usual.
Barley, 5,[illegible] qrs.; a remarkably small supply.
Oats, 185,000 qrs.; a large supply.
Maize, 14,[illegible] qrs.; two-thirds of an average.

Imports of breadstuffs since last harvest have been:—

	Qrs.
Wheat	21,820,000
Flour	3,352,480
Total	25,172,480

Continental purchases of wheat for the eleven months ended June 30 make a very interesting item in *Beerbohm's List* for July 28. Although twenty-seven days "late," the return is, in reality surprisingly early, for it includes not only particulars from France and Germany, Belgium and Holland, but also from such countries as Spain and Sweden, Italy and Austria-Hungary. The total is 23,085,000 qr., against 22,088,000 qr. for the like period in the previous cereal year. A net increase of a million quarters is thus disclosed, or say 5 per cent. The countries buying less wheat have been France, Holland, Germany, Belgium, and Sweden, while increased reliance on wheat grown outside their own frontiers is shown by Austria-Hungary, Spain, and Italy.

Supplies on passage to the United Kingdom on July 29 included a liberal quantity of wheat:—

	Qrs.
American	80,000
Russian	395,000
Indian	975,000
Argentine	595,000
Australasian	565,000
Various	45,000
Total	2,655,000

No wheat is coming from California or Chili.

Of flour, 122,000 sacks are on passage, viz., 42,000 sacks American, 40,000 Argentine, 15,000 Hungarian, 15,000 Australian, and 10,000 "various." Acreage expectations are about half a million sacks.

Of barley, 195,000 qr. are on passage, or about a third of a full quantity. The chief items are: Russian, 125,000 qr.; Roumanian, 10,000 qr.; Caifornian, 20,000 qr.; and Asiatic, 15,000 qr.

Of oats, 317,000 qr. are on passage, including 300,000 qr. Russian, 10,000 qr. Argentine, and 5,000 qr. American.

Of maize, the following are the expectations, which exceed the average by about 25 per cent.:—

	Qrs.
Russian	25,000
American	300,000
Argentine	700,000
Total	1,025,000

Other supplies on passage are as follows:—
Rice, 24,000 tons; a small supply.
Linseed, 216,000 qrs.; more than usual.
Cottonseed, 21,000 tons; a full supply.
Beans, 2,000 qrs.; a very small quantity.

There are a few parcels of Indian peas, millet, and dari on passage, such parcels ranging from 100 to 500 tons apiece. The total of these three staples is a good deal under the average.

Shipments from America last week were much below the average. The totals were: wheat, 42,000 qr.; barley, 3,000 qr.; oats, 3,000 qr.; maize, 144,000 qr.; and flour, 40,000 sacks. Argentina, on the other hand, was a remarkably vigorous shipper, sending off 230,000 qr. of wheat, 389,000 qr. of maize, and 76,000 qr. of linseed.

Russia's energies as a shipper have already been referred to. Actual quantities cleared from Russian ports last week were 423,000 qr. of wheat, 66,000 qr. of barley, 110,000 qr. of oats, and 18,000 qr. of maize. To these may be added 16,000 qr. of wheat and 5,000 qr. of barley shipped by Roumania.

Other shipments of the week were 90,000 qr. of wheat, and 21,000 qr. of linseed from India, 18,000 qr. of wheat from New Zealand, and 9,350 tons of cottonseed from Egypt.

GAME AND POULTRY.

Smithfield, Saturday.—Supply and demand good, prices: Surrey fowls, 2s 9d to 3s 6d; essex fowls, 2s 3d to 2s 9d; Lincolnshire fowls, 2s to 2s 6d; Irish fowls, 1s 6d to 2s; Russian fowls, 1s 6d; feathered pigeons, 10d; Bordeaux pigeons, 10d to 1s 3d; quails, 1s to 2s; live hens, 1s 9d to 2s 3d; Aylesbury ducks, 2s 6d to 2s 9d; country ducks, 2s to 2s 3d; goslings, 5s 6d to 4s 6d; wild rabbits, 6d; tame rabbits, 1s 3d each; Australian rabbits, 6s to 8s per dozen; venison, haunches, 10d; forequarters, 5d per lb.

PROVISIONS.

London, Monday.—The arrivals of bacon last week were from Ireland 16,054 bales, and from foreign ports 15,39 bales. The bacon market was fair from strong last week, the demand not being such as it should be taking the time of year into consideration. Prices ranged:—Irish, 58s to 62s up to 71s; Danish, 54s to 58s up to 71s; Canadians, 56s to 58s up to 61s. Butters were all in good demand. French ranging from 92s to 104s; Danish ranging from 118s to 120s; Russian ranging from 92s to 94s; Irish ranging from 98s to 112s; Canadian ranging from 92s to 110s; Australian ranging from 94s to 100s. Lard: The lard market was steady: Irish, 34s to 39s; Danish, 40s to 42s; American, 32s to 36s.

TO-DAY'S MARKETS.

MARK LANE, MONDAY, July 31.

[FIRST REPORT.]

The market to-day commanded but a small attendance, and interest will be concentrated on the actual cornfields for some little time to come. New crop samples may be expected at the market immediately after the Bank Holiday, i.e., on August 9, but no appreciable quantities of new wheat are likely to be obtainable much before the market of August 21. From that date trade should be brisk. The sales to-day of English wheat, barley, and oats were so small that prices were practically unquotable. Foreign wheat was dull, but, with the old home crop completely exhausted, and no new yet to be had, holders of imported sorts were in a position to refuse concessions. Maize was as firm as ever, but foreign oats and barley favoured buyers. New trifolium seed made 24s. per cwt., and mustard seed made 8s. 6d. per bushel for best, 7s. 6d. for ordinary good seed. Hempseed made 34s. for Russian and 35s. for Chilian, each per 336 lb. A small quantity of very fine sunflower seed realised 18s. per cwt., but ordinary was quoted 11s. to 12s. per cwt.

CLOSE OF THE MARKET.

THE MARKET CLOSED IN BUYERS' FAVOUR.

THE FLOUR TRADE.

MARK LANE, MONDAY, July 31.

Top-price flour was dull but steady, at 31s., Whites coming at 28s., and Households at 25s., as on the 24th inst. No. 1 Supers made 29s. 9d. to 30s. per sack, and paste flour realised 21s. 6d. to 22s. per sack.

Country flour was steady at 22s. 6d. for roller Whites 60 per cent. extract, and 26s. 6d. for fine East Anglian patents. Cascadia made 25s. to 25s. 3d., and Granardia 25s. 9d. to 26s. per sack. Hungarian realised 31s. for "Five Stars," and also for "Six Anchors." Manitoba patents were held for 29s. 9d., with a few bona fide offers at 29s. per sack. Kansas patents may be quoted 26s. 9d. to 27s. for autumn delivery. Nothing is doing on spot. Belgian flour made 27s. 6d. for the best sorts. Fine middlings were quoted 115s. per ton for best; coarse at £5 per ton, were in good rtquest. London flake bran at £5 pe ton, also sold well. No new features marked business in Australian or Argentine flour, but prices were considered to be no worse from a week ago.

LONDON TERM MARKET.

This market is open to elected members only, and is held at the Baltic Club, St. Mary Axe. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters, or 4,800 cental.

Prices quoted on Saturday at the close of the week's trade were :—

WHEAT (per cental).

No. 2 American Red	6s. 10d.	Aug. delivery.
,, ,,	6s. 9d.	Sept. ,,
,, ,,	6s. 7d.	Oct. ,,

MAIZE (per cental).

American	4s. 10d.	Aug. delivery.
,,	4s. 9d.	Sept. ,,
,,	4s. 8d.	Oct. ,,

These are not official prices, but will, we believe, be found practically correct. Official quotations, we hear, are likely to be resumed very shortly.

There are offers to-day to buy American Red winter wheat for September delivery, at 6s. 8d. per cental, but 6s. 9d. is asked. For American maize, September delivery, 4s. 8½d. was accepted.

GRAIN AND FLOUR FACTORS' REPORT.

Flour.—Rather more business has been done; demand steadier, and for some qualities there has been a slight improvement in prices. Offals.—Bran in only moderate demand; no new feature to report. GREENHILL BROTHERS (Belfast).

Flour.—American markets have again quietened down, and flour is not so firmly held as it was last week. Grain.—Indian corn is quieter on spot at 14s. 3d. per 280 lb., and 4½d. per boll lower for shipment. Oats very plentiful, and favour buyers as regards price. Barley continues very scarce. Owing to arrivals, pease are rather lower. Beans in retain demand, but price is 3d. dearer. Mill Stuffs.—Bran is in better demand at 2s. 6d. to 5s. per ton advance. Thirds scarce.—MCKINNON AND MCDONALD (Glasgow).

Flour on the spot has met only a small demand to-day at unchanged prices for patents, whilst bakers' grades are somewhat pressed at fully 3d. decline. For shipment some little business has been put through in Kansas patents at steady prices.—T. S. MEDILL AND SONS.

Arrivals of wheat are large. Trade is steady and prices are supported. Flour sells slowly at late prices. Maize and barley unchanged. Oats, with heavy arrivals, in favour of buyers.—COVENTRY (Mark Lane).

The trade for milling offals is slow, but prices remain unchanged from last week.—JOHN BAWCOMB AND CO.

FEEDING STUFFS.

London, Monday.—Linseed cake: For the time of year we have had a good demand, especially for forward delivery, and we anticipate that the market will further advance. Decorticated cotton cake, as well as ordinary, are scarce and full prices are paid.

English Linseed Cake	ex mill	7 12	6 to 7 15	0
American Calcutta Linseed Cake	ex quay

Turkish Linseed, in bags, per 416 lbs.				

ROBERT AND JOHN HEWETSON.

THE BALTIC, 1 p.m.

STATE OF TRADE.

Cargoes of White Wheat were a little steadier from Saturday. Red wheat cargoes were depressed. Maize was a firmer market from Saturday for cargoes, and barley, oat, and pulse cargoes were all the turn in buyers' favour.

BUSINESS DONE

WHEAT.—No. 3 Northern Manitoba, 31s 3d per 480lb, August shipment; Bahia Blanca, 30s 9d per 480lb, August shipment; white Calcutta, 30s 9d per 492lb, August shipment; white Kurrachee, 30s per 492lb, August shipment; red Kurrachee, 29s 9d per 492lb, August shipment; Roumanian, 30s 3d per 504lb, August shipment; Roumanian, 30s 6d per 512lb, August shipment; Russian winter, 33s 3d per 492lb, August shipment; Russian spring, 32s per 492lb, August shipment; Australian, 31s 6d per 480lb, arrived.

MAIZE.—Argentine, 23s per 480lb, August shipment; American, 22s 9d per 480lb, August shipment.

BARLEY.—Azoff, 19s per 400lb, on passage; Kustendje, 19s 3d per 400lb, on passage.

OATS.—Vologda, 14s 6d per 304lb, August shipment; South Russian white, 13s 9d per 304lb, August shipment.

BEANS.—Smyrna, 30s 9d per 480lb, August shipment.

PEAS.—White Calcutta, 28s 3d per 504lb, August shipment.

LINSEED.—Argentine, 39s 6d per 416lb, August shipment.

COTTONSEED.—Egyptian, £5 13s 9d per 2,240lb, August shipment.

HOPS.

London, Monday.—W. H. and H. Le May, 67, Borough, London, report:—Some consumers are availing themselves of the present most favourable opportunity to replenish their stocks. Growers being anxious to clear out now puts the market all in favour of the buyer.

Worcester, Saturday.—The plantations continue to make steady progress and to develop in a satisfactory manner. Trade is of a retail character to meet present requirements. Prices tend in buyers' favour.—CHARLES FARAM AND CO.

THE VALLEY OF THE MEDWAY (July 29).—There is not much change in things so far, but there is a little vermin, some mould, also red spider, which may cause trouble unless we get a good deal of wet. The early hops are mostly out in full burr.

CATTLE.

Metropolitan Market, Islington.

	Monday, July 31, 1905 British.	Total.	Monday Aug. 1, 1904
Beasts	1,010	1,010	745
Sheep and Lambs	4,000	4,000	4,550
Calves	20	20	
Milch Cows	50	50	49

Quotations per 8 lbs. (sinking the offal):—

ENGLISH

	Inferior.	Second.	First.
Beasts	3s 10d	3s 4d	4s 0d
Sheep	3s 10d	4s 2d	4s 6d
Lambs	5s 4d	6s 0d	6s 4d
Calves	3s 8d	4s 10d	5s 2d

Milch cows, per head, £16 to £21 10s.

British arrivals include as follows: Scotland, nil; Eastern Counties, 90; Midland, Home, and Western Counties, [illegible], Devon, 15; Ireland, 112.

We note to-day a decrease of 90 in the number offered for sale compared with Monday last. Trade all round was of a dull and dragging nature, rates ruling 2d. per 8 lb. in favour of the buyer. The arrivals from Ireland consisted of 70 Dublins (10 of which were black polled cattle) and 42 Waterfords. These shared in the general depression, and were quoted from 1d. to 2d. per 8 lbs. lower. Fat butchering cows and bulls, notwithstanding their being in smaller numbers, met with a very limited demand, consequently 2d. per 8 lbs. less money had to be accepted to effect sales. No Scotch cattle were offered for sale. A clearance will not be made.

The following are top quotations per 8 lbs. (sinking the offal):—

	To-day.	Monday, Aug. 1, 1904.
Scotch	—	4s 10d ex 5s 0d
Devons	4s 4d to 4s 6d	4s 8d to 4s 10d
Herefords	4s 6d ex 4s 8d	4s 4d to 4s 6d
Runts	4s 0d to 4s 6d	4s 4d to 4s 6d
Lincolns	3s 10d to 4s 0d	4s 0d to 4s 2d
Irish	3s 10d to 4s 2d	
Fat Cows	3s 2d to 3s 4d	3s 6d ex 3s 8d

There was an increase of 110 in the number penned in the sheep market compared with Monday last. Trade for both wethers and ewes being of a very sluggish nature, rates ruling 2d. per 8 lbs. in favour of the buyer. Both Scotch and Yorkshire sheep are now falling off in point of number. Irish were in larger supply and met with little enquiry even at 2d. per 8 lbs. less money. Lambs were in fair average supply and shared in the general depression, salesmen having to accept a decline of 2d. per 8 lbs. to effect sales. The supply included 600 Scotch, 1,225 Irish, 200 Yorkshires, and 1,100 from the Eastern Counties. A clearance will not be made.

Undermentioned quotations are at per 8 lbs. (sinking the offal), and are for the best of each class penned:

	To-day.	Monday, August 1, 1904.
8 st Scotch	5s 6d to 5s 8d	5s 6d to 5s 8d
7½ to 8 st Downs	5s 4d to 5s 6d	5s 8d ex 5s 10d
9 st Downs	5s 2d to 5s 4d	5s 4d to 5s 6d
10 st Half-breds	5s 0d to 5s 2d	5s 2d to 5s 4d
10 st Yorkshires	4s 6d to 4s 8d	6s 2d to 6s 4d
12 st Lincolns	—	4s 4d to 4s 6d
10 st Irish	5s 2d to 5s 4d	5s 2d to 5s 4d
10 st Down Ewes	3s 10d to 4s 0d	4s 2d to 4s 4d
11 st Half-bred ditto	3s 8d to 3s 10d	4s 0d to 4s 2d
5 st Down Lambs	6s 2d to 6s 4d	6s 0d to 6s 2d
6 st Half-bred Lambs	5s 10d to 6s 0d	5s 10d to 6s 0d
6 st Irish ditto	5s 10d to 6s 0d	5s 10d to 6s 0d

Short supply of calves, trade slow, best on offer making from 4s. 10d. to 5s 2d. per 8 lbs.

No pigs on the market.

London (Central), Monday.—Fair supply, quiet demand. Best Scotch, 3s 10d to 4s 8d; English, 3s 6d to 3s 8d; American, 3s 1d to 3s 6d. Mutton, Scotch wethers, 4s 4d to 5s; ewes, 3s 6d to 3s 8d; English wethers, 4s 2d to 4s 8d; lamb, English, 4s 10d to 5s 8d; New Zealand, 3s 6d to 3s 10d; veal, 3s 4d to 4s 4s; pork 3s 2d to 4s per 8lb.

St. Ives (Hunts), Monday. Beast 160; sheep and lambs, 1,225; pigs, 430. Beef, 7s to 7s 6d. Mutton, 7s 6d to 9s 4d. Lamb, 8d to 10d. Pork, 5s 9d to 6s 6d. Fat and store cattle, sheep, and pigs, fair demand. Milch cows, short supply fair demand, prices £14 to £22.

FOREIGN.

Deptford, Monday.—Beasts, 765. To-day's supply of beasts, compared with Monday last, showed an increase of 81 head, and consisted of 667 from the United States and 96 from Canada. Trade was of a firm and steady nature, both in regard to tone and value, last Monday's quotations being well upheld. The best States on offer to-day, about 720lb, made from 3s 10d to 4s; seconds, 3s 8d; Canadians, 3s 8d to 3s 10d; seconds, 3s 6d per 8lb (sinking the offal). On Saturday 1,241 beasts from the United States and 191 from Canada were offered for sale, and with a slow trade were quoted at from 3s 9d to 3s 11d exceptionally, 4s for the former, and from 3s 8d to 3s 9d for the latter.

Liverpool, Monday. Supply of cattle in market to-day was smaller than last week. Demand slow and prices unchanged. Sheep and lambs also shown in reduced numbers. Trade fair for lambs at last week's rates, sheep in slow demand and prices lower. Beef sold at 5d per pound; mutton, 8d to 6d; lamb, 9½d to 7d. At market, 809 cattle and 10,463 sheep.

WOOL.

Canterbury, Saturday.—Trade rather more cheerful, wool being firmly held at recent rates. Good lots of Kent fleeces are worth 1s. per lb., but inferior only fetch 11½d, lamb wool 8d., halfbred fleeces 12d to 12½d, and Downs 13d per lb.

Halifax, Saturday.—The quieter tone lately noticed in the state of the wool trade appears to be passing away; values are again firm, and the same causes stated the purchases. There is some talk [illegible] American requirements, which has called the value of North begg wools, now quoted at 13d, and Yorkshire hoggs about 13½d.

Liverpool, Wednesday. The fourth series of periodical auctions for this year began on the 26th inst. East India Wool being catalogued on that and two following days, and sundry descriptions yesterday and to-day. The new arrivals of East India wool [illegible] bales, and importers still had 50[illegible] bales out of the 1,55[illegible] withdrawn from the May sales, so that with a few second-hand lots 19,514 bales were catalogued, and 15,[illegible] bales sold, leaving 3,495 bales in importers' hands. The home trade secured 9,100 bales, the Continent 2,[illegible]50 bales, and America 4,[illegible]50 bales.

LIVE STOCK AND MEAT TRADE REVIEW

(Written Specially for the "Mark Lane Express.")

Trade in London.

There was a rather larger supply of beasts at Islington during the past week; as usual, at this season of the year, the supply was chiefly drawn from the Midland counties, and consisted of grass-fed Herefords and runts. Ireland was well represented; no store cattle, however, were included in the consignment. Trade for both prime and second quality beasts was of a slow but steady nature, late currencies governing all transactions. On the other hand, Irish descriptions met with a very limited inquiry, the tendency in regard to value being a downward one, though barely sufficiently so to warrant our quoting any lower rates. Fat butchering cows and bulls were in average supply, and met with less inquiry by both town and country buyers. On Thursday, the second market-day of the week, trade was practically confined to fat butchering cows and bulls, trade was slow with a downward tendency in value.

At Deptford throughout the week a slow trade was experienced. The total number on offer at both markets was 3,783, as against 4,646 during the preceding week, consisting of 1,150 British (increase 150) and 2,633 foreign, comprising 2,247 from the United States and 386 from Canada. Quotations were as follows:—80 to 90 stone Devons, 4s. 6d. to 4s. 8d.; 90 to 95 stone Herefords, 4s. 8d.; 95 stone runts, 4s. to 4s. 6d.; 90 stone Norfolks, 4s. 4d. to 4s. 6d.; 100 stone Shorthorns, 3s. 10d. to 4s.; 95 stone Irish, 4s. to 4s. 3d.; 90 stone States, 3s. 10d. to 4s.; 95 stone Canadian, 3s. 9d. to 3s. 11d.; 90 stone fat cows, 3s. 6d.

The sheep trade was entirely confined to the Islington market. Small wethers met with a steady inquiry, late rates governing all transactions. Heavy descriptions, on the other hand, were difficult to vend, Scotch sheep met a slow but steady sale, rates being well maintained, this remark also applies to Irish, included in the latter consignment were some lambs, these found ready purchasers at advanced rates. Ewes were steady at late currencies. Lambs met a firm, steady trade at an advance of 2d. per 8 lb. on value. On the second market day of the week, for both sheep and lambs, trade was of a very sluggish nature. The total number penned consisted 4,290, as against 4,690 during the previous week. Best pens made, per 8 lb., as follows:—7½ to 8 stone Downs, 5s. 8d.; 10 stone ditto, 5s. 4d.; 8 stone Scotch, 5s. 10d.; 10 stone Irish, 5s. 2d.; 10 stone half-breds, 5s. 4d.; 10 stone ewes, 4s. 2d.; 9 stone Yorkshires, 4s. 6d.; 5 stone fat Down lambs, 6s. 6d.; 6 stone half-bred ditto, 6s. 2d.; 6 stone Irish lambs, 6s. 2d.

Calves numbered 110, and were quoted at from 5s. to 5s. d. per 8 lb., offal given in.

No pigs on the market.

Trade in Scotland.

The number of fat cattle on offer this week has been much under an average. Owing to the very hot weather the demand has been only moderate, but the light supplies helped the trade, and prices on an average would advance fully 10s. per head. Sheep have been shown in fair numbers. The demand was fairly steady, but prices were just the turn lower, with the exception of ewes, which being more scarce, maintained previous rates. There was a very large supply of lambs, and they also met a slightly worse market at quite 1s. a head less money. Calves a large and good show, and they were decidedly cheaper, while pigs were without change. There were exceedingly few store cattle on offer, but there is no demand, and very few were sold. There was a small supply of sheep, and they got nearly cleared out at previous prices. Milch cows met a quiet trade at rather less money. Quotations: Top price of cattle per live cwt., 38s; current from 35s. to 36s. Mutton to fully 8¼d. per lb.

Trade in Ireland.

Cattle of best finish were scarce, and sold well considering the general state of the meat market. Buyers held back in the early hours, and this gave a tedious tone to business, and it was only well finished cattle that managed to at all hold their own. Best ox and heifer beef made from 52s. to 54s., and extra lots up to 57s. per cwt.; good second-class beef from 46s. to 50s.; and inferior from 42s. upwards. Exporters were feeling the effects of the recent sultry weather in England on the wheat trade; while, on the other hand, the continued drought is bringing in very keen beef as graziers are sending in all the cattle they can to thin the stock on the lands.

The sheep trade was very much on the lines of the previous Thursday's market. The home trade inquiry was limited to light qualities of wethers, and for these the values of last day were fairly well maintained, but with some difficulty. Some buyers were acting on commission for London and Lancashire, but only a moderate business was done by them. Heavy sheep difficult to place, and coarse, wasty sorts neglected, at very irregular prices. The decrease in the number of lambs offered for sale was very marked, and there were very few really prime fat ones forward, owing to the lack of food on most pastures. Good lambs sold well; inferior ones were not wanted. Prime wethers sold from 7d. to 7½d per lb.; ewe, 6d. to 7d. Light hoggets made from 32s. to 42s., and heavy ones from 44s. to 54s. each. Best lambs sold briskly at from 38s. to 40s. each; other sorts from 20s. to 30s. Veal met with a disappointing sale, offerings being in excess of demand, but choice made from 7d. to 8½d. per lb.; inferior from 5d. per lb. upwards.

There was a fairly large show of milch cows, and a rather brisk demand, best springers making from £18 to £21, and other sorts from £8 upwards. Trade for store cattle was very slow, and most of the auctions of store stock have been postponed till better times.

The attendance at the pig market was a full one, comprising a large number of exporters and local pork butchers. Sellers were firm, as the supply of pigs was small, and buyers were equally hesitant, so it was hard to transact business. Later on in the day, representatives of country factories coming on the market matters improved, and a brisk business and early finish was effected at the full prices of previous day. Nice light-weight pigs sold at from 54s. to 55s. per cwt.; heavy from 49s. to 53s.; and coarse from 35s. per cwt.

Trade in the West.

Very considerable supplies of store cattle are just being sent to market, many farmers being greatly perplexed what else to do with them on the present burnt-up condition of the pastures. As a result, prices have suffered more or less, except for the most desirable classes, which have declined only to a very trifling extent, whilst some of the more ordinary and rougher grades of graziers have dropped back from 10s. to £1 a head, with a quieter trade, too, at the same time buyers not caring to hamper themselves with a single head of stock more than they know what to do with; and barreners are feeling the effects of the drought more acutely than almost anything else, from £24 to £26 or £27 per pair is almost an outside figure at present for even the best, this price being but rarely exceeded for anything exceptional in character, whilst the rougher grades can be bought out at the ruinously low figures of £14 or £15 per pair up to £20.

As regards fat stock, bullocks are coming to hand rather more freely than they have been doing of late. The bettermost class of both heifers and steers still command fully late rates—11s. to 12s. per score (or from £17 to £23 apiece); but fat cows of anything of an ordinary class meet a very slow sale at prices favouring buyers—from 9s. to 10s. being an average range—and for anything coarse or excessively fat, 8s. to 8s. 6d. is a nearer approximate to present values, the hot weather badly affecting heavy weights. Fat calves of medium size are steadily hardening value with an increase, the best of these again touching 8½d. per lb. and over; but heavier calves are still a comparatively slow trade at 7d. to 7½d. In mutton, butchers are confining their attention almost exclusively to the neater weights of wethers, which are bringing from 47s. to 55s. each (or 8d. to 8½d. per lb. for the best); seconds, 7½d.; coarse ewes, a very dragging trade, at 6d. to 6½d. Young, well-finished sucking lamb meets a good demand at extreme rates, the best bringing 10d. to 11d. per lb. (or 34s. to 42s. each); heavier lambs, 9d. to 9½d. In pigs the demand is principally restricted to small weights in baconers and medium-size porkers, which sell freely at 9s. to 10s. 3d. per score, and baconers of decent quality at 8s. 6d. Heavy pigs are much neglected, and sellers are unable to find a market for them, except at very low values—7s. to 8s. per score; but the fact is, this class of meat is, with the prevailing hot weather, quite out of demand.

LONDON.

Islington. Thursday.—Beast supply consisted of fat butchering cows and bulls, trade for which was slow, last Monday's money being barely maintained. Top prices: Fat cows, 3s 6d; fat bulls, 3s 10d to 4s 2d per 8lb. An increase of 500 in sheep market, supply consisting entirely of Downs and half-breds, including a fairly large number of lambs, for the latter there was little or no inquiry, rates favouring the buyers to the extent of fully 2d per 8lb. For all grades of both wethers and ewes trade ruled dull and dragging, small neat handy weights barely making late rates, whilst heavier descriptions were practically unsaleable. Best pens made as follows:—7½ stone to 8-stone Downs, 5s 8d; 9-stone ditto, 5s 6d; 10-stone, 5s 4d; 10-stone half-breds, 5s 2d to 5s 4d; 10-stone Down ewes, 4s; 5-stone fat Down lambs, 6s 4d; 6-stone half-bred ditto, 6s. Rather larger supplies of calves on offer, which met a limited demand, best being quoted at from 4s 8d to 5s. Quotations per 8lb:—Beasts, 2s 10d to 3s 6d; sheep, 3s 8d to 5s 8d; calves, 3s 6d to 5s; lambs, 5s 2d to 6s 4d. Total supply:—Beasts, 50; sheep and lambs, 3,680; calves, 80.

London (Central). Friday.—A large quantity was delivered, for which a slow demand again existed at late rates. Arrivals of beef included 60 tons Scotch, 385 Liverpool sides, 2,500 hindquarters, and 1,900 forequarters American refrigerated; also 1,700 Argentine chilled hindquarters and forequarters. Quotations:—Beef: Scotch short sides, 4s to 4s 4d; long sides, 3s 10d to 4s; English 3s 6d to 3s 8d; American Deptford-killed, 3s 2d to 3s 6d; Liverpool sides, 3s 1d to 3s 5d; American refrigerated hindquarters, 3s 6d to 3s 8d; forequarters, 2s to 2s 2d; New Zealand hindquarters, 2s 3d to 2s 4d; forequarters, 1s 7d to 1s 8d; River Plate hindquarters, 2s 1d to 2s 3d; forequarters, 1s 6d to 1s 7d; Argentine chilled hindquarters, 2s 6d to 2s 10d; forequarters, 1s 8d to 1s 10d. Mutton: Scotch wethers range from 4s 4d to 5s; ewes, 3s 6d to 3s 8d; English wethers, 4s 2d to 4s 8d; New Zealand, 2s 6d to 3s; River Plate, 2s 2d to 2s 6d; Dutch wethers, 4s to 4s 6d; ewes, 3s 2d to 3s 4d. Lamb: English, 4s 10d to 5s 8d; New Zealand, 3s 6d to 3s 10d; Dutch, 4s 8d to 5s. Veal: English, 3s 4d to 4s 4d; Dutch, 3s 4d to 4s. Pork: English, 3s 2d to 4s; Dutch, 3s 4d to 3s 8d per 8lb.

COUNTRY.

Ashford. Tuesday.—Improved trade for sheep. Small half-breds and Downs, 5s 6d to 6s; Kent wethers, small, 4s 8d to 5s 4d; large, up to 5s 2d; lamb, 6s 8d to 7s 4d. Beef, same rates as last week:—Best, 4s 6d to 4s 10d; secondary, 4s 4d. Small supply of pigs, big demand; roasters made 2s a score advance, selling at 10s to 11s, small store pigs made 10s to 14s each.

Basingstoke. Wednesday.—At Raynbird and Sons' sale-yard there was a good attendance of buyers to meet a supply of 32 fat beasts, 100 calves, 515 fat sheep and lambs, 159 pigs, and 164 head of dairy and store cattle, for which the following prices were realised:—Fat Shorthorn steers made up to £18 5s; heifers, £20 10s; cows, £16; bulls, £17; Devon steers, £18 15s; cows, £17 10s; two-year-old Polled Angus heifers up to £18 5s; fat calves, 70s to £5 10s; small, 20s to 55s; fat porkers, 28s to 52s 6d; store pigs, 10s 6d to 19s 6d; dairy cows, £10 15s to £22 5s; prime Down wethers and ewes, 50s to 56s; smaller, 44s 6d to 48s 6d; old Down ewes, 35s 6d to 39s; rams, 42s to 52s; six-months-old lambs, 44s to 53s; small, 34s to 38s; three-months-old Down sucking lambs, 30s to 36s; cross-breds, 31s to 35s; Southdowns, 31s to 34s; Exmoor ewes, 38s; black-faced Scotch wethers, 32s 6d; Welsh sheep, 25s 6d; Dorset ewes, 31s; small cross-bred store lambs, 27s 6d to 28s. The show of fat beasts included some choice Devons and Shorthorn steers and Polled Angus heifers, for which there was a good demand and a clearance made. A good supply of fat sheep and fat lambs attracted the attention of buyers from local and distant markets, a clearance very nearly made, late rates ruling for fat sheep and big lambs, for small choice lambs higher prices were paid; a good part of the supply being taken for the south coast water-side places. The best class milk cows found a ready sale at late high prices, secondary were difficult to realise upon, less money having to be taken. Store cattle are a slow trade. Fat calves were cleared at late rates. Fat porkers met with a good demand with a poor trade throughout. Store pigs sold fairly well at late prices. Ruling values:—Choice Devon and Polled Angus beasts, 6¾d to 7¼d; Shorthorns, 6d to 6¾d; bulls, cows, and inferior, 5d to 5¾d; best fat sheep, 8¼d to 8¾d; second ditto, 7¾d to 8d; old ewes, rams, and inferior, 6d to 6½d; choice fat lambs 9d to 10d per lb.; fat calves, 6½d to 7¾d per lb.; fat porkers, 8s to 9s 6d per score.

Berwick. Saturday.—The number of beasts penned was not large, but they were 31 more than the previous week, and the quality was very good. Business was practically at a standstill.

Birmingham. Thursday.—Fair supply of lambs; small supply of beasts and pigs. Trade slow. Quotations:—Beef, 5¾d to 6¾d per lb. Herefords, 7d per lb.; mutton, 6½d to 8¼d per lb; lamb, 8d to 9d per lb; veal, 6d to 7¼d per lb; bacon pigs, 9s 6d to 9s 8d per score; cutting pigs, 9s 6d per score; sows, 7s per score.

Bristol, Thursday. — Market to-day was quiet, and only average business was done. Beef was in fair quantity, and trade steady at late rates, best price being 60s per cwt. With abundant supply of sheep and lambs, there was a limited demand, and values fell slightly; light down wethers selling at 8d to 8¼d, and prime wethers at 7¼d to 7¾d. Pigs were fewer in number, and baconers advanced to 9s 6d.

Calne, Friday.—Present prices for prime pigs, in lots of not less than ten, on rail within 100 miles of Calne.

Prime Stores.	Thickness of fat in any part of Back.	Price per Sc. s. d.

C. AND T. HARRIS AND CO., LTD.

Canterbury. Saturday. Rather more sheep offering to-day met a fair trade. One run of 260 lambs averaged 28s 6d; large ones forward in condition, 27s to 30s; and some good fresh Down tegs sold at 38s 6d; old sheep, 24s 6d to 32s.

Carlisle. Saturday. There was a very small supply of Irish store stock on the Sands. Buyers were very scarce and trade stagnant. Small heifers, £6 10s to £8 10s; ditto best, £10 to £12 10s.

Chester. Thursday. Supply and demand were fairly good. Best dairy cattle were in strong request, and realised high prices. Quotations: Milch cows, £15 to £22; calvers, £14 to £19; barrens, £10 to £15; heifers, £9 to £14; stirks, £6 to £10; sheep, 17s to 32s.

Colchester. Saturday. There was again a poor supply all round. Grass beef made from 4s 4d to 4s 6d per stone; mutton, 5s 6d to 5s 8d; lamb, 6s to 6s 8d; and pork, 8s to 8s 6d per score.

Doncaster. Saturday.—Small supplies of cattle, chiefly milch beasts. Poor attendance and a slow trade. Milch beasts made slightly less, and realised £10 to £22; bullocks, £15 to £17; heifers and drapes, £11 to £16; stirks, £6 to £9; young stores, £4 to £6 each. Very quiet trade for sheep; hoggs, 40s to 48s. Mashams, 30s to 38s each.

Dorchester. Wednesday.—Full supplies at to-day's market, and a fairly brisk inquiry. Prices had rather a declining tendency. Medium calves made 8d to 9d per lb. for the best; larger calves, 7d to 8¼d; and rearers still a quick sale. Best wether mutton or young ewes sold at 7¾d to 8¼d per lb.; coarser mutton, 6¾d to 7d; and lambs, 9½d to 10d per lb. Bacon or porker pigs made 9s to 10s per score, and heavier 7s 6d to 8s 6d. Store pigs made 18s to 40s.

Dorchester, Saturday. — For the time of the year Messrs. T. Eason and Son were well supplied at their sale at the Agricultural Repository, and there was also a good attendance of buyers, a good many being very keenly in search of milch beasts to meet the requirements of the trade, owing to the falling off in the supply as a result of the dry weather, and a considerable advance in prices resulted. Best milchers sold from £17 up to £21 10s each, and others from £14 to £16 10s. Barreners quiet sale, except for anything very fresh, which made £22 to £28 10s per pair. Fat bullocks quiet, but prices about maintained, £17 10s being the top price to day (or 10s 6d to 11s per score). Mutton slow, except for wethers, which made 8d; ewes, 5½d to 6½d; choice lamb in request up to 38s; secondary grades slow trade.

Dublin, Thursday.—Numbers in market—Beasts 2,177, decrease 24; sheep 8,783, decrease 1,526; calves 525, increase 15. Export buyers continue in very cautious mood, all tendency towards speculation being checked by the disappointing trade in cross-Channel centeres. The smaller numbers of cattle on offer helped to keep business steadier to day, but prices show no recovery from last week's rates. Nice suitable sheep in fair request at last week's prices; heavy sheep very difficult to place to advantage owing to unfavourable weather; lamb in better demand at late rates. Cattle, live weight, best, 30s to 33s per cwt.; rough and interior sorts, 26s to 29s per cwt. Mutton, dead weight, 5½d to 7½d per lb. —GANLY, SONS, AND CO.

Edinburgh, Wednesday. — The market was the smallest of the season, and trade was very dull. Polled bullocks realised up to £14, the best class of half bred sheep 43s, secondary 34s to 38s; Cheviots 32s to 39s; the best Shorthorn cows £23 to £24, and Ayrshires £17 to £19 10s per head.

Exeter, Friday.—Dull trade in fat cattle, and late prices barely maintained. Steers and maiden heifers, 11s to 11s 6d; cows, 9s to 10s 6d, not all cleared. Very large market of sheep, but not so good a trade as last week. Small wethers, 8d; larger size, 7½d; ewes, 6d; lambs, best quality, 10d in wool, 9d to 9½d shorn. Many breeding ewes on offer, but very little demand, 40s to 44s; calves, 7d to 7½d.

Glasgow, Wednesday.—Supplies moderate of cattle, but larger of sheep. A fair trade for live stock at full to dearer prices than those of last week. Top Scotch cattle, 64s; secondary, 58s to 60s per cwt.; top hoggs, 9d; secondary, 8d to 8½d; ewes, 6d to 7d; lambs, 8d to 9d per lb. A moderate demand for dead meat, and prices a shade off; Scotch beef, however, commanded 6d: States, 5½d; Canadian, 5½d per lb.

Hereford, Wednesday.—There was a fair supply of beef, best heifer and bullock making up to 6½d per lb., cow beef 5d per lb. Calves were a small supply, the trade being about 7d per lb.; there was a good demand. Mutton was a better supply than last week, and the trade was fairly rm for young wethers at 7½d to 8d per lb., ewe mutton fetching 6d per lb. There was a large supply of fat and store lambs, making 8d and 8½d per lb. A short supply of pigs with dull trade. Store cattle no trade at all.

Leicester, Saturday. — With a continuance of the drought there were only small consignments of home-bred stock. Buyers were moderately represented, and trade ruled sluggish at a further decline of fully 10s per head. Choice milch cows, £20 to £22; secondary, £14 to £17; bullocks, £12 to £14; calves, 15s to 30s per head.

Lincoln, Friday.—A small show of store beasts, and a moderate trade. Milch cows, £16 to £20. Few sheep were penned, and trade was slow. Ewes, 20s to 37s.

Lynn, Tuesday.—Average show of fat beasts, trade slow, 7s to 7s 6d per stone. Scarcely any store beasts, and very little trade, £6 to £12 each. Fat sheep average show, trade slow, 8s 9d to 9s 3d per stone. Store sheep 40s to 45s, store lambs 20s to 32s, fat lambs 25s to 40s each.

Manchester, Friday.—Beef: First-class, 5½d; second-class, 4½d to 5d; third-class, 3½d to 4d. Mutton: First-class, 7½d; second-class, 6½d to 7d; third-class, 5½d to 6d. Veal: First-class, 5½d; second-class, 4½d to 5½d; third-class, 3½d to 4½d. Lamb: First-class, 7½d; second-class, 6½d per lb.

Norwich, Saturday.—Fat beasts in sufficiently large numbers to meet the demand, choice animals making 8s per stone; those of inferior quality as little as 7s per stone. Store beasts on offer were not of first-rate description, and trade was dull at £6 to £13 10s head. Store sheep and lambs penned in small numbers. Lambs fetched 22s to 33s per head, and breeding ewes, 32s to 55s per head. Average supply of fat sheep, and trade fair at 9s to 10s per stone. Good demand for fat pigs, at 5s 9d to 6s 3d per stone, there being a large supply. Plenty of store pigs on market; but trade was anything but brisk.

Nottingham, Saturday.—Very slow trade, except for best cattle. There were very few stores, but a large quantity of milch beasts; in calf cows, to £22 5s; and in-calf heifers, to £20 5s; store beasts, to £16 17s 6d; smaller ditto, to £9 7s 6d; calves, 30s to 50s.

Retford, Saturday. — Store stock of all kinds was scarce, and with a limited muster of farmers and dealers the business was restricted, and quotations generally showed no change from those of the previous week.

Romford, Wednesday.—Fat beasts in shorter supply; trade very slow. Best animals, 4s 4d to 4s 6d; middlings, 3s 10d to 4s per stone. Calves in average supply; trade slow at 4s 6d to 4s 8d per stone. Good supply of sheep; trade fair; best sheep, 5s 2d to 5s 6d; middlings, 5s to 5s 2d per stone. Ewes in average supply; trade about the same at 4s to 4s 4d per stone. Lambs in short supply; trade better at 6s to 6s 4d per stone. A few store beasts offered; very slow demand. Pig trade slow.

Thame, Tuesday.—There was again a large show of all descriptions of stock, both beef and mutton being in larger numbers than for many weeks past. Best trade throughout showed a slight decline on previous weeks, although best quality was a clearing trade. Cows were difficult to dispose of. A capital trade for both sheep and lambs, this firm being supported by a large number of buyers right up to the finish; in fact, practically every lot was disposed of. Veal met a ready sale. Bacon and pork dear. Weaning calves at late rates. Messrs. Bond and Burrows' sale comprised 101 fat beasts, 412 fat and store sheep, 38 fat and weaning calves, and 81 fat and store pigs. Fat oxen made from £16 10s to £21 17s 6d; fat heifers, £15 to £13 5s; fat wethers, 50s to 64s; fat ewes, 40s to 52s; fat lambs, 32s to 40s 6d; fat calves £3 to £4 18s; weaning cow calves, 30s to 55s; bull calves, 10s to 48s; bacon hogs, £3 5s to £4 10s; porkets, 24s to 38s; stores, 10s to 24s.

Truro, Wednesday. Fat bullocks, 54s to 58s per cwt.; very choice, 60s; barreners and store bullocks, 40s to 42s; cows and calves, £11 to £16 each; rearing calves, 20s to 50s; wethers, 7d to 7½d per lb.; ewes, 5½d to 6d; lambs, 7½d to 8d; pigs, 10s to 45s each; beef, 6d to 8d per lb.; mutton, 6d to 8d; lamb, 8d to 9d; veal, 6d to 8d; pork, 6d to 8d; bacon, uncured, 6d to 7½d; cured, 7d to 9d; pork sausages, 4½d to 5½d. Number in cattle market—200 bullocks, 62 calves, 310 sheep, 234 pigs, 4 horses, 20 live geese. Business fairly brisk; attendance very good.

Wolverhampton, Wednesday.—Fair supply; very slow trade all round. Beef, 5d to 7d per lb.; mutton, 6½d to 8½d per lb.; lamb, 8d to 9d per lb.; veal, 7d to 8d per lb.

Worksop, Wednesday.—Small show of stock. Trade slow. Best beef, 7s to 7s 6d; secondary, 6s 6d to 7s per stone; best Southdown wether and cross breds, 8d to 8½d; ewes, 6d to 7d; lamb, 9d to 9½d; veal, 7d to 7½d per lb.

FOREIGN.

Yorkhill, Monday. Large supplies of Canadian and American cattle were on offer at the usual weekly sales held to day, there being 1,105 head penned in the lairages. A large attendance of buyers was present, but business ruled exceedingly slow throughout the day, and prices owing to the continued warm weather combined with a dull holiday trade, exhibited substantial reductions from the previous week's rates. Bullocks of really choice quality sold at up to 56s per cwt. dead weight, while other sorts were disposed of from 51s to 53s per cwt., the current price being about 52s per cwt. dead weight. Bulls made from 44s to 48s per cwt.

Irish Live Weight Quotations.

Department of Agriculture and Technical Instruction for Ireland.)

The following returns are those of actual sales made in Robson's Cattle Mart, Belfast, the stock being weighed either before or after sale, for week ending July 2[illegible] 1905.

MANURES.

Liverpool, Friday.—In the absence of business, quotations are purely nominal and are as per subscribed:—Nitrate of soda, best quality, i.e., guaranteed 95 per cent. pure, in bags, £10 5s to £10 10s; East India bone meal, in bags, £5 7s 6d to£5 10s; kainit, prime 23 per cent. sulphate of potash, in bags, £2 2s 6d to £2 5s; palm nut cake, prime, in bags, £5 15s to £6; linseed cake, American thin oblong, prime, in bags, £7 5s to £7 10s; ditto English, prime, in bulk, £7 17s 6d to £8 7s 6d; ditto foreign round, prime, in bags, £7 17s 6d to £8; cottonseed cake, N.A. decorticated, prime, in bags, £6 17s 6d to £7 2s 6d; ditto ditto English decorticated, prime,soft, in bages, £7 5s to £7 7s 6d; ditto ditto English undecorticated, prime, in bulk, £4 10s to £4 15s; cotton-seed, crushed, 20 to 25 per cent. oil guaranteed, prime, in bags, £6 17s 6d to £7; maize germ meal, prime, in bags, £5 15s to £6; corn oil cake, 10 to 13 per cent. oil, prime, in bags, £6 to £6 5s; rice meal, Rangoon, as imported, in bags, £5 per ton; Indian meal, coarse to fine grinding, prime, in bulk, 13s per 240lb.; linseed, fine bold feeding, in bags, £2 7s 6d to £2 9s 6d per qr. 416lb.; cod liver oil, cattle feeding, prime, in casks, 4s 6d per gallon; treacle, feeding prime, in barrels, 4s 6d per cwt.; D.N.S. brand superphosphate of lime, gauranteed 25 to 27 sol., in bags; ditto ditto guaranteed 30 to 31 sol., in bags; ditto ditto guaranteed 35 to 36 sol., in bags; basic slag, prime quality, guaranteed 30 to 35 per cent. phos., in bags; ditto prime quality, guaranteed 38 to 45 per cent. phos., in bags; ditto finest quality, guaranteed 42 to 50 per cent. phos. in bags—nominal.—H. JONES LANGAR AND CO.

COLONIAL DAIRY PRODUCE.

London, Friday.—Butter: The demand for Canadian butter, both creamery and dairy, continues as strong as ever and the market in consequence is very firm. The arrivals largely go direct into consumption, and unlike nearly all previous years the accumulations in cold store are unusually small, and it is some years since the cold stores all over the country were so empty of butter of all kinds as they are at the present time. The price of "Choicest" brands of Canadian are selling on spot at 106s to 108s per cwt., mildly salted and saltless alike, and the c.i.f. quotation is considerably in advance of these figures. The Copenhagen official quotation has again been raised and this time by four kroner, which brings it up to 99 kroner, the highest figure it has reached at this time of the year ter the last quarter of a century. Cheese: The market is strong and the demand good at 50s to 52s per cwt. for Canadian, which shows an advance of 2s on the week. There is practically no New Zealand cheese left on the market. The price of cheese, like that of butter, is the highest for many years at this period, and although there may be no immediate decline, it is idle to ignore the accumulation of stocks now takinb place in the United Kingdom. — W. WEDDEL AND CO.

HAY AND STRAW.

Manchester, Friday.—Hay, old, 5½d; ditto new, 4½d: clover, old, 5½d to 6½d; ditto new, 5d to 5½d; oat straw, 3½d to 3¾d per stone.

Whitechapel, Saturday. Supplies continue fair, and meet with fair support, at steady rates. Best clover,75s to 82s 6d; inferior ditto, 60s to 70s; specially picked hay, 80s; good ditto, 65s to 75s; inferior ditto, 45s to 60s; mixture and sainfoin, 67s to 75s; straw, 30s to 42s per load.

FEEDING STUFFS.

Hull, Tuesday. Linseed: The arrivals are 2,192 qrs Archangel, 17,452 Russian, 1,792 from St. [illegible] 4,200 St. Petersburg, total, 26,736 qrs. The importers' returns ending July 21 were as follow: Plate 4,720 Bushels, 12,500 Quarters, 9,500 Cwts. etc., 9,000 Lead, 9,000 Continent Bombay 9,000 Continent [illegible] 6,000 qrs. The market has ruled [illegible] but the business passing is [illegible] Plate: Spot, 28s 9d. [illegible] September, 29s; Bombay, nominal. [illegible] and September-October, [illegible] quiet all the week and [illegible] Egyptian, on spot, sold at down to [illegible] sellers to-day. August done [illegible] more offering at the lower figure. [illegible] been dealt in, and 26s to 27s would [illegible] January. Bombay, on spot, offers at £4 15s 3d, and a little business done for shipments [illegible] December-January at £4 17s 6d to £4 17s. Oilcake: Linseed cakes: A firm market, but with very quiet demand. Cotton cakes keep very firm in price, but offers are scarce. KEIGHLEY MAXTED AND CO.

London, Thursday.—Linseed: The market has been steady during the week at enhanced values—at the close, however, prices are about 2d under the best. [illegible] London — Spot June-July and July-August 40s 3d; August September 40s 6d; September October 40s 9d. La Plata, July-August, 39s 9d. Hull — A steady market with fair demand for near positions, forward neglected. La Plata spot 39s 6d, passage-ness doing and prices are nominal Brown Cawnpore July-August 35s 9d, Brown Calcutta, July-August 35s 6d sellers. Cottonseed: Egypt has again declined and prices here are considerably lower; the market, however, closes firmer. London—Spot and July £5 13s 9d, August £5 13s 9d, September Favourite £5 14s 3d, November-January £5 18s 9d. Oil cakes.—Linseed cakes: Firm. London made £7 12s 6d to £7 15s. Cotton cakes steady. London made £4 8s 9d to £4 10s. — THE PRODUCE BROKERS COMPANY, LTD.

Mark Lane, Monday.—Linseed Cakes.—With only a limited quantity of foreign description available in warehouse and small offerings both from Russia and America, values are again inclined to harden, while a decidedly improved inquiry has sprung up in spot and forward positions, which will further tend to strengthen the market. Russian make fully £5 5d per ton more sought American have changed hands at a slight increase in price. East India are 5s. per ton dearer. London made sell rather more freely, but are unchanged. Cotton Cakes.—As is usual at this time of year, there is only a limited consumption, and with fairly large stocks values remain quiet, while English and Bombay are unchanged. Decorticated: London made attract rather more attention being relatively cheaply offered at £6 17s 6d for cake and meal and at£5 5s for special digestive meal, with American "Open Hand" brand selling at £6 17s 6d, "Ley" brand at £6 12s 6d, and meal at £6 12s 6d. Rape Cakes. Scarce and dear. East Indian and Ravison unchanged. Maize Germ Meal.—White American does not offer in any position, but English makes may be bought on last week's terms. Maize Gluten Meal is nominally quoted at £5 10s to £5 15s per ton. Rice Meal.—Landed lots of Rangoon are firmly held at £4 10s. to £4 12s 6d, while steamer parcels to arrive are quoted at £4 8s 9d to £4 10s. Broken Rangoon rice in bags is to be had at the low figure of £4 15s per ton. Locust beans, on account of the short crop, are the turn dearer, at £5 5s. for Whole and £5 10s for Kibbled. Nitrate of soda is dull and without change at £11 per ton ex quay.

FRUIT AND VEGETABLES.

Covent Garden, Saturday. — Fruit and [illegible] met with a steady inquiry, the market being amply supplied with produce. Quotations for English produce: Apples, 4s 6d to 6s per bushel; grapes, 8d to 3s 0d; gooseberries, 2s 6d to 3s; cherries, 2s to 4s 6d; black currants, 4s 6d to 5s; red ditto, 3s to 5s; apricots, 4s 0d to 5s 0d per half sieve; peaches, 1s 0d to 1s 6d per dozen, [illegible] to 1s 0d; green figs, 1s to 1s 6d per box; plums, 2s 0d to 2s per half sieve; greengages, [illegible] box, 0s to 1s 0d per half sieve; nectarines, 1s to 1s 6d per box; tomatoes, 2s to 4s 0d; parsley, 1s 6d to 2s per 24 bunches; radishes, 4d to 5d; carrots, 1s 0d to 2s; turnips, 1s 6d to 3s per dozen bunches; cabbages, 1s 0d to 2s 6d; cucumbers, 1s to 3s; cauliflowers, 1s to 3s per dozen; vegetable marrows, 2s 0d to 4s per dozen; peas, 1s 0d to 2s per bag; beans, 1s to 2s per bag; scarlet runners, 2s 0d to 3s 0d; broad beans, 2s per bushel; beetroots, 2s to 3s per dozen bunches; potatoes, 3s to 4s 0d per cwt.

HOPS.

Canterbury, Saturday. Reports from the plantations continue very favourable generally. Mould is troublesome at places, and on some thin lands the dry weather is bringing red spider; the plant, however, as a rule, is very healthy and promising.

SHOWS IN BRIEF.

Berwickshire.

The twenty-third annual show of the Berwickshire Agricultural Association took place on Thursday within the policies of Duns Castle, Duns, in lovely weather, and there was a very satisfactory attendance of visitors. The show, which had formerly been limited to the district, is now open, but the entries were chiefly from the Border districts. A nice lot of Shorthorns were forward, and the grazing cattle made a strong show. Sheep, too, were good, including as they did winners at the Highland and Northumberland shows. There was a really good entry of agricultural horses, which showed that the breeding of Clydesdales in the Borders is being carried on with great care, skill, and success. Among other attractive features was a working trial of sheep dogs, which was watched with interest by a large crowd.

Framlingham.

Visitors to the show of the Framlingham Live Stock Association can generally rely on seeing a splendid array of Suffolk horses, and those who visited the twenty-second annual fixture, held on Thursday, were not disappointed in this respect, for there was an array of the native breed of horses, especially of young stock, unequalled by any other show, and the judges had a hard task in making their awards. The truth of this will be more readily seen when it is remarked that for a special prize given for the best Suffolk foal, no fewer than forty animals entered the ring, and they formed a display of which any Suffolk agriculturist had reason to be proud. Horses other than Suffolks also made a creditable display, Shires predominating, whilst in the foal section some good Red Polls were shown, and in the four sheep classes Suffolks held their own. There was also a small but choice show of pigs.

Longtown.

The show of the Longtown Agricultural Society, which opens the agricultural show season in Cumberland, took place in not very favourable weather, and the attendance, consequently, was smaller than usual. The show was in all respects well up to the usual standard. There were 510 entries—almost the same number as for the two preceding shows—and of the total there were no fewer than 326 in the horse section. The draught horses were a feature of outstanding interest; whilst the show of saddle horses was a distinct improvement on those of previous years. The cattle were by no means a strong lot, Shorthorns being especially few in number, but the quality was good. There was a good class of dairy cows, and the grazing cattle were also a creditable lot, most of the animals being Irish. Border Leicesters were the principal breed of sheep exhibited; whilst amongst the attractions of the day were driving, jumping, sheep dog trials, and military competitions.

Malton.

The thirty-ninth annual show at Malton, on Wednesday, unfortunately clashed with that of the Durham County, Tadcaster, and two other local shows, whilst the harvest had begun in the district, so that both the entries and attendance were affected by circumstances. Nevertheless, there were nearly three hundred horses forward, in addition to nearly fifty each of cattle and sheep, and there was a goodly attendance of visitors, so that the show was anything but a failure. Hackneys were not so well represented as on previous occasions, and were somewhat disappointing; but hunters were as good as ever, and a really fine lot. The competition for the big prize of the show—Lord Wenlock's £20 prize for four year old hunters—brought a field of twenty, and they made a remarkably fine show. They were put through their paces by the judges, whose choice for the principal premium was Messrs. Snowden's chestnut gelding, Silver Thorne, by Sleive Gallion, and bred by Mr Fox, of Dundalk. The winner is a very valuable and courageous hunter, with the best of limbs, which he uses to the greatest advantage; but many preferred Mr J. H. Stokes's noted Ebony, champion at Glasgow, which had on this occasion to play second fiddle. The third prize-taker was another well-known gelding, Ireland, the property of Messrs. T. and H. Ward, of Pinchingthorpe. Weight-carrying hunters, over 15 stone, had a cup offered them by Lord Helmsley, which was won by Mr. John Brown, of Kirbymoorside, with Queen Bee, Mr Wm. Brown, of Slingsby, being second. Coaching horses made a good show, and, as far as they went, the agricultural horses to the number of 50 were a meritorious lot. A slight decline was noticeable in the numbers in the cattle classes, but this was compensated for by an appreciable improvement in the quality. There was an improved entry in sheep, and the quality was also an advance on last year. Flockmasters welcomed the change by which the different breeds of rams were differentiated, and the results were much more satisfactory. Lincoln rams were distinctly the pick of the show.

Monks Kirby.

The annual show of the Monks Kirby Farmers' Club was held at Newnham Paddox, on Wednesday, by permission of Lord Denbigh, and was well attended. The stock penned numbered 300, and was just about the same as last year. Horses formed the principal feature, and many high-class animals were exhibited, notably in the Shire horse classes; the cattle classes, which were well filled, also contained some high-class animals, and the show all round was a credit to the club.

Paignton.

The Paignton and District Agricultural Society were favoured in every respect for their show on Wednesday; the entries were good, the weather delightfully fine, and the "gate" a record one, so that the show was written down one of the best, if not the best, of the series. In addition to the ordinary attractiveness of the horses and cattle and other exhibits, enjoyment was considerably enhanced by the excellent performances of the famous Besses o' th' Barn Band, which also played in the evening, when the front of the pavilion was prettily illuminated. The South Devon cattle made a capital show, the winner in the old bull class of the president's five-guinea cup—the property of Mr. A. Searle, of Waddeton—being a remarkably fine animal, good in quality and type. The three winning cows were very satisfactory specimens, and the class generally was commendable. The heifers were such an exceedingly good lot that the judges had difficulty in awarding the premier honours. In the horse section there was a good show of hacks, hunters, and cart horses, whilst the riding and driving competitions were quite the attraction of the afternoon. The sheep, though somewhat mixed, were on the whole a fairly good lot.

Royal Northern, Aberdeen.

The annual summer show of the Royal Northern Agricultural Society, held in Central Park, Aberdeen, was in every respects a success, for the weather was good and the takings a record—£612 2s., as against £537 8s. last year—whilst the entries were larger than in the three preceding years, and the quality quite up to the standard. There was a splendid display of stock in all the sections, and the show was reckoned as one of the best that has been held under Royal Northern auspices. The cattle classes were all well filled with animals of the highest merit, and in the fat stock ring the King carried off first prize with a yearling Aberdeen-Angus ox, Magistrate, after the famous sire Elandslaagte. His Majesty was also awarded a first prize for a pure-bred Aberdeen-Angus yearling heifer. As regards the horse section there was quite an average display in the various classes of Clydesdales, with the exception of brood mares, which were rather poorly represented. The quality all over was high, some very nice colts and fillies being forward. Roadsters, too, were a strong lot, and there was a nice display of Shetlands.

Tadcaster.

The show held at Tadcaster, on Wednesday—the 28th of the series—was a credit to the Tadcaster Agricultural and Horticultural Society; the entries all round being above the average in numbers, whilst quality was as good as ever. The agricultural horse classes were not only well filled but contained a large proportion of animals of really good quality; whilst in the Hackney section several stylish examples claimed attention. The hunting horses, more numerous than those of the Hackney and roadster type, though fewer than the agricultural, made an attractive display and included a goodly number possessed of sterling quality, as befitted this hunting district. Cattle and sheep, though not numerous, made a fairly creditable display, the dairy cows being quite the most noteworthy feature in their section. There was also an interesting show of poultry, pigeons, and rabbits, as well as a very pleasing collection of horticultural exhibits.

Taunton Horse.

The Taunton and West of England Horse Show Society's nineteenth annual exhibition, held on Tuesday at Taunton, proved a remarkable success as regards the number of horses entered and the quality of the animals. This was especially so in the hunter classes, as might naturally be expected in such a famous hunting country as West Somerset, where staghounds, foxhounds, and harriers all find a home. In the four heavy and light-weight classes there was a really grand lot of horses, including prize-winners at the Royal, Richmond, Peterborough, Nottingham, and Melton Mowbray exhibitions; while others more familiar, perhaps, to show visitors in the West Country had been prize-winners at the Somerset County, Cornwall, and Devon and Exeter shows. Hacks were unusually numerous, and made an excellent display, whilst agricultural horses showed an improvement on previous years. There was a considerable increase in the jumping and driving classes, and these, as is always the case, formed one of the most attractive and popular features of the show.

Tiverton.

The show of the Tiverton Agricultural Society was originally held at Stoodleigh, where, principally through the instrumentality of Sir E. H. Dunning, the Association had its inception now some five years ago, but last year it was thought that if held at Tiverton itself a greater amount of success would be achieved, and it would appear as if the presumption was correct, for at the show on Thursday last there was an increased entry—658 against 628 last year, and also a better attendance of visitors. The agricultural horses made a dozen classes, with an additional special class for the produce of the Society's Shire horses, in which the prizes were all given by Sir E. H. Dunning. Mr. Reed's champion prize, open to tenant farmers, was taken by Mr. S. Mansfield, of Kentisbeare, with a brown mare Violet, the same exhibitor being reserved with Bassett Mundee, an older black mare. Local hunters and light horses were well supported, and the jumping was a great improvement on previous years. As to the cattle classes, they were well filled, and there was an admitted improvement in quality, whilst there was more competition in the sheep department than usual, and Devon Longwools especially made good classes. Neither Exmoors nor crossbreds were quite so strong numerically, but the quality was exceptionally good.

Wem.

The annual show of the Wem and District Agricultural Society, held at Parkymoor, Wem, on Wednesday, attracted a record number of visitors, and there was certainly a good show for them to inspect. There were nice displays of cart horses and hunters, a good show of cattle, and a splendid turnout of Shropshire sheep, these forming a feature of the exhibition; whilst dogs were generally acknowledged to be one of the most interesting sections of the show, Clumbers particularly being in strong force.

Whalley.

The Whalley Agricultural Show on Thursday reached its ninety-fifth year, and the pleasantly situated ground was crowded with visitors from all parts of the country. The entries in all classes numbered 1,100, which is 60 above last year, and very little below the record entry. The quality, too, was good, being better than has been the case on many previous occasions. This was notably so in the horse and cattle sections, which included many well known prize-winners. During the day an exhibition was given by trained sheep dogs, and there was also jumping competitions of the horses entered in the hunter classes.

"RATIONAL PIG-KEEPING."

If you wish to learn all about Pig-Keeping, and have the subject analysed and placed before you in simple language, read this book. You can readily obtain all the information you require. *Beautifully Illustrated.*

Arranged in ten sections, each with many sub-sections.

"FARM FIELD & FIRESIDE" OFFICE,
1, Essex Street, Strand, W.C.

PRICE ONE SHILLING.

BY POST, 1/3.

Bound in cloth and go'd lettering, 2/-; by post, 2/3.

An Extraordinary Farm Scene.—Mr. W. T. C. Greene, of Parkside, Wethersfield, Braintree, Essex, in a letter to the *Standard*, says that at ten minutes to three p.m. on July 21 part of a load of hay was taken up by a whirlwind some 5,000 feet high. Some of it we watched out of sight and never say it again. It had the appearance of a flock of rooks going round and round as they ascended almost straight up. There was scarcely a breath of air at the time elsewhere.

Sherborne Sheep and Cattle Fair. At this important Dorset stock fair, held on Thursday, a full average number of sheep were penned. Best Down ewes, 42s. to 43s.; plainer, 34s. to 40s.; young Down sheep, 35s. to 40s.; Down wether lambs, 35s. to 38s.; seconds, 28s. to 34s.; mixed working lambs, 33s. 9d. to 35s. 6d.; horn wethers, 38s. to 44s.; horn and cross-bred lambs, 24s. to 35s. Milch beasts were dearer, but barreners were very dull. Fat beasts were also cheaper to buy.

Live Stock Record.

HARNESS HORSES AND PONY SOCIETY.

A new society with the above title was formed on Wednesday. The Earl of Lonsdale, who presided at the inaugural meeting held at his house in Carlton House Terrace, was emphatic in his assertion that the time had arrived for horse-owners to protest against the selfish use of the roadway by one class of traveller to the detriment of the interests of all others; and the meeting, which was a most influential one, being largely composed of the principal owners of exhibition harness horses, cheered his lordship to the echo.

Lord Lonsdale, in the course of his observations, expressed the opinion that it was unnecessary for him to say anything in praise of the horse before such a meeting, but they were there as supporters of the old rules of the road, and to protect the interests of those who owned and exhibited horses to the best of their ability. The objects of the meeting, which had been subscribed to by Lord Ashtown, Mr. John Kerr, M.P., Messrs. C. E. Cooke, W. Foster, E. H. Goad, James Hamilton, R. G. Heaton, A. W. Hickley, H. Le Marchant, R. W. Lindsay, Walter Lloyd, J. M. Meeken, W. S. Miller, Tom Mitchell, Alex. Morton, William Oppenheimer, Iain Ramsay, Vero Shaw, W. J. Tatem, W. G. Weger, Mrs. Hartley Batt, and Miss Ella Ross, than whom there were no better-known people in the horse world, and which had received offers of practical support from Sir Walter Gilbey and others, were, to put it briefly, the recognition of the rules of the road, and the enforcement of the rights of those who show harness horses and ponies, and surely no more laudable objects could be imagined. But in claiming the recognition of the rights of the road, Lord Lonsdale did not imply that motorists alone were to blame, though he was afraid that a good many people, when they put on their blue goggles, forgot the necessity for behaving like gentlemen. Beyond all doubt there were many people professing to be ladies and gentlemen using motors who were responsible for much discomfort and injury to other people, and to horses who used the King's highway, and also there were ill-behaved cyclists and irresponsible drivers of horse-drawn vehicles who attempted to monopolise the rights of others. All these people the society would attempt to reach, and particularly those who lost no opportunity of seizing the tramway lines and the crown of the road, thereby disorganising the faster traffic behind them. The smoke nuisance was also one that should be dealt with, as in France, where a man who exceeds the proper allowance of smoke and oil, thereby creating a nuisance to the public, is promptly fined, and so it should be here. The harness horse is the horse of the Empire, and he spoke as one who had owned and judged every breed of English horse; in fact, all horses from the thoroughbred to the pony supply the ranks of harness horses, and yet there existed no society to protect their interests and to support the claims of their owners to use them in comfort. As regards the exhibition of harness horses and ponies, there were many hardships, Lord Lonsdale pointed out, from which owners suffer, and none more conspicuous than the measuring question, the arrangements for taking the heights of show horses being most unsatisfactory. The official heights which were registered by the Polo Pony Society were recognised, and most properly so, by the committees of all shows, and so it should be with harness horses and ponies.

Lord Lonsdale's remarks having been strongly endorsed by several speakers, it was unanimously decided to establish the Harness Horse and Pony Society, the Earl of Lonsdale being by acclamation elected the first President thereof.

Lord Lonsdale was elected the first President of the Society; and, on the motion of Mr. John Kerr, M.P., Mr. Vero Shaw was appointed secretary, upon terms to be arranged between the committee and himself. The following committee was elected:—Lord Ashtown, Mr. John Kerr, M.P., Mr. W. Foster, Mr. E. H. Goad, Mr. James Hamilton, Mr. R. G. Heaton, Mr. H. Le Marchant, Mr. R. W. Lindsay, Mr. Walter Lloyd, Mr. Alex. Morton, and Mr. Iain Ramsay.

A general meeting of members will be held at an early date, at which rules will be drafted and the association put into working order.

Lady Members of the Live Stock World.

LADY SEFTON.
Croxteth, Liverpool.
BREEDER OF DEXTER CATTLE.

STOCK AND SHOW NOTES.

By Herdsman.

The Cliviger Agricultural Society's sixty sixth annual show will be held on Saturday, August 12, when prizes and specials will be offered in competition for cattle, horses, sheep, pigs, poultry, pigeons, dogs, cats, rabbits cavies, gentlemen's and tradesmen's turn-outs, butter, eggs, bread, etc.; whilst among other popular features there will be a pony race, donkey race, etc., and a gala in the evening. It will thus be seen that an attractive show is promised. The society is a member of the Federation of Lancashire Agricultural Societies, and entries will therefore absolutely close on the date mentioned, viz., Tuesday, August 8, at 10 a.m. Mr. J. Crossley, Oakleigh, Cliviger, near Burnley, is the secretary.

Intending exhibitors at the show of the East Berks Horse Show Society, to be held at Hawthorn Hill Racecourse on Thursday, August 17, are reminded that the post entries at double fees close to-morrow (Tuesday) the other entries having closed last Tuesday. An attractive schedule of prizes has been drawn up and deserves a good entry. The hon. secretary of the society is Mr. F. R. Jackson, Auctioneer and valuer, Abingdon.

The English Kerry and Dexter Cattle Society has recently issued volume VI. of "The English Kerry and Dexter Herd Book," which is on a much smaller scale than some other herd books, but is none the less interesting and useful. The new volume contains entries of 9 Kerry bulls and 111 cows, and 27 Dexter bulls and 80 cows; a record of change of ownership; standard descriptions of the Kerry and Dexter; prize winners at some of the principal shows in 1904, and other interesting matter to English breeders of these small but useful cattle.

If this year's show of the Welbeck Tenants' Agricultural Society to be held August 8, is not a success it will not be the fault of the society, for the members, and particularly the indefatigable secretary, Mr. H. M. Woods, have done everything possible to deserve success. A most liberal prize-schedule was issued and this has attracted a very fine entry, the total being 1,028, made up as follows:—Horses—agricultural 109, half-breds 172, including 24 saddle and 18 harness—total, 281; cattle, 75; sheep, 155; pigs, 22; wool, 20; butter, 17; eggs, 32; cheese, 13; shepherds' dogs, 29; shoeing smiths, 16; poultry, 164; long service, 8; farms, 15; employees' poultry, etc., 166; and workmen's long service, 15.

It will thus be seen that every department has received goodly support, and should provide much to interest visitors. In addition, a new feature has been introduced, viz., a horticultural show, fifty classes for all kinds of garden produce, for workmen on the estate, have been provided, and there is promise of a large entry and good show. Other attractions in an altogether good programme include:—Exhibition of objects of agricultural interest from the Midland Agricultural and Dairy Institute, Kingston; demonstrations of milk-testing and fancy cheese-making, by Miss Evans, in dairy; parade of the Duke of Portland's thoroughbred stallions and yearlings at Hunciecroft Paddocks, and lecture, with practical illustrations of the best and most profitable methods of bee-keeping, showing appliances of the most modern type and of reasonable cost, and how to use them, by Mr. Hayes, British and Notts Bee-keepers' Association. A large house-party has been invited at Welbeck Abbey for the occasion, and amongst those expected to be present is the President of the Board of Agriculture. The various railway companies will run special and cheap trains, and those who can spare the

time should certainly pay a visit to this, one of the most interesting of our one-day shows.

The Mid-Somerset Show at Shepton Mallet is always one of the most popular and best-managed fixtures in the West and a London Press representative of wide experience who visited its last show described the showground as one of the best arranged in the Kingdom. The district, from the influence of the Compton Stud, is one of special interest to horse breeders, and being so close to Bath Show many of the best outsiders find their way to Shepton Mallet to compete. The cattle are good, and the Shorthorns of the district are famous, whilst here is always a pretty competition amongst the Channel Islands stock. Cheese is a great line at Shepton, a tent over 200 ft. long having to be erected for the great competition, one of the largest in the Kingdom. The total entries at last year's show numbered over 800, and with the capital schedule which the committee have issued there should be an advance even on this for the current year. Entries are open till August 18.

Nearly £700 is offered in prizes by the Bath Horse Show Society for their exhibition at Bath on September 6 and 7, and the affair promises to maintain its old reputation. Classes are provided for hunters, hacks, riding and harness horses, cart horses, etc., and handsome prizes are offered in all, the value of the firsts ranging up to £20. In addition there are some "specials," including the medals of the Hunters' Improvement Society. Entries close on Saturday, August 19, and forms, together with prize schedules, can be had of the Secretary, Mr. Lewis C. Mundy, 41, Milsom Street, Bath.

Messrs. W. and B. Hobbs's lamb sale at Ashford will take place in the Cattle Market Field on Thursday, August 3, and already they have an entry of 8,000 Kent ewes and wethers, half-bred Southdown, Shropshire and Hampshire Down lambs, including 300 capital half-bred Southdown lambs from Godington Park, the property of Mr. G. Ashley Dodd. Catalogues, when ready, may be obtained from the Auction and Estate Offices, Ashford, Kent.

Chichester, Sussex, the principal centre in England for the sale of Southdown sheep, will be the scene of another dispersal by auction on Wednesday, August 9, for on that date Messrs. Stride and Son will hold their great annual show and sale of about 400 Southdown shearling rams and ram lambs both shearlings and lambs being from leading breeders, and also over 5,500 Southdown ewes of all ages from a large number of the leading registered flocks. Catalogues, etc., can be had on application to the Auctioneers, 63, East Street, Chichester.

Leighton Buzzard and Linslade Foal Show will be held at Leighton Buzzard on September 26, the entries closing September 12, or post entries at double fees on September 19. Prize schedules, etc., can be had of Messrs. Walter C. Prudames and W. G. W. Willis, secretaries, North Street, Leighton Buzzard.

August 13 is the date of this year's show of the Scalby and Newby Agricultural, Floral, and Horticultural Society, and a sum of £300 is offered in prizes for horses, cattle, pigs, leaping, driving, Yeomanry class, plants, flowers, etc. The entries close on August 10 with the secretaries, Messrs. T. Flinton and J. Tickle, Scalby, R.S.O.

The South Devon Flock-book Association announces that the annual sales of registered South Devon rams will take place this year as follows: At Totnes, Devon, on Monday, July 31 (ewes will be included in this sale); at Liskeard, Cornwall, on Monday, August 14; and at Truro, Cornwall, on Wednesday, September 6. Special attention is called to these sales, at which a large supply of typical rams, from all the principal flocks of the breed, will be offered for sale. Full pedigrees, etc., of these sheep, and particulars of conditions of entry, for flocks or sheep, in the Flock Book, can be obtained of the secretary, Mr. W. W. Chapman, 4, Mowbray House, Norfolk Street, Strand, London, W.C.

Entries for the new volume of the Hackney Stud Book close on August 1. Applications for forms should be made to the Secretary, Hackney Horse Society, 12, Hanover Square, London, W., stating the number required, and whether for colts or fillies.

At a meeting of the council of the Essex Agricultural Society, held in London on Monday, the Secretary, Mr. F. Taylor, presented the financial statement of this year's show at Southend, and I am glad to say the balance, as I anticipated, comes out on the right side, the net profit on the show being £313 1s. 4d. The total receipts exceeded the previous year by £110, £3,554 10s. 3d. against £3,442 5s., there being a large increase at the gate and in the entry fees. The latter amounted to £543, against £433 at Chelmsford last year. The Society had, however, to pay various items, such as hire of the ground, police charges, etc., which had never been incurred before, these items having hitherto been paid by the local committee. As a result of this satisfactory show the Society's balance in hand now stands at £496 15s. 4d. as against £183 14s. at the beginning of the year. A hearty vote of thanks was passed to Southend for the admirable way in which they conducted everything. The field trials were a new but undoubtedly popular feature, and it has been decided to appoint a committee to consider whether or not the feature should be a permanent one.

I hear that Mr. George Cran, Morlich, Aberdeenshire, has sold his four-year-old Aberdeen-Angus bull Jeshurun to Sir George Macpherson Grant, Bart., of Ballindalloch, at the price of 300 guineas. This beautiful bull, which was bred at Ballindalloch, won the second prize at this year's Royal Show, and was one of a group which won for Mr. Cran the president's prize at the Royal Northern show at Aberdeen recently.

On Friday next, August 4, an important sale of Southdown sheep will take place at Bear Wood, Wokingham, for Messrs. J. Thornton and Co. are to bring under the hammer close on eighty animals from Colonel A. F. Walter's famous flock. The flock is kept in natural breeding condition on high-lying land very healthy for sheep, and the wool has usually obtained the highest price made in the neighbourhood. The sale includes the champion ram at the Gloucestershire Show at Cheltenham this year, whilst there are a number of very good shearlings as well as lambs for sale, among their sires being Bear Wood 42, winner of second prize at the R.A.S.E. Show at Park Royal, 1903; Bear Wood No. 7, a winner at the B.W.S., the Sussex, and Tunbridge Wells Shows, and other prize rams.

Polled Cattle Society.

The annual meeting of the Polled Cattle Society was held in the showyard of the Royal Northern Agricultural Society at Aberdeen. Mr. Garden A. Duff, of Hatton, the president of the society, occupied the chair, and moved the adoption of the report, which showed that the membership and finances were in a very satisfactory condition.

Mr. Bridges, of Ewell Court, Epsom, Surrey, was elected president of the society for the ensuing year. Mr. Smith, Burnshangie, was re-elected vice-president, and Mr. Dingwall Fordyce was appointed a vice-president.

Sale of a Lincolnshire Estate.—At Boston on Wednesday, Messrs. Escritt and Barrell, of Grantham, offered a freehold estate known as the Abbey Parks Farm, Great Hale Fen, Lincolnshire, consisting of about 563r. 0r. 19p. of arable, pasture, and meadow land, with the mansion known as Park House, two farmhouses, seven cottages, and extensive farm buildings. Lot 1 comprised the mansion, entrance lodge, farmhouse, four cottages, plantation, and pasture, arable, and meadow land, the whole covering an area of 488a. 0r. 25p. Bidding commenced at £12,000, and when it had advanced to £18,000, it was knocked down to Mr. A. J. Sole, of Peterborough. Lot 2 consisted of a farm house, farm buildings, and pasture, and arable land, standing upon an area of 74a. 3r. 34p., and the lot is subject to an annual rent charge of £50 in favour of the Vicar of Heckington. Mr. W. Marris, of Boston, became the purchaser, for £2,125.

The Royal Lancashire Show at Liverpool.

Each succeeding year of this popular Society brings with it new features, either in a large addition to its membership role, or the increased total of its entries, and judging by the accompanying tabulated statement of entries the forthcoming show at Liverpool, on August 3, 4, 5, and 7, seems likely to eclipse all previous attainments. For reference the entries for the previous visit to Liverpool are included:—

	Liverpool, 1905.	Liverpool 1899.
Farms	—	12
Cattle	342*	229
Light Horses	404	319
Shires, &c.	91	156
Sheep	90	172
Pigs	186*	70
Goats	—	25
Cheese	78	108
Butter and Dairy	159	135
Dogs	1,105*	205
Poultry	1,232*	850
Pigeons	469*	293
Honey	140*	105
Eggs	26	46
Horse Shoeing	—	59
Local (one day) Exhibits	189	—
		2,784
Implement Stands	301	309
Total	4,810*	3,093

* Represents Record.

The previous grand total record was 4,072.

A gratifying feature is the records established in the principal sections, which will embrace the finest exhibits in the United Kingdom; whilst in the minor sections, especially poultry and pigeons, Mr. Bohane's new judging combination has had the effect of increasing the entries very materially, and is a striking answer to the many criticisms levelled against it by some interested.

The great display of implements and machinery in motion will be unequalled in the Society's long history, the whole of the principal engineering firms being represented, and this section alone will occupy no less than 6,948 lineal feet of shedding.

The harness, driving, and leaping competitions are exceptionally strong, and the push ball matches (football on horseback) arranged for daily by teams from the Royal Horse Artillery will be a distinct feature. Five aside teams—the horses playing the ball a mammoth leather football five feet in diameter—the animals entering into the spirit and excitement of the game equalled only by their riders.

The full band of the Royal Marines, under the directorship of Lieutenant Miller, will provide the musical programme on the first three days of the show, and the Liverpool City Police band on the Bank Holiday.

The showyard is an ideal one, covering 44 acres, level, with an excellent sandy subsoil, ensuring an absolutely dry ground; within easy access of all parts of the city and railway stations. Electric cars will run to entrance gates every minute.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending July 22, 1905:—

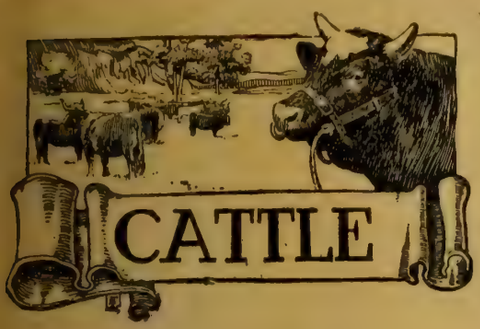
NOTE.—The figures for the current year are approximate only.



Notes and Jottings.

At the time of writing, the intensely hot weather of the past fortnight appears to be giving place to more temperate heat. The thunder and rain storms that have been rather severe in some districts, appear to have cleared the air and made matters much more comfortable for both man and beast, and have in a very few hours made a great change in the aspect of the pastures and roots. Swedes were turning blue in many places very rapidly, but it is not yet too late for these to revive and for white turnips to make a good crop. The earth is just now in quite a hot-bed state, vegetation, with a little more rain, will be very rapid. In districts where cutting of corn has commenced the shocks are standing thickly, so that, altogether, there are yet hopes of a fair amount of feed and winter necessaries for our cattle.

During the past week interest appears to have been awakened in some of our breeds of cattle of which but little has been heard of late. Those good and profitable dairy cattle of North Britain, the Ayrshires, have been in request for export to a greater extent than usual, 116 animals of this breed having been shipped in one consignment to Finland, this being the largest shipment of this breed that has ever left Scotland. Japan, too, appears to be at last waking up to stock-breeding, as we hear that a committee from that country have recently visited Ottawa for the purpose of selecting cattle for experiments, and have purchased a number of Ayrshires and Jerseys for dairy purposes. The climate of Japan, at least, should suit these cattle. We know but little as to the soil.

When cattle of any breed are being taken to an entirely new country, the matter of attention is one of the most important elements in their success or failure. In a country like Japan the feeling of friendship is very strong, and this will influence very much the amount of care and thought that will be bestowed upon these English and Scottish breeds of cattle. The man has as much to do with the matter as the cows have. Good cows treated unkindly in the way of looking after and milking, will quickly become bad ones if subjected to harsh and careless treatment; whereas, on the other hand, where they are looked upon as friends and pets, tended with care and kindness, they thrive and feed, and quickly show their gratitude by giving a plentiful supply of rich and wholesome milk.

We often see this sort of thing in our home herds. When visiting strange places, a rough and hasty herdsman opens the shed doors to you, and the cattle all jump up and endeavour to face you as though wondering what is going to happen to them, you may rest assured there is little milk and little profit either in growth or flesh; whilst, in direct contrast to this, you go to another farm, a quiet and faithful herdsman introduces you into the byres, and the cattle lie there chewing the cud of contentment in the most trusty and familiar manner, and, though you are a stranger, it is only by force (lightly applied, of course) that you can get them to rise and show themselves. These are the sheds and conditions under which profit is made.

The old Longhorn breed of cattle, too, has attracted a share of attention during the past week in the Midlands, a sale of some thirty of this breed having taken place by Messrs. Lythall and Walters, of Birmingham, from Mr. W. H. Sales's famous herd at Atherstone. There were a number of strange purchasers present, and new herds seem likely to be founded as a result of this sale. Sensational prices were an absent element in the features of the sale, the highest price being 35½ gs. for a young cow and her five-days-old heifer calf; the average for Mr. Sales's cows working out at £25 10s., and heifer calves ran from 13 gs. to 22 gs. each. Bulls were in demand chiefly for crossing purposes, but this sex was represented by one or two aged ones and several very young ones. The highest price was 28 gs.

The influence of dry weather upon our milk supply is very marvellous. There appears to be very great difficulty always has been in maintaining a full supply of milk and butter during hot and dry weather, and it is quite certain from experence that the weather has a very telling effect upon the quantity of butter fat in the milk. Upon the same pastures, and from the same cattle, we have known an increase of as much as over 2 lb. of butter per head over a large herd to take place in the month of June from one week to another. The only question that could possibly account for this great difference being the weather. After rain the cattle rest quieter, flies are less troublesome, and a greater amount of succulent grass springs up. Peace in the sheds and yards, and succulent feed, must be factors in this increase.

During the spring and early summer sales of North Devon cattle, a much more active demand than usual was experienced for all the best specimens, and we read that recently at a dinner given in the West in honour of some visitors to England from Uruguay and Argentina, a very interesting, and, to breeders, very satisfactory account, was given of the progress of "these juicy red plums of the Devonshire line," on the River Plate, and this good account extended both to their dairy properties as well as to their beef productiveness. A great many excellent native cattle appear to be graded up in these countries from the imported Devons. We have always spoken very highly of the many good properties of this beautiful breed of cattle, particularly as regards the main thing, "rent paying."

The recent sale of the Hengherst herd of Sussex cattle must have presented a sort of silver lining to the clouds that have been hanging over breeders of this very useful and profitable breed of beef cattle. At several sales during the past two or three years some very low averages and individual prices have ruled. At Hengherst, though figures were not sensational, they were fairly substantial indeed, so much so as to show that a profit may be obtained by good breeding and management; 42 guineas, 53 guineas, 45 guineas, 39 guineas, and 36 guineas were some of the prices given, and Mr. Schicker must have read with satisfaction the average of over £25 for the entire herd. The Sussex is a very massive and heavily-fleshed beast, easily fattened, and yields to but few, if any, in the way of early maturity.

Though there appears to have been a great deal of talk and fuss about dairy cattle and our milk supply for some long time past, and still continues, yet we all must admit that in the way of money making the beef breeds and the beef strains of blood in the dual purpose herds have had the best of it as regards prices. This may be due to the bare fact that you may obtain milk, as least in moderation, from the beefiest cattle, and its quality is always good; but, on the other side, we question if it is not well nigh impossible to obtain beef at a profit, or any quantity of it at any price from the milking breeds only. Then it is not every farmer that cares, or is adapted to dabble in the milk pails year in and year out.

Herefords continue to meet a strong demand for export, and at very fair, and, in some instances very high, prices. America and the Argentine have always been customers for the white faces in great numbers, and Australia and New Zealand also, as well as one or two of the smaller islands of the sea; latterly also the continent of Europe appears to be looking the breed up, and several inquiries have been noted from that source. Four heifers and a young bull have recently been exported to Spain from Mr. Turner's well known herd at the Leen. A very important day among the white faces will be October 3 next, when the renowned herd from Downton Castle, the property of Mr. Thomas Fenn, will be dispersed. There is a deep infusion of the best strains of blood here.

These are days of intense education in the lower and middle classes, especially whilst in the upper classes there appears to be quite an inclination to treat higher education especially rather coolly. The reason for this may probably be found to a certain extent in the fact that a great many sons of the upper classes are finding that, with even a modicum of education, they can spend a happy life, if not a lucrative one, on the land. There are many of this class nowadays taking, what may be called, "gentlemen's helps" or "farmer's helps" places and very useful they prove, not only to themselves, but to the country. When a man is destined to be a man he will find the way, whatever his education may have been.

A few paragraphs of a biographical character, referring to that well-known and clever live-stock auctioneer in America, Colonel Judy, who is now hearty and comparatively young, and well to do at 83 years of age, are very interesting. One paragraph tells us that he was the son of an industrious farmer, who believed in putting his boys to work as soon as their age would warrant it. Experience has well atoned for education in the life of this fine man; and we are bound to ask the question, Would he have made one iota a better citizen or become a happier or wealthier man had he been given a university education? Not a bit. And what about the sons of the lower classes? Would not thousands of them become better and happier men, with a little less of the Board school droning and a good deal more country life, amongst our magnificent and interesting herds of cattle?

Sale of Mr. F. J. Steward's Shorthorns.

About sixty head of Shorthorn cattle belonging to Mr. F. J. Steward were sold by auction on Wednesday, at Whitehall Farm, Brigstock, Northamptonshire, by Messrs. John Thornton and Co. Established some ten years ago, the stock bred by Mr. Steward has been most successful, and at the Birmingham show and sale last year, eight bulls from this herd made over £90 each, one of them making 410 gs. At the sale last week there was a capital lot of large-framed cows (many of them with their calves running with them). Mr. J. T. Hobbs purchased a couple of the best of them to go to Maiseyhampton, viz., Brigstock Careless, winner of first prize as one of a pair at the Duke of Buccleuch's estate show last year, at 100 gs.; and Carnation 2nd, the winner of a couple of second prizes at the Northampton and Peterborough shows this season. Several were also bought for Argentina. The fifty-eight cows and calves averaged

Sale of Devon Cattle, &c. at Whimple.

The sale of pure-bred Devon cattle, Shire and hunter horses, and fat cattle belonging to Mr. T. S. Morgan, at Whimple House, Whimple, on the 21st inst., attracted a very large company of breeders. Messrs. Risdon and Sons were the auctioneers, and they brought under the hammer a fine lot of stock, which met a fairly ready demand, except the horses, but at prices somewhat in favour of the buyers. The Devon cows and heifers made up to 31 guineas and the bulls up to 24 guineas, whilst the fat steers made £43 per pair, and fat heifers £36. The horses did not change hands.

Sale of Longhorns at Atherstone.

The greater part of Mr. W. H. Sale's herd of Longhorn cattle was sold by auction, at Arden Hill, Atherstone, on Thursday, by Messrs. Lythall and Walters. There was a good attendance of breeders, and the chief prices realised were 35 guineas, 30 guineas, 29 guineas, 28 guineas, 27 guineas, and 25 guineas. The principal buyers were Lord Gerard, Hon. E. A. Fitzroy, Captain C. Tollemache Scott, Mrs. Cheape, Messrs. S. H. B. Chamberlayne, R. T. Bowers, W. L. Riley, O. C. H. Riley, F. J. Mayo, H. H. Cave, H. W. F. Garland, G. H. Tanzer, W. Shaw, and J. Green.

Horse Notes.

"He doth nothing but talk of his horse."
—Merchant of Venice.

The great improvement which has been made in heavy horses all over the country recalls some circumstances connected with the early history of the two great breed societies which look after the interests of those breeds which are fairly entitled, from their numbers and position, to be called the principal breeds of agricultural horse of Great Britain. Some seventeen or eighteen years ago—I forget the exact date—there was a considerable agitation in some influential quarters to bring about an amalgamation, or what practically amounted to an amalgamation, between the Clydesdale and the Shire Horse Societies. It was urged that the Clydesdale and the Shire horse had practically the same origin, and that, whilst the English breed was undoubtedly descended from Flemish stallions which were imported so far back as the reign of King John, so the Scottish breed could certainly trace its descent from a Flemish stallion which was imported by the fifth Duke of Hamilton, who bred in the reign of Charles II.

Much was made of the common origin of the two breeds. Still more was made of the way in which, in pre-Stud Book days, the English heavy horse breeding counties Lincolnshire especially, were scoured by Scottish breeders for those big weighty mares which are the pride of the Midlands. Emphasis was laid upon the fact that many of the stallions in the early volume of the Clydesdale Stud Book were, undoubtedly, descended from English dams or granddams, and one scarcely ever found an advocate of the amalgamation who could not show a heavy horse in which he defied the critic to tell where the Shire ended and the Clydesdale began, and which he asserted roundly was a better and a more valuable animal either for working or breeding purposes than any pure Stud Book animal—an assertion which it was very difficult to disprove. In connection with this I well remember, at one of the Glasgow stallion shows, a conversation between a gentleman whom I will describe as a Clydesdale purist, and one who was a strong advocate for the change. The Clydesdale man's arguments were cogent and convincing from his own standpoint, and when he had finished his opponent said, "Yes, I grant you all that; but you are a man of sense and knowledge, and I ask you," pointing to three or four of the horses that had been kept in the short leet, "if those are not English heads"? And the Clydesdale man had to admit that they looked very like it.

It is a matter of history that nothing was done by either society to promote an amalgamation, and the result was the formation of what was called "The Select Clydesdale Society of Great Britain and Ireland" which published a few volumes. I never saw more than two of a Stud Book. The "Select Society" did not last long. A society within a society publishing a Stud Book within a Stud Book, so to speak, was on no substantial foundation, and its fate was practically certain when it did not obtain the support of either of the great societies whose good work it attempted to supplement.

Those of the younger generation who see the magnificent specimens of the cart horse which are brought into the show ring at the Shire horse show, the Glasgow stallion show, and other great shows throughout the country will scarcely credit how different the two breeds were only some twelve or fourteen years ago to what they are now. The Shire horse had plenty of bone and feather, but he was very subject to side bone, he had upright joints, and in every respect he was the inferior of the Clydesdale "on the ground." The Shire breeder, however, when tackled on these subjects, had a ready retort. He pointed out that the Clydesdale was losing size, that his back was by no means what it should be, that he wanted a rib, and that though undoubtedly a horse was not of much good unless he had good legs and feet that would wear on the stones, he was useless for town work unless he had some weight to put into the collar. These are in their way unanswerable arguments, and the fact that the crossbred cart horse, if I may be allowed to use the term, possessed both the good feet and legs of the Clydesdale and the weight of the Shire was much dwelt upon, but to no effect.

It is interesting to note how the two breeds have changed, each working on its own lines. Some months ago I called attention to the great improvement which had been made in the Shire horse; how one no longer saw the fleshy legs, sidebones, and upright pasterns which prevailed in the early days of the Shire Horse Society, and it is needless to go fully into the subject again. But a word on the improvement which has been made in the Clydesdale seems apropos. I have been at several shows of late where the agricultural horses have been emphatically of the Clydesdale type—indeed, where they have been "Stud Book" Clydesdales, and I could not fail to be impressed with the fact, that whilst they had gained in size and power, they had not lost any of that beautiful quality of bone and joints which was their leading characteristic. At South Shields, on Wednesday last, there was a remarkably fine show of Clydesdales, and in mentioning one or two horses that I saw I must promise that I am selecting them at haphazard; I have no intention of giving anything approaching to a report of the classes.

Two grey colts, two-year-old stallions, shown by the Seaham Harbour Stud Co., which is founded on the stud which the Marquis of Londonderry owned for so many years, and which did so much for heavy horse-breeding in the county of Durham, seem to be a fair example of what I mean. They are half-brothers by Prince of Aires, and were first and second in their class. The winner, Pearl Diver, is a big upstanding colt, with weight and substance. He has a capital middle, his bone is big as well as of fine quality, and he combines the good points of both breeds. The same may be said of Gamecock, who was second, though he has not quite so much bone, and his bone is perhaps the least bit like the bone of the old Clydesdale in shape.

The facts that I have pointed out, viz., that the two breeds have, without cross breeding, developed valuable properties which were a quarter of a century ago looked upon as almost exclusively the property of the other, bears ample testimony to the industry, intelligence, and singleness of purpose which has actuated British cart horse breeders during the period we have been surveying, and they also prove that the policy of the Clydesdale and Shire Horse Societies in adhering to their original plan was a wise one. The lesson is one which may be taken to heart by other societies which are flirting with the policy of amalgamation.

How little was thought about sidebones in the early seventies, and indeed much later than that, by the rank and file of breeders, it is scarcely possible to realise nowadays. I remember selling a gelding for a very big figure to a veterinary surgeon. He looked him over, said "You well know he has a little side bone," and then bought him, saying he was sound enough, and it did not matter much.

His successor would not buy such a horse now at any figure. Another incident connected with sidebones occurs to my memory. A few years after the sale of the horse to which I have drawn attention I was judging agricultural horses at an important show, and the first class we had to judge was one for brood mares. We selected a big handsome mare as they walked round, and placed her at the head of the class. When we got the lot drawn up we began to run the rule over them. The mare we first selected had big side bones, and we sent her down. So had other two or three of the best looking mares in the class, and we had some trouble to please ourselves in placing the three for which there were prizes. As we left the ring I was pounced upon by an angry lady—she was very angry indeed who asked why we had not given her mare first prize, and she proceeded to expatiate on the many undoubted excellencies of her mare. I admitted these when I could get a word in, and added: "But then she had big sidebones." "Sidebones," said the lady in tones of the greatest contempt, what

are sidebones, I neved heard of sidebones." I meekly answered that I wished I never had—and I wish so still.

THE LOOKER-ON.

Sale at Perth.

Messrs. Macdonald, Fraser, and Co., Ltd., held a sale of work horses and mares, Clydesdale colts and fillies, carriage and riding horses, cobs and ponies, etc., at Perth on Monday, 247 of all classes being catalogued. There was a large attendance of buyers, and for the best class of carriage horses, and also work horses, a good selling demand was experienced, but secondary sorts were meeting a slow demand. Work horses, from four to seven years old, from £56 to £75, and from £35 to £48; seven years old and upwards, from £30 to £36, and from £17 to £26; colts and fillies to £35; carriage horses, from £34 to £55, and from £18 to £32; cobs to £35; ponies, from £8 to £17.

Sale of Dinarth Hall Stud Animals.

Messrs. John Jones and Sons' second biennial sale of high-class Hackney and Welsh polo brood mares, etc., was held at the Dinarth Hall Stud, North Wales, on Thursday. Messrs. Manley, of Crewe, being the auctioneers, and there was a large representative company of breeders present, whilst prices ruled high. The three-year-old filly, Lady Cahar, first and reserve championship winner at the Hackney Horse Society's Show in London, sold for 225 gs. to Mr. Boddy, Durham; whilst the handsome yearling colt by Julius Cahar, sold for 110 gs. to Mr. Hollingworth, of Oldham. For the noted prize-winner, Maid of Newton Mr. Lemmell bid 485 gs., which, however, did not reach the reserve; but Mr. Jones and he had a private consultation, when it was announced that the sale to Mr. Lemmell had been effected. Other good prices were realised, as the following list of the chief sales will show:—

Welsh Actress, bay mare, by Winnal George—Mr. Hollingworth, 45 gs. Welsh Music, bay mare, by Winnal George, and colt foal—Mr. Davies, 50 gs. Lady Jones, black mare, by Eiddwen Flyer—Mr. Booth, 31 gs. Londesborough Whitesocks, dark chestnut mare, by Sir Augustus—Mr. Chancellor, 76 gs. Buttington Jessie, bay mare, by Winnal George—Mr. Thompson, 60 gs. Gloomy, dark brown mare, by Winnal George—Mr. Pickering, 71 gs. Titmouse, black mare, by Ruby—Mr. Willis, 37 gs. Lady Cæsar, bay mare, by Julius Cæsar II.—Mr. Boddy, 225 gs. Julia Gem, chestnut mare, by Julius Cæsar II.—Mr. Underwood, 51 gs. Two-year-old filly, by Julius Cæsar II.—Mr. Booth, 36 gs. Yearling filly, by Julius Cæsar II.—Mr. Hollingworth, 36 gs. Why Not, two-year-old stallion, by Julius Cæsar II.—Mr. Jones, 85 gs. Andrew, two-year-old stallion, by Julius Cæsar II.—Mr. Evans, 46 gs. Yearling colt, by Julius Cæsar II.—Mr. Hollingworth, 110 gs. Yearling colt, by Julius Cæsar II.—Mr. A. Morton, 64 gs. Two-year-old harness gelding, by Confidant—Mr. Bourne, 40 gs. King Orme, dark chestnut gelding, by Stortford Denmark—Mr. Hughes, 51 gs. Garon King, dark chestnut gelding, by Stortford Denmark—Mr. Willis, 50 gs. Garon Prince, dark chestnut gelding, by Stortford Denmark—Mr. McNaughtan—53 gs. Newry, chestnut gelding, by Julius Cæsar II.—Mr. Willis, 33 gs. Maid of Newton, chestnut mare, by Langton—Mr. Gemmell, 485 gs. Welsh Princess, black mare, by Honesty—Mr. Hollingworth, 110 gs. Combination, chestnut gelding—Mr. Forbes, 45 gs. Sian Llwyd, dark chestnut mare—Mr. Crowe, 46 gs. Gentle Jane, chestnut mare—Mr. Miller, 41 gs. Etto, dark chestnut mare, Mr. Grey, 32 gs. Sweet Jenny, bay mare—Mr. Pascoe 31 gs. Elin, bay mare—Mr. Forbes, 35 gs. Rhys, dark dun gelding—Mr Pascoe, 30 gs.

The Small Holding Committee.

The Departmental Committee appointed by the President of the Board of Agriculture and Fisheries to inquire into the subject of small holdings, held a meeting on the 27th inst.

The following members were present:—The Right Hon. the Earl of Onslow, G.C.M.G.; the Right Hon. Jesse Collings, M.P.; Major P. G. Craigie, C.B.; Mr. F. A. Channing, M.P.; Mr. James Long; Mr. R. A. Yerburgh, M.P.,; and the Secretary (Mr. T. H. Sutton).

Evidence was given by Mr. Jesse Marlow, Secretary of the Desborough Co-operative Society, and Mr. W. Gutteridge, Secretary of the Rushden (Northants) Allotments and Small Holdings Association.

The approaching Bank Holiday is undoubtedly the time when the greatest exodus takes place from London, and to meet the many requirements of holidaymakers, both for the forthcoming holiday and the remainder of the season, the Midland Company's programme of Bank Holiday excursions gives the fullest particulars of their arrangements. The pamphlet can be obtained, together with tickets (which can be dated in advance, to suit the convenience of passengers) from any of the Midland Company's stations and booking offices, or from any office of Thomas Cook and Son.

Notes and Jottings.

The increased price of wool has been on all hands a great benefit to the sheep breeder. Probably the breeders of the long wool varieties of sheep have felt the benefit of the rise more than the short wooled breeders. At least this would appear to be the case in respect to the export demand for stud sheep. The records of the sales of Lincoln rams by private treaty has been quite exceptional. This excellent demand has resulted in quite a large number being purchased at very high prices. In addition to the sales previously reported, we understand that Messrs. Poels and Brewster have secured a first-class lot of fifty yearling rams from Mr. Harry Dudding's flock at Riby.

The demand for the Kent and Romney Marsh sheep has been far more keen than in recent years. In fact, we are informed by the secretary of that society that a larger number of this breed have been already exported this season than in any previous year since the society was established in 1902. Amongst those to whom export certificates have been issued during the past month are Mr. Charles File, of Elham, who has despatched to the Argentine six ewes born in 1904 and five yearling rams; the Earl of Verulam, who has sent to the same country five ewe lambs, including the winning pen at the Royal Show, and four yearling rams; and Mr. A. Amos has just sold to Mr. T. Goodchild, for export to the Argentine, a specially good lot of the yearling rams.

The last-named breeder has also sold for export to Australia three specially-selected yearling ewes, and two yearling rams which are being sent out to Victoria.

One of the best sales of Southdown wool we have noticed this season is that of Mr. Ellis, of Summersbury, Shalford, Guildford, who has sold the whole of his clip of Southdown wool in the grease at the very excellent price of 1s. per lb. Higher prices have been made of washed wool, but this is, we believe, the highest we recorded for a whole clip of unwashed wool.

Amongst the Hampshire Down flocks we find Mr. H. C. Stephens, at Cholderton, has come very much to the front during the past season. This flock has for several years been working its way to the fore, and the result of the past showyard season shows very clearly that the sure foundation that has been laid, coupled with the judicious purchases made, are bearing good fruit, another flock bids fair to take a very leading position amongst others of its breed. Several important lots of lambs, yearlings, and other sheep have been recently despatched to the Argentine.

Another flock of Hampshire Down sheep which has given strong indication of future excellence is that owned by Mr. F. A. Holman, of North Litchfield, Hants. At the Wiltshire County Show a very nice and typical pen of lambs were exhibited; and again at the Salisbury Fair its two entries in the single ram lamb class were both in the award list—one h.c. and the other c.—and then at Overton Fair several of the leading awards were secured.

The first-prize pen of wether lambs from this flock were a grand pen of one hundred head, and they were sold at the excellent price of 54s. 6d. per head. This price is one that few, if any, other breeds or breeders could equal for so large a number of lambs at this season of the year, and is one that brings out in a very distinct degree the high merit and early development of the Hampshire Down Sheep.

A valuable addition has just been made to the Cholderton Hampshire Down flock by the purchase of 300 ewes from Mr. W. G. Young's noted flock at Stratford-Sub-Castle. This selection comprises of the best 100 ewes of the three flock ages, 2 tooth, 4 tooth, and 6 tooth ewes. Mr. Young has, we understand, decided to retire from ram breeding, and can therefore spare these specially fine and well-bred ewes.

At the Chichester sale last week it was quite a striking feature to find how much more eagerly the fat rams were competed for than those in ordinary field condition. This is always the case, and yet breeders on all hands acknowledge that better results accrue when rams are in good store condition.

Of course, every flockmaster is entitled to the credit of being able to know that which best suits his own requirements, but it is very singular to note that whenever there is a sale the rule is generally to find all the fattest rams to sell most readily; and yet take almost any of these breeders by themselves, and ask them the question: Which is the best to use, the fed up ram or the store ram in ordinary condition? and the reply will be, in ninety-nine cases out of the hundred, the latter one is.

Special attention is called to this fact now, because the sale season is the proper time to direct attention to such points of interest in flock management. It would, of course, be of value and interest if statistics were carefully compiled showing the results that accrued from the service of the two classes of rams amongst ordinary flocks.

Another matter that is worth thinking of at this season is whether or not the custom of turning out three or four rams, as the case may be, altogether with the flock (the number, of course, varying to its size) is the correct one. The writer's experience is that it is not so. A very successful system is for the rams to be kept shut up alone in separate pens during the daytime and well fed, and only turned with the ewes at night.

Some shepherds object to this system on the ground of the trouble it involves, but this is a matter of no real consequence, because in actual practice it is but little, if any, extra labour. Close observation has time after time convinced me that for all flocks in which hand-riding is not practised this is by far the better plan to adopt. The ram is well rested, and keeps its vigour and strength far better than when he has to take its chance with the ewe flock entirely.

The earlier Hampshire Down ram sales have been quite satisfactory. Mr. T. F. Buxton has not quite equalled his high letting price of 1904, but with one making over the century for six weeks' hire, it is evident that there was keen competition for these well-bred and typical ram lambs. Lord Rothschild's sale was also a very good one.

Vegetable Matter in Wool.

At a meeting of the Bradford Chamber of Commerce last week a circular was approved drawing attention to vegetable matter in wool, and asking all British Chambers of Agriculture to take up the subject. It is recognised that these extraneous matters only get into the wool through inadvertence—for instance shearing the sheep and winding the fleeces in places where particles of grass, straw, etc., are littered about, and tying up the fleeces with loosely twisted string known as "binder twine."

These faults, the Bradford Chamber states, may appear trivial to wool-growers, but they are very serious matters indeed to consumers of the wool, as vegetable fibres will not take the dyes used for animal fibres. An appeal was also approved to Colonial Chambers of Commerce mentioning similar grievances, and complaining of the hemp or jute material used in bagging wool.

Sheep Fairs and Sales.

Chiddingly.

The glories of the Bat and Ball Fair, Chiddingly, seem on the wane, for at that held on Monday there was a poor entry of lambs, and only a few cattle. Against the 16,000 or 17,000 lambs of a few years back, only some 3,000 were penned, and trade was dull. The prices for lambs varied from 35s. downwards; 32s., 31s. 6d., 30s., 29s., 28s., and even 27s. being prices at which lots of 100 to 15 or 20 lambs changed hands. Wether lambs fetched 30s. 6d. to 32s.; mixed culls 26s. to 28s.; tegs 2 gs. to 46s. 6d. Mr. Paul, of Ninfield, offered some fine ram lambs, and these went at £10 apiece. Store beasts brought from £7 10s. (yearlings) to £15—£13 being a popular price.

Kesgrave.

Kesgrave lamb sale was held on Friday, the auctioneers being Messrs. Spurling and Sons, of Ipswich. Additional interest attached to the event from the fact that just fifty years have passed since the late Mr. William Biddell held the first public auction, and every year since 1895, pens have been pitched on land opposite the Bell

Inn, the consignments numbering thousands each year. The sale of Friday was one of the largest witnessed for a long time, the consignors including the names of gentlemen occupying farms from which lambs have been sent from time to time during the whole period of fifty years. On no previous occasion perhaps was there a better collection of lambs; there was a good attendance, and the high prices which have ruled elsewhere this season were well maintained.

The first Suffolk lambs to come into the ring were 100 belonging to Mr. Clement C. Smith, Trimley, the first two lots of twenty Suffolk ewe lambs making 45s. and 42s. respectively, the average of the consignment being 37s. Mr. N. Everett, Rushmere, sent 320 Suffolk and first-class lambs; the first lot of twenty of which fetched 48s. 6d., and the whole consignment made the satisfactory average of 37s. 6d. Mr. R. J. Dawson, Kirkton Hall, sent about 300 lambs realising 57s. and 49s., 125 ewe lambs making the good average of 46s., and whole flock just over 41s. Mr. S. R. Sherwood, Playford, had seventy ewe lambs, two lots fetching 55s. 6d. and 52s., the seventy averaging 49s. The 250 Suffolk ewe and wether lambs, belonging to Mr. B. S. King, also sold well; 100 ewes averaging 38s. Mr. E. G. Pretyman, M.P., sent 325 Suffolk lambs and ewes from the Kesgrave Hall farm, the first two lots of forty ewe lambs going at 41s. 6d. and 40s. 6d.; 160 ewe lambs averaging 36s. 3d. and 146 wethers 34s.; top price 37s. 6d. The same gentleman had an entry of 358 wether lambs and ewes from the Brightwell Hall farm, 300 wethers averaging 32s. Mr. Spencer Dawson, Stratton Hall had 100 ewe lambs, which averaged 43s. 3d.; top price 51s. There were numerous other consignments which went at prices similar to the above.

Saxmundham.

Messrs. Flick and Son's thirty-eighth annual lamb sale at Saxmundham took place on the 21st inst, when upwards of 8,400 lambs and ewes were penned, the catalogue embracing 4,561 Suffolk lambs, chiefly from registered flocks, and 3,122 first-cross and half-bred lambs. There was a crowded company of buyers, representative of all parts of East Anglia, and in these circumstances the bidding ought, perhaps, to have been a little more spirited. Trade, however, unquestionably showed an improvement upon last year, and, generally speaking, the growers had very little reason to grumble. Prior to the sale, a wine luncheon was served in a marquee upon the ground, at which the chair was occupied by Mr. Robert Flick, and the usual mutual compliments cordially exchanged. One of the most successful consignors was Mr. W. H. Borrett, of Leiston Hall, who achieved the coveted distinction of making the top price of the sale—48s. 6d. apiece for a score of Suffolk ewe lambs (ear-marked). Other prices were on similar lines to those ruling at recent East Anglian sheep sales.

Tring Park Hampshires.

The annual sale of ram lambs, ewes, and ewe lambs from Lord Rothschild's Tring Park farms, took place at the Home Farm, Mr. F. J. Brown (of the firm of W. Brown and Co.) being the auctioneer, and, as usual, there was a large and representative gathering of those interested in the Hampshire breed, especially from the Northampton district. In opening the sale the auctioneer reviewed the sheep trade of the previous year, and gave his reasons for thinking the season just opening a most hopeful one for sheep farmers, both as regards fleece and mutton.

Fifty-four ram lambs were offered for sale, and six for hire for six weeks. The first ram was let to Mr. J. G. Williams, of Pendley, for 51 gs., and another let for 21 gs. The top selling price was 25 gs. for a lamb by Dogdean, the purchaser being Mr. Hamborough. Others realised 18, 17, and 16 gs., the average being over 11 gs. a head. The purchasers included the Marquis of Winchester, Lord Salisbury, Mr. A. de Rothschild, Mr. Scott-Murray, and Mr. Sheppard Cross. Twelve lots of five two-tooth ewes, belonging to the Hon. C. N. Rothschild, of Ashton Wold, Oundle, sold at from 56s. to 58s. Draft ewes belonging to Lord Rothschild made from 50s. to 56s. 6d., and ewe lambs from 40s. 6d. to 47s.

Mr. T. F. Buxton's Hampshire Downs.

A large company gathered at Waters Place on Monday for the annual sale and letting of sheep from Mr. T. F. Buxton's famous Hampshire Down flock, beautiful weather favouring the occasion. Mr. Buxton, in giving the only toast of the afternoon ("The King") said he was pleased to see so many persons present that day, which showed that they were glad to see the Waters Place sheep. It was wonderful how many years that flock of Hampshire Down sheep had kept up its quality, and they ought to express a word of appreciation to Mr. Hurford, under whose superintendence it had gone on. (Hear, hear.) The auctioneer again had a very good lot of sheep to put before them, even though the successes the flock had won during the year had not been quite up to those of the previous two or three years, for it could not always maintain quite the same standard. All he could say was that they hoped for a return of the same success next year

Mr. Rawlence was the auctioneer, and he commenced the sale with the letting of six ram lambs. The first one was secured by Mr. Drake, of Salisbury for six weeks for 104 gs. This was the top price, compared with 180 gs. last year. Another lamb was hired by Lord Rothschild for 40 gs., and a third for 20 gs. by Mr. Holman, of Whitchurch. The others went for 10, 11, and 15 gs. Among the ram lambs sold, the highest price—37 gs.—was paid by the Hon. Duncan Bouverie, of Coles Hill, Berks. Last year's highest price was 50 gs. Ewes fetched prices up to 68s. a head.

Mr. W. M. Harris' Hampshires.

Messrs. James Harris and Son, of Winchester, offered for sale on Wednesday afternoon, at Basingstoke, seventy ram lambs from the well-known Long Sutton Hampshire Down flock of Mr. W. M. Harris. There was a fair attendance of farmers and sheep breeders, and altogether forty-one lambs were let and sold, twenty-eight being withdrawn. The principal buyers were Mr. Carey Coles, 18 gs.; Mr. Flower, 14 gs.; Mr. Goldsmith, 14 gs.; Mr. A. Arnold, 13, 12, 11, 10, and 8 gs.; Mr. Bruce, 11, 10, and 9 gs. (twice); Mr. Meinertzhagen, 9 gs.; Mr. Harding, 8 gs. The average price of forty-one lambs let and sold reached £7 15s

Wool Fairs and Sales.

Berwick.

The first wool sale of the season at Berwick was held on the 22nd inst., and was well attended both by merchants and farmers. With the enhanced prices offered there was a disposition on the part of farmers to dispose of clips more readily than has been the case at the opening market for some years past, and consequently a good deal of business was done. Prices showed an average rise of 2s. per stone over last year's figures, when the advance was very marked from the previous year. The general rates prevailing were: All hogg, 25s. 6d. to 26s. per stone of 24 lb.; all ewe, 24s. per stone; half ewe to half hogg, 25s. per stone.

Bellingham.

This old-established wool fair for the sale of Cheviot and blackfaced wools was held on the 22nd inst., and was largely attended. Business, however, was very slow for the greater part of the day, farmers holding out in a confident manner for substantial increases on last year's prices, but in the end a considerable number of transactions took place at good advances from last year's quotations. Cheviot clips—hogg and ewe included—were dealt in at from 25s. to 26s. 6d. per stone, this showing an increase of from 4s. to 4s. 6d. when compared with last year, while an exceptional clip made a considerably higher price. There was not much business done in blackfaced clips, prices being about the same as last year, the general price being from 14s. to 14s. 6d. a stone—an advance of about 3d. per stone.

Brampton.

The second wool fair for hill clips at Brampton, Cumberland, was held on Wednesday, in fine weather, and there was a fair attendance of buyers. Blackfaced clips sold from 7½d. to 7¾d., unwashed 6¾d. to 7d. Cheviot ewe wool 11d. and 11½d. Other wools left over from last fair sold at a ½d. down in price.

Jedburgh.

At the Rink Wool Fair held at Jedburgh on Tuesday, the farming interest was very well represented, but buyers were not drawn from so wide a district as used to be the case. At the opening of the market business was slow, mainly because an agreement as to terms could not be arrived at; and in the end a few of the farmers were not satisfied with the prices offered, and left the market without selling. A fair number of clips were, however, disposed of. For half-bred, prices were slightly easier than they have been, but Cheviot was quite firm. On an average the price for half-bred ewe may be quoted at from 23s. 6d. to 24s. per stone; for one-quarter to one-third hogg, 24s.; while for Cheviot, which has shown a remarkable advance and has still a steady market, the price was about 26s.

Langholm.

This old-established Border fair for the sale of Cheviot wool was held on Wednesday. Trade was slow at the start, but eventually the usual amount was disposed of at excellent prices, the clips bringing from 23s. to 26s. per stone of 24 lb., a rise of 4s to 5s. During the past three years the price of Cheviot wool has more than doubled.

The Royal Agricultural Society.

New Council.

Below we give, as far as is possible, a complete list of the members of the new Council. For the divisions of Dorset, Essex, and South Wales no nomination has been received, and the vacancies in these divisions will, therefore, fall to be filled up by the new Council under By-Law 90.

Bedfordshire.—John Howard Howard, St. Mary's House, Bedford.
Berkshire.—George Adams, Royal Prize Farm, Faringdon.
Buckinghamshire.—Ernest Mathews, Little Shardeloes, Amersham.
Cambridgeshire.—C. R. W. Adeane, Babraham Hall, Cambs.
Cheshire.—Sir Gilbert Greenall, Bart., Walton Hall, Warrington.
Cumberland.—Joseph Harris, Brackenbrough Tower, Carlisle.
Derbyshire.—John T. C. Eadie, The Knowle, Hazelwood, Derby.
Devonshire.—Mr. John Henry Hine, Pomphlett Farm, Plymstock.
Durham.—Christopher Middleton, Vane Terrace, Darlington.
Gloucestershire.—Lieut.-Colonel J. F. Curtis-Hayward, Quedgeley House, Gloucester.
Hampshire.—The Earl of Northbrook, Stratton Park, Micheldever.
Herefordshire.—A. P. Turner, The Leen Pembridge.
Hertfordshire.—Richardson Carr, Estate Office, Tring.
Huntingdonshire.—John Rowell, Manor Farm, Bury, near Huntingdon.
Kent.—T. L. Aveling, Boley Hill House, Rochester; and F. S. W. Cornwallis, Linton Park, Maidstone.
Lancashire (two).—T. H. Miller, Singleton Park, Poulton-le-Fylde; and William Harrison, Hall House, Leigh.
Leicestershire.—J. P. Cross, Catthorpe Towers, Rugby.
Lincolnshire.—William Frankish, Bracebridge, Lincoln.
London (three).—John Thornton, 7, Princes' Street, Hanover Square, W.; Ralph Charlton Palmer, 9, Little Stanhope Street, Mayfair, W.; and William Arthur May, 1, Essex Street, Strand, W.C.
Middlesex (two).—Ernest W. Shackle, Redleaf, Hayes; and George Taylor, Cranford, Middlesex.
Monmouthshire.—Richard Stratton, The Duffryn, near Newport, Mon.
Norfolk.—Herbert Tallent, Westacre, Swaffham.
Northamptonshire.—Sir Charles V. Knightley, Bart., Fawsley, Daventry.
Northumberland.—George Gray Rea, Middleton, Wooler.
Nottinghamshire.—Claude M. S. Pilkington, Wollaton, Nottingham.
Oxfordshire.—Robert W. Hobbs, Kelmscott, Lechlade.
Rutland.—S. N. Bankart Hallaton Hall, Uppingham.
Shropshire.—Thomas Stephen Minton, Montford, near Shrewsbury.
Somerset.—R. Neville Grenville, Butleigh Court, Glastonbury.
Staffordshire.—Mr. Richard Powell Cooper, Shenstone Court, Lichfield.
Surrey.—The Earl of Onslow, K.C.M.G., Clandon Park, near Guildford.
Suffolk.—Alfred J. Smith, Rendlesham, Woodbridge.
Sussex (two).—Duke of Richmond and Gordon, Goodwood, Chichester; and Walter F. Ingram, 2, St. Andrews Place, Lewes.
Warwickshire.—Howard P. Ryland, Moxhull Park, Erdington, Birmingham.
Westmorland.—Mr. Christopher W. Wilson, Rigmaden Park, Kirkby Lonsdale.
Wiltshire.—Henry Herbert Smith, Bowood, Calne.
Worcester.—E. Vincent V. Wheeler, Newnham Court, Tenbury.
Yorkshire (East Riding).—Frederick Reynard, Sunderlandwick, Driffield.
Yorkshire (West Riding).—E. W. Stanyforth, Kirk Hammerton Hall, York.
Yorkshire (North Riding).—William Scoby, Hobground House, Sinnington, York.
Glamorganshire.—Robert Forrest, St. Fagan's, Cardiff.
North Wales.—R. M. Greaves, Wern, Portmadoc.
Scotland.—Sir John Gilmour, Bart., Montrave, Leven, Fife.
Ireland.—Richard George Carden, Fishmoyne, Templemore, Tipperary.

The Contested Seats

A meeting was held, on Monday, the 24th, of the Sub Committee Sir John Thorold, Bart. (President), Lord Middleton, and Sir Nigel Kingscote appointed to supervise the arrangements for the election of the new Council of the Royal Agricultural Society, and to superintend the counting of the voting papers, with the assistance of the three auditors of the Society's accounts appointed by the members, who had been invited to act as scrutineers.

As a result of the voting, the following candidates received a majority of votes, and are, therefore, under By-law 85, "considered to be elected to be Ordinary Members of Council":—

Mr. C. R. W. Adeane, of Babraham Hall, Cambs. (Cambridgeshire).

Mr. John Henry Hine, of Pomphlett Farm, Plymstock (Devonshire).

Lieut.-Colonel J. F. Curtis-Hayward, of Quedgeley House, Gloucester (Gloucestershire).

Messrs. Thomas Horrocks Miller, of Singleton Park, Poulton-le-Fylde, and William Harrison, of Hall House, Leigh (Lancashire).

Messrs. John Thornton, of 7, Princes' Street, Hanover Square, W.; Ralph Charlton Palmer, of 9, Little Stanhope Street, Mayfair, W.; and William Arthur May, of 1, Essex Street, Strand, W.C. (London).

Mr. Robert W. Hobbs, of Kelmscott, Lechlade (Oxfordshire).

Mr. R. Neville Grenville, of Butleigh Court, Glastonbury (Somerset).

Mr. Richard Powell Cooper, of Shenstone Court, Lichfield (Staffordshire).

The Earl of Onslow, G.C.M.G., Clandon Park, near Guildford (Surrey).

The Duke of Richmond and Gordon, of Goodwood, Chichester; and Mr. Walter F. Ingram, of 2, St. Andrews Place, Lewes (Sussex).

Mr. Christopher W. Wilson, of Rigmaden Park, Kirkby Lonsdale (Westmorland).

SHOWS

Tunbridge Wells.

The annual show of the Tunbridge Wells and South-Eastern Agricultural Society took place on Thursday and Friday last in their permanent showgound. A good entry had been obtained in the various sections, and the show was quite up to the average of previous exhibitions, while the attendance was, as far as we could judge, satisfactory.

Heavy Horses.

The horse section so far as it relates to the heavy horse classes was not so strong a feature of this show as we have sometimes seen it. However, although some of the classes were a bit below the average, it is satisfactory to report that there were some real good horses amongst the exhibits. Mr. Walpole Greenwell won with Marden Harold in the senior class for stallions, with Grimsargh Drayman from Mr. Saillard's as second, a pair of very serviceable horses. Mr. L. Salomons took first honours in the two-year-old class with an excellent colt Norbury Wizard, and in the yearling colt the same breeder was first with a real good one in Norbury Minstrel, second honours going to Mr. Walpole Greenwell for Marden Premier, a well bred weighty colt. The eleven entries in the mare and foal class included some very good ones. Sir E. Stern's winner Ladysmith II. was one of the right sort and moved well. The well known Tatton Tapestry from Mr. R. W. Hudson's stud came second, and then came that grand mare, Childwick Youno, as r.n., whose present owner is Mr. L. Salomons. The foal class that followed was a good one. Sir E. Stern won with Harrysmith, by Dunsmore Jameson; Mr. L. Salomons with a filly out of Childwick Youno, by Hurdle Champion; and Mr. R. W. Hudson r.n. with Danesfield Tapestry. The barren mare class had seven entries. Here Marden Fan, a typical Shire, won for Mr. T. Jones, with Mr. R. W. Hudson's Blythwood Laurel in close attendance, leaving the r.n. for Wern Blossom from Mr. L. Salomon's stud. A useful class of three-year-old fillies was headed by Marden Lily, from Mr. Walpole Greenwell; but Norbury Pearl, from Mr. L. Salomon ran very close as second, leaving the r.n. for Mr. F. Manwaring's Ninna. Mr. T. Simpson Jay won first honours in a capital class of two-year-olds with Johnson Fairy Queen, but Mr. L. Salomon's Norbury Duchess was a bit out of luck to have to take second honours here. Marden Pride came r.n. for Mr. W. Greenwell. Lord Hothfield's yearling filly, first in her class, has fine merit and excellent bone; Norbury Jewel, the second winner for Mr. Salomons, also a very promising one; and in Swaylands Princess, from Mr. G. Drummond's stud, the r.n. was found a rare good filly.

The five classes open for tenant farmers in Kent, Surrey, or Sussex seemed a very good average entry. The leading winners were Messrs. R. Burrow, D. Harris, F. Manwaring, and F. de B. Collard. Mr. L. Salomons won the special prize for best colt with any foal bred in Kent, Surrey, or Sussex with that fine filly by Hurdle Champion out of Childwick Youno; and Mr. P. D. Harris was r.n. with Sherndon Harold.

Sir E. Stern, with Ladysmith, won the Shire Society's gold medal, and Mr. R. W. Hudson was r.n. for the same with Tatton Tapestry.

Hunters.

This section was a good one. The entries were fully up to the average, and quite a number of first class horses were found in the several classes which numbered eight. Sir M. R. Burrell's Speculation, first in a real good brood mare class won the Hunter Society's gold medal; followed by Homely Lass, from Mr. C. Kelway Bamber; whilst Gold Leaf and Glowworm, third and fourth winners, owned by Messrs. E. W. Robinson and J. A. Mullins, another pair of first class mares were found. The foal class had nine entries, a choice lot, particularly the winner, Mr. J. A. Mullin's Radium. In the riding classes Tennis Ball won first for Mr. H. M. Mackusick: and amongst the other winners were Draco, from Mr. J. P. Honning. The three-year-old class had its winner in Mr. J. A. Mullin's Shono, with Primrose Day, from Mr. E. W. Robinson as second. A small class of two-year-olds were led with Mr. J. A. Mullin's Paleface; and that for the yearlings had Sweet Alum, owned by Mr. C. Kelway Bamber, as its winner.

Four classes for Polo or Riding Ponies secured an excellent entry. Bold Marco led for Mr. J. Barker in the stallion class, and won the special for best polo stallion. Mr. Barker won in the brood mare class with Sapphire, with Miss L. C. Standish's Silver Star in close attendance, to which also went the medal for best brood mare, and this fine mare subsequently won in the mare and gelding class. The second and r.n. in this class were owned by Mr. O. T. Price, whose mare, The Nun, won the special for best mare other than a brood mare.

Hackneys.

Several of the classes in this section were judged the second day; but in these as in those mentioned below, an excellent entry was secured. Mr. W. B. Tubbs' Administrator won in the stallion class, with Cuddington, from Mr. T. Radmore second. Mr. W. B. Tubbs, with that grand mare Rosadora, came in first in the brood mare class; Mr. E. J. Allen, with Lady Wilmington, taking the second place. Atwick Flirt won for Mr. J. T. Mitchell in the under 15.2 hands class, Mr. E. J. Allen's Croydon Surprise taking second honours. The three-year-old class had Sir Walter Gilbey's Bold Clara for its winner, Mr. H. Le Marchant taking second with Green Girl. The fine lot of two-year-olds were led by Polllinaris, from Mr. R. P. Evans' stud, Sir Walter Gilbey's Dashing Princess taking second honours. Cristolian won for Mr. Evans in the yearling class, and Mr. J. E. Allen came second with Country Primrose, a nice typical filly. The hack class obtained a very first class entry. Mrs. W. C. N. Chapman was the leading winner. The Ladies E. and D. Hope and Mrs. A. J. Beale were leading winners in the interesting and good classes of Shetland ponies.

Cattle.

This section, taken as a whole, was one of very good merit indeed. We were pleased to note the larger support secured in the Sussex classes, and the keen competition seen generally all through the section. The Shorthorns were first to enter the ring, and here, in the Old Bull classes, Messrs. Denny, with that very fine bull, Ascot Constellation, took leading honours. This is a bull of great merit and fine character. Foundation, from the Marquis of Camden, came next with Ascot Francis r.n. from Messrs. Green Bros. Ten entries made up a good class of yearling bulls. Mr. R. W. Hudson's Old Daisy Bull 6th was first, followed by Millhill's Favourite from Mr. J. Colman's herd. A useful lot of tenant farmer bulls was headed by Coral Beard from Messrs. Robinson's. Millhill's Favourite won for Mr. J. Colman the Shorthorn Society's prize for the district, and Mr. T. Jones, with Maiden Douglas, took the r.n. The cow class, with its fourteen entries, was a good one. Hawthorn Flower, a fine specimen of her breed, won first honours for Mr. J. Colman. This excellent cow was also first in the class of milking Shorthorns. Another nice type of the breed was found in Mr. R. W. Hudson's Jenny Lind's Princess, whilst Ardfoot Belle, another from Mr. Colman's herd, was r.n. Mr. A. Hiscock took second honours in the milking class with Golden Rose, and Mr. J. Colman came r.n. with Ada 2nd. This latter breeder made short work in the two-year-old class, for he won both first and second honours with two very useful heifers, Mabel 2nd and Gatlin Rose. The yearling heifers had for their winner a beautiful white sweet briar bred by Mr. H. Y. C. Brassey, and exhibited by Mr. R. J. Balston. This was probably one of the

Shetland Pony Mare Corona.

Winner of First Prize at the Tunbridge Wells Show last week.

FOALED JUNE, 1902; SIRE ODEN, 32, DAM HOPLEMURONIA, 130; BRED BY AND THE PROPERTY OF THE LADIES E AND D. HOPE, GREAT HOLLENDEN, UNDERRIVER, SEVENOAKS.

THE DAIRY.

Chester Cheese Fair.

Mr. R. Challinor reports as follows concerning the Cheese Fair at Chester last week:—Pitch about 50 tons; large attendance of buyers being present a brisk trade ensued. Finest lots made from 52s. to 57s.; medium 46s. to 50s.; lower grades down to 42s.

Preston Cheese Fair.

The July Cheese Fair at Preston was held on Wednesday, and was largely attended, but the supply was exceptionally small for the season owing to extensive country buying and limited production. A fair business passed at prices showing a slight advance on last month, medium cheese making from 47s. 6d. to 50s., best 52s. 6d. to 55s., with one of two lots reaching 60s. per cwt.

best Shorthorns in the show. Another white, Mr. J. Colman's Snow Queen, made a good second. The Colman Challenge Cup for the best four Shorthorns, one from each class—a fresh competition—was one of great interest. Another fine animal owned by Mr. J. Colman won the honour, Messrs. Denny taking r.n.

Sussex.

Here the competition was a close one, and one far more keen than has been the case in recent years. The Hon. R. P. Nevill won with Mayor in the Old Bull class, followed by Mr. W. Lord's Brown Prince. The two-year-old class was an excellent one, Mr. Nevill's Bonfire Prince II. taking away his due first honours, but Mr. C. J. Lucas, with Lord Eric, pressed him very close indeed. The yearling bull class afforded that grand young bull, Shollingen Bewbush to secure yet another honour for Earl Winterton. Mr. E. E. Braby, with another very promising youngster, Lord Dumgewick 5th, took the second honours, and a neat and well-formed young bull, Patsy Major, came in r.n. for Mr. C. H. Hoare. That grand old cow, Old Mayflower 8th, won once again first honours for the Hon. R. P. Nevill, Fancy, another fine type of her breed, taking second honours for the Earl of Derby. The three-year-old class had but two entries. These were those two grand heifers from Mr. W. F. Winch's herd—Warden Lady and Tilsden Damsel—and they won first and second honours. Smileput 5th, a grand heifer, won first honours for Earl Winterton in the two-year-old class with Bewbush Wind 4th from Mr. Saillard as second. The yearling heifer class was particularly strong. The Earl of Winterton won with Sunlight 7th, a choice heifer, followed by Gwendolin of Lynwick from Mr. John Angier's herd, leaving the barren honour of r.n. for Mr. Saillard's excellent heifer Bewbush Woodmancote.

Other Breeds.

The Aberdeen Angus were represented by an entry of choice breeding and pedigree, being of small numbers. Danesfield Jester was easily the first in the Old Bull class and special as best of its breed; Dianthas 5th, from Mr. J. H. Bridges's, taking second. This breeder won with Judge of Hursley in the yearling bull class. The cow class was one of superior merit. Here two from Mr. G. A. Cooper's herd were first and third, leaving the second place to Mr. G. Drummond's Effuljust II. of Danesfield. Enamel of Dalvey won first honours for Mr. G. A. Cooper in the two-year-old class, and Pride of Swaylands, a choicely-bred and typical heifer, took second for Mr. G. Drummond. Mr. J. H. Bridges was first and second with Queenie of Longshott and Parthia of Longshott, two grand yearling heifers. The Jersey entry was always one of superior merit and equality. Lady de Rothschild won the challenge cup for best female with Golden Hours, who, together with her herd mate, were first and second in a very strong class of cows. The same owner took r.n. for this honour with her first-prize three-year-old heifer Tambourette, whose new mate, Coral, was third in this class. Mr. R. H. Cobb, A. Miller Hallett, Mr. C. McIntosh, J. Joicey, and Captain L. G. Gisburne were also leading winners. The bull classes were hardly so large, but there was fine merit all through. The winning two-year-old bull, Mr. A. F. Perkin's Dort, won the Wadhurst Challenge Cup for best bull in the section, Mrs. C. McIntosh's Polly Gum, winner in that proud class of yearling bulls, taking the r.n. for this honour. Lady de Rothschild, Admiral the Hon. T. S. Brand, Mr. J. B. Hawkey, Mr. J. C. Drew, and J. Joicey were amongst the other leading winners.

The Guernseys secured a representative entry, Mr. G. A. Hambro, who won in the cow class first and second honours with Queen of the Roses and Golden Cherry, two beautiful cows, in the two-year-old heifer class with Hayes Golden Cherry, and first and second for yearling heifers with Hayes Olive 2nd and Hayes Sultana, was the leading winner. Messrs. H. Fitzwalter, Plumpton, F. Hargreaves, J. P. Morgan, and J. W. Martel were the other leading winners.

Lady Greenall, the Countess De-la-Warr, and Mr. T. Waite were the leading winners for Kerries. The Duchess of Devonshire and Messrs. De Bertodano, and J. Snelgrove were leading winners in the very excellent and good entry of Dexters.

Sheep.

A very typical and first-class lot of Southdown sheep were found in this section. Mr. E. Ellis won first and second for two shear rams, his winner taking r.n. for the best male, and r.n. for the Blythwood Bowl for the best Southdown in the yard. Mr. E. Ellis was also second for ram lambs and first and third for yearling ewes and first for ewe lambs, taking also the medal and r.n. for the best pen of females in the show. Mr. E. Henty won first honours for the yearling rams beating here Mr. E. Ellis's grand entry with the narrowest of margins. Col. W. W. Hammond, who won first honours in the ram lamb class, had a grand lamb, probably one of the best of its age breed and sex we have seen out this year. This noble masculine ram lamb was made winner of the medal for the best male Southdown and the Blythwood Bowl for the best specimen of its breed. Mr. J. Colman was close up in all the classes, and he also came in r.n. for the Colman Challenge Cup for the best pair of Southdown exhibits, one being taken from each class. This award was won by Mr. E. Ellis, whose quartette when out for inspection disclosed that marked uniformity of type and character that shows how well this grand old flock has been bred and selected.

The Kent or Romney Marsh breed has never, we consider, been represented by a better or more typical entry. The awards were not in all cases such as we approve of, but it must be a matter of great satisfaction to Mr. H. Walters to be able to secure with a ram bred by Mr. A. Amos, first honours in the two-year-old class, in which Mr. H. Rigden came second and Mr. F. Neame r.n. Mr. Rigden won again in the yearling rams, followedby Mr. C. File, whose ram was of superior merit. Mr. F. Neame claimed the leading honours in the ram lamb class, but Mr. C. File who came in second and third, was only beaten with a very narrow margin. In the yearling ewe class Mr. F. Neame led; Mr. C. File was second and Mr. W. Millen r.n., but Mr. C. File's pen that has won all through the season was not in the award list, a result that is beyond conception, because a better, more level, and typical pen we have not seen this year. Mr. F. Neame won in the ewe lambs with a fine compact pen, followed by Mr. H. Rigden's excellent pen.

Pigs.

The Berkshire breed was strongly represented. Mr. G. T. Jurman won first and third honours for boars with two fine animals, Hopemoor Mikado and Hopemoor Duke, first for sows with that excellent Compton Rose, and first and r.n. for pairs of gelts. The Duchess of Devonshire was second for boars with that nicely marked and good fleshed boar Polegate Dollar, first for pair of boar pigs, second for sows with Polegate Dido. Mr. A. Hiscock took second with a real good pair of gelts. In the other breed classes Mr. Sanders Spencer was first throughout with a very fine and well bred lot of pigs.

Produce.

This section was but meagrely catered for, in three classes of butter there were some good makes, but the great heat was much against their appearance. First prizes in two classes were won by Messrs. R. Underwood, of Berkhamsted, while the best in the tenant farmer class was Mrs. Baines, of Henfield. A couple of classes for home-made bread brought a fair entry, and concluded the section.

Cambridgeshire.

Unpromising weather and the fact that harvesting was being carried on somewhat extensively in the surrounding districts affected the attendance of visitors at the show of the Cambs and Isle of Ely Agricultural Society at Cambridge on Thursday, but happily the general returns at the end of the day were anything but disappointing, and, considering all things, the organisers of the show had every reason to feel satisfied with the day's results. Those who did put in an appearance had quite a tropical experience—vivid lightning, followed instantaneously by crackling peals of thunder and deluging rainfall. The morning had been sultry and threatening, and about three o'clock, just after luncheon had been concluded on the show ground, the storm broke over the district, and a perfect deluge of rain followed. Most of the ring competitions were carried on in the pouring rain, whilst the turn-outs were judged during the thunderstorm.

The site of the show was the same as on previous visits to Cambridge—viz., the admirably suited paddocks adjoining Brooklands, kindly lent by Mr. G. E. Foster. The entries were good, showing an increase of ten over last year's total, when the exhibition was held at March. On that occasion the aggregate was 396, the previous four years being—1903, Cambridge, 417; 1902, Chatteris, 418; 1901, Cambridge, 416; 1900 Ely, 390. The quality and nature of exhibits in the various sections will be gathered from the following details of the awards, etc.:—The Shire horse made undoubtedly one of the chief attractions of the show, for not only were the exhibits numerically strong, but of good quality, the competitions being in many cases keen. The best of the Shire stallions foaled previous to or in 1901 turned out to be Mr. J. Rowell's Aldeby Coeur de Lion, a celebrated winner, which was easily first against the Cambridge Shire Stud Company's exhibit. Mr. W. Richardson, of Doddington, was both first and second with three-year-old stallions, Mr. H. Bultitaft, Ely, being the winner in the class for the entire colts foaled in 1903; with the same animal he won the tenant farmers' prize. His exhibit in the class for colts foaled in 1904 was beaten by Mr. J. Rowell's Bury Best Quality. The class for Shire mares with foal at foot was a strong one, a close contest ending in favour of Mr. H. Towgood, of Little Shelford, with Rolleston Fuschia, Mr. C. Morbey, of Soham, and Mr. T. Gee, of Wrydelands, Thorney, being respectively second and reserve. The last-named, however, won the tenant farmers' prize in the next class with the same animal, Wrydelands' Sunshine, which secured the Shire Horse Society's medal at the Thorney Show. In the brood mare class, Mr. Gee added another to his many wins with Wrydelands' Starlight, which turned out to be one of the best animals in the ring, and was appropriately awarded the championship. The reserve went to Mr. C. Morbey's Integrity, a beautiful black animal of undeniable quality. Mr. Morbey was an easy winner with Barrow Gem in the filly class foaled in 1903, whilst of those foaled in 1904, Mr. H. Towgood's second Suffolk winner, Shelford Luck, took premier place.

The hackney classes were fairly well filled, but the hackney stallions foaled in 1901 were not a strong lot. First prize was given to Mr. R. G. Heaton, Chatteris, for Spuds, and the same exhibitor, with Bolsover, won first in the 1902 stallion class, and with the same animal captured the champion prize offered by Sir Walter Gilbey. In the open class for hackney entire colts foaled in 1903, Mr. W. Flanders won with an animal that looks like making a fine stallion. The hackney mare with foal at foot class was a somewhat poor one, but had an excellent animal at its head, namely, Bury Duchess, shown by Mr. J. Rowell. There was a very nice lot of fillies, the best of which was Mr. R. Carter's Wood Nymph, which was first in both the open and tenant farmers' classes. Of the hackney fillies foaled in 1903, Mr. R. G. Heaton secured first and champion with Sedgeford Pretty Polly, which was more like a brood mare: the second and reserve, belonging to Dr. H. C. Meacock, North Brink, Wisbech, was the best goer. The fillies foaled in 1904 were a useful lot, the leading one of which was Mr. C. E. E. Cooke's Lilladora. The colt foals were a rather ordinary lot, the leading animals being Mr. A. Towler's, of Trumpington, who was first and second in the open, and first in the closed classes, Mr. J. Tibbitt, of Doddington, took the first awards for filly foals in both classes. Saddle and harness horses did not provoke any very serious competition, the leading winners being Mr. W. Flanders, Ely, Mr. R. G. Heaton, Mr. R. Baxter, Walsoken, Dr. H. C. Meacock, and Mr. J. Towler, Bottisham. Hunters were fairly well represented, the principal awards falling to Mr. J. H. Stokes, Great Bowden, Market Harborough, who, besides taking two firsts, secured the championship.

Cattle were not over numerous, and were not so good as they might have been. Six Shorthorn bulls, calved in or after 1900, were brought out in the first class, the winner being Messrs. S. Spencer and Son's beautiful roan bull, already the winner of a good many first prizes. Captain Duncombe came a good second with Crown Diamond, a massive bull, the winner of numerous prizes. The best representative in the class for Shorthorn cows of any age was found in Mr. H. S. Leon's Roseleaf, a splendid animal that has scarcely ever been beaten. Captain Duncombe again took second place with a useful animal, bred in Scotland, that was a bit patchy. In Shorthorn heifers Mr. H. S. Leon again supplied the winner, a pretty red, and a very level animal.

There was not very keen competition in the classes for the Channel cattle, Mr. Hargreaves, Gamlingay, taking all the prizes with but one exception. There were two classes for dairy cows, the first being for those having produced one live calf. In this instance, Mr. W. Tebbs, of Peterborough, was first with a very good cow for dairy purposes, Mr. W. Nesbit, of Radwinter, coming in second. The best of the cows eligible for registration was shown by Captain Duncombe, his specimen being a fine three-year-old heifer, with wonderful back for her age. Messrs. Spencer and Sons, who were second, had a nice cow, but it was too small.

Sheep were rather fewer than last year, but the quality was good. The Suffolks occupied the foremost position, though there were a choice lot of Southdowns, all shown by the President, Mr. C. R. W. Adeane, who had absolutely no competitors, and consequently captured all the prizes for this breed. The entry of Wensleydale sheep were confined to two exhibitors, who brought very good specimens of the breed. The winner in each of the three classes was Mr. W. J. Green, Childerley Gate, Wensleydale. The Suffolks were a splendid lot. The winner of the four rams entered was Mr. M. G. Hale's, Claydon, Royal winner, Mr. R.

Barclay, of Higham, being both second and reserved. Mr. Hale's ram was awarded the Suffolk Sheep Society's silver medal, besides winning the championship award for the best ram bred by a tenant farmer. There were four pens of three black-faced ram lambs, and it was a curious circumstance that there was one weak specimen in each pen. Messrs. Traylen were clear winners, but there was very little to choose between the second and reserved pens, owned respectively by Mr. M. G. Hale and Mr. R. Barclay. Mr. R. Burrell, of Westley Hall, Bury St. Edmunds, had a very good pen, but unfortunately, having lost one of his lambs during the past week, he was unable to supply the vacancy with a really good specimen. In the ewe lamb class, Messrs. Traylen's, which the judge considered the champion lambs of the show, under a mistaken notion, were awarded the champion prize; but as it was afterwards found only Cambridgeshire and Isle of Ely competitors were eligible, it was given to Mr. H. J. Briggs, of Babraham, the only exhibitor of the Hampshire breed. The winning pen was closely followed by Mr. R. Barclay's ewes.

Herts.

That the show of the Herts Agricultural Society is as popular as ever was proved last week by the fact that, in spite of two other shows taking place upon the borders of its district, simultaneously with its own annual show at Hatfield, it was able to command a large number of entries and as numerous an attendance of supporters, and this, although the weather was far from favourable, a severe storm being experienced during the afternoon.

The value of the prizes offered in competition in the various classes was stated to be £1,100, and amongst the new prizes offered this year were four handsome championship cups given, to be won outright, by the president, the Marquis of Salisbury. The entries, however, showed a falling off of 157, but this is not surprising, seeing that the Cambridgeshire and Tunbridge Wells Shows were being held at the same time. The most noted falling off was amongst the nags, which were fewer by 33, as compared with last year's figures—namely, 214, against 181. Agricultural horses were fewer by 18—174 as compared with 192; Shorthorns fewer by 10—113 against 123; pigs fewer by 10—47 against 57; and butter showed a decline of eight in the number of entries —33 against 41. In two sections only, those devoted to sheep and honey, was there an increased entry. In the former department there were 70 entries, as against 58 last year and 57 in 1903, and in the latter 18, as compared with 14 last year. The Channel Islands cattle stood at the same total as last year—63.

The judges were:—Agricultural horses: Mr. T. Ewart, Dunsmore, Rugby; Mr. E. H. Cartwright, Keddington Grange, Louth; Mr. W. Howkins, Hillmorton Grounds, Rugby; and Mr. R. Simpson, Wilbarston, Market Harborough. Hunters: Hackneys, ponies, etc.: Lord Alfred Fitzroy, Whittlebury, Towcester; Mr. A. Jordan; Mr. W. Foster, Mel Valley, Moseley, Birmingham; and Mr. James Hornsby, Laxton Park, Stamford. Cattle: Mr. W. Crosland, Buscot Park, Faringdon, Berks; Mr. J. Paisley, Sandy, Beds; and Mr. J. Stratton, Wick Down, Broad Hinton, Swindon. Channel Island breed: Mr. W. Adams, Woodside, Loughton; and Mr. Ernest Matthews, Little Shardeloes, Amersham. Sheep: Mr. George Judd, Cocum, Barton Stacey, Hants. Pigs: Mr. W. T. Hall, Highclere, Newbury.

The section of the show devoted to agricultural horses was deprived of the presence of many of the leading animals which were noticeable in the show ring a few years ago. The death of Sir J. Blundell Maple robbed the society of one of its most constant supporters, and the withdrawal of such Shire breeders as Lord Rothschild, Mr. Crisp (who has given up breeding Shires), and the Earl of Verulam, accounted for the absence from the show ring of many of its leading habitues. But while the open classes were lacking in this respect, the farmers' classes were never better than on the present occasion. Mr. J. Bell, of Cattlegate, gained distinction with his mare, Cattlegate Ruby, an excellent mare of true Shire type, which not only beat all her opponents in the competition for the Aldenham Challenge Cup, given by Mr. C. T. Part, and the Shire Horse Society's silver medal, but carried off first prize in her class, and in company with Cattlegate Ruth and Cattlegate Headlight, two of her offspring, obtained Messrs. Young Bros.' five guinea cup. She was also reserved for the president's Champion Cup and the Tring Park Challenge Cup. Cattlegate Headlight, her bay foal, was first both in the open and local classes for yearlings. It was in the class for entire colts, foaled in 1903, that the champion tenant farmer's animal was found in Mr. S. Pigg's Lockinge Blagdon, a colt of excellent type, with good legs and feet and a profusion of hair, bred by the exhibitor. He has been frequently exhibited, and has generally succeeded in obtaining a place of prominence, and on this occasion added to his laurels by being awarded the Tring Park Challenge Cup. Mr. J. Lloyd's challenge cup went this year to Mr. S. P. Bullen's Dragon, which also claimed first prize in its class and first, in association with the same exhibitor's Duke in the class for pairs of geldings. One of the most successful fillies was 'Ware Chance, sent by Mr. W. Hammond, which obtained three first prizes and secured the reserved card for the Aldenham Challenge Cup.

The classes in the hunter section were all very satisfactory, those for yearlings being especially good. The Hunters Improvement Society's medal was accorded to Veda, a smart animal shown in the three-year-old hunter class by Messrs. J. I. Kirkby and Son, of Sawbridgeworth, which was placed third in its class; and the Imperial Hunter Stud Book Society's silver medal for the best hunter mare was given to Mr. J. R. Russell's Diana, reserved in its class. Amongst the polo ponies, Mr. S. Gurney Shephard, jun., had things entirely his own way, all three of the prizes offered falling to him. The Hackneys were, taken generally, a very useful lot, although, with regard to the Hackneys proper, they were a little short of action. The judging in the light horse classes took place, as usual, in the large ring, and was witnessed by a considerable number of interested spectators. The jumping was looked forward to with much eagerness, but many were disappointed, as the rain, which came on just before the competition commenced, greatly marred the progress of the event. Owing to the rain, the bulk of the onlookers had to take refuge in the tents, and could only catch a glimpse of what was going on. The jumping, too, was not so good as usual by far, many of the competitors failing to go over the obstacles, which were in some cases knocked down. On several occasions, too, the horses refused to jump at all.

The classes for cattle have for some years been as strong as any classes in the show, and this year they were again excellent, comparing very favourably with former years. The judges were particularly pleased with the young animals exhibited, the classes for these being very strong. The classes for Shorthorns showed some fine animals, and Mr. C. E. Wodehouse, of Woolmers, Hertford, took first in the class for cows calved previous to 1902 for the sixth year in succession. Mr. Wodehouse has been remarkably successful with his animal, Coronet 10th, having taken prizes at the Royal Show both this year and last. In the class for bulls, Mr. C. F. Raphael's Duke of Strathtay secured first, and was also awarded the prize for the champion animal in the show. In this class, Mr. A. D. Acland secured second with another of his animals, Duke of Barrington 84th. Mr. C. F. Raphael was a prominent exhibitor in the section for cattle, and was successful in securing several firsts. In the Channel Island breeds the classes were all strong, and the judges were particularly pleased with the animals exhibited. Lord Rothschild exhibited largely in the classes, securing quite a number of firsts in succession, and, with the exception of two classes, he swept the board of firsts. Mr. A. Beit, of Welwyn, secured first in the class for bulls calved previous to 1904, with his animal Alex.

The sheep were characterised by the judge as a very nice lot. The Hampshire Downs, as usual, led the way, producing the largest and strongest classes. Mr. T. F. Buxton was represented by several excellent pens of the breed, with which he has scored so many successes at the leading shows in the neighbourhood. He not only carried off first prize in all four of the Hampshire classes, and seconds in three of them, but secured also the President's Champion Cup for the best pen of sheep in the show. The three Southdown classes were well filled, Sir J. Wernher and the Right Hon. T. F. Halsey leading the way amongst the prize-winners. In the Shropshire classes, which exhibited considerable improvement upon the show of previous years, Mr. R. P. Cooper, Mr. H. F. Woollatt, and Mr. J. Pearman shared the honours.

The show of pigs was very encouraging. The Berkshires were particularly prominent, being an increase on any previous show, and the judge here reported a marked improvement over this section of the show two years ago, when he acted in the same capacity. The Hon. A. Holland-Hibbert, who won the champion prize in this section the year before last, secured the champion prize again this year with the same animal. Other interesting features were shepherd's dogs, butter, poultry and pigeons, honey, etc.

Durham County.

Of late years the Durham County Agricultural Society has been most unfortunate as regards the weather experienced for its annual show, so that to have a brilliantly fine day, as was the case on Wednesday last, was quite a welcomed change. The show was held at South Shields, and a magnificent site, off the New Sea Road, to the south of the Marine Parks, consisting of about fifteen acres, was granted by the Corporation of South Shields, free of any cost to the Society. A more suitable or more pleasantly situated site could not have been secured, for, from the show ground, could be obtained an uninterrupted view of the coast line, far to the north and to the south, but a few trees would have afforded welcome shelter from the heat of the sun. The show itself was a splendid one all round, the number of entries established a record in the history of the Society, and showed a substantialy improvement on last year's show at Lambton Park, the total number being 1,430, as compared with 993 in 1904. The entries in the various sections compared with last year were:—

	1905.	1904.
Cattle	59	36
Sheep	57	1.2
Agricultural horses	175	159
Hunters, hackneys, and driving	252	144
Leaping	15	9
Pigs	—	—
Dairy Produce	31	61
Pigeons	215	91
Poultry	305	240
Dogs	267	110
Totals	1 430	993

Shorthorns were well up to the standard quality of the leading county exhibitions, including specimens of well-known herds in Durham and Northumberland, and from still further north. The most successful of the importations was Ratcheugh Witch, from Mr. Bell's Alnwick herd. She is a beautiful roan daughter of the famous Baron Abbotsford, and has taken many coveted honours this season, in addition to the second at the Royal. On Wednesday she gained the championship cup for the best breeding animal. The contest for the trophy lay between her and Mr. C. E. Hunter's Polled Angus heifer, Ruritania, which was first and champion female at the Royal. If rather on the small side, she is a particularly well-shaped animal, though the Shorthorn appeared better in substance, and had five months advantage in age. Most of the Northumberland winners came into the ring, and as a general rule previous verdicts were sustained, or only slightly varied through the advent of fresh competitors. The massive three-year-old bull, Baron Butterfly, belonging to Mr. A. F. Nichol, came out at the head of a small but very strong class, the runner-up being Mr. George Harrison's Pioneer, a roan with splendid Shorthorn characteristics, sired by Ronald, the champion of the Royal and Highland Shows in 1904. In the yearling class Lord Polwarth's British Renown, the winner at Park Royal, was again in the foremost place, and Mr. George Harrison secured the second with Royal Ensign, which was, in addition, given the Shorthorn Society's special prize for the best bull calved in 1904. Another of Mr. Harrison's bulls, under a year, won premier honours on its first appearance in the show-yard; the same owner's Ursula Raglan led the way in the cow class, and Mr. G. H. Proctor's Fairy Whitesocks, a nice red, which has a good record at county and local shows, obtained the second award.

The principal exhibitors of Polled Angus stock were Messrs. Perkins and Partners, Mr. C. E. Hunter (of Selaby Hall, Gainford), and the Seaton Delaval Coal Co. (Limited). The most conspicuous winner in the section was Pundit of Preston.

Agricultural horses were a particularly strong lot, and made quite the feature of the show. Some of the best awards were carried North by Mr. William Park, of Portobello, who with such first-rate animals as his brood mare Florodora, and his bay two-year-old filly Rosadora, was deserving of all the honours he obtained. Against the former, which is by Prince of Brunstane, the Earl of Durham showed his well-known Lambton Maid, which, as at the Northumberland, made a good second among a remarkably strong lot. Mr. Park's filly, a daughter of Marmion, was awarded the open championship. Draught mares were led by Rosebud, of the Seaham Harbour Stud, and they also won in the pairs, with a couple of strong well-furnished mares, and in other classes. Some special prizes were given to tenant-farmers in the county, who managed to hold their own in the wider competition. The tenant-farmers' challenge cup went to Messrs. Turbull Brothers, of Twizell Hall Farm, Beamish.

Most of the hunting classes were thinly contested, but, thanks in a great measure to the offer of a twenty-five guinea challenge cup, the gift of Mr. J. E. Rogerson, M.F.H., the competition showed some little improvement on previous shows. This coveted trophy went to Mr. F. Walton Smith, the exhibitor of a smart light weight gelding. The best of the brood mares was Blue Garter, a chestnut shown by Mr. J. Ingledew, of Bedale. Hackneys were a fairly strong section, and the championship was carried off by Mr. Thomas Boddy, of West Auckland, with Woodhatch Connaught, a five-year-old chestnut mare shown in saddle.

Home Notes.

The Weather and the Coming Crop.

As we are getting very near to the harvest, there seems to be little doubt that, unless special hindrances should arise, a fairly abundant yield of good hops is in front of us. With but few exceptions, the reports from the plantations in every district are promising. Here and there we hear of mould and suiphuring, of red spider, and some lingering lice, with continuance of washing to a limited extent. The most prominent question is the capacity of the over luxuriant bine for development of a due proportion of fruit, concerning which there appears to be considerable difference of opinion. Despite the strong growth of laterals, much of it seecrs to be failing to put forth burr, and many experienced planters are inclined to think that the finai results will not be commensurate with present promises. All depends on the climatic conditions of August, and it may be conceded that the usual experience of English weather suggests the possibility of an early and important change from the uninterrupted sunshine we have recently enjoyed for an exceptional period. Predictions are already circulated that many wet days and nights are in store for us during next two months, and, should these be fulfilled, the present crop prospects will, of course, be materially modified.

The Borough Trade.

is consequently in a state of partial suspense. Merchants report that their customers generally refuse to entertain offers, and, although the output of beer has largely increased, prefer to lower their stock of hops to the lowest possible point before buying further. Nevertheless, inquiries are not altogether absent, and in cases where out side holders are willing to accept very low prices, a few sales have been made. The present hopes of holders are based upon the necessary demand for yearlings that is always consistent with the supply of new hops, and experience has shown that in certain seasons, when a large new crop has reduced the general value to a low point, yearlings have frequently realised much higher prices. Considering the very limited stocks of 1904's at present in hand, it is not improbable that such a variance in values may be apparent this season.

Arsenic (not) in Hops.

I am happy to say that the note of alarm sounded in the ears of hop growers by the action of certain brewers, based upon a reported regulation as to the proportion of arsenic in hops, may now be unheeded. A statement of the case for which "Lupulin" is pleased to accept one chief responsibility) was presented a short time ago by Dr. Hutchinson, M.P., to the Chancellor of the Exchequer. Subsequently the Chancellor, after consultation with the experts of his department, requested Sir W. Hart-Dyke, Mr. Lawrence Hardy, Dr. Hutchinson, Captain Foward, and Mr. Ball (Parliamentary representatives of the principal Southern hop-growing districts) to meet him. The Right Hon. gentleman stated ther that no sperial regulation had been issued by the Inland Revenue Department with respect to the amount of arsenic permissible in hops, and that samples of English-grown hops were frequently submitted to Government analysis, with the result that out of eighteen samples recently tested, eight were entirely free from arsenic, seven contained minute and negligible quantities, and one sample showed more than the 1-100th of a grain per lb. The inquiry that had arisen is therefore traceable solely to some misapprehension of the scope and effect of the usual official action in advising brewers whenever an appreciable amount of arsenic is detected in any samples of beer or material used in its manufacture.

The members of Parliament mentioned afterwards agreed upon a report on the subject, which will be published in due course, and which will doubtless be entirely satisfactory to hop planters and others connected with the industry.

All official reports and notices of the National Association of English Hop Growers are printed in the MARK LANE EXPRESS, *and current information from all parts of the world, likely to be of interest and benefit to the members of the society, and Hop Growers generally.*

Foreign Crop Prospects.

America.

Letters recently received are interesting, in so far as they give me the views of the writers; but I must confess that as they appear to be coloured according to the desires of those who are concerned in this or that direction of the course of future events, I am bound to take them with a pinch of salt, and read between the lines. The old couplet, "As the man thinks, so the bell clinks," is applicable to American as it is to English opinions. I have long ago learned that predictions as to the hop trade must be especially examined in this light. There is, however, one evident fact. The pools—at the formation of which such great results were foreseen—have failed in their mission, the bear buyers having succeeded in forcing prices down to such an extent that holders were sickened and their combinations are broken up. It appears that they did not possess from the first any solid elements of cohesion, being formed on mere promises, accompanied by entire liberty of action on the part of the individual members, thus each holder could act for himself, and gradual disintegration set in as soon as any uncertainty was hinted at. This rapidly spread, until panic took the place of confidence, and the whole combine came to a speedy end. Buyers are consequently acting with extreme caution, and values appear at the moment, in view of the favourable crop outlook, to be gradually but steadily falling. It is almost impossible to quote reliable prices, and a cable message received this week indicates that the market is expected to be still lower. Of course, much depends upon the weather, and by a letter dater July 7 I learn that a sudden and heavy attack of vermin had appeared in Oregon, but it was then anticipated that washing and hot sun would enable growers to conquer the attack; but I hear more recently that the yield will probably be seriously damaged. The same report, however, says that whatever may happen to the Oregon crop, the total yield of the U.S. must be much larger than last year, owing principally to the increased acreage.

Nuremberg.

The generally favourable reports received from the plantations, coupled with the gradual increase of stocks caused by the clearing out of the country holdings, and the absence of demand from consumers, are exercising a depressing effect on values. Bohemian buyers are taking small quantities, but other export trade is very quiet, and for the sake of business holders are now very willing to make concessions. It is estimated that from 1,600 to 1,800 bales remain unsold, and it seems to be certain that this quantity will fully suffice to cover the requirements of brewers until the new supplies are available. In Lower Alsace and Styria heavy hail storms have destroyed the plants to a very large extent, but beyond this there is no unfavourable news concerning the coming crop. Rain is, however, wanted in almost every district, in order that the flowering and fruiting may fully develop; therefore, there are still some uncertain features to reckon with before final results can be certainly estimated.

Belgium.

Public information refers in promising terms to the coming crop, the progress of the white bines in Poperinghe towards flowering being very rapid, and the green bines are also well forward. The market is therefore very quiet, buyers awaiting further developments, and prices are somewhat lower. But I have private letters which are not so optimistic with respect to the new crop, my friends being disposed to anticipate that present outlook will not be fulfilled.

The imports of hops into Belgium during the six months ending June 30 were 14,460 cwts., and the exports 6,460 cwts. The latter figure appears in strong contrast to the returns for the same period last year, when Belgium shipped no less than 34,500 cwts. A notable feature of the returns is seen in the Belgian shipments to England during last June, these were only 77 cwts., whereas in the same month England shipped to Belgium about 470 cwts.

FLY IN SHEEP

Cuff's Fly Oil or Maggot Lotion
Will very quickly destroy MAGGOTS in Sheep and prevent the FLY striking again. It will also cure the SCAB, SHAB, &c., in Sheep.
Price 1s. 8d. and 3s. per Bottle.

Cuff's Fly and Tick Powder
Is a valuable preparation for powdering Sheep and Cattle, to protect them from FLIES and other Insects, also for destroying FLEAS, LICE, &c., in other animals.
Price 1s. and 1s 8d. per Tin.

Prepared by
J. B. CUFF & SONS, Cattle Market,
LONDON, N.
And Sold by Chemists.

SOCIETIES & NOTICES.

THE NATIONAL ASSOCIATION of ENGLISH HOP GROWERS.
(Founded June 1894.)
SECRETARY.—THOMAS IRONMONGER.
CENTRAL OFFICE.—86, HOP EXCHANGE, BOROUGH, LONDON.
GENERAL OBJECTS.
To promote united action among English hop growers as a body for the improvement of the industry.
To promote, support, or oppose such legislative and other measures as may affect the industry.
To collect and publish, for the benefit of members, special statistical and other useful information relating to English and foreign hop-culture.
To arrange for arbitrations in cases of dispute between sellers and buyers of hops, for the avoidance of litigation.
ANNUAL SUBSCRIPTIONS.
Ordinary members, 3d. per acre of hops under cultivation; honorary members, £1 1s.; hop factors, £1 1s.

GREAT YORKSHIRE SHOW,
Anlaby Road, HULL,
WEDNESDAY, THURSDAY, and FRIDAY, AUGUST 9th, 10th, and 11th, 1905.
STOCK, IMPLEMENTS, &c
JUMPING COMPETITIONS.
Military Band.
Admission:
Wed., 9 a.m. to 5 p.m. ... 2/6
Wed., 5 p.m. to 8 p.m. ... 1/-
Thurs., 8 a.m. to 8 p.m.... 1/-
Friday, 8 a.m. to 6 p.m.... 1/-
Season Tickets 10/6 each.
Reserved Seats on Grand Stand, 5/- each.
JOHN MAUGHAN, Secretary.

BATH HORSE SHOW,
SEPTEMBER 6th and 7th,
Nearly £700 in Prizes.
GREAT JUMPING COMPETITIONS.
Entries close August 19th.
Schedules and all particulars to be obtained of
LEWIS C. MUNDY, Secretary,
41, Milsom Street, Bath.

ROYAL JERSEY AGRICULTURAL AND HORTICULTURAL SOCIETY.
President: J. F. GIFFARD, Esq.
AGRICULTURAL AND HORTICULTURAL SHOW at ST. HELIER'S, JERSEY,
AUGUST 22nd and 23rd, 1905
(held in connection with a week's fetes and gala).
JOHN A. PERREE,
Secretary.

TRING SHOW.
THURSDAY, AUG. 10th, 1905.
PRIZES, £1,350.
Milk and Butter Tests, 80 entries.
Jersey Cattle, 100 entries.
A good level entry in all classes received.
SHEEPDOG TRIALS a great feature.
TANDEMS, PAIRS, and JUMPING.
TRING PARK:
The Grounds, &c., open to all visitors.
Catering ensured by Messrs. J. Lyons & Co., London.
Three special trains, Euston and Willesden, and from Northampton and District.
Full programme sent on application to
Mr. F. J. BROWN, Tring.

EAST BERKS HORSE SHOW SOCIETY.
THE NINTH ANNUAL HORSE SHOW
Will be held at
HAWTHORN HILL RACECOURSE,
(Between Maidenhead and Bracknell, Berks.
On THURSDAY, AUGUST 17th, 1905.
Band of the 3rd Batt. Royal Berkshire Regt.
Luncheon and Refreshment Tents.
Entrances to Show Ground, 2s. 6d. before 2 o'clock, 1s. after. Grand Stands, 2s. 6d. and 1s. Carriages, 10s. and 5s.
Judging commences at 9.30 a.m. punctually.
C. H. W. DIXON, Hon. Secretary,
4, Henrietta Street, Covent Garden, London, W.C.

BIRMINGHAM AUTUMNAL SHORTHORN SHOW, and SALE.

SOCIETIES & NOTICES

(continued from front page).

ROYAL SOCIETY FOR THE PREVENTION OF CRUELTY TO ANIMALS, &c.,

105, Jermyn Street, St. James's, London, S.W.

PRIZES FOR IMPROVED VERMIN TRAPS First, £50; Second, £25.

The Committee of the R.S.P.C.A. have much pleasure in renewing their offer of PREMIUMS for IMPROVED VERMIN TRAPS, calculated to supersede the cruel steel-toothed trap at present used in game preserves. The improved trap must be portable, inexpensive, weather-proof, easy of adaptation to the various requirements of trapping, simple in manipulation, effectual, and humane—killing instantly, or capturing without giving pain. The Committee reserve to themselves the right to refuse to award either or both of the above Premiums, in the event of the aforesaid conditions being insufficiently complied with in the opinion of the judges. Specimens must be sent, carriage paid, on or before the 1st day of JANUARY next, addressed to the undersigned, and stamped with a private mark. A similar mark to be sent in a sealed envelope, enclosed in a letter, giving full name and address of the competitor. Drawings will not be accepted.

G. L. DERRIMAN,
Secretary.

AUCTION SALES.

IMPORTANT SALES OF PURE-BRED STOCK.

JOHN THORNTON & CO. will SELL by AUCTION as follows:—

FRIDAY NEXT, AUGUST 11.—Mr. A. T. Miles' Flock of SOUTHDOWN SHEEP, and about 50 LARGE WHITE YORKSHIRE PIGS, at Buckwell, Wye, Kent.

FRIDAY, AUGUST 18.—Sir N. W. Throckmorton's SOUTHDOWN Flock, at Buckland, Faringdon.

FRIDAY, SEPTEMBER 1.—About 60 SHORT-HORNS, bred by the Rt. Hon. Lord Brougham and Vaux, at Brougham, Penrith.

TUESDAY, SEPTEMBER 5.—About 50 SHORT-HORNS, belonging to Henry Williams, Esq., at Moor Park, Harrogate, Yorkshire.

THURSDAY, SEPTEMBER 7.—Third and final portion (about 120 head) of the Whitlingham RED POLLED herd, at Crown Point Park, Trowse, Norwich.

Catalogues may be had of JOHN THORNTON AND CO., 7, Princes Street, Hanover Square, London, W.

CHICHESTER, SUSSEX.
IMPORTANT GREAT ANNUAL PRIZE SHOW AND SALE OF PURE-BRED SOUTHDOWN SHEEP.
WEDNESDAY, AUGUST 9th next.

For prime quality of both mutton and wool, hardiness of constitution, and early maturity, Southdowns are unsurpassed. First class results obtained when crossed with other breeds.

MESSRS. STRIDE & SON beg to announce that present entries for this important great annual fixture, which will be held in the market on the above date, consist of

410 SOUTHDOWN SHEARLING RAMS AND RAM LAMBS,

comprising consignments from many of the leading breeders, including several prize winners at the leading shows, and forming altogether the largest and best selection of Southdown Rams and Ram Lambs to be offered anywhere this season.

5,500 SOUTHDOWN EWES,

including a grand show of shearlings, and ewes of all flock ages, from a large number of well-known registered flocks.

Commissions carefully executed.

Catalogues on application to the Auctioneers, 63, East Street Chichester.

SATURDAY, AUGUST 12TH, 1905.

BRITFORD FAIR,
One Mile from Salisbury.

THE CHILMARK FLOCK.

MESSRS. WATERS and RAWLENCE are instructed by Mr. JAMES FLOWER to LET and SELL by AUCTION, in the above Fair, on SATURDAY, AUGUST 12th, 1905, at 10.30 o'clock,

100 RAM LAMBS,
2 SHEARLING RAMS, and
100 GRAND BREEDING EWES

from his renowned Registered HAMPSHIRE DOWN FLOCK.

For many years Mr. Flower has enjoyed an important and almost unparalleled prize-winning career in all the Showyards of England, and this season the Chilmark Flock has fully maintained that high position which it has so deservedly won in the Hampshire Down world. The Shearling Rams, Pens of Shearling Ewes, and Pen of Ram Lambs which have gained such distinction have been pronounced most perfect as rams, with that beauty of feature, depth of flesh, and symmetrical form which have made them such noted prize winners; all these essential points will be found in the Ram Lambs and Ewes to be offered at Britford, when the Sale should again prove a record one.

The outgoings are very low. At present let to an excellent tenant at a rent of £350 per annum.—NICHOLAS DENYER & Co. will SELL, the above by AUCTION shortly, at Bury St. Edmunds. Meanwhile particulars can be had of the Auctioneers NICHOLAS DENYER & Co., 43, Pall Mall, London, S.W.

BANKS, INSURANCES.

LONDON AND COUNTY BANKING COMPANY, LIMITED.

Registered under "The Companies Acts." Established in 1836.

Capital £8,000,000, in 100,000 Shares of £80 each.

REPORT ADOPTED AT THE HALF-YEARLY ORDINARY GENERAL MEETING HELD ON THE 3RD AUGUST, 1905.

The Hon. GEORGE JOACHIM GOSCHEN, M.P., in the Chair.

The Directors, in submitting to the Shareholders the Balance-sheet for the half-year ending 30th June last, have to report that, after paying interest to customers and all charges, making provision for bad and doubtful debts, and allowing £23,256 2s. 11d. for rebate on bills not due, the net profits amount to £264,065 17s. 1d. From this sum has been deducted £50,000 carried to Reserve Fund (raising it to £1,400,000), leaving £214,065 17s. 1d., which, with £66,391 1s. 3d. balance brought forward from last account, leaves available the sum of £280,456 18s. 4d.

The Directors have declared a Dividend for the half-year of 10 per cent., which will require £200,000, leaving the sum of £80,456 18s. 4d. to be carried to the Profit and Loss New Account.

The Directors have appointed Charles John Hegan, Esq., to a seat on the Board, in the place of William Anastasius Jones, Esq., whose decease was referred to at the last General Meeting.

The Dividend, £2 per Share, free of Income Tax, will be payable at the Head Office, or at any of the Branches, on or after Monday, 14th August.

(Signed) J. ANNAN BRYCE, GEORGE J. GOSCHEN, W. HOWARD. } Audit Committee of Directors.

G. J. RODOLPH, Head Office Manager.
RICHD. LEMON, Country Manager.
G. K. SMITH, Chief Accountant.

London and County Banking Company, Limited,
17th July, 1905.

In accordance with the provisions of the Companies Act, 1900, we certify that all our requirements as Auditors have been complied with, and we report that we have examined the Balance-sheet and Profit and Loss Account, dated the 30th June, 1905, have verified the Cash-Balance at the Bank of England, the Stocks there registered, and the other investments of the Bank. We have also examined the several Books and Vouchers and certified Returns showing the Cash-Balances, Bills and other Amounts set forth, the whole of which are correctly stated; and in our opinion the said Balance-sheet and Profit and Loss Account are properly drawn up, so as to exhibit a true and correct view of the Company's affairs as shown by the books of the Company.

(Signed) GEO. H. FABER, HY. GRANT, THOS. HORWOOD, } Auditors.

THE FOOD COMMISSION—THE GOVERNMENT AND BRITISH WHEAT.

On Wednesday last, the long-expected report of the Food Commission was presented to Parliament. The labours which August 2, 1905, ended, were commenced more than two years ago, but the agitation out of which the Commission itself sprang began—at least as early as 1887. The need of a national granary first occurred, in modern times, to the late Captain Bedford Pim, M.P., a versatile and able man, who failed to exert the influence to which he was entitled owing to a love for exaggerated statement.

To-day, when a very important Commission has presented its report, the worthy Captain may be said to be justified, for while a strong minority recommend "immediate practical precautions," a majority, headed by the Prince of Wales, "do not discourage an experiment in the direction of national grain storage." It is true that the majority conclude that "there is no serious cause for public apprehension," but this deals with matters as they stand, and not with matters as they may very quickly come to be. It is a pity that the Commission is not unanimous, but the minority report, signed by the Duke of Sutherland, Mr. Chaplin, Mr. Wharton, Sir. H. Seton-Karr, and Mr. Conynghame, is simply the voice of the majority uttered in a somewhat higher key.

The three points which the Commission may be said to have seen made are: (i) The ability of our Navy to convey all necessary grain imports; (ii.) the very crippling effect that such a duty would have on the same Navy as an offensive weapon against the foe; and (iii.) the ease with which, if grain storage were decided upon, the grain itself could be procured. The Commission speaks with a less certain voice on the cost of the storage exeriment, on the keeping of the grain, and on the relative urgency of the menace. We cannot, of course, expect all things even from the most important Commissions; but the naval experts might have told us more clearly how many battleships and cruisers would be needed to guard our grain against a first-class Power, and the owners of elevators and warehouses might have helped matters by bonâ-fide tenders for actual storage. In London it costs about fifteenpence a month to store 500 lb. of wheat, while for a whole year storage in a warehouse not actually in London five shillings a year is spoken of as ample. A clear understanding of the real cost of the national storage scheme has yet to be arrived at.

Meanwhile, there is one form of national storage which is admirably practical, and needs no elevators or warehouses. The Government can at any time like the present, when the home harvest is in progress, buy the newly-cut wheat of the farmers at a moderate fixed price, say, 30s. per quarter for fair average quality, the farmer to hold it in stack or barn to the order of the Government. If held for six months, 32s. might be paid for it, as the seasoning of holding over winter would add at least a florin to its market value, and this extra price would recoup the farmer for any loss on the bulk of fair average quality grain itself. The Government, of course, could not be expected to take anything below milling quality; but the chicken wheat would equally, of course, be no very great loss to the farmer, seeing that every year the great value of wheat as egg-producing food for poultry becomes manifest. If the Government held the bulk of the home crop, say six million quarters, the importers would be left free to buy and make their own warehouse arrangements. We fancy that they would make large use of the great fleet of unfreighted sailing ships, which is the result of the unusual call for speed and consequent preponderance of steamers. Grain stored in sailing ships pays no rates beyond moorings, and is ready to be towed round to any port where the market is good. The Government, we take it, would put their old wheat on sale about midsummer, when the Board of Agriculture would not only know the acreage of the new crop, but also its prospects. Thus, in a wet and poor season, when, say, only one million quarters were promised from a small acreage, it would be inadvisable to sell out more than four millions, while at a midsummer like that of this year six millions could safely be dispensed with, seeing that at least that quantity of new wheat will clearly be available. If the Government dates of sale and re-sale were fixed by Statute, the trade would be rather steadied than upset by such transactions.

The above considerations are submitted rather to open up discussion than to lay down any fixed rule of policy; this, however, may be firmly indicated, that if the Government takes to buying wheat, the first person to have the right of selling to the Government must be the British farmer.

Our Food Supply in the Time of War.

The Prince of Wales and all the other members of the Royal Commission on Food Supply in Time of War have signed the report which that body has now presented to Parliament. The Commissioners have been engaged nearly two and a half years in their onerous work, having been appointed in April, 1903. Although laid in dummy upon the Table of the House of Commons, the report is still in the hands of the printers, by whom it is expected to be issued next week.

It is understood that the main report, drafted by Lord Balfour of Burleigh, and in which all the Commissioners concur, is, on the whole, reassuring. Allusion is made to the sense of comparative safety derivable from the fact that the whole coasts of these islands could not be blockaded by any enemy, and that the ordinary laws of supply and demand might be trusted under almost every conceivable state of things to ensure us ample importation of food stuffs. It is said that the Commissioners do not discourage an experiment in the direction of storage of grain for times of emergency, but on the whole they conclude that there is no serious cause for public apprehension or uneasiness upon the important subject referred to them.

Whilst all the Commissioners sign the main report, most of them have added separate comments or reservations. One of the most important of these, which may be regarded as almost amounting to a minority report, is signed by the Duke of Sutherland, the Right Hon. H. Chaplin, the Right Hon. J. L. Wharton, Sir H. Seton-Karr, M.P., and Mr. H. S. Conynghame, C.B. There is reason to believe that this reservation takes a more alarmist view of the position, and urges immediate practical precautions. It is pointed out by this minority that at certain seasons of the year there is little more than five and a half weeks' reserve of grain supplies stored in this country, and that, in the event of our becoming engaged in war at such a period, the available supplies of food would soon become exhausted, and famine prices would prevail. It is, therefore, suggested that we should adopt a national system of grain storage, which the signatories in question believe could be provided for at a comparatively moderate cost to the Exchequer.

The Right Hon. Sir Bernhard Samuelson, Bart., P.C., F.R.S., for many years M.P. for Banbury, of 5a, Princes Gate, and Bloxore Grange, Oxford, left estate of the gross value of £755,793, of which £697,225 0s. 9d. is net personality.

Seasonable Topics.

The tropical weather experienced during the past month has brought on the corn amazingly, and everywhere both ear and straw have assumed that hue of rich golden brown which tells of harvest. Indeed, there is certain overlapping in some places, and while we still hear the rattle of the mower on the one hand, the sharp click-click of the reaper and binder is getting to be a familiar sound on the other. A resort to figures, of course, reveals the fact that Great Britain is no longer a corn-growing country in the old sense of the word, and the millions of its population depend more for their grain on the virgin soils of the Far West. But, in spite of this, grand fields of corn prove the fact that the soil of the Old Country has not lost its capacity for growing cereals, neither has the hand of the British farmer lost its cunning in this direction. He has let corn go because opposing forces were too great for him and the crop did not pay. In short, he could not afford to continue playing a losing game, but the interest in British corn-growing is by no means dead. In fact, it seems to be assuming more vigorous life than it has displayed of late, and were we gifted with powers of looking into the future we might see many of the grass fields, which show by the way they are ridged and furrowed, that they were once under the plough, rippling again, a sea of golden corn.

The Corn Harvest.

* * *

A chat with any old countrywoman of the labouring class reveals the fact that women do not take anything like the same share in farm work as they used to do, and, what is more, if the statements of the grandmothers in these days be true, the lives of labourers' wives are light in comparison to the old days. Machinery has, of course, done away with female labour to some extent, but there is neither the necessity nor the inclination on the part of women to go to work in the fields as there was in the youthful days of our grandmothers. In the first place the wages of the men have increased, while the cost of living has been reduced, and therefore there is less need for wives and mothers to be actual earners. Where would have been the chances of bread half a century ago without the gleanings of the wives and children; and if they had not earned a few shillings a week in addition it is hard to know how the family could have lived at all? The style of farming in the district has more to do with the demand for female labour than anything, and in Kent women are probably more in request than anywhere. From the time the first growths need tying till picking is over there is employment for women in the hop gardens, and for the particular kind of work they do they are much better adapted than men. Women, too, are particularly in demand for fruit-picking, and their operations are not wholly confined to bush and ground fruit, as the women scale the long ladders in the cherry orchards with quite as much confidence and agility as the men. Indeed, considering the demand in the hop gardens and fruit plantations for female and juvenile labour, the wage-earning facilities of the farm-labouring class are far greater in Kent than in many other agricultural counties.

Female Labour on Farms.

* * *

On some estates, unfortunately, the preservation of game for sporting purposes seems to be the end and aim of everything, and the interests of the farmers are sacrificed in order that the landlord and his friends can secure record bags on shooting days. It is not surprising if the farmers in such cases chafe, because their position is not unlike that of the man who has some choice bred fowls killed by foxes and is compensated by the hunt at the same rate as if they were mongrel farmyard poultry. Happily there are many estates on which the landlords get abundance of shooting, and this without the tenants suffering material loss through damage done by game, and these are the instances in which the farmers do all they can to provide sport for the owner. Gamekeepers can do much to maintain happy relations between landlords and tenants in regard to game, and where these individuals display reasonable tact there is rarely any friction. In fact, it is wise of the keeper, on behalf of his master, to seek the co-operation of tenant farmers in the preservation of game, because the latter can be of material assistance in this matter. Being continually about his land the farmer often knows of the presence of pheasants' nests and broods of young partridges that are overlooked by the keeper. If encouraged to do so, most farmers will take the trouble to look after the birds on their holdings, and it is a source of pride to many tenants when the landlord gets a good bag on their farms. We delight in seeing these friendly relations between landlords and tenants, because sport and game preservation are beneficial to agriculture up to a certain point, and it is when the interests of the latter are sacrificed for the sake of the former that the wrong comes in.

The Care of Game.

* * *

Of all the public holidays in the year, that which falls on the first Monday in August is doubtless the most popular, because it comes at the height of the summer, when outdoor pleasures may be enjoyed, and a brief respite be taken from the work which has been made oppressive by the tropical weather experienced of late. Of course, Bank Holidays do not affect agricultural workers to the same extent as other people, but the spirit of holiday making on the first Monday in August makes itself felt even in rural districts. We see men who cannot afford the whole day knocking off a little earlier in the afternoon in order to take part in some local amusement, and some of those to whom Bank Holiday makes no difference seem to go about their duties in a half-hearted manner which suggests that they would rather be elsewhere. We know several local but very go-ahead agricultural societies that make a rule of holding their shows on August Bank Holiday, and they gain by doing it, because on that day they obtain the nimble shilling or sixpence of the working men, who would probably be absent if the show were held on any other day. Bank Holiday, again, is the day of village flower shows, and probably more cottage-grown flowers, fruit, and vegetables are displayed in competition on the first Monday in August than any other day in the year. We should like to say a word here in support of these institutions, because we consider that they have a beneficial effect on agriculture. In other words, we want to encourage cottage gardening through the medium of horticultural societies, shows, and other means, because our experience teaches us that the labouring men who take keen interest in the fruit, flowers, and vegetables in their gardens and allotments are invariably good workmen, valuable servants to their employers, and respected members of the local community. For the simple reason that village flower shows encourage cottage gardening, and men who have good gardens which they take a pride in show no restless anxiety to leave their cottages and villages, we hope that climatic conditions on Bank Holiday will contribute to the success of local flower shows.

Bank Holiday.

* * *

It may be observed that there is a growing tendency on the part of townspeople to spend their holidays quietly in the country in preference to long touring journeys and overcrowded seaside resorts. This tendency can be quite understood, because holidays are supposed to be taken for the purpose of change and rest, and what rest there can be when all the day and the greater part of the night are spent in exciting amusement we fail to see. What better place can a jaded city man have in order to obtain that repose of mind and body which he needs than a country farmhouse, which is far removed from busy scenes of turmoil and commercial strife? Here he can do as he likes, dress how he likes, go where he likes, and be sure of getting good, wholesome food to eat. In addition to this, he can often get a little quiet sport, and with mind severed, for the time being, from business responsibilities, it is a wonder if he does not go back to town in every respect a better man. We would urge, however, that this tendency for country holiday-making be encouraged by those who have the necessary accommodation to offer. There are hundreds of big, roomy farmhouses in the country in which apartments could be let for a few weeks in the summer without inconveniencing the family household to any extent, and there are plenty of townspeople who would be glad of such accommodation if they knew where they could get it on reasonable terms. Be it far from us to suggest that the farmer's wife should develop any of the grabbing propensities of the average seaside lodging house keeper, but there are scores of farmers who are not so wealthy that they can afford to discard opportunities of earning an honest shilling, and the letting of apartments during the holiday season certainly offers a chance. Indeed, we know a few farmers' wives, who are no longer tied hard and fast to the dairy on account of all the milk going to London, that put a nice little bit in their pockets by taking holiday boarders. The latter enjoy the change and the rest, and the free country life, and the former find the money useful; so both are satisfied.

Holidays at Farmhouses.

* * *

With the disaster of Park Royal still fresh in the mind, and particulars coming regularly to hand of provincial shows in which the stock is above the average, implement yard up to date, amusements abundant, prizes liberal, and yet a falling off in the attendance, we are inclined to ask whether these gatherings are not getting so common and numerous that the ordinary visitor whose presence contributes to make up the necessary crowd is not growing tired of them. As a matter of fact, you must be an agriculturist to appreciate more than one agricultural show, and this being the case, societies must look to the farming community for support, rather than to the man in the street. But even the enthusiast does not want to go to too many agricultural shows in the course of a season, and it is possible that if two or three societies were to join hands and have one large show, instead of several medium-sized ones, they would all benefit. We do not think that exhibitors would mind so much, particularly the stock breeders, who seem to rely more on foreign markets than showyard triumphs. In fact, foreign cattle-raisers realise that pure-bred British stock is indispensable to them, and animals raised by noted breeders do not need to be boomed at exhibitions. We notice, by the way, that the Gloucester and Wilts Agricultural Societies have respectively decided to withhold their shows next year and to unite in making the Bath and West Show at Swindon a big affair. We cannot help thinking that the decision of both the county societies is a wise one, and in view of the heavy expenses connected with the holding of agricultural shows, and the increasing want of interest on the part of the visiting public, it might be well if some other county societies were to consider the question of amalgamation A straw indicates which way the wind blows, and it is useless to persist in playing a losing game till bankruptcy stares one in the face. Indeed, it seems as if fewer shows at greater intervals must be the order, at any rate for the next few years.

Should Agricultural Societies Combine?

Successful Appeal Against Assessments by the Duke of Grafton.

At the Ixworth Sessions, on Monday, an appeal was entered by the Duke of Grafton against the Assessment Committee of Thetford Union. It transpired that the appeal was in respect of those portions of the Duke's estate which are situated in the parishes of Barnham, Fakenham, Honington, and Sapiston. The magistrates decided to hear the case as regards Barnham first.

It was stated that 4,815 acres were open land, and 318 woodland. The assessment as to the 4,815 acres was disputed. The Duke's assessment as to the parish of Barnham, it was stated, which at one time was £243, had been increased to £729, practically from 1s. an acre to 3s. per acre, which was considered "grossly unfair." His Grace thought the valuation in respect of his hereditaments was unfair and incorrect, the assessment being too great, as the hereditaments were assessed at a higher amount than the net annual value thereof, the rateable value being too high.

Mr. Herbert Trustam Eve, of Bedford, rating surveyor, gave evidence showing that, as to the parish of Barnham, he valued the sheep walks (1,333a. 0r. 24p.) at 9d. per acre, thus amounting to £50; the grass lands (545a. 3r. 3p.) at 1s. per acre, £27 6s.; the brook plantings (79a. 1r. 20p.) at 2s. 6d. per acre, £10. As to the arable land, which included 227a. uncultivated, at 1s. per acre, the amount was £11 7s.; the cultivated arable land (2,629a. 3r. 15p.), at 1s. 6d., £197 5s. He thus reckoned that, for the total of 4,815 0r. 29p., the rating value was £295 18s.

Mr. R. Menzies, of 17, Victoria Street, S.W., stated that he was well acquainted with sporting rights in Norfolk and Suffolk, and knew the light land at Barnham. He agreed with Mr. Eve as to the valuation.

Mr. Frewer, of West Rudham, near King's Lynn, gave similar evidence.

Ultimately the magistrates reduced the assessable value to £420, and ordered costs to follow.

The hearing of the Duke's appeal as to the parishes of Sapiston, Fakenham, and Honington was adjourned until October.

Agricultural Politics.

BY A LOBBYIST.

I pray that the new Poor Law Commissioners will not disregard the necessities of the rural poor. As you listen to the wild tirades and rumbustious prophecies and declamatory assurances of the gentlemen who live out of town-politics, you would imagine that the divine assurance that "The poor ye shall always have with you," meant that "The poor are only deserving of sympathy, and of legislative sympathy, when they are the street-corner loafers of the towns and cities." Providence, according to these gentlemen, meant, in its prophetic declaration, only those ne'er-do-wells who prefer to kick their heels to the heavens in London's parks or Manchester's open spaces, and who in the intervals of doing nothing yawningly denounce the conditions of society which refuse to offer them the work they loathe. The agitation which has led to the promise of the appointment of this Commission was inspired, manœuvred, and machined by men who only care for the agricultural labourers or the derelicts of rural society so long as they can be made pawns in the game of a fellow at the docks who loves work so much that he would lie down by the side of it, or a loafer in the parks who prefers to sleep while work is being done by somebody else, or a gentleman who only dislikes unemployed processions because they give him something to do and require him to exert himself. What are the men interested in rural areas doing? Have they already seen to it, or are they already seeing to it, that the evidence shall not only concern the wastreldom of the city, but shall concern the whitened old fellows whose sin has been agricultural depression and whose only frailty has been to have a cheap and palatable glass of beer in the intervals of a strenuous life? Mr. Balfour is said to be not too friendly to agriculture. He has to obey the prayers placed in the lion's mouth, the hopes offered at the Temple of Apollo! What prayers and hopes have yet come from agriculture?

• • •

A correspondent has written to me to ask my view of the personnel of the Departmental Committee to consider Mr. Rider Haggard's proposal in reference to the establishment of farm colonies. Frankly, I cannot wax enthusiastic over it, a reason why I refused even to reflect upon it last week. First of all, the restrictive character of its operation is an anomaly, and it reveals the fact, despite official phraseology, that the intention of the Government has no sympathy with the anxiety to establish training rural colonies in England. So far as we are concerned, the purpose is not even to inflict a vicarious advantage on agriculture. Its aim is to establish farm colonies in Canada. And the members of the Committee are more or less pedants and officials.

• • •

'Tis a pity that so great a work as this of Mr. Rider Haggard's should be doomed to so poor a result, but if I can read aught of omens, the report of this Departmental Committee is fated to fall on sterile ground. The pedantic element will be supreme; the practical element will be hesitant; the official element will be—well, very official. A very poor prospect, very poor. My condolences to Mr. Rider Haggard. 'Tis an impoverished return for his excellent work. Will Mr. Sidney Webb draft the report? He has skilled in the report, and the reports fill a usual place in the national archives. Will they have any other value?

• • •

I have been reducing adipose tissue for a week—aye, even been away from the House of Commons—in that calm and somnolent area of romance, Hampshire. Report says—the report, that is, of the politicians—that the rural labourers are stung into revolt by the indignant scentiment inspired by the suggested tax upon articles of food. It may be so, but not even an echo of the turmoil reached me, not even a breath. "I sought the brae and bracken through and through, the thorny thicket and the meadow too"; but to tell truth no reverberating rumble of a popular discontent reached me. I might have been in Bœotia, and all around the dull monotony of apathy and somnolence. Mr. Chamberlain may take heart of grace, so far as this fact is concerned. This experience has at least led me to the conviction that if Liberal victories have been won in rural areas—and most assuredly they have been won—it has been because of other issues beside the economic.

• • •

One old labourer did say, "Well, if they be gayng to put the price on bread so that we may have a bit more wages, I'd like to have the bit more wages fust, like, to be safe." This, however, was the only evidence of the great economic issue having seriously infected the Hampshire mind. But, most excellent messieurs of the Conservative headquarters, doesn't this suggest to you the wisdom of at once shaping your faith in the direction of rural sympathy? Do for the town unemployed what thou wouldst, but think of the grievances of the rural areas. As a mere speculative investment it would pay. You have neglected those areas, and, short-sighted in your self-opinion, you have given the Radicals a good chance. Let us be frank and ask ourselves the question, Would they not be fools if they didn't accept it?

• • •

"He did not think that the British farmer could throw any stones nowadays at the landlord because the rents are too high." A sentiment from Lord Wenlock's recent speech at the Malton show. I will go farther, and declare that it would be impossible to find in any section of the British community any other body who would so willingly relinquish a serious part of their income in order to benefit and relieve the anxieties of men on whose regularity of payment their income depends. Let us for a moment contrast the attitude of the landlords of this community with the attitude, say, of the anti-landlords—let us take, for instance, the attitude of the paid professionals among the urban working-men advocates. Do you ever hear of the latter summoning the men together who pay them their incomes and saying, "My dear fellows, I know you cannot meet your responsibilities. Let me ask you to pay me a third less salary than ever you have done before. Believe me, that when you have 'docked' my wages in this fashion, I shall ever esteem, honour, and love you." If we did meet a romantic fellow of this texture we should love him with an affection ever enduring. But yet, my Lord Wenlock—"but yet," as Shakespeare said, "is a monstrous malefactor"—there is the fact that all landlords are not cast in the same divine mould. There be landlords, and there be landlords. The latter, who exact the uttermost farthing, are in the minority; and the question arises, What shall we do with these? Good sirs, we can do naught. I can hear Lord Wenlock asking me what I would suggest to adjust the situation? I answer that I can suggest nothing; but I do say that the differentiation of treatment in this matter constitutes a grave and almost a potent question. Why not, then, introduce land courts? The fact is that neither landlords nor farmers are anxious for a disciplinised system of revising rents. It is out of harmony with the English rural sentiment; and this fact is of more significance than all the perfected sentiments of those Olympian gentlemen who know no more about land than they do about heaven.

• • •

I do not know what provision the State makes for its older rural postmen. This week, whilst luxuriating in the environs of the New Forest—I was at a quaint little place called Chandler's Ford, and was happy after having enjoyed a most succulent chop at that comfortable hostelry, The Hut Hotel—when I met, trudging sturdily along the road, the postman. His immediate destination was, I think, Eastleigh. A silvered haired old fellow, bearded not quite like the pard, himself still alert, and possessing that agility which comes from lithe sinew and that contented mind which comes from good health. Twenty-five years had he been in the State's service, twenty-five years with only a day or so for the luxury of illness. How many miles a day had he trodden? Beshrew me, but I think he told me not less than eighteen or twenty. "I be paid, ye see, for twelve and a half miles; but, ye see, I 'a' to go up and give in the letters. Why, everybody got a bit a-garden, and sometimes 'tis a bit more. I must go up here—good day." And the old fellow left me, speaking in that fine vernacular which, with the burr, is the very reflection of the strength of the Hampshire character, to follow an avenue of fifty yards, may be a hundred, to deliver a letter.

• • •

Redolent of the clay he came from was this old Hampshire postman! Who knows but that it was his ancestor who sang—was I not in the district of the novelist's heroes?—Conan Doyle's melody, "The Song of the Bow"? "I been here always," had said he, "and my forbears afore me." Who knows but that his forbears were the men of Crecy, of Poictiers, of Agincourt, the Hampshire clothshaftsmen who made England great? And what is the State going to do for him by-and-bye, he who is doing that State an honourable service in the interest of civilisation and of comfort? Honest, silvered, bent old man, your future will not be made as fragrant as it might be by a State proud of your fidelity! "As excellent an official as ever post-office had!" This was the verdict of mine host at the Hut when I returned another day to enjoy another well-cooked chop. A cynical world, my masters—a cynical world!

PUBLICATIONS RECEIVED.

Well in advance of the season—and it is always best to order early—Messrs. Little and Ballantyne, the King's seedsmen, Carlisle, have issued their bulb catalogue for 1905. It contains nothing strikingly new, but gives details of some reliable bulbs, especially recommended for early flowering, and other varieties of plants.

A practical farmer needs not to be told the advantage of book-keeping, but there are many agriculturists who are unacquainted with this useful business method, and to them "Principles and Practice of Booking for the Farm, Garden, Dairy, and Estate," by J. O. Peet, B.Sc., and H. Taylor, will prove of immense value, whilst it should prove of the utmost service to students attending courses of instruction in agriculture, horticulture, etc. It is published at a moderate price by Mr. H. Taylor, Broadway Buildings, Reading.

Lord Hawke, the captain of the Yorkshire Eleven, has written an article on cricket in the "Unwritten Laws of Sport" series for the August number of the "Badminton Magazine of Sports and Pastimes." There is no greater authority on cricket living than Lord Hawke, and his remarks on the etiquette of the game are well worth the attention of every cricketer, who will also be interested by a paper from L. C. Braund, the famous all-round Somerset player, on "The Importance of Fielding." In the "Royal Homes of Sport" series "The Schorfheide" is described by permission of the German Emperor, who has also allowed several photographs from his private collection to be reproduced in the article. "The Cost of Shooting," by Percy Stephens is a particularly careful paper on the economy of the sport, and grouse shooting in Scotland and in Norway is contrasted by Nicholas Everitt. The series of photographs of the Devon and Somerset Stag Hounds give a good idea of a day with this well-known pack. The editor writes on "The First Half of the Racing Season," and there is a continuation of the discussion on "A New Seat for Race Riding," bridge, etc., and a further instalment of the "Strange Stories of Sport."

At Blackenbrae Farm, Kenmure, Bishopbriggs, near Glasgow, on Tuesday, three stacks of hay became ignited, and damage was done to the extent of £150.

Drought in the North Riding of Yorkshire.

SIR,—The prospects this season are the worst in this immediate district that I can remember.

The hay crop was all well got, but the quantity about one-half the usual one. Turnips are very scarce—indeed, many farmers have ploughed them out. Calving cows are selling well, but young stock can hardly be cashed.

There is at present no fogg, but should rain come this should be remedied. Many of the fields, viewed from a distance, resemble arable land rather than grass. I am afraid the back-end promises very badly. This part has, I think, had the least rain of any. I have heard and seen wet within thirty miles of this part, but none has come here. Many springs are dry, and cattle have to be taken in many places some distance to water. T. F. K.

August 1, 1905.

Prospects in the Westmorland Lake District.

SIR,—The hay crop here on the low lands is good, but I hear of bad crops in the hilly lands owing to the dry May and June.

Our turnips here are also good, but in Cumberland and parts of Westmorland they are very deficient; here we have had just enough rain to keep them going, though the first sowing had to be resown, as the fly took them. Potatoes are being bothered by the rooks a good deal; I suppose this also is because of dry weather.

The corn is fairly promising, straw not very long, of course.

The lamb crop has been a fairly good one, and sheep are doing well. Milking cows are cheap, as they have been now since last autumn. The mutton trade is good.

The wool trade is quiet at present, and prices offered have dropped slightly during the last fortnight, but farmers are holding out, expecting a firmer tone again. B. F.

August 1, 1904.

Harvesting in Herefordshire.

SIR,—The wheat is healthy, but many fields will cut up very light. I think it will not be more if an average crop. Barley is fully an average crop, and unless we get bad weather the quality will be very good.

Oats will not be an average. Winter oats very heavy, but much laid. Spring oats are the worst crop we have. Beans are very good—considerably over an average.

Peas are a fair crop, but not many grown. Not many potatoes grown except for our own consumption; not a good crop.

The hops everywhere look very well, and so far are generally free from disease.

Roots vary very much, but on the whole are not an average.

The hay crop was generally a light one, and grass is short, but the pastures are not burnt up much as yet, but want rain badly.

The apple crop is a poor one, about one-third crop. Beef and mutton has been selling badly the last two or three weeks, partly, no doubt, owing to the hot weather.

Harvest has begun generally. D. E.

August 1, 1905.

Want of Water in Westmeath.

SIR, Up to a few days ago the season has been marked by great heat and drought, such as has not been for at least eighteen years.

In consequence, many districts are suffering from want of water, supplies, never in living memory having failed, being now quite dry.

The hay harvest is well advanced, quite three-quarters of this crop being saved, though both old and new meadows were much below average.

Pastures are in many parts very dried up and burnt, though cattle spared them in the hot days, being unable to venture out of shelter until late in the evening, and where not sheltered were exhausted with running to escape the swarms of flies. It is a pity there is not some reliable and lasting smear or dip the application of which would ensure the cattle a little freedom from the attacks of these pests.

The harvest will be in full swing by the middle of next month. The oat crop looks well, though the straw, especially on light land, is very short.

Wheat, though early, looks very well.

Potatoes promise to be a record crop, and have been selling at excellent prices.

Turnips and mangels, where not sown before the late frosts, are doing very well. Many farmers, tempted by the fine weather, sowed too early, with the result that second and even third sowings were frequent.

Beef continues to be at a very bad price, and with the high prices of stores last spring, the profits to the feeder will be very small.

July 31, 1905. R. R.

Sussex.

Sir,—The hay crop is generally a good one, and all well harvested. Wheat is the best crop, heavy in most places. Corn, where early sown, is also a good crop, and barley; but where late planted it is short and, and this hot sun has forced it to ripen too quickly. The corn and barley will be light per bushel. Very little of the late-planted oats will make over 37 lb. the bushels. Mangels look well where early planted, backward where late sown.

I have not seen a good field of swedes anywhere, the land being far too dry. They do not grow after being singled; the hot sun shrivels them up. Pastures are also getting bare.

Potatoes are good where planted early, but there are not many planted in the fields in this district.

JOHN CAMPBELL.

August 2.

Hants.

Sir,—The best crop of the year is wheat. I have not seen it looking better for many years. Barley looks fairly well. Oats put in early are good, but those put in late are very short in straw and uneven.
